ERP No. D-NOA-A91058-00 Rating EC2, Atlantic Ocean Sharks Fishery Management Plan (FMP), Implementation, Possible NPDES, COE and Coast Guard Permits, Exclusive Economic Zone (EEZ) the Gulf of Mexico, Atlantic Ocean and the Caribbean Sea.

Summary

EPA has concerns on (1) the shark finning process, (2) data collection process, (3) foreign fleet impacts, and (4) small coastal shark exploitation. EPA recommended clarity of certain aspects and the provision of additional information.

ERP No. D-SFW-K90026-CA Rating EC2, Tijuana Estuary Tidal Restoration Project, Implementation, Tijuana River National Estuarine Research Reserve, section 10 and 404 Permits and Special Use Permit, San Diego County, CA.

Summary

EPA expressed environmental concerns regarding the discharge of dredged materials and potential impacts to water quality, wetlands and endangered species. EPA requested that additional documentation be presented concerning the results of a sediment analysis and the selected method of disposal, and that potential impacts to threatened and endangered species be assessed before moving ahead with the project.

ERP No. DA-NPS-K91029-CA Rating EC2, Yosemite National Park, General Management Plan (GMP), Implementation, Concession Services Plan (CSP), Tuolumne, Mariposa and Madera Counties, CA.

Summary

EPA expressed environmental concerns regarding potential project impacts to air quality and water quality, and urged the National Park Service to implement various pollution prevention measures such as energy and water conservation and source reduction of hazardous materials. EPA stated that several actions affecting Yosemite should have been assessed in the EIS, including proposed Yosemite housing and changes to the park's transportation system as well as the concession services plan.

Other

ERP No. RS-IBM-A99190-00 40 CFR-1500-1508—DOI Manual 516 DM 6, Appendix 6 Managing the NEPA Process for the Bureau of Mines, Revised Proposed Rulemaking (57 FR 8436).

Summary

EPA recommended that the proposed revisions reference relevant sections of the CEQ regulations, the DOI manual, and Bureau NEPA guidelines to reflect consistency. EPA also recommended adding a section on environmental assessments.

Dated: March 10, 1992.

Richard E. Sanderson,

Director, Office of Federal Activities.

FEDERAL COMMUNICATIONS COMMISSION

Applications for Consolidated Hearing

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant, city and state	File No.	MM Docket No.
A. Central Florida Educational Foundation, Inc.; Union Park, FL	BPED-881207MA	92-33
B. Bible Broadcasting Network, Inc.; Conway, FL	BPED-890412MJ	
C. Palm Bay Public Radio, Inc.; Mims, FL	BPED-891127MB	
D. Southwest Florida Community Radio, Inc.; Conway, FL	BPED-891127MC	
E. Mims Community Radio, Inc.; Oak Hill, FL	BPED-891127MD	
F. Hispanic Broadcast System, Inc.; Lake Mary, FL	BPED-891128ME	

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue Heading and Applicants

1. Environmental Impact, A,B,C,D,E,F
2. 307(b)-Noncommercial Educational, A,B,C,D,E,F
3. Contingent Comparative—Noncommercial Educational FM, A,B,C,D,E,F
4. Ultimate, A,B,C,D,E,F

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text may also be purchased from the Commission's duplicating contractor, Downtown Copy Center, room 246, 1919 M Street NW., Washington, DC 20554 (telephone (202)-659-8657).

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

SUMMARY: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter

35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget a request for OMB review of the information collection system described below.

Type of Review: Extension of the expiration date of a currently approved collection without any change in the substance or method of collection.

Title: Application for assistance to operating insured banks and savings associations.

Form Number: None (letter application).

OMB Number: 3064–0071.

Expiration Date of OMB Clearance: May 31, 1992.

Respondents: Operating insured depository institutions in danger of failing and wishing to apply to the FDIC for financial assistance.

Frequency of Response: On occasion.

Number of Respondents: 100.

Number of Responses per Respondent: 1.

Total Annual Responses: 100.

Average Number of Hours per Response: 40.

Total Annual Burden Hours: 4,000.

OMB Reviewer: Gary Waxman, (202) 395–7340, Office of Management and Budget, Paperwork Reduction Project 3064–0071, Washington, DC 20503.

FDIC Contact: Steven F. Hanft, (202) 898–3907, Office of the Executive Secretary, room F–400, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

Comments: Comments on this collection of information are welcome and should be submitted by May 12, 1992.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed above. Comments regarding the submission should be addressed to both the OMB reviewer and the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: The FDIC has statutory authority to provide financial assistance to an operating insured depository institution which is in danger of failing. The FDIC uses the information collected in letter applications to evaluate the factors required by statute before approving applications.

Dated: March 9, 1992.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL MARITIME COMMISSION

Spain-Italy/Puerto Rico Island Pool; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 212–011213–026.

Title: Spain-Italy/Puerto Rico Island Pool Agreement.

Parties:

Compania Trasatlantica Espanola, S.A.
d'Amico Societa de Navigazione, S.p.A.
Nordana Line A/S
Sea-Land Service, Inc.

Synopsis: The proposed amendment would delete d'Amico Societa de Navigazione, S.p.A. as a party to the Agreement.

Agreement No.: 217–011245–001.

Title: Euro-Gulf International, Inc./Tecomar, S.A. Space Charter Agreement.

Parties:

Tecomar, S.A. de C.V.,
Euro-Gulf International, Inc.

Synopsis: The proposed amendment would expand the Agreement's geographic scope to include Mediterranean service, as well as the port of Felixstowe, and deletes reference to foreign-to-foreign service. The parties have requested a shortened review period.

Agreement No.: 217–011362–001.

Title: Tecomar, S.A. de C.V./Transportacion Maritima Mexicana, S.A. de C.V./Euro-Gulf International, Inc. Slot Charter Agreement.

Parties:

Tecomar, S.A. de C.V.
Transportacion Maritima Mexicana, S.A. de C.V.
Euro-Gulf International, Inc.

Synopsis: The proposed amendment would expand the geographic scope to include service between U.S. Atlantic and Gulf ports and the Mediterranean. The parties have requested a shortened review period.

Dated: March 10, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Federal Allotments to States for Developmental Disabilities, Basic Support, and Protection, and Advocacy Formula Grant Programs for Fiscal Year 1993

AGENCY: Administration on Developmental Disabilities, Administration for Children and Families, Department of Health and Human Services.

ACTION: Notification of fiscal year 1993 federal allotments to States for developmental disabilities basic support and protection and advocacy formula grant program.

SUMMARY: This notice sets forth the individual allotments to States for Fiscal year 1993, pursuant to section 125 of the Developmental Disabilities Assistance and Bill of Rights Act (Act). The allotments to the States published herein are based upon Fiscal Year 1992 funding levels, and are contingent upon Congressional appropriations for Fiscal Year 1993. If Congress enacts and the President approves an amount different from the Fiscal Year 1992 funding levels, the allotments will be adjusted accordingly.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Bettye J. Mobley, Office of Financial Management, Administration for Children and Families, Department of Health and Human Services, 370 L'Enfant Promenade SW., Washington, DC 20447, telephone (202) 245–7220.

SUPPLEMENTARY INFORMATION: Section 125(a)(2) of the Act requires that adjustments in the amounts of State allotments may be made not more often than annually and that States are to be notified not less than six (6) months before the beginning of any fiscal year of any adjustments to take effect in that fiscal year.

The Administration on Developmental Disabilities has updated the data elements for issuance of Fiscal Year 1993 allotments for the Developmental Disabilities formula grant programs. The data elements used in the update are:

A. The number of beneficiaries in each State and Territory under the Childhood Disabilities Beneficiary Program, December 1990, are from Table 5.J10 of the "Social Security Bulletin: Annual Statistical Supplemental 1991" issued by the Social Security Administration, U.S. Department of Health and Human Services. The numbers for the Northern Mariana Islands and the Trust Territories of the Pacific Islands, included under 'Abroad' in the Table, were obtained from the Social Security Administration;

B. State data on Average Per Capita Income, 1985–90, are from Table 1, page 30 of the "Survey of Current Business," August 1991, issued by the Bureau of Economic Analysis, U.S. Department of Commerce; comparable data for the Territories also were obtained from that Bureau; and

C. States and Territories total population are from the 1990 Census Population Counts. Data for the States were issued in the U.S. Department of Commerce, Bureau of the Census report entitled, "Census Population—Housing" (CPH–L–4, Summer 1991); and the Territories data were issued individually by "Census Bureau Press Releases" (CB91–142, CB91–242, CB91–243, CB91–244, CB91–263, and CB91–276, July, 1991). States' data for the Working Populations (ages 18–64) are also based upon the 1990 Census Population Counts. The Territories Working Populations were issued in the Bureau of Census report, "General Characteristics Report: 1980," which is the most recent data available from the Bureau.

BILLING CODE 4130–01–M

Centers for Disease Control

Advisory Council for the Elimination of Tuberculosis; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control (CDC) announces the following council meeting:

Name: Advisory Council for the Elimination of Tuberculosis (ACET).

Time and Date: 8 a.m.–5 p.m., April 2–3, 1992.

Place: Holiday Inn Decatur Conference Plaza, Decatur Ballroom A, 130 Clairemont Avenue, Decatur, Georgia 30030.

Status: Open to the public, limited only by the space available.

Purpose: This council advises and makes recommendations to the Secretary, Department of Health and Human Services, the Assistant Secretary for Health, and the Director, CDC, regarding the elimination of tuberculosis. Specifically, the council makes recommendations regarding policies, strategies, objectives, and priorities; addresses the development and application of new technologies; and reviews the extent to which progress has been made toward eliminating tuberculosis.

Matters to be Discussed: Council Progress Report; TB Laws/Regulations; and TB

Infrastructure. Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Dixie E. Snider, Jr., M.D., Director, Division of Tuberculosis Elimination, and Executive Secretary, ACET, National Center for Prevention Services, CDC, 1600 Clifton Road, NE., Mailstop E-10, Atlanta, Georgia 30333, telephone 404/639-2501 or FTS 236-2501.

Dated: March 9, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

Food and Drug Administration

[Docket No. 92N-0127]

Drug Export; Anti-Human Globulin Reagent Anti-IgG (Rabbit) (Green) Ortho BioVue™ System

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ortho Diagnostic Systems, Inc., has filed an application requesting approval for the export of the biological product Anti-Human Globulin Reagent Anti-IgG (Rabbit) (Green) Ortho BioVue™ System to Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Iceland, Ireland, Italy, Japan, Luxembourg, The Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FUTHER INFORMATION CONTACT: Boyd Fogle, Jr., Center for Biologics Evaluation And Research (HFB-120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8191.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of biological products that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)((B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Ortho Diagnostic Systems, Inc., Route 202, Raritan, NJ 08869, has filed an application requesting approval for the export of the biological product Anti-Human Globulin Reagent Anti-IgG (Rabbit) (Green) Ortho BioVue™ System to Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Iceland, Ireland, Italy, Japan, Luxembourg, The Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and The United Kingdom. The Anti-Human Globulin Reagent Anti-IgG (Rabbit) (Green) Ortho BioVue™ System are qualitative antiglobulin tests that demonstrate the presence or absence of immunoglobulin on the surface of red blood cells. The application was received and filed in the Center for Biologics Evaluation and Research on February 26, 1992, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 23, 1992, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Biologics Evaluation and Research (21 CFR 5.44).

Dated: March 3, 1992.

Thomas S. Bozzo,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

[Docket No. 92N-0126]

Drug Export; Anti-Human Globulin Reagent (Rabbit and Murine Monoclonal) (Green) Anti-IGG, -C3D; Polyspecific, Ortho Biovue™ System

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Ortho Diagnostic Systems, Inc., has filed an application requesting approval for the export of the biological product Anti-Human Globulin (Rabbit and Murine Monoclonal) (Green) Anti-IgG, -C3d; polyspecific, Ortho BioVue™ System to Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Iceland, Ireland, Italy, Japan, Luxembourg, The Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and The United Kingdom. The Anti-Human Globulin Reagent (Rabbit and Murine Monoclonal) (Green) Anti-IgG, -C3d; polyspecific, Ortho BioVue™ System is a glass bead column agglutination in vitro diagnostic test for detection of antibodies in human serum or for the detection of gamma globulin or beta globulin on the surface of red blood cells. The application was received and filed in the Center for Biologics Evaluation and Research on February 26, 1992, which shall be considered the filing date for purposes of the act.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human biological products under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Boyd Fogle, Jr., Center for Biologics Evaluation and Research (HFB-120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8191.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of biological products that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act required that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Ortho Diagnostic Systems, Inc., Route 202, Raritan, NJ 08869, has filed an application requesting approval for the export of the biological product Anti-Human Globulin Reagent (Rabbit and Murine Monoclonal) (Green) Anti-IgG, -C3d; polyspecific, Ortho BioVue™ System to Australia, Austria, Belgium, Canada, Denmark, Federal Republic of Germany, Finland, France, Iceland, Ireland, Italy, Japan, Luxembourg, The Netherlands, New Zealand, Norway, Portugal, Spain, Sweden, Switzerland, and The United Kingdom. The Anti-Human Globulin Reagent (Rabbit and Murine Monoclonal) (Green) Anti-IgG, -C3d; polyspecific, Ortho BioVue™ System is a glass bead column agglutination in vitro diagnostic test for detection of antibodies in human serum or for the detection of gamma globulin or beta globulin on the surface of red blood cells. The application was received and filed in the Center for Biologics Evaluation and Research on February 26, 1992, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 23, 1992, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Biologics Evaluation and Research (21 CFR 5.44).

Dated: March 3, 1992.

Thomas S. Bozzo,

Director, Office of Compliance, Center for Biologics Evaluation and Research.

BILLING CODE 4160-01-M

Advisory Committees; Meetings

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

MEETINGS: The following advisory committee meetings are announced:

Dermatologic Drugs Advisory Committee

Date, time, and place. April 9 and 10, 1992, 8:30 a.m., Bethesda Holiday Inn, Versailles Ballrooms III and IV, 8120 Wisconsin Ave., Bethesda, MD.

Type of meeting and contact person. Open public hearing, April 9, 1992, 8:30 a.m. to 9 a.m., unless participation does not last that long; open committee discussion, 9 a.m. to 4:30 p.m.; open public hearing, April 10, 1992, 8:30 a.m. to 9 a.m., unless public participation does not last that long; open committee discussion, 9 a.m. to 4:30 p.m.; Adele S. Seifried, Center for Drug Evaluation and Research (HFD-9), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4695.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the treatment of dermatologic diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 1, 1992, and submit a brief statement of the general

nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On April 9, 1992, the committee will discuss: (1) General efficacy parameters relative to the assessment of repair of photodamaged skin, and (2) new drug application (NDA) 19-963 (tretinoin emollient cream 0.05 percent) for treatment of photodamaged skin. On April 10, 1992, the committee will discuss continued over-the-counter (OTC) marketing availability of benzoyl peroxide for the treatment of acne while further testing of the ingredient's safety is being conducted. The committee will also consider the National Consumer League's request for warning information in the labeling of these products.

The committee's discussion and recommendation regarding benzoyl peroxide may be considered by the agency in its preparation of an amendment of the final monograph for OTC topical acne drug products. An amendment to the tentative final monograph for OTC topical acne drug products, in which benzoyl peroxide was reclassified from Category I (recognized as safe and effective) to Category III (more-data-needed), was published in the **Federal Register** of August 7, 1991 (56 FR 37622). The final monograph for OTC topical acne drug products, covering all ingredients except benzoyl peroxide, was published in the **Federal Register** of August 16, 1991 (56 FR 41008).

Science Advisory Board to the National Center for Toxicological Research

Date, time, and place. April 13, 1992, 1 p.m. and April 14, 1992, 8:30 a.m., Bldg. 13, Conference Rm., National Center for Toxicological Research, Jefferson, AR.

Type of meeting and contact person. Open board discussion, April 13, 1992, 1 p.m. to 4 p.m.; open public hearing, 4 p.m. to 5 p.m., unless public participation does not last that long; open board discussion, April 14, 1992, 8:30 a.m. to 12 noon; Ronald F. Coene, National Center for Toxicological Research (HFT-10), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3155.

General function of the board. The board advises the Director, National Center for Toxicological Research, in establishing and implementing a research program that will assist the Commissioner of Food and Drugs in fulfilling his regulatory responsibilities. The board provides the extra-agency review in ensuring that research programs and methodology development at the National Center for Toxicological Research are scientifically sound and pertinent to environmental problems.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the board. Those desiring to make formal presentations should notify the contact person before April 8, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open board discussion. The board will be presented with an overview of the 12 research programs of the National Center for Toxicological Research. The board will discuss the processes that will involve the board's participation in an indepth and ongoing review of each of the 12 programs.

Antiviral Drugs Advisory Committee

Date, time, and place. April 20, 1992, 8:30 a.m., and April 21, 1992, 7:30 a.m., Bethesda Ramada Inn, Embassy Ballrooms I, II, and III, 8400 Wisconsin Ave., Bethesda, MD.

Type of meeting and contact person. Open public hearing, April 20, 1992, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 6 p.m.; open public hearing, April 21, 1992, 7:30 a.m. to 8:30 a.m., unless public participation does not last that long; open committee discussion, 8:30 a.m. to 3:30 p.m.; Lee L. Zwanziger, Center for Drug Evaluation and Research (HFD-9), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4695.

General function of the committee. The committee reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of acquired immunodeficiency syndrome (AIDS), AIDS-related complex (ARC), and other viral, fungal, and mycobacterial infections.

Agenda—Open public hearing. Interested persons may present data, information, or views orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 8, 1992, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On April 20, 1992, the committee will discuss: (1) New drug application (NDA) 20-154 (Videx, ddI (dideoxyinosine), Bristol-Myers Squibb Co.), (2) CD4 cell count as a surrogate marker in studies of drugs to treat human immunodeficiency virus infection, and (3) NDA 20-199 (ddC (dideoxycytidine), Hoffmann LaRoche Co.) also for use to treat human immunodeficiency virus infection. On April 21, 1992, the committee will continue discussion of NDA 20-199.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting.

Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI-35), Food and Drug Administration, rm. 12A-16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a..m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Inforamation Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. App. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

The Commissioner approves the scheduling of meetings at locations outside of the Washington, DC, area on the basis of the criteria of 21 CFR 14.22 of FDA's regulations relating to public advisory committees.

Dated: March 9, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

Consumer Participation; Open Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following district consumer exchange meeting: Cincinnati District Office, chaired by James Simmons, District Director. The topics to be discussed are regulations and labeling of dietary supplements and regulation of seafood.

DATES: Thursday, March 26, 1992, 1 p.m. to 3 p.m.

ADDRESSES: Jefferson County Cooperative Extension Service, 8012 Vinecrest Ave., Suite 1, Louisville, KY 40222-4690.

FOR FURTHER INFORMATION CONTACT: Ruth E. Weisheit, Public Affairs Specialist, Food and Drug Administration, P.O. Box 838, 3820 Center Rd., Brunswick, OH 44212, 216-273-1038.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to encourage dialogue between consumers and FDA officials, to identify and set priorities for current and future health concerns, to enhance relationships between local consumers and FDA's district offices, and to contribute to the agency's policymaking decisions on vital issues.

Dated: March 9, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

[Docket No. 91N-0291]

Order for Transitional Class III Devices; Submission of Safety and Effectiveness Information Under Section 520(1)(5)(A) of the Federal Food, Drug, and Cosmetic Act; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** of November 14, 1991 (56 FR 57980), regarding the submission of safety and effectiveness information for class III devices. The document states that class III devices are required to have an approved premarket approval application (PMA) prior to distribution. The notice is being corrected to reflect that class III devices that are preamendments devices (i.e., devices marketed before the enactment of the 1976 amendments) and postamendments devices (i.e., devices that first were marketed on or after the enactment of the 1976 amendments) that have been found to be substantially equivalent to a class III preamendments device, may continue to be distributed prior to premarket approval until the deadline for submission of a PMA and, if a PMA is submitted and accepted for filing by FDA, during the pendency of the review period. (See 21 U.S.C. 351(f).) In addition to this correction, the notice corrects other editorial errors.

FOR FURTHER INFORMATION CONTACT: Joseph M. Sheehan, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4674.

In FR Doc. 91-27426, appearing on page 57960 in the **Federal Register** of Thursday, November 14, 1991, the following corrections are made:

1. On page 57960, in the third column, the first complete sentence is corrected and a sentence is added to read "A class III device is required to have an approved premarket application prior to distribution, unless such device is a preamendments device (i.e., it was marketed before the enactment of the 1976 amendments) that was classified by regulation into class III, or it is a postamendments device (i.e., a device that first was marketed on or after the enactment of the 1976 amendments) that has been found to be substantially equivalent to a class III preamendments device. These types of class III devices may continue to be distributed prior to premarket approval until the deadline for submission of a PMA and, if a PMA is submitted and accepted for filing by FDA, during the pendency of the review period. (See 21 U.S.C. 351(f).)"; and in the third complete paragraph, in line 2, "seven" is corrected to read "nine".

2. On page 57961, in the second column, in the first complete paragraph, in the last sentence, "device effectiveness" is corrected to read "device safety and effectiveness."

Dated: March 9, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

Health Care Financing Administration

Hearing; Reconsideration of Disapproval of Connecticut State Plan Amendment (SPA)

AGENCY: Health Care Financing Administration, HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on April 30, 1992 at 10 a.m. in room 1211, 12th Floor Conference Room, J.F.K. Federal Building, Boston, Massachusetts to reconsider our decision to disapprove Connecticut SPA 89-52.

CLOSING DATE: Request to participate in the hearing as a party must be received by the Docket Clerk by March 30, 1992.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, 1849

Gwynn Oak Avenue, Meadowwood East Building, Groundfloor, Baltimore, Maryland 21207, Telephone: (410) 597-3013.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove Connecticut State plan amendment (SPA) number 89-52.

Section 1116 of the Social Security Act (the Act) and 42 CFR part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. The Health care Financing Administration (HCFA) is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

Connecticut submitted SPA 89-52 on February 16, 1989, to implement various resource and income policies that apply to individuals eligible for Medicaid in various eligibility groups. The State requested that these policies be protected under the moratorium provisions of the Deficit Reduction Act (DEFRA) of 1984. Additional information on SPA 89-52 was received from the State on September 5, 1991.

The issues in this matter are as follows: (1) Do the income methods which were denied protection under the DEFRA moratorium qualify for protection under that moratorium? (2) Do 42 CFR 430.20 and the relevant appropriations acts governing the Department of Health and Human services preclude approving the income methodologies contained in the amendment with a retroactive effective date earlier than the beginning of the calendar quarter in which the amendment was submitted? (3) Would the approval of the disapproved income methodologies violate section 1902(a)(4) and (a)(19) of the Act insofar as the State has not provided assurances in the amendment that approval of these methodologies would not result in claims for Federal financial participation (FFP) which would exceed the limitations specified in section 1903(f) of the Act?

On December 4, 1991, HCFA disapproved portions of SPA 89-52. HCFA provided the following reasons for the disapproval: The more liberal treatment of income specified in the amendment violated 42 CFR 430.20 and the Department's appropriations acts which limit retroactive approval of expansions of eligibility to the beginning of the quarter in which the amendment was submitted. In addition, those more liberal income methods included in the amendment violated the requirements of section 1903(f) of the Act because the State's income levels for the affected groups are already at the maximum permitted for purposes of FFP. Accordingly, HCFA concluded these income methods were disapprovable under sections 1902 (a)(4) and (a)(19) of the Act.

Although the plan amendment was disapproved, HCFA granted protection under the DEFRA moratorium for certain policies contained in its amendment but denied moratorium protection for other policies. By letter dated February 5, 1992, the State of Connecticut Department of Income Maintenance requested reconsideration of the disapproval of those income methodologies which were not granted moratorium protection because they may violate the FFP limits in section 1903 of the Act.

Under the DEFRA moratorium the Secretary is prohibited from taking certain adverse actions against States for using more liberal income and resource methods than those of the cash assistance programs (Aid to Families with Dependent Children and Supplemental Security Income) for determinations of eligibility for the medically needy and limited categorically needy groups (section 2373(c) of the DEFRA of 1984). The moratorium covers the period of October 1, 1981 through February 17, 1989. It is HCFA's position that the adverse actions which the Secretary is prohibited from taking do not include disapproving SPAs.

Thus, HCFA disapproved SPAs for which the State sought protection under the DEFRA moratorium, if those amendments violated the requirements of Title XIX of the Act which were in effect during the moratorium period. However, if the amendment satisfied the criteria of the moratorium and did not violate other provisions of the Medicaid statute for which the moratorium did not afford protection, HCFA would advise the State that the policies in the amendment qualified for moratorium protection. The Department would not take any adverse actions against a State resulting from policies which were protected under the moratorium.

SPA 89-52 sought DEFRA moratorium protection for three income policies, which it applied to the following groups: Individuals eligible under sections 1902(a)(10)(A)(ii)(IV), (V), (VI) and 1902(a)(10)(C)(i)(III). The policies for which protection was sought were as follows.

- *Income-in-Kind*—Income-in-kind is excluded from consideration as income except when provided through General Assistance or for the performance of services.
- *Irregular Income*—Gifts received too irregularly or infrequently to be counted, but not more than $30 per calendar quarter, are excluded.
- *Inaccessible Income*—Inaccessible income is money which an assistance unit member is due, but neither receives nor benefits from due to circumstances beyond his or her control. Any income which meets the definition of inaccessible income is not counted.

SPA 89-52 sought DEFRA moratorium protection for three additional income policies, but limits application to the following groups: Individuals eligible under sections 1902(a)(10)(A)(ii)(IV) and 1902(a)(10)(C)(i)(III) (medically needy aged, blind, and disabled only). The policies for which protection was sought were as follows:

- *Earned Income Disregard*—$65 per month plus ⅓ of the remainder is disregarded from the earning of applicants or recipients of assistance to the blind.
- *Deeming Methodology*—The assistance unit's needs include the needs of the spouse of the unit member when they are living together in the community. Spouses living together in the community who are both recipients of, or eligible applicants for Medicaid are each entitled to the appropriate earned and unearned income disregards when determining eligibility.
- *Unearned Income Disregards*—An unearned income disregard, based upon the individual's living arrangement, is deducted from the unit member's total gross income.

While the last three policies are more liberal than the cash assistance policies, they are not more liberal than policies already in the approved State plan for individuals eligible under a State supplementary payment (section 1902(a)(10)(ii)(IV)). However, the use of policies identical to approved policies does not violate the requirements of the DEFRA moratorium.

Because the income standards for the groups to which these more liberal policies were to apply were already at the maximum level permitted by section 1903(f) of the Act, all of the policies cited above have the potential for violating the FFP limits set forth in section 1903(f) of the Act. Therefore, HCFA disapproved these income policies as violating the requirements of title XIX of the Act during the period covered by the DEFRA moratorium. Further, we did not grant DEFRA moratorium protection for those policies because they may violate the FFP limits at section 1903(f).

The notice to Connecticut announcing an administrative hearing to reconsider the disapproval of its SPA reads as follows:

Ms. Audrey Rowe,
Commissioner,
Department of Income Maintenance, 110 Bartholomew Avenue, Hartford, Connecticut 06106.

Dear Ms. Rowe: I am responding to your request for reconsideration of the decision to disapprove Connecticut State Plan Amendment (SPA) 89-52.

Connecticut submitted SPA 89-52 on February 16, 1989, to implement various resource and income policies that apply to individuals eligible for Medicaid in various eligibility groups. The State requested that these policies be protected under the moratorium provisions of the Deficit Reduction Act (DEFRA) of 1984. Additional information on SPA 89-52 was received from the State on September 5, 1991.

The issues in this matter are as follows: (1) Do the income methods which were denied protection under the DEFRA moratorium qualify for protection under that moratorium? (2) Do 42 CFR 430.20 and the relevant appropriations acts governing the Department of Health and Human Services preclude approving the income methodologies contained in the amendment with a retroactive effective date earlier than the beginning of the calendar quarter in which the amendment was submitted? (3) Would the approval of the disapproved income methodologies violate section 1902(a)(4) and (a)(19) of the Act insofar as the State has not provided assurances in the amendment that approval of these methodologies would not result in claims for Federal financial participation which would exceed the limitations specified in section 1903(f) of the Act?

I am scheduling a hearing on your request for reconsideration to be held on April 30, 1992 at 10 a.m. in room 1211, 12th Floor Conference Room, J.F.K. Federal Building, Boston, Massachusetts. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed at 42 CFR part 430.

I am designating Mr. Stanley Katz as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (410) 597-3013.

Sincerely,

Gail R. Wilensky,
Administrator.

BILLING CODE 4120-03-M

Health Resources and Services Administration

Availability of Funds for Community and Migrant Health Center Activities, for the Provision of Technical and Non-Technical and Non-Financial Assistance to Community and Migrant Health Centers, and for Cooperative Agreements of Support Community and Migrant Health Centers

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice of availability of funds.

SUMMARY: The Health Resources and Services Administration announces that for fiscal year (FY) 1992 approximately $588.8 million will be available for grants for Community and Migrant Health Center (C/MHC) activities, cooperative agreements to support C/MHCs and other community-based providers of primary care, and awards for the provision of technical and other non-financial assistance to C/MHCs.

C/MHC grants will include both new and continuing awards. This announcement is made to assure that continuation grants can be awarded in a timely fashion consistent with the needs of the program as well as to provide for distribution of funds throughout the fiscal year. A subsequent notice will be issued in the **Federal Register** to announce the availability of funds for C/MHC new starts and expansion grants.

The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS led national activity for setting priority areas. The health center program directly addresses the Healthy People 2000 objectives by improving access to preventive and primary care services for underserved populations, especially minority and other disadvantaged populations. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017-001-00474-01) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-01) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone 202-783-3238).

1. Community and Migrant Health Center Activities

Grant Amounts: Approximately $479 million in discretionary grants for continuation of C/HC activities (i.e., approximately $446 million for general primary care services delivery and $33 million for Comprehensive Perinatal Care Program (CPCP) activities) and approximately $51 million in discretionary grants for continuation of MHC activities (i.e., approximately $49 million for general primary care services delivery and $2 million for CPCP activities) will be available under sections 330 and 329 of the Public Health Service (PHS) Act (42 U.S.C. 254c and 254b, respectively).

Number of Awards: A total of 450 C/MHC grants will be made available under sections 330 and 329, of which approximately 200 ($190 million) will be for competing continuation grants and approximately 349 ($340 million) will be for noncompeting continuation grants. Approximately 305 of these grants will include CPCP activities and all will range from approximately $200,000 to approximately $2 million for general primary care services delivery (C/MHCs) under the sections 329 and 330 authorities. Awards will be made for a one year budget period. Project periods will be for up to three years.

A. General Care Services Delivery

Eligible Applicants: Sections 329 and 330 grants for general primary care services delivery include both new and continuing awards. Eligible applicants for sections 329 and 330 awards to continue to provide health services in medically underserved areas are health centers currently funded under sections 329 and 330. A notice will be published in the near future announcing the availability of approximately $30 million in grants for new starts and to expand existing C/MHC programs in new areas.

Review Criteria: When determining whether Federal support will be made available for continuing awards, the Department will review C/MHCs for compliance with standard criteria stipulated in the program regulations (42

CFR part 51c for CHC and part 56 for MHC activities) and use of previously awarded sections 330 and 329 funds. This year's reviews will continue to emphasize need and community impact, health services, management and finance, and governance. Specifically, applications will be evaluated based on: (1) The demonstrated need for services based on geographic, demographic, and economic factors, resources in the area, and health status; (2) the capacity to provide primary health services as appropriate to meet the needs of the community, as evidenced by such attributes as an adequate medical provider staff (e.g., in number, specialty mix, and qualifications), critical linkages to other relevant entities (e.g., State or local health departments, health professions training programs), and coordination with other levels of care; (3) appropriate leadership, management structures and financial systems to enable delivery of health services efficiently and effectively; (4) appropriateness of governing board composition, committee structure, and performance to enable the board to function fully and effectively in its fiduciary role; and, (5) the degree to which the applicant intends to integrate services supported by a grant with other health services provided under other Federally assisted health services or reimbursement programs.

Approximately $15 million is available to support improvement activities that go beyond the current level. These requests will be held for review during the fourth quarter of the fiscal year and awards will be made by September 30, 1992. Emphasis for improvement activities will be on retention and recruitment of primary care providers; correction of cited fire and life safety code violations involving imminent danger to patients and staff and that requires less than $100,000 in additional Federal funds; and, provision of translation and culturally sensitive services to people of limited English-speaking ability as authorized under the Disadvantaged Minority Health Improvement Act of 1990 (Pub. L. 101–527), specifically section 9 of the Act which amended section 330.

One to two million dollars will also be awarded for improvement activities that either establish or expand linkages between C/MHC and graduate or undergraduate education programs for primary care physicians. These linkages must strengthen community based primary care to the underserved, reinforce the program expectations of the Section 329/330 program, and contribute both to the recruitment and retention of C/MHC clinicians and the quality of care.

Within the $15 million estimated for improvements, it is anticipated that approximately $3 to $5 million will be available to support applications for major capital improvement, i.e., requests for PHS support in excess of $100,000. Eligible applicants are existing C/MHCs. In order to be considered for funding, these applications will be due on May 1, 1992. The preference for funding is proposals to correct existing fire and life safety code violations for which the grantee has been officially cited, and for which the total amount of C/MHC funds requested exceeds $100,000.

B. Comprehensive Perinatal Care Program

Eligible Applicants: All CPCP awards are expected to be made to current recipients of CPCP funding which are performing satisfactorily.

Review Criteria: Funding determinations regarding current CPCP activities will depend on: (1) The extent to which the center has documented the need for prenatal, neonatal, and infant care of residents of its community; (2) the adequacy and feasibility of the new or expanded efforts proposed to meet the needs of the population and to improve pregnancy outcomes by reducing the incidence of infant mortality and morbidity and reducing low birth weight; (3) the adequacy of the center's plan to evaluate the results of the activity in terms of improved health status; and, (4) the appropriateness of the proposed budget. Perinatal care funds are distributed after consideration of infant mortality rates (IMR), which may be adjusted to apply to a particular area or population. Highest priority is given to centers in areas with an IMR greater than the national average which have demonstrated success in enrolling pregnant women into early prenatal care and have systems in place to ensure the appropriate number of visits and postpartum follow-up in a cost-effective way. However, some funds may be targeted to C/MHCs in areas with a relatively lower adjusted IMR that serve unusually high risk subpopulations that have increasing infant death rates. In addition, funds may be targeted to C/MHCs that enroll high risk pregnant women from special populations (such as homeless, HIV-infected, or substance abusers) into prenatal care.

Priority is given to applicants with the ability to: (1) Integrate a case management approach to perinatal and infant care into their overall care delivery program; (2) demonstrate strong linkages with State and local health departments and targeted programs such as the Healthy Start program; (3) document the results of the comprehensive perinatal care activity in terms of improved health status of the target population; and/or, (4) provide arrangements in which multiple services (e.g., clinical, financial, nutritional, social and/or eligibility services) are offered in one location.

2. Cooperative Agreements

Grant Amounts: Approximately $4.6 million under section 333(d) of the PHS Act will be made available to support cooperative agreements with qualified statewide organizations and approximately $700,000 will be made available for awards to national organizations to provide assistance in the development and coordination of primary health care services in needy areas.

Number of Awards: Up to 53 statewide cooperative agreements, the majority of which will provide approximately $100,000, and 4 national cooperative agreements ranging from $125,000 to $200,000 will be made under the section 333(d) authority. Awards will be made for a one year budget period. Project periods will be for up to three years.

Eligible Applicants: Section 333(d) awards are anticipated to be awarded primarily to continuation grantees, but may include up to 6 States for new cooperative agreement funding. An applicant for section 333(d) funds must be an agency of State government; a statewide public or private nonprofit entity that operates solely within one state; or, a national organization that represents State, local or community-based health constituencies, and that satisfies the Secretary that it is able to meet program requirements.

Review Criteria: Applications for statewide cooperative agreements under section 333(d) will be evaluated according to their ability to perform State-specific activities in five program areas: (1) Primary care access; (2) recruitment and retention of professional staff and clinical effectiveness; (3) health care financing; (4) maternal and child health; and, (5) other special populations. Appropriate activities for cooperative agreements include, but are not limited to: identifying health professional shortage areas and determining the need for National Health Service Corps (NHSC) and other primary care providers; assisting C/MHCs and other community-based organizations and primary care providers in areas of high need in recruiting and retaining health care personnel; promoting the use of State resources (including Medicaid, Maternal and Child Health and special population funding) for primary care purposes; promoting partnerships and affiliations with State and local health departments, Area Health Education Centers, hospitals, specialty and social service providers and primary care residency training programs; coordination of activities with PHS and NHSC State loan repayment activities and other State health profession loan repayment/scholarship programs and programs encouraging students to pursue careers in primary care; and, planning and resource development for activities in support of the perinatal life cycle as well as activities targeted towards special needs groups such as the homeless, substance abusers, HIV-infected individuals, the elderly, and migrant/seasonal farmworkers.

In addition to performing State-specific activities in the five program areas identified above, all section 333(d) recipients will be required to perform the following key activities: (1) In the area of primary care access, recipients will be required to produce county-specific primary care access plans, including elements regarding health professions personnel and primary care delivery systems; (2) in the area of recruitment and retention, recipients will be required to compile information on the State's health professions training, address financial support activities, and facilitate the activities of Area Health Education Centers, the State, the regional offices, and State and regional primary care associations regarding the development of retention, recruitment and residency/training linkages; (3) in the area of maternal and child health, recipients will be required to participate in, and coordinate with, the State's Maternal and Child Health Title V planning activities; and, (4) in the area of health care financing, grantees will be required to monitor and report on their States' implementation of the Federally Qualified Health Center (FQHC) Medicaid provisions. Additionally, recipients in States with Healthy Start grantees are expected to provide technical assistance to the consortia and facilitate coalition building and State linkages. Priority for funding of State-specific activities will be give to applications received from agencies of State government.

Grant funding will be available to support FY 1992 priorities for statewide cooperative agreements which include: service education linkages; primary care access; retention/recruitment/clinical effectiveness; and, health care financing. Preference for funding innovative one-time activities beyond basic, ongoing operations (i.e., improvement packages) will be accorded to requests in these areas. These requests will be held for review during the fourth quarter of the fiscal year and awards will be made by September 30, 1992.

All national organizations seeking cooperative agreements under the authority of section 333(d) will be evaluated according to their ability to address activities in one or more of the following priority areas: (1) Enhanced access to primary care; (2) management and enhanced financing for primary care services; (3) health care services for minorities; and, (4) retention and recruitment of health care providers in medically underserved areas and to medically underserved populations.

Federal Responsibilities under the Cooperative Agreements Under Section 333(d) of the PHS Act: Federal responsibilities under the statewide cooperative agreements under section 333(d) of the PHS Act, in addition to the usual monitoring and technical assistance provided under grants, will include the following: (1) The exercise of responsibility for final authority on the award of Federal grants, Federal health personnel placement, and overall program management of Federal resources in the context of fulfilling the State program as developed under the agreement; (2) the detail or assignment of Federal personnel of the statewide organization; (3) the recruitment and assignment of NHSC personnel in accordance with the program developed under the cooperative agreement; and, (4) participation in the development of and approval of statewide plans at various stages during their development.

3. Technical and Non-Financial Assistance

Grant Awards: Approximately $8.5 million in discretionary grants to provide technical and non-financial assistance, including awards to national organizations, of which approximately $6.7 million would be awarded under section 330(f)(1) and approximately $1.8 million would be awarded under 329(g)(1) of the PHS Act.

Number of Awards: Up to 35 awards, the majority of which will amount to approximately $100,000, will be made under the section 330(f)(1) authority for the performance of State-specific and/or regional activities. Approximately 5 national awards ranging from $125,000 to $1.2 million will be made under the section 329(g)(1) and 330(f)(1) authorities. Awards will be made for a one year budget period. Project periods will be for up to three years.

Eligible Applicants: Sections 330(f)(1) and 329(g)(1) awards are anticipated to be awarded primarily to continuation grantees. Eligible applicants for section 329(g)(1) and 330(f)(1) funds are private nonprofit entities, including previously existing and newly established State and regional primary care associations.

Review Criteria: Applicants for funding under section 330(f)(1) to provide technical and non-financial assistance to C/MHCs and other similar providers will be evaluated according to their ability to perform State-specific activities in five program areas: (1) Primary care access; (20 recruitment/retention/clinical development; (3) health care financing; (4) maternal and child health (MCH); and, (5) other special populations. Appropriate activities for section 330(f)(1) grantees include: promoting the use of State resources (including Medicaid, Maternal and Child Health and special population funding) for primary care purposes; assisting C/MHCs and other similar providers in preparing their applications for Federal, State and local funding; providing training and technical assistance in management and governance; developing shared services and joint purchasing arrangements; assisting C/MHCs and other similar providers in recruiting and retaining primary care providers; promoting partnerships and affiliations with State and local health departments, Area Health Education Centers, hospitals, specialty and social service providers and residency programs; coordinating activities with PHS and NHSC State loan repayment activities, and other State health profession loan repayment/scholarship programs and programs encouraging students to pursue careers in primary care; and, planning and developing resources for activities in support of pregnant women and children as well as activities targeted towards special needs populations such as the homeless, substance abusers, HIV-infected individuals, the elderly and migrant/seasonal farmworkers.

In addition to performing State-specific activities in the program areas identified above, all section 330(f)(1) recipients will be required to perform the following key activities: (1) in the area of primary care access, recipients will be required to actively participate with the recipient of the appropriate State cooperative agreement in the production of a county-specific primary care access plan; (2) in the area of recruitment and retention, recipients will be required to develop, support, and coordinate clinical networks and other appropriate means of securing

substantial input to their activities in the five program areas from primary care program clinicians; and, (3) in the area of health care financing, recipients will be required to perform activities to enhance the reimbursement of C/MHCs and similar providers of primary care through improvements in rates from cost-based programs such as FQHC, Rural Health Clinic (RHC) and fee-for-service determinations, eligibility requirements in programs such as the Migrant Medicaid Interstate Compact, and benefits in programs such as Early and Periodic Screening, Diagnostic, and Treatment (EDSDT). In a State where no cooperative agreement exists, the recipient will assume primary responsibility for producing the State primary care access plan mentioned as core activity #1. Additionally, in States with Healthy Start grantees, recipients will be expected to provide technical assistance to the consortium and its community-based provider members and to coordinate activities with the State Cooperative Agreement, if any.

Limited grant funding will be available to support FY 1992 priorities for primary care associations which include: primary care access; retention/recruitment/clinical effectiveness; and health care financing. Preference for funding innovative one-time activities beyond basic, ongoing operations (i.e., improvement packages) will be accorded to requests in these areas. These requests will be held for review during the fourth quarter of the fiscal year and awards w3ill be made by September 30, 1992.

All recipients of national awards funded under sections 329(g)(1) and 330(f)(1) authority will be evaluated according to their ability to address activities in one or more of the following priority areas: (1) enhanced access to primary care/recruitment and retention of health providers; (2) improved management for primary care services; (3) health care services for special populations; (4) integration/collaboration with public and other external organizations; and, (5) clinical strategies for primary care clinicians.

Opportunity for Comment: Interested persons are invited to comment on the proposed funding priorities for C/MHC activities under section 330 and 329, cooperative agreements under section 333(d) and technical and non-financial assistance under sections 330(f)(1) and 329(g)(1). Normally, the comment period would be 60 days. However, due to need to implement any changes for the fiscal year 1992 award cycle, the comment period has been reduced to 30 days. All comments received on or before April 13, 1992 will be considered before the proposed funding priorities are finalized. No funds will be allocated or final selections made until a final notice is published indicating whether the proposed funding priorities will be applied.

Written comments should be addressed to: Richard C. Bohrer, Director of Primary Care Services, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, 5600 Fishers Lane, room 7a–55, Rockville, MD 20857 (301) 443–2280.

All comments received will be available for public inspection and copying at the Division of Primary Care Services, at the above address weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Application Deadlines: Competing and non-competing continuation applications by existing grantees for section 329 and/or 330 funds to provide essential services are due 120 days prior to the expiration of the current grant award unless otherwise specified. Proposals for grants to provide technical and non-financial assistance under section 330(f)(1), and for new and continuation cooperative agreements under section 333(d) must be received no later than July 1, 1992, unless otherwise specified. Applications shall be considered to have met the deadline if they are: (1) Received on or before the deadline; or, (2) postmarked before the deadline date and received in time for orderly processing. Untimely applications will be returned to the applicant. Applicants should obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service or request a legibly dated U.S. Postal Service postmark. Private metered postmarks shall not be accepted as proof of timely mailing.

ADDRESSES: The PHS Regional Grants Management Officers (RGMOs) whose names and addresses are provided in the appendix to this document are responsible for distributing application kits and guidance (Form PHS 5161–1 with revised face sheets DHHS Form 424, as approved by the OMB under control numbers 0937–0189), and competed applications must be submitted to them. The kits and guidance will be sent to existing grantees; new applicants should contact the appropriate RGMO. The RGMOs are available to provide assistance on business management issues.

FOR FURTHER INFORMATION CONTACT: For technical assistance and general program information about the availability of section 329 and 330 funds, contact Richard C. Bohrer, (301) 43–2260. For additional information about funding under sections 329(g)(1), contact Jack Egan, (301) 443–1153. Additional information about funding under sections 330(f)(1) and 333(d) can be obtained from Bonnie Lefkowitz, (301) 443–2270. For assistance on section 333(d) State-specific cooperative agreement retention and recruitment issues, contact Donald L. Weaver, M.D., (301) 443–2900. Additional information about current comprehensive perinatal care activities can be obtained from Beverly Wright (301) 443–7587.

SUPPLEMENTARY INFORMATION: Application kits contain guidance information which incorporates new and updated program requirements arising from changes in the program's authorizing legislation. since CPCP activity is part of a C/MHC's total perinatal care program, a C/MHC is not required to submit a separate application for CPCP activities, but a center requesting CPCP funding is required to submit a separate budget and narrative report detailing the proposed uses of these funds.

Other Award Information: All grants to be awarded under this notice are subject to the provisions of Executive Order 12372, as implemented by 45 CFR Part 100, which allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application kits will contain a listing of States which have chosen to set up such a review system and will provide a point of contact in the States for that review. Applicants (other than Federally recognized Indian governments) should contact their State Single Points of Contact (SPOCs) as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. State process recommendations should be submitted to the appropriate Regional Office (see appendix). The due date for State process recommendations is 60 days after the appropriate application deadline date. The Bureau of Health care Delivery and Assistance does not guarantee that it will accommodate or explain its response to State process recommendations received after this date.

In the OMB Catalog of Federal Domestic Assistance, the Community Health Center program is listed as Number 93.224; the Migrant Health Center program is Number 93.246; the program of technical and other non-financial assistance, including national organizations is Number 93.129; and the Cooperative Agreements program, including national organizations, for development and coordination of comprehensive primary care services is Number 93.130.

Dated: January 9, 1992.

Robert G. Harmon,

Administrator.

Appendix—Regional Grants Management Officers

Region I: Mary O'Brien, Grants Management Officer, PHS Regional Office I, John F. Kennedy Federal Building, Boston, MA 02203, (617) 565–1482

Region II: Steve Wong, Grants Management Officer, PHS Regional Office II, Room 3300, 26 Federal Plaza, New York, NY 10278, (212) 264–4496

Region III: Martin Bree, Acting Grants Management Officer, PHS Regional Office III, P.O. Box 13716, Philadelphia, PA 19101, (215) 596–6653

Region IV: Wayne Cutchens, Grants Management Officer, PHS Regional Office IV, Room 1106, 101 Marietta Tower, Atlanta, GA 30323, (404) 331–2507

Region V: Lawrence Poole, Grants Management Officer, PHS Regional Office V, 105 West Adams Street, 17th Floor, Chicago, IL 60603, (312) 253–8700

Region VI: James A. Doss, Acting Grants Management Officer, PHS Regional Office VI, 1200 Main Tower, Dallas, TX 75202, (214) 767–3885

BILLING CODE 4160–15–M

Emergency Medical Services for Children Demonstration Grants

AGENCY: Health Resources and Services Administration (HRSA).

ACTION: Notice of availability of funds.

SUMMARY: The HRSA and the National Highway Traffic Safety Administration (NHTSA) announce fiscal year (FY) 1992 funds are available for grants authorized under section 1910 of the PHS Act. These discretionary grants will be made to States or accredited schools of medicine to support projects for the expansion and improvement of emergency medical services for children (EMSC). Funds appropriated by Public Law 102–170 will be used for this purpose. Under the EMSC program authority, awards are made for project periods of up to 2 years. The authority to award grants expires on September 30, 1992.

The NHTSA has participated with the HRSA in developing the program priorities announced under the EMSC program for FY 1992. The NHTSA will also share the Federal monitoring responsibilities for EMSC awards made during FY 1992 as well as continue to provide ongoing technical assistance and consultation in regard to the required collaboration/linkages between applicants and their Highway Safety Offices and Emergency Medical Services Agencies for the State(s).

The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS led national activity for setting priority areas. The EMSC grant program will directly address the Healthy People 2000 objectives related to emergency medical services and trauma systems linking prehospital, hospital, and rehabilitation services in order to prevent trauma deaths and long-term disability. Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (telephone 202 783–3238).

DATE: To receive consideration, grant applications for the EMSC should be submitted to the Chief, Grants Management Branch, Maternal and Child Health Bureau (MCHB), Health Resources and Services Administration, room 16–12, Parklawn Building 5600 Fishers Lane, Rockville, Maryland 20857.

These applications must be received or postmarked on or before April 30, 1992. Applications will be considered as meeting this deadline if they are either:

1. Received on or before the deadline date, or
2. Postmarked on or before the deadline date and received in time for submission to the review group.

A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Applications received after the deadline will be considered late applications and will be returned to the applicant.

FOR FURTHER INFORMATION CONTACT: Requests for technical or programmatic information should be directed to Mr. Pete Conway, Division of Maternal, Infant, Child and Adolescent Health, Maternal and Child Health Bureau, Health Resources and Services Administration, room 18A–30, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone 301 443–2250 or Jean Athey, Ph.D., Division of Maternal, Infant, Child and Adolescent Health, Maternal and Child Health Bureau, Health Resources and Services Administration, room 18A–39, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone 301 443–4026.

Grant applications (PHS form 5161–1, approved under OMB #0937–0189) and additional information regarding business, administrative or fiscal issues related to the awarding of grants under this notice may be obtained from: Chief, Grants Management Branch, Maternal and Child Health Bureau, Health Resources and Services Administration, room 18A–30, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone 301 443–1440.

SUPPLEMENTARY INFORMATION:

Program Background and Objectives

The Emergency Medical Services for Children statute, (section 1910 of the PHS Act, as amended), establishes a program of grants to States and accredited medical schools for demonstration projects for the expansion and improvement of emergency medical services for children who need treatment for trauma or critical care. For purposes of this grant program, the term "State" includes the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Northern Mariana Islands, Guam, American Samoa, the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia. The term "school of medicine" for purposes of this program is defined as having the same meaning as set forth in section 701(4) of the PHS Act (42 U.S.C. 292a(4)). "Accredited" in this context has the same meaning as set forth in section 701(5) of the PHS Act (42 U.S.C. 292a(5)).

It is the intent of this grant program to stimulate further development or expansion of ongoing efforts in the States to reduce the problems of life-threatening pediatric trauma and critical illness. The Department does not intend to award grants which would duplicate grants previously funded under the Emergency Medical Services Systems

Act of 1972 or which would be used simply to increase the availability of emergency medical services funds allotted to the State under the Preventive Health Services Block Grant.

Funding Category

There will be a single program category open for competition this year—implementation grants for the purpose of initiating or improving the capacity of a State's Emergency Medical Services program to address the particular needs of children. Implementation grants are to be demonstrations of the use of existing research-based knowledge, state-of-the-art systems development approaches, and the experience and products of previous EMSC grantees in meeting program goals. Budget requests for these grants should not exceed $250,000 per year. Up to four grants will be awarded. For this competition, applications from States (and medical schools within those States) which have not as yet received support under this program will receive preference for funding. This means that approved applications from States (and medical schools within those States) with no previous EMSC program support will be funded ahead of approved applications from outside this group.

This year's funding category is not being proposed for public comment. Owing to limited resources available for new competition, this category is the only one of three priority areas funded in FY 1991 (published at 56 FR 9366 on March 6, 1991) to be open for competition in FY 1992. It is being extended because of continuing and documented demand from or within States that have not benefited from this assistance to improve the capacity of State EMSC services. Its selection was based on consultation with national leaders, EMSC grantees, and other Federal program staff, representing substantial public input from those most involved in the issue.

By statute, the project period for EMSC grants is up to 2 years. The legislative authority for the award of grants under the program expires on September 30, 1992.

Availability of Funds

Approximately $4,880,000 is available for grants under the EMSC program, of which approximately $850,000 will be used for new, competing grants. We estimate funding approximately 3–4 new grants. The remaining funds will be used for continuation support of the 18 existing EMSC projects.

Special Concern

The MCHB places special emphasis on improving service delivery to women and children from culturally identifiable populations who have been disproportionately affected by barriers to accessible care. This means that EMSC projects are expected to serve and appropriately involve in project activities members of ethnoculturally distinct groups, unless there are compelling programmatic or other justification for not including either women or persons from culturally distinct populations. The MCHB's intent is to insure that project outcomes are of benefit to culturally distinct populations and to insure that the broadest possible representation of culturally distinct and historically under-represented groups is supported through programs and projects sponsored by the MCHB.

Consistent with the statutory purpose and with particular attention to the appropriate involvement of women and persons from culturally distinct populations, the Department will review applications for funds under the above mentioned category as competing applications and will fund those which, in the Department's view, best meet the purposes of the EMSC program and address achievement of applicable Healthy People 2000 objectives related to emergency medical services and trauma systems.

Eligible Applicants

Applications for funding under section 1910 will be accepted from States and accredited schools of medicine. Applicants are encouraged to seek the participation and support of interested entities within the State, such as local government and health and medical organizations in the private sector including local or regional trauma centers, in developing the proposed project.

Review Criteria

The review of applications will take into consideration the following criteria:

—The adequacy of the applicant's description of the problem of pediatric trauma and critical illness in the grant locale. The adequacy of sections of the application devoted to the special problems of (a) handicapped children and families; and (b) minority children and families (including Native Americans).
—The appropriateness of project objectives and outcomes in relation to the specific nature of the problems identified by the applicant.
—The soundness (in relation to the state of the art), appropriateness, comprehensiveness, cost effectiveness and responsiveness of the proposed methodology for achieving project goals and outcome objectives.
—The soundness of the plan for evaluating progress in achieving project objectives and outcomes.
—The extent of collaboration and coordination with other appropriate organizations involved in emergency medical services, health care, and public health and safety (e.g., injury prevention activities, the State Emergency Medical Services agency, the State Maternal and Child Health program, State Highway Safety Offices, rehabilitation programs) and the degree of involvement of the "community" (e.g., private sector, voluntary organizations).
—The soundness of the proposal, as set forth in the application, in terms of fiscal management, effective use of personnel, and ability to complete the proposal within the grant period.
—The extent to which the applicant proposes to employ products and expertise of EMSC programs in other States, especially of current and former grantees of the Federal EMSC program. Such resources include, but are not limited to, technical assistance and consultation.
—The extent to which the project gives special emphasis to improving service delivery to women and children from culturally identifiable populations who have been disproportionately affected by barriers to accessible care and ensures that members of culturally distinct groups are appropriately represented in the activities of approved grants and cooperative agreements.

Allowable Costs

The basis for determining if costs charged to PHS grants are allowable or allocable is set forth in 45 CFR part 92.22. The five separate sets of cost principles prescribed for grant recipients are: (1) OMB Circular A–87 for State and local governments; (2) OMB Circular A–21 for institutions of higher education; (3) 45 CFR part 74, appendix E for hospitals; (4) OMB Circular A–122 for nonprofit organizations; and (5) 48 CFR chapter 1, subpart 31.2 for for-profit (commercial) organizations.

Executive Order 12372

This program has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs by appropriate health planning agencies, as implemented by 45 CFR part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available under this notice will contain a listing of States which have chosen to set up such a review system and will provide a single point of contact (SPOC) in the States for review. Applicants (other than federally-recognized Indian tribal governments) should contact their State SPOCs as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the application deadline for new and competing awards. The granting agency does not guarantee to "accommodate or explain" for State process recommendations it receives after that date. (See part 148, Intergovernmental Review of PHS Programs under Executive Order 12372 and 45 CFR part 100 for a description of the review process and requirements.)

OMB Catalog of Federal Domestic Assistance

The OMB Catalog of Federal Domestic Assistance number is 93.127.

Dated: January 9, 1992.

BILLING CODE 4165–15–M

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on Friday, February 28, 1992.

(Call PHS Reports Clearance Officer on 202–245–2100 for copies of package)

1. Screener/Baseline Round of the Feasibility Study for the Household Component of the National Medical Expenditure Survey (NMES)—New—This feasibility study will test methods for enhancing the quality of data on medical care and expenditures, for improving the efficiency of data collection and assess the willingness of potential respondents to participate. Respondents: Individuals or households; Number of Respondents: 1,736; Number of Responses per Respondent: 1; Average Burden per Response: .89 hours; Estimated Annual Burden: 1,538 hours.

2. HRSA Noncompeting Training Grant Application Form PHS 6025–2—0915–0061—The Health Resources and Services Administration uses the information to determine the eligibility of a grantee to continue their previously approved grant project. The review includes calculation of the amount of each award, evaluation of progress made, and assessment of the grantee's responsiveness to the programs funding preferences. Respondents: Non-profit institutions; Number of Respondents: 977; Number of Responses per Respondent: 1; Average Burden per Response: 25.5 hours; Estimated Annual Burden: 24,914 hours.

3. Automatic Detention and Private Laboratory Testing of FDA Regulated Products for Import Entry—0910–0261—The Food and Drug Administration has the responsibility for assuring the admissibility of foods, drugs, medical devices and cosmetics offered for import into the United States. The automatic detention program exists to assure the quality of incoming products where a history of violation exists. This has resulted in increased use of private laboratories for testing purposes because laboratory results for each shipment of a product in automatic detention must be accepted by the agency before it is allowed entry into the United States. Respondents: Businesses or other for-profit; Number of Respondents: 4,000; Number of Respondents Per Respondent: 2.25; Average Burden per Response: 5.25 hours; Estimated Annual Burden: 48,500 hours.

4. Community Mental Health Centers (CMHC) Construction Grantee Checklist—0930–0104—To insure that CMHC facilities built with Federal assistance provide mental health service for a 20-year period as required, the National Institute of Mental Health will: (1) Survey the universe of CMHC construction grantees annually through a compliance checklist; and (2) utilize survey results to determine appropriate follow up, e.g., waivers/recovery activities. Respondents: State or local governments, Non-profit institutions, Small businesses or organizations; Number of Respondents: 389; Number of Responses per Respondent: 1 hour; Average Burden per Response: .33 hours; Estimated Annual Burden: 130 hours.

5. Evaluation of Physician Adherence to Tuberculosis Prevention and Treatment Recommendations—New—The Centers for Disease Control will conduct a mail survey of a sample of primary health care providers concerning their screening, treatment, and management practices for patients with tuberculosis infection or tuberculosis. The data will assist in explaining why some physicians fail to comply with current TB recommendations that are essential to assuring necessary prevention and control practices. Respondents: Individuals or households; Number of Respondents: 2,927; Number of Responses per Respondent: 1; Average Burden per Response: .317 hours; Estimated Annual Burden: 927 hours.

6. A Case Control Study of Attempted Suicide, Harris County, Texas—New—Respondents will be selected from 15–34 year old residents of Harris County, Texas that meet the study criteria. Respondents will include suicide attempters and controls in the community. Information learned from this study will help in targeting suicide prevention efforts directed at this age group. One of the Year 2000 health objectives is to reduce violent and abusive behavior and to provide for better health education and access to preventive services for all Americans. Respondents: Individuals or households; Number of Respondents: 510; Number of Responses per Respondent: 1; Average Burden per Response: 0.75 hours; Estimated Annual Burden: 383 hours.

7. A Methodologic Study to Improve Procedures to Assess Exposure to Pesticides—New—Epidemiologic studies have noted associations between farmers' use of pesticides and certain cancers. The major limitation in these investigations is the accuracy of determining historical exposure to pesticides. This project is designed to integrate information from interviews and monitoring to improve exposure assessment in epidemiologic studies. Respondents: Individuals or households, Farms, Businesses or other for-profit, Small businesses or organizations; Number of Respondents: 468; Number of Responses per Respondent: 6.31; Average Burden per Response: 0.188 hours; Estimated Annual Burden: 554 hours.

8. IHS Community Health Representative (CHR) Activity Reporting Sample—0917–0010—The Indian Health Service CHR Program obtains data on: service category, health area setting, patient's age and sex, referral from, referral to, and minutes providing service or in travel. This information is used for program planning, allocation of resources, and evaluation purposes. Respondents: State

or local Governments; Number of Respondents: 1,512; Number of Responses per Respondent: 4; Average Burden per Response: 1.5 hours; Estimated Annual Burden: 9,072 hours.

9. National Home and Hospice Care Survey—New—This survey will be conducted by personal interviewers among a sample of hospices and home health agencies about the patients they serve. The National home and hospice Care Survey will provide estimates of the characteristics of people being served by hospices and home health agencies. Respondents: Businesses or other for profit; Federal agencies or employees; Non-profit institutions; Small businesses or organizations. Number of Respondents: 1,400; Number of Responses per Respondent: 19; Average Burden per Response: .202 hours; Estimated Annual Burden: 5,368 hours.

10. Survey of Physicians HIV Prevention and Treatment Practices—New—The Centers for Disease Control will conduct a survey among physicians to determine their prevention and treatment practices for patients with HIV. CDC will use the data to help physicians identify potential improvements in HIV prevention and treatment delivery. Respondents: Individuals or households; Number of Respondents: 12,075; Number of Responses per Respondent: 1; Average Burden per Response: .169 hours; Estimated Annual Burden: 2,283 hours.

11. Nominations for ATSDR Community Assistance Panels—New—This information collection provides a mechanism for communities near hazardous waste sites to nominate residents to serve on a Community Assistance Panel. The Panel facilitates data collection, community cooperation and understanding, and public health education regarding exposures to toxic substances. Respondents: Individuals or households; Number of Respondents: 5,400; Number of Responses per respondent: 1; Average Burden per Response: .1666 hours; Estimated Annual Burden: 899 hours.

OMB Desk Officer: Shannah Koss-McCallum

Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated above at the following address: Human Resources and Housing Branch, New Executive Office Building, Room 3002, Washington, DC 20503.

Dated: March 10, 1992.

Sandra K. Mahhorn,

Deputy Assistant Secretary for Public Health Policy.

BILLING CODE 4160-17-M

Social Security Administration

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Social Security Administration publishes a list of information collection packages that have been submitted to the Office of Management and Budget (OMB) for clearance in compliance with Public Law 96-511, The Paperwork Reduction Act. The following clearance packages have been submitted to OMB since the last list was published in the **Federal Register** on February 21, 1992.

(Call Reports Clearance Office on (410) 965-4149 for copies of package)

1. Application For Benefits Under The Italy-U.S. International Social Security Agreement—0960-0445. The information collected on the form SSA-2528 is used to determine eligibility for Social Security benefits. The respondents are applicants who live in Italy.

Number of Respondents 100
Frequency of Response 1
Average Burden Per Response 20 minutes
Estimated Annual Burden 60 hours

2. Disability Hearing Officer's Report Of Disability Hearing—0960-0440. The form SSA-1205 is used by disability hearing officers to conduct disability hearings. The form serves as a guide in conducting the hearings and ensures that all pertinent issues are considered. It, also, provides a record of the hearing. The respondents are disability hearing officers in the State Disability Determinations Staffs.

Number of Respondents 8,354
Frequency of Response 1
Average Burden Per Response 1 hour
Estimated Annual Burden 8,354 hours

3. Disability Hearing Officer's Report Of Disability Hearing—0960-XXXX. The form SSA-1204 will be used by disability hearing officers to conduct disability hearings. The form will serve as a guide in conducting the hearing and ensure that all pertinent issues are considered. The respondents will be disability hearing officers in the State Disability Determinations Staffs.

Number of Respondents 2,500
Frequency of Response 1
Average Burden Per Response 1 hour
Estimated Annual Burden 2,500 hours

4. Statements Regarding Chinese Custom Marriage—0960-0068. The information collected on the forms SSA-1344/SSA-1345 is used to determine if a number holder and an alleged spouse are legally married for the purpose of paying Social Security benefits. The respondents are individuals applying for benefits based on an alleged Chinese custom marriage or individuals who attended the marriage.

Number of Respondents 200
Frequency of Response 1
Average Burden Per Response 14 minutes
Estimated Annual Burden 47 hours

5. Statement of Income and Resources—0960-0124. The information is used to determine the eligibility of certain individuals for supplemental security income (SSI) payments. The respondents are parents, sponsors and ineligible children living in the same household of an SSI applicant or recipient.

Number of Respondents 460,000
Frequency of Response 1
Average Burden Per Response 20 minutes
Estimated Annual Burden 153,333 hours

6. Representative Payee Questionnaire—Individual Representative Payee Questionnaire-Individual Representative Payee Questionnaire Institution—0960-0493. The information collected on the forms SSA-622 and SSA-6220 will be used to create a "Master Representative Payee File" data base as required by law. The respondents are individuals, institutions or agencies receiving benefits on behalf of beneficiaries.

Number of Respondents 4,770,000
Frequency of Response 1
Average Burden Per Response 5 minutes
Estimated Annual Burden 363,917

OMB Desk Officer: Laura Oliven.

Written comments and recommendations regarding these information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: March 2, 1992.

Charlotte Whitenight,

Chief of Design and Development Branch, Division of Publications.

BILLING CODE 4190-11-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-92-1917; FR-2934-N-69]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410; telephone (202) 708-4300; TDD number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 57 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intentions to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as a suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A-10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265, (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

The more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: U.S. Army: Robert Conte, Dept. of Army, Military Facilities, DAEN-ZCI-P, rm. 1E671, Pentagon, Washington, DC 20310-2600; (202) 693-4583; (This is not a toll-free number).

Dated: March 6, 1992.

Paul Roitman Bardack,

Deputy Assistant Secretary for Economic Development.

TITLE V, FEDERAL SURPLUS PROPERTY PROGRAM, FEDERAL REGISTER REPORT FOR 03/13/92

Suitable/Available Properties

Buildings (by State)

Alabama

Bldg. T00220
Fort McClellan
Fort McClellan, Co: Calhoun, AL 36205-5000

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Amended Notice of Intent To Prepare an Environmental Impact Statement; Newmont Gold Company, Eureka and Elko Counties, NV

[NV–010–92–4130–09]

AGENCY: Bureau of Land Management, Interior.

ACTION: Amendment to the notice of intent to prepare an environmental impact statement; Newmont Gold Company's gold quarry mine expansion.

SUMMARY: On February 14, 1992, a notice of intent to prepare the Gold Quarry Mine Expansion Environmental Impact Statement was published in the **Federal Register** on pages 5462–5463. Since the publication of the Notice of Intent, the Elko public scoping meeting has been relocated. The April 7, 1992, scoping meeting will now be held at the Elko Convention Center on 700 Moren Way Elko, Nevada. All other terms and conditions of the previous notice continue to apply.

Dated: March 3, 1992.

Rodney Harris,

Elko District Manager.

District Grazing Advisory Board Meeting; Montana

AGENCY: Bureau of Land Management, Butte District Office, Interior.

ACTION: Notice of meeting.

SUMMARY: A meeting of the Butte District Grazing Advisory Board will be held Tuesday, April 7 in the conference room of the Butte district office 106 North Parkmont, Butte, Montana. The meeting will begin at 8 a.m. On the agenda will be a discussion of range work planned for FY92, biological control of weeds, the wild horse program, the riparian initiative, and the district's procedures for notifying the public of planned projects.

The meeting is open to the public. Interested persons may make oral statements to the board or file written statements for the board's consideration. Anyone wishing to make oral statements should make prior arrangements with the district manager. Summary minutes of the meeting will be maintained in the district office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: James R. Owings, District Butte District, Bureau of Land Management, Box 3388, Butte, Montana 59702.

Dated: March 5, 1992.

James R. Owings,

District Manager.

BILLING CODE 4310–33–M

[CA–060–01–4212–13; CA–20045]

Realty Action; Exchange of Public and Private Lands, Riverside County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Amendment to notice of realty action.

SUMMARY: This notice amends the legal description of the selected public lands described in the Notice of Realty Action published in the **Federal Register** on Friday, May 17, 1991, in Vol. 56, No. 96, pages 22884, 22885, and 22886.

The land description is amended to include the following public land:

T. 5 S., R. 6 E.,
Sec. 28: NE1/4.
Riverside County, California Containing 160 acres, more or less.

SUPPLEMENTARY INFORMATION: The purpose of the lands exchange is to acquire non-federal land within the Santa Rosa Mountains National Scenic Area (SRMNSA) and the Salt Creek ACEC. The exchange would create a more logical and efficient land management pattern and enhance the Bureau of Land Management's goal to dispose of isolated unclassified public lands in exchange for private lands within the above described special management areas. The proposed exchange would be processed in strict conformance with the Land-Tenure Adjustment Element of the California Desert Conservation Area (CDCA) Plan. Acquisition of private lands within the SRMNSA and Salt Creek ACEC is needed to protect wildlife, recreation, cultural and aesthetic values in the Santa Rosa Mountains and the Salt Creek ACEC, as described in the previous NORA publications cited above.

The public land proposed for disposal is unclassified in the CDCA Plan and is

an isolated parcel surrounded by private lands with limited or no public access. The exchange is being pursued with the view that disposal of the isolated public land and acquisition of offered private lands within the Salt Creek ACEC and the Santa Rosa Mountains National Scenic Area would serve the public interest.

The selected public land will be used to equalize land values for offered private lands within the Salt Creek ACEC and the SRMNSA pursuant to the exchange pooling agreement between The Nature Conservancy (TNC) and the Bureau of Land Management (BLM). The BLM has entered into a land exchange pooling agreement with TNC to acquire private lands within these special management areas through a series of land exchanges to occur within the next two years until the values of the offered and selected lands reach equal fair market value as described by regulation.

The lands to be transferred from the United States will be subject to the following reservations:

1. A reservation to the United States of a right-of-way for ditches and canals constructed by the authority of the United States; Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals will be conveyed unless following the completion of mineral reports the authorized officer will determine what, if any, mineral interests will need to be reserved to the United States based upon the presence and value of mineral deposits.

3. Those rights for a canal granted to the Bureau of Reclamation by right-of-way grant LA–061554, pursuant to the Act of December 5, 1924 (43 Stat. 672).

4. Those rights for a canal granted to the Bureau of Reclamation by right-of-way grant LA–098196, pursuant to the Act of December 5, 1924 (43 Stat. 672).

5. Those rights for a Federal Aid Highway granted to the California Department of Transportation (CALTRANS) by right-of-way grant, LA–051842, pursuant to the Act of November 9, 1921 (42 Stat. 212).

6. Those rights for a Federal Aid Highway granted to CALTRANS by right-of-way grant, R–2006, pursuant to the Act of August 27, 1958 (72 Stat. 916).

In addition to the above reservations, transfer of the public land from the United States to TNC will also be subject to the following third party rights:

1. Those rights for an existing reservoir and water transmission line granted to the City of Coachella by right-of-way grant, R–2748, pursuant to the Act of February 15, 1901 (31 Stat. 790).

2. Those rights for an existing telecommunications line granted to U.S. Sprint Communication Company, its successors or assigns, by right-of-way grant, CA–18888, pursuant to the Act of October 21, 1976 (90 Stat. 2776).

3. Those rights for an existing telecommunications line granted to General Telephone and Telegraph, its successors or assigns, by right-of-way grant, CA–2197, pursuant to the Act of March 4, 1911 (36 Stat. 1253).

Publication of this notice in the **Federal Register** segregates the public land from the operation of the public land laws and the mining laws, except for mineral leasing. This segregative effect will expire upon issuance of patent or two (2) years from the date of publication, whichever occurs first.

FOR FURTHER INFORMATION CONTACT: Russell L. Kaldenberg, Area Manager, Palm Springs-South Coast Resource Area, 63–500 Garnet Avenue, North Palm Springs, California, 92258–2000, (619) 251–0812.

Dated: March 5, 1992.

Jean Rivers-Council,

Acting District Manager.

[FR Doc. 92–5841 Filed 3–12–92; 8:45 am]

BILLING CODE 4310–40–M

[CA–050–09–4333–13; CACA 27371]

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action; exchange of public and private lands in Trinity County, California.

SUMMARY: The following described public lands are being considered for exchange to Irvin J. and Edith Smith, under section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716).

Note: Not all lands identified below may be involved in the exchange. Some may be deleted to eliminate possible conflicts that could arise during processing. The final selection of properties will be made to achieve comparable values between the offered and selected lands.

Selected Public Land

T. 33 N., R. 10 W.,
Section 17, S½SW¼; Section 19, Lots 15, 20,
Mount Diablo Meridian, California,
containing 103.58 acres, more or less.

In exchange for these lands, the Federal Government will acquire the surface and mineral estate, excluding the locatable mineral estate, of non-Federal lands described as follows:

T. 33 N., R. 11 W.,
Sec. 1,

All that portion of Trinity County AP# 12–12–42 lying west of the centerline of State Highway 299W, Mount Diablo Meridian, California, Containing 64.8 acres, more or less.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to block up public lands along the Trinity River, and to provide public access to the river for recreational use. This exchange is consistent with Bureau planning for the lands involved. The public interest will be well served by making the exchange.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions:

(1) A reservation to the United States for a right-of-way for ditches and canals constructed under the authority of the Act of August 20, 1890 (43 U.S.C. 945).

(2) Any authorized land uses, such as rights-of-ways, will be identified as prior existing rights.

This notice, as provided in 43 CFR 2201.1(b), shall segregate the public lands that are being considered for this exchange. By publication of this notice, those vacant, unappropriated and unreserved public lands described above are segregated from settlement, location, and entry under the public lands and minerals laws. The segregative effect shall terminate upon issuance of patent, or upon publication in the **Federal Register** of a termination of the segregation, or two years from the date of this notice, whichever occurs first.

EFFECTIVE DATE: On or before April 27, 1992. The public is invited to comment on the proposed exchange. Comments may be sent to the Area Manager, Redding Resource Area, 355 Hemsted Drive, Redding, California 96002. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this action will become the final determination.

FOR FURTHER INFORMATION CONTACT: Patricia Cook, Realty Specialist, at the address above.

Dated: March 6, 1992.

Mark T. Morse,

Area Manager.

Bureau of Mines

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

A request extending the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1032–0116), Washington, DC 20503, telephone 202–395–3470.

Title: Mining and Mineral Resources Research Institute Program.

OMB approval number: 1032–0116.

Abstract: The purpose for collecting these data is to ensure prudent technical and fiscal monitoring of each grant by the Bureau of Mines. The data will be used to periodically track and evaluate grantee research success and conclusions; to evaluate the fiscal status of each grant; and to close each completed grant. The Bureau of Mines, Office of Mineral Institutes, which is responsible for the technical monitoring of each project, and the Bureau of Mines, Branch of Procurement, which is responsible for the sound administration of each grant will be using these data.

Bureau Form Numbers: 6–1603–S, 6–1604–A, 6–1607–A, 6–1608–A, and 6–1609–A.

Frequency: Semiannually and annually.

Description of Respondents: Universities.

Estimated Completion Time: 11 hours.

Annual Responses: 192.

Annual Burden Hours: 1,980.

BILLING CODE 4310–53–M

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicant has applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Columbus Zoo, PRT–764235, Columbus, Ohio.

On February 13, 1992, a notice of application for a permit to import a pair of giant pandas was published. The applicant has amended this application in order to import two different pandas. The pandas they wish to import are both males captive-born on August 31, 1989, at Xian Zoo, Shaanxi Provence and October 4, 1989, at Chengdu Zoo, Sichuan Province. All other aspects of the application remain unchanged. We also note that the applicant will make a donation to the Chinese Ministry of Forestry which will be used to construct the nature preservation area for the giant panda in the Lao Hsien District, Shaanxi Province.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 20 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45–4:15) in, the following office within 20 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, Room 432, Arlington, Virginia 22203. Phone: (703/358–2104); FAX: (703/358–2281).

Dated: March 9, 1992.

Susan Jacobsen,

Acting Chief, Branch of Permits, Office of Management Authority.

BILLING CODE 4310–55–M

National Park Service

Subsistence Resource Commission; Meeting

AGENCY: National Park Service, Interior.

ACTION: Subsistence Resource Commission meeting.

SUMMARY: The Superintendent of Aniakchak National Monument and the Chairperson of the Subsistence Resource Commission for Aniakchak National Monument announce a forthcoming meeting of the Aniakchak National Monument Subsistence Resource Commission.

The following agenda items will be discussed:

(1) Introduction of commission members and guests.

(2) Superintendent's welcome: a. Review of SRC function and purpose.

b. Subsistence management report.

(3) Old Business: a. Review and approve minutes from last meeting.

b. Election of Chairperson.

c. Status of hunting plan recommendations.

(4) New Business: a. Federal Subsistence Program update.

b. Public and other agency comments.

(5) Subsistence hunting program recommendations work session.

a. Identify monument subsistence hunting issues.

b. Draft recommendations.

DATE: The meeting will begin at 9 a.m. on Tuesday, March 24, 1992, and conclude around 5 p.m. We will reconvene at 9 a.m. on Wednesday, March 25, 1992, and conclude at 12 noon.

LOCATION: The meeting will be held at the Port Heiden Fire Hall, Port Heiden, Alaska.

FOR FURTHER INFORMATION CONTACT: Alan Eliason, Superintendent, P.O. Box 7, King Salmon, Alaska 99613. Phone (907) 246–3305.

SUPPLEMENTARY INFORMATION: The Subsistence Resource Commission is authorized under title VIII, section 808, of the Alaska National Interest Lands Conservation Act, Public Law 96–487, and operates in accordance with the provisions of the Federal Advisory Committees Act.

Paul F. Haertel,

Acting Regional Director.

BILLING CODE 4310–70–M

Cape Cod National Seashore, South Wellfleet, MA; Advisory Commission Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770, 5 U.S.C. App 1 section 10), that a meeting of the Cape Cod National Seashore Advisory Commission will be held on Friday, March 27, 1992.

The Commission was reestablished pursuant to Public Law 99–349, Amendment 24. The purpose of the Commission is to consult with the Secretary of the Interior, or his designee, with respect to matters relating to the development of the Cape Cod National Seashore, and with respect to carrying out the provisions of section 4 and 5 of the Act establishing the Seashore.

The Commission will sponsor an informal panel discussion at Park

Headquarters, Marconi Station, South Wellfleet, MA from 10 a.m. until noon to address cooperative efforts between the National Park Service and state and local agencies and organizations on Cape Cod. The commission members will then meet at 1 p.m. for a regular business meeting which will also convene at Park Headquarters for the following reasons:

1. Adoption of Agenda.
2. Approval of Minutes of Previous Meeting.
3. Reports of Officers.
4. Old Business.
(a) Low impact use—walking trails.
(b) Highland Light update.
5. Superintendent's Report.
6. General Management Plan Update.
7. New Business.
8. Agenda for Next Meeting.
9. Date for Next Meeting.
10. Communications/public comment.
11. Adjournment.

The business meeting is open to the public. It is expected that 15 persons will be able to attend the meeting in addition to the Commission members.

Interested persons may make oral/written presentations to the Commission during the business meeting or file written statements. Such requests should be made to the park superintendent at least seven days prior to the meeting.

Further information concerning this meeting may be obtained from the Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663.

Dated: March 4, 1992.

Steven H. Lewis,

Acting Regional Director.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-55 (Sub-No. 413X)]

CSX Transportation, Inc.—Abandonment Exemption—In Webster County, WV

Applicant has filed a notice of exemption under 49 CFR 1152 subpart F—*Exempt Abandonments* to abandon its 13.0-mile line of railroad between milepost BUG 10.5, near Bolair, and milepost BUG-23.5, near Jerryville, in Webster County, WV.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 12, 1992 (unless stayed). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 23, 1992.[3] Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by April 2, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Charles M. Rosenberger, CSX Transportation, Inc., 500 Water Street, J150, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 18, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927-6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: March 3, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92-5919 Filed 3-12-92; 8:45 am]

BILLING CODE 7035-01-M

[Docket No. AB-3 (Sub-No. 99X)]

Missouri Pacific Railroad Company—Abandonment Exemption—In Denton County, TX

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon its 7.97-mile line of railroad between milepost 721.53, near Denton, and milepost 729.5, near Coors, in Denton County, TX.

Applicant has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 12, 1992 (unless stayed). Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 23, 1992.[3] Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by April 2, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: Joseph D. Anthofer, Missouri Pacific Railroad Company, 1416 Dodge Street, Room 830, Omaha, NE 68179.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 18, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927-6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: March 3, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

[Docket Nos. AB-3 (Sub-No. 100X) and AB-364 Sub No. IX]

Missouri Pacific Railroad Co.—Abandonment Exemption—In Grayson County, TX; and Mid-Michigan Railroad Co., Doing Business as Texas Northeastern Railroad—Discontinuance Exemption—In Grayson County, TX [1]

Missouri Pacific Railroad Company (MP) and Mid-Michigan Railroad Company d/b/a Texas Northeastern Railroad (MM), have filed a notice of exemption under 49 CFR 1152 subpart F—Exempt Abandonments and Discontinuances for MP to abandon and MM to discontinue service over a 18.105-mile line of railroad between milepost 154.995, near Sherman, and milepost 173.10, near Whitesboro, in Grayson County, TX.

MP and MM have certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic on the line can be rerouted over other lines; and (3) no formal complaint filed by a user of rail service on the line (or a State or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or with any U.S. District Court or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment and discontinuance shall be protected under Oregon Short Line R. Co.—Abandonment—Goshen, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 12, 1992 (unless stayed). Petitions to stay that do not involve environmental issues,[2] formal expressions of intent to file an offer of financial assistance under 49 CFR 1152.27(c)(2),[3] and trail use/rail banking statements under 49 CFR 1152.29 must be filed by March 23, 1992.[4] Petitions for reconsideration or requests for public use conditions under 49 CFR 1152.28 must be filed by April 2, 1992, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to MP's and MM's representative: Joseph D. Anthofer, Missouri Pacific Railroad Company, Mid-Michigan Railroad Company, 1416 Dodge Street, room 830, Omaha, NE 68179.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

MP and MM have filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment and discontinuance.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will issue the EA by March 18, 1992. Interested persons may obtain a copy of the EA from SEE by writing to it (Room 3219, Interstate Commerce Commission, Washington, DC 20423) or by calling Elaine Kaiser, Chief, SEE at (202) 927-6248. Comments on environmental and energy concerns must be filed within 15 days after the EA becomes available to the public.

Environmental, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Decided: March 9, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

[1] By letter (telecopier) filed March 6, 1992, Mid-Michigan Railroad Company indicates that it is operating the line under the trade name Texas Northeastern Railroad.

[2] A stay will be routinely issued by the Commission in those proceedings where an informed decision on environmental issues (whether raised by a party or by the Section of Energy and Environment in its independent investigation) cannot be made prior to the effective date of the notice of exemption. See Exemption of Out-of-Service Rail Lines, 5 I.C.C.2d 377 (1989). Any entity seeking a stay involving environmental concerns is encouraged to file its request as soon as possible in order to permit this Commission to review and act on the request before the effective date of this exemption.

[3] See Exempt. of Rail Abandonment—Offers of Finan. Assist., 4 I.C.C.2d 164 (1987).

[4] The Commission will accept a late-filed trail use statement as long as it retains jurisdiction to do so.

[Finance Docket No. 31973]

Santa Fe Southern Railway Inc.—Acquisition and Operation Exemption—the Atchison, Topeka and Santa Fe Railway Company

Santa Fe Southern Railway, Inc. (SFS), a non-carrier, has filed a verified notice for an exemption to acquire from The Atchison, Topeka and Santa Fe Railway

Company (ATSF) and operate the 18.12-mile Santa Fe Subdivision in Santa Fe County, NM. The line extends between milepost 0.01, at Lamy, and milepost 18.125, at Santa Fe, including ATSF's rail yard and Track No. 21 in Santa Fe. The exemption became effective on February 17, 1992 (SFS was to have closed on the acquisition February 19, 1992).[1]

Any comments must be filed with the Commission and served on: John D. Heffner, Gerst, Heffner, Carpenter & Podgorsky, 1700 K Street, NW., suite 1107, Washington, DC 20006.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: March 9, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[FR Doc. 92-5820 Filed 3-12-92; 8:45 am]

BILLING CODE 7035-01-M

[1] SFS has invoked the class exemption at 49 CFR 1150.31 to acquire and operate an active rail line over which ATSF currently provides only freight service. SFS indicates that it "contemplates offering rail passenger service beginning in the spring or summer of 1992." The class exemption extends to the acquisition and operation of rail property. SFS does not contend that it has acquired any rights to provide passenger service from ATSF, and this exemption does not confer any rights to provide passenger service.

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget

BACKGROUND: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. chapter 35), considers comments on the reporting/recordkeeping requirements that will affect the public.

LIST OF RECORDKEEPING/REPORTING REQUIREMENTS UNDER REVIEW: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

- The Agency of the Department issuing this recordkeeping/reporting requirement.
- The title of the recordkeeping/reporting requirement.
- The OMB and/or Agency identification numbers, if applicable.
- How often the recordkeeping/reporting requirement is needed.
- Whether small businesses or organizations are affected.
- An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.
- The number of forms in the request for approval, if applicable.
- An abstract describing the need for and uses of the information collection.

COMMENTS AND QUESTIONS: Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Kenneth A. Mills ((202) 523-5095). Comments and questions about the items on this list should be directed to Mr. Mills, Office of Information Resources Management Policy, U.S. Department of Labor, 200 Constitution Avenue, NW., room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, room 3001, Washington, DC 20503 ((202) 395-6880).

Any member of the public who wants to comment on recordkeeping/reporting requirements which have been submitted to OMB should advise Mr. Mills of this intent at the earliest possible date.

Revision

Bureau of Labor Statistics

CURRENT POPULATION SURVEY CATI/CAPI OVERLAP SAMPLE

Form No.	Affected public	No. of respondents	Freq	Ave. time per response
Revised CPS with Debriefing	Households	2,150	4	0.1667 Hours.

1,433.62 Total Hours in 1991.

The Current Population Survey is a household sample survey that is the primary source of data on the growth of the labor force and on trends in employment and unemployment. The overlap sample will benchmark differences in labor force estimates between the current system and the proposed system.

Extension

Bureau of Labor Statistics

Employment, Wages and Contributions Report (ES-202 Program)

BLS 3031
Quarterly
State or local governments
Small businesses or organizations are not affected
212 respondents
983,778 total burden hours
4,640.462 average hours per response

The Employment, Wages, and Contributions Report is a summary of employment, wage and contributions data collected by State Employment Security Agencies (SESA) from employers subject to the State unemployment insurance (UI) and Unemployment Compensation for Federal Employees (UCFF) laws. The data are used by Federal and State governments in the administration of unemployment programs, by the Bureau of Labor Statistics and Bureau of Economic Analysis for statistical purposes, by Federal agencies for administrative and research purposes, and by public and private researchers.

Reinstatement

Mine Safety and Health Administration

Annual Status Report and Certification and Weekly Inspections of Refuse Piles and Impoundments

1219-0015
Businesses and other for profit
Small businesses or organizations

Reporting/recordkeeping requirement	Respondents	Frequency	Average time per response
Annual Status Report and Certification	860	Annually	2 hours.
Weekly Inspections with Monitoring Instruments	332	Weekly	3 hours.
Weekly Inspection without Monitoring Instruments	496	Weekly	2 hours.
Total Burden Hours 105,304 hours.			

Requires coal mine operators to submit to MSHA an annual status report and certification on impoundments and hazardous refuse piles; and to keep records of the results of weekly examinations and instrumentation monitoring of impoundments.

Impoundment and Refuse Pile Plans and Revisions

1219-0060
On occasion
Businesses and other for profit
small businesses or organizations
210 respondents
79,300 total burden hours
377.62 average hours per response

Requires coal mine operators to submit plans, and revisions thereof, for construction of refuse piles and impoundment structures to MSHA for approval.

Escape and Evacuation Plan (30 CFR 57.11053)

1219-0045
Semi-Annually reporting; recordkeeping
Businesses or other for-profit; small businesses or organizations
315 respondents
7,560 total burden hours
24 hours average per response

Standard 20 CFR 75.11053 requires operators of metal and nonmetal underground mines to develop and keep current escape and evacuation plans for use in case of an emergency.

Respirator Program Records

1219-0048
On occasion
Businesses and other for profit
Small businesses or organizations
Written standard operating procedures; 600 responses; 5 hours per response; 375 total burden hours
Respirator fit testing records: 1,500 responses; 15 minutes per response; 375 total burden hours
Record date of inspections of emergency-use respirators; 750 responses; 24 seconds per response; 10 total burden hours
Record results of inspections of emergency-use respirators: 30 responses; 15 seconds; 1 burden hour

Respirator programs are required to be established when engineering controls fail to reduce airborne contaminants to permissible levels. Mine operators are also required to conduct fit testing of respirator devices and to keep records of the results. Fit-testing records are used to ensure that a respirator worn by an individual is in fact the one for which the individual received a tight fit. Emergency-use respirators are required to be inspected monthly to assure that they are in satisfactory working condition.

BILLING CODE 4510-24-M

Employment Standards Administration,

Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment

procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) documents entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., room S-3014, Washington, DC 20210.

Correction to General Wage Determination Decisions

Pursuant to the provisions of the Regulations set forth in title 29 of the Code of Federal Regulations, part 1, section 1.6(d), the Administrator of the Wage and Hour Division may correct any wage determination that contains clerical errors.

Corrections being issued in the Government Printing Office document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts" are indicated by Volume and are included immediately following the transmittal sheet(s) for the appropriate Volume(s).

Volume II

Wage Decision No. MN90-7, through Modification No. 4
Wage Decision No. MN90-8, through Modification No. 2
Wage Decision No. MN90-15, through Modification No. 2
Wage Decision No. MN91-7, through Modification No. 3
Wage Decision No. MN91-8, through Modification No. 2
Wage Decision No. MN91-15, through Modification No.3
Wage Decision No. MO91-9, through Modification No. 1
Wage Decision No. WI91-10, through Modification No. 2

Pursuant to the Regulations, 29 CFR part 1, section 1.6(d), such corrections shall be included in any bid specifications containing the wage determinations, or in any on-going contracts containing the wage determinations in question, retroactively to the start of construction.

New General Wage Determination Decisions

The numbers of the decisions added to the Government Printing Office document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts" are listed by Volume, State, and page number(s).

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington DC, this 6th day of March 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

Employment and Training Administration

Attestations Filed by Facilities Using Nonimmigrant Aliens As Registered Nurses

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is publishing, for public information, a list of the following health care facilities which plan on employing nonimmigrant alien nurses. These organizations have attestations on file with DOL for that purpose.

ADDRESSES: Anyone interested in inspecting or reviewing the employer's attestation may do so at the employer's place of business.

Attestations and short supporting explanatory statements are also available for inspection in the Immigration Nursing Relief Act Public Disclosure Room, U.S. Employment Service, Employment and Training Administration, Department of Labor, room N4456, 200 Constitution Avenue, NW., Washington, DC 20210.

Any complaints regarding a particular attestation or a facility's activities under that attestation, shall be filed with a local office of the Wage and Hour Division of the Employment Standards Administration, U.S. Department of Labor. The address of such offices are found in many local telephone directories, or may be obtained by writing to the Wage and Hour Division, Employment Standards Administration, Department of Labor, room S3502, 200 Constitution Avenue, NW., Washington, C 20210.

FOR FURTHER INFORMATION CONTACT: *Regarding the Attestation Process:* The Employment and Training Administration has established a voice-mail service for the H-1A nurse attestation process. Call Telephone Number: 202-535-0643 (this is not a toll-free number). At that number, a caller can:

(1) Listen to general information on the attestation process for H-1A nurses;

(2) Request a copy of the Department of Labor's regulations [20 CFR part 655, subparts D and E, and 29 CFR part 504, subparts D and E) for the attestation process for H-1A nurses, including a copy of the attestation form (form ETA 9029) and the instructions to the form;

(3) Listen to information on H-1A attestations filed within the preceding 30 days;

(4) Listen to information pertaining to public examination of H-1A attestations filed with the Department of Labor;

(5) Listen to information on filing a complaint with respect to a health care facility's H-1A attestation (however, see the telephone number regarding complaints, set forth below); and

(6) Request to speak to a Department of Labor employee regarding questions not answered by Nos. (1) through (4) above.

Regarding the Complaint Process: Questions regarding the complaint process for the H-1A nurse attestation program shall be made to the Chief, Farm Labor Program, Wage and Hour Division. Telephone: 202-523-7605 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Immigration and Nationality Act requires that a health care facility seeking to use nonimmigrant aliens as registered nurses first attest to the Department of Labor (DOL) that it is taking significant steps to develop, recruit and retain United States (U.S.) workers in the nurse profession. The law also requires that these foreign nurses will not adversely affect U.S. nurses and that the foreign nurses will be treated fairly. The facility's attestation must be on file with DOL before the Immigration and Naturalization Service will consider the facility's H-1A visa petitions for bringing nonimmigrant registered nurses to the United States. 26 U.S.C. 1101(a)(15)(H)(i)(a) and 1181(m). The regulations implementing the nursing attestation program are at 20 CFR part 655 and 29 CFR part 504, 55 FR 50500 (December 6, 1990). The Employment and Training Administration, pursuant to 20 CFR 655.310(c), is publishing the following list of facilities which have submitted attestations which have been accepted for filing.

The list of facilities is published so that U.S. registered nurses, and other persons and organizations can be aware of health care facilities that have requested foreign nurses for their staffs. If U.S. registered nurses or other persons wish to examine the attestation (on Form ETA 9029) and the supporting documentation, the facility is required to make the attestation and documentation available. Telephone numbers of the facilities' chief executive officers also are listed, to aid public inquiries. In addition, attestations and supporting short explanatory statements (but not the full supporting documentation) are available for inspection at the address for the Employment and Training Administration set forth in the **ADDRESSES** section of this notice.

If a person wishes to file a complaint regarding a particular attestation or a facility's activities under that attestation, such complaint must be filed at the address for the Wage and Hour Division of the Employment Standards Administration set forth in the **ADDRESSES** section of this notice.

Signed at Washington, DC, this 6th day of *March 1992.*

Robert J. Litman,

Acting Director United States Employment Service.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 23, 1992.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, no later than March 23, 1992.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Adminstration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 2nd day of March 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

APPENDIX

Petitioner (Union/Workers/Firm)	Location	Date received	Date of petition	Petition No.	Articles produced

Gandalf Systems Corp.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on January 17, 1992, applicable to all workers of Gandalf Systems Corporation, Cherry Hill, New Jersey. The notice was published in the **Federal Register** on February 4, 1992 (57 FR 4218).

New information from the company shows that Gandalf had worker separations in California, Florida, Georgia, Illinois, Massachusetts, Missouri, New Jersey, New York, Ohio, Texas and Virginia. The former employees worked in administration, service and sales positions which supported the manufacturing operations in Cherry Hill, New Jersey. All the former employees were on the company payroll.

The intent of the Department's certification is to include all workers of Gandalf who were adversely affected by increased imports.

The amended notice applicable to TA-W-26,566 is hereby issued as follows:

All workers of Gandalf Systems Corporation, Cherry Hill, New Jersey; Encino, California; Foster City, California; Sunrise, Florida; Atlanta, Georgia; Chicago, Illinois; Wellesley, Massachusetts; St. Louis, Missouri; East Rutherford, New Jersey; New York, New York; Dublin, Ohio; Houston, Texas; Herndon, Virginia and Vienna, Virginia who became totally or partially separated from employment on or after October 31, 1990 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 5th day of March 1992.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-26,415, 416, 416A, 417]

Schlumberger Technology Corp.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In the matter of Schlumberger Technology Corp., d/b/a SWS NAM, Inc., Larose Offshore Office, Cutoff, Louisiana; TA-W-26,416 Schlumberger Technology Corp., d/b/a SWS NAM, Inc., Well Services Office, Belle Chasse, Louisiana; TA-W-26,416A Schlumberger Technology Corp., d/b/a SWS NAM, Inc., Special Services Office, Belle Chasse, Louisiana; TA-W-26,417 Schlumberger Technology Corp., d/b/a SWS NAM, Inc., Renovation Center, Belle Chasse, Louisiana.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) as amended by the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100-418), the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on November 27, 1991, applicable to all workers of the subject firm. The notice was published in the **Federal Register** on December 20, 1991 (56 FR 66086).

At the request of the State Agency the Department reviewed the subject certifications. New information shows that all of the claimants' wages were reported under Schlumberger Technology Corporation, d/b/a SWS NAM Inc., Houston, Texas. Therefore, in order to properly reflect the correct worker group, the Department has changed the name from Schlumberger to Schlumberger Technology Corporation, d/b/a SWS NAM Inc.

The amended notice applicable to TA-W-26,415, TA-W-26,416, TA-W-26,416A and TA-W-26,417 is hereby issued as follows:

All workers of Schlumberger Technology Corporation, d/b/a SWS NAM Inc., Well Services Office, Belle Chasse, Louisiana (TA-W-26,416); Special Services Office, Belle Chasse, Louisiana (TA-W-26,416A); Renovation Center, Belle Chasse, Louisiana (TA-W-26,417); and Larose Offshore Office, Cutoff, Louisiana (TA-W-26,415) who became totally or partially separated from employment on or after January 1, 1991 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 5th day of March 1992.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

DEPARTMENT OF LABOR

National Advisory Commission on Work-Based Learning; Open Meeting

SUMMARY: The National Advisory Commission on Work-Based Learning was established in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463) on December 14, 1990, **Federal Register** December 26, 1990, pg. 53063). The Commission has broad responsibility to advise the Secretary of Labor on ways to increase the skill levels of the American work force and expand access to work-based learning. The Commission is developing strategic action plans for:

- A voluntary, industry-led system of skill standards and for certification;
- Integrating human resource development and technology diffusion efforts;
- Promoting labor-management cooperative efforts to implement work-based learning;
- Changing accounting methods to promote human resource development;
- Valuing diversity as a corporate strategic asset;
- Developing a national quality award for excellence in human resource development.

TIME AND PLACE: The meeting will be held on Tuesday, April 7, 1992, from 9 a.m. until 4:30 p.m. at the Grand Hotel, 2350 M Street, NW., Washington, DC 20037.

AGENDA: The agenda for the meeting will include.

Tuesday, April 7

9 a.m.—Call meeting to order
Discussion of Framework for Action
Break
Workgroup Reports
Workgroup Reports
Public Comment Period
Adjourn at 4:30 p.m.

Note: Lunch will be taken at 12 noon to 1:15 p.m. The meeting will be open to the public. Thirty minutes will be set aside for public comments. Seating will be available for the public on a first-come, first-serve basis. Handicapped individuals wishing to attend should contact the Commission on Work-Based Learning in advance, so that staff can make appropriate accommodations. Individuals or organizations wishing to submit written statements should send 10 copies to Peter Carlson, Managing Director, National Advisory Commission on Work-Based Learning, FPB S2028, 200 Constitution Avenue NW., Washington, DC 20210, by March 31, 1992.

FOR FURTHER INFORMATION CONTACT: Peter E. Carlson, Managing Director, National Advisory Commission on Work-Based Learning, FPB S2028, 200 Constitution Avenue NW., Washington, DC 20210; Tel. (202) 523-8271.

Signed at Washington, DC, this 9th day of March, 1992.

Roberts T. Jones,
Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

Advisory Committee on the Use of Air in the Belt Entry to Ventilate the Production (Face) Area at Underground Coal Mines and Related Provisions; Meeting

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of advisory committee meeting.

SUMMARY: This notice provides the date, time and place for the first meeting of the Mine Safety and Health Administration's Advisory Committee on the Use of Air in the Belt Entry to Ventilate the Face Area at Underground Coal Mines and Related Provisions.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Ballston Tower #3, 4015 Wilson Boulevard, room 631, Arlington, Virginia 22203; phone (703) 235-1910.

SUPPLEMENTARY INFORMATION: Under sections 101(a) and 102(c) of the Federal Mine Safety and Health Act of 1977, a public meeting of the advisory committee will be held between the hours of 9 a.m. and 5 p.m. on March 30 and 31, 1992, at the Ramada Renaissance Hotel (Gallery III Ballroom) located at 950 N. Stafford Street, Arlington, Virginia 22203.

The Secretary of Labor appointed this advisory committee to make recommendations on conditions under which belt entry air could be safely used in the face areas of underground coal mines. The advisory committee's charter reflects a broad mandate to assess the safety and health aspects surrounding the use of air in the belt entry to ventilate the production area at underground coal mines. The committee will discuss a wide variety of issues which relate to necessary protections for assuring safe and healthful mining environment.

The purpose of the meeting is: (1) To give an historical overview on the prohibition of the use of belt air to ventilate the working face in underground coal mines; (2) to allow the committee members to become familiar with the issues involved and (3) to set an agenda for the committee to follow during its six-month tenure.

The public is invited to attend. The chairperson will provide an hour at the end of the meeting to allow interested persons to make comments. Official records of the meeting will be available

for public inspection at the above address.

Dated: March 11, 1992.

William J. Tattersall,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

NATIONAL COMMUNICATIONS SYSTEM

Federal Telecommunication Standards

AGENCY: National Communications System, Office of Technology and Standards.

ACTION: Notice for comment on proposed standard.

SUMMARY: The purpose of this notice is to solicit the views of Federal agencies, industry, the public, and State and local governments on proposed Federal Telecommunications Standard 1049; "Telecommunications: HF Radio Automatic Operation in Stressed Environments, Section 1: Linking Protection."

DATE: Comments are due by June 11, 1992.

ADDRESS: Send comments to the National Communications System, Office of Technology and Standards, Attn: NT, 701 South Courthouse Road, Arlington, VA 22204-2198.

FOR FURTHER INFORMATION CONTACT: Institute for Telecommunication Sciences, National Telecommunications and Information Administration, Mr. Robert T. Adair, telephone (303) 497-3723, or Mr. David F. Peach, telephone (303) 497-5309.

SUPPLEMENTARY INFORMATION:

1. The General Services Administration (GSA) is responsible under the provisions of the Federal Property and Administrative Services Act of 1949, as amended, for the Federal Standardization Program. On August 14, 1972, the Administrator of General Services designated the National Communications System (NCS) as the responsible agent for the development of Federal telecommunication standards for NCS interoperability and the computer communication interface.

2. Prior to the adoption of proposed Federal standards, it is important that proper consideration be given to the needs and views of Federal agencies, industry, the public, and State and local governments.

3. Requests for copies of the November 14, 1991 draft proposed FED-STD-1049, Section 1 should be directed to the National Communications System, Office of Technology and Standards, Attn: NT, 701 South Courthouse Road, Arlington, VA 22204-2198.

Dennis Bodson,

Assistant Manager, NCS Office of Technology and Standards.

BILLING CODE 3610-05-M

NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE

Proposed National Career Development (Institute) Training Program

AGENCY: National Occupational Information Coordinating Committee.

ACTION: Notice; request for comment.

SUMMARY: The Congress has appropriated to the National Occupational Information Coordinating Committee (NOICC) $1.2 million which are to be used for—

The establishment of career development programs to train personnel in assisting students to understand themselves in the context of their career development, to be aware of the world of work, to understand the linkage between academic skills and work-related skills, and to make effective career decisions.

In keeping with the stated wishes of the Congress and in conjunction with State Occupational Information Coordinating Committee (SOICC's), the NOICC is seeking to establish a National Career Development (Institute) Training Program, the goals of which are:

- To develop and provide a National training capability for career development counselors, advisors, teachers, instructors, administrators and paraprofessionals that can be institutionalized in States and/or regions.
- To provide a National technical assistance role and evaluation capacity to support career development training throughout the NOICC/SOICC network.
- To expand and improve upon ongoing NOICC/SOICC career development training initiatives.
- To support a specified range of SOICC initiated career development projects and activities to enhance the base for the training and/or contribute to the training in State or local settings.

The NOICC plans to work with SOICC's and a nationally recognized university (or consortium of universities) to establish a National Career Development (Institute) Training Program and proposes to split on a roughly 50:50 basis appropriated resources between (1) the academic institute and (2) the SOICC's.[1] The university (or universities) will be responsible for establishing a National Career Development Training Institute that can formulate, facilitate, and evaluate a National career development training agenda through one or more cooperating regional centers or programs and the States. The SOICC's will be responsible for creating in each State an institutionalized capacity to assist in determining a National career development training agenda and in carrying out specific training or evaluation activity.

The Executive Director of the NIOCC is soliciting from SOICC's, selected Federal agencies, and key counseling, education, and employment and training organizations suggestions about the structure and content of the Career Development Training (Institute) Program. The Executive Director also wishes to hear opinions of the public at large on a number of basic program design questions and is, therefore, requesting comment on the same.

DATES: Written comments on this notice are invited. Comments shall be received by April 13, 1992.

ADDRESSES: Comments shall be mailed to Ms. Juliette Lester, Executive Director, National Occupational Information Coordinating Committee, 2100 M Street NW., suite 156, Washington, DC 20037.

FOR FURTHER INFORMATION CONTACT: Burton Carlson or Walton Webb at (202) 653-5671.

SUPPLEMENTARY INFORMATION: The NOICC is a Federal interagency committee established by Congress in 1976 to promote and coordinate the development and use of occupational, labor market and career information. It is authorized and funded through sections 125 and 464 of the Job Training Partnership Act (JTPA) and title IV, part C, sections 422(a) and 451(a) of the Carl D. Perkins Vocational and Applied Technology Education Act (PVATEA).

The need to match worker skills with workplace demands is a topic of increasing National concern, both with respect to workers now employed across this nation and with respect to students leaving school and entering the workplace for the first time. Successful matching of worker skills with job requirements depends to a large measure on the individual worker and

[1] Funds going to a university or consortium of universities will also be channeled through a SOICC.

the extent to which he or she understands the kinds of jobs available, the skills required, and the relationship between academic preparation and job performance. The proposed National Career Development Training (Institute) Program seeks to address this issue by increasing the knowledge, tools, and skills of those persons who assist youth and adults with occupational preparation and career decisions.

Career development is a growth and learning process important to individuals across their lifespan. The persons who need career development assistance vary in age, sex, education, experience, the kinds of assistance needed, as does the context in which such assistance is provided. The persons rendering career development assistance represent a variety of agencies and situations and have studied or been trained in a variety of subjects and disciplines. They work with a variety of potential service groups. As a result, the structure and content of the proposed career development institute program raises a number of questions.

The questions that follow are, in the view of the NOICC, basic to the structure and content of the Career Development Training (Institute) Program. The public is, therefore, invited to respond to these questions and/or to add to the list any questions it believes the NOICC has left out. The specific questions are:

1. Should the primary focus of the National Career Development Training (Institute) Program be creation—at the individual State level—of a State capacity for developing and delivering career development training to counselors, counselor educators and others; or should the primary program be the development and direct provision of training through a National Institute? If State capacity building is the answer, should attention be directed to all States, or be limited to those States that demonstrate early commitment and ability to field training in a short period of time? If the answer is the direct provision of training, how can a National program with limited funds be structured to supply a sufficient amount of training to make a difference? Does regionalization of the program offer an acceptable option?

2. How should the National Career Development Training Institute be structured? Should a single university approach be used or should multiple universities be involved? If a multiple university arrangement is preferred, how should that relationship be structured?

3. What should the role of the National Institute be? Should it be confined to a developmental and train-the-trainer role, or should it engage in the actual delivery of training, or both? To what extent should a National Institute be expected to provide technical assistance to States and on what basis? Should the Institute engage in evaluation and research?

4. Should there be created a National Institute advisory or governing committee? If so, how should it be configured and what authority should it exercise?

5. If a National/Regional configuration is used for the Institute, should the roles of universities/centers at the two levels differ? Or should they be comparable?

6. What should the role of the NOICC be? Should the NOICC be limited to funding and oversight? Or is a more active involvement recommended? If so, what should that involvement include?

7. What should the role of SOICC's be? Should they be treated as planning/administrative entities only, or should they be directly involved in the delivery of career development training? What should be the SOICC's relationship to the National Institute? To any regional centers or programs?

8. Should training offered through the National Institute or States be targeted to individual State audiences, or should training be made available through the Center and States to interested parties on a regional or national basis?

9. Should the National Institute or States offer courses designed for a general audience, no matter what their experience or education; or should distinction be made between beginning and advanced curricula? What sort of admissions policies and procedures should be developed to make the best and widest use of the program?

10. Should the National training curriculum offer specialized courses to persons who work with specific populations, for example, teachers of elementary students or counselors in correctional facilities? Or should curriculum be organized solely by topics or subject matter applicable to all clientele and all situations? What topics might the curriculum include?

11. Should the National Institute or States be authorized to conduct or support "in-house" or "cooperative" career development training programs for "closed audiences"—such as the personnel of a single school district or Federal prison?

12. Should the National Institute or States conduct training specifically designed for paraprofessionals who have not completed a four-year degree program or received professional postsecondary certification?

13. Should the National Institute or State training be structured so that some sort of "grade" or certificate is given to persons successfully completing a course or session? Should satisfactory completion of training result in academic credit? If grades, certificates, or academic credit are to be issued, what sort of certification should be required of faculty and course content?

14. Should the National Institute or State training be provided free-of-charge, or should training be made available on a fee basis? If training is offered on a fee basis, should scholarships or financial assistance be made available to qualified persons who cannot afford the cost?

15. If training is offered on a fee basis, should the Institute or State training materials (textbooks, handbooks, videos) be published and disseminated to users who have not participated in related National Institute programs?

16. Should the National Institute and States, independent of NOICC, pursue grants and contracts from other public and private organizations to support the overall goals of the National Career Development Training Program?

Request for Public Comment

The NOICC is seeking public response to these questions and any other appropriate comments or suggestions interested parties wish to make.

Signed at Washington, DC, this 10th day of March, 1992.

Juliette Lester,

Executive Director.

BILLING CODE 4510-23-M

NATIONAL SCIENCE FOUNDATION

Permit Application Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit application received under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act of 1978 at title 45 part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by April 17, 1992. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESS: Comments should be addressed to Permit Office, room 627, Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357–7817.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest.

1. Applicant

Gerald L. Kooyman, Physiological Research Lab 0204, Scripps Institution of Oceanography, University of California, San Diego, La Jolla, CA 92093.

Activity for Which Permit Requested

Taking. Import into USA. Enter Specially Protected Area. The applicant is conducting research on penguin foraging effort and breeding success. These studies will be the basis for a study of emperor penguins as environmental monitors in the Ross Sea. Up to 115 adult and 210 emperor penguin chicks will be captured to attach instruments, perform stomach lavage, weigh, or collect blood samples. Carcasses of 5 adults, 5 chicks, and 15 eggs will be salvaged for morphometric measurements.

Location

Cape Washington, Coulman Island, Cape Roget, Cape Crozier.

Dates

September 1992–December 1993.

Charles E. Myers,

Permit Officer, Division of Polar Programs.

[FR Doc. 92–5944 Filed 3–12–92; 8:45 am]

BILLING CODE 7555-01-M

Nuclear Regulatory Commission

Carolina Power & Light Co; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards; Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. 50–261 issued to Carolina Power & Light Company (the licensee) for operation of the H.B. Robinson Steam Electric Plant, Unit No. 2, located in Darlington County, South Carolina.

The proposed amendment would add a footnote to Technical Specifications (TS) 3.14.3.2.a and 3.14.4.2.a that would suspend the requirements of these sections of the fire protection Technical Specifications for the duration of the containment Integrated Leak Rate Test (ILRT) and the Structural Integrity Test (SIT).

By letter dated March 6, 1992, the licensee requested exigent handling of the proposed amendment request. The licensee stated that they have exerted their best effort to make a timely application for the proposed amendment. Initial concerns regarding the ability to satisfy the required action statement of TS 3.14.3.2.a and 3.14.4.2.a were expressed during a review of the ILRT procedure on February 4, 1992. An investigation was initiated which involved a review of the test procedure, the applicable TS, testing practices used at other sites, and the approach used during a 1987 performance of this test. Without exigent handling, it is projected that the performance of the ILRT and SIT will be delayed approximately one week, which would likewise delay the start of critical containment work and would probably extend the outage completion date.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed amendment would provide a temporary exemption from the compensatory actions required when the specified pre-action system and fire hose stations are inoperable during concurrent performance of the Integrated Leak Rate Test (ILRT) and the Structural Integrity Test (SIT). This exemption will apply only to these very specific conditions for a finite period of time.

During the performance of the ILRT, the plant will be in cold shutdown. By de-energizing all components within the containment that are not required for either ILRT performance or maintenance of shutdown core cooling, potential fire ignitions sources will be minimized. Also, a thorough containment walkdown by the fire protection staff prior to initiation if the ILRT will ensure that any combustible materials are minimized or eliminated.

The fire hose station and Pre-Action Systems are not required for achieving and maintaining either hot or cold shut down.

It may be postulated that the consequences of a fire may be slightly increased due to an unspecified delay in confirming and responding to an actual fire in the containment. Upon receipt of alarms for two trains of the fire detection system, there will be some time required for assessment of the situation, and some unspecified delay in responding to the fire while the ILRT is suspended and containment is accessed. However, by de-energizing nonessential equipment within the containment, and minimizing or eliminating combustible materials prior to ILRT pressurization, the probability of a fire occurring will be extremely small. In fact, since the containment will be secured immediately following the fire protections walkdown, there will be no possibility of transient combustibles entering the area. As such, a once per shift inspection should be unnecessary since there should be no change in the "potential hazards for fire." In summary, although the proposed amendment may have a minor impact upon the ability to promptly respond to an actual life, the compensatory actions taken, together with the conditions imposed by the ILRT, ultimately demonstrate that there will be no significant increase in the probability or consequences of an accident previously evaluated.

The plant will be in cold shutdown throughout the duration of the ILRT when the proposed amendment will be in effect. The possibility of a fire occurring will be significantly reduced, if not eliminated, by the de-energization of nonessential equipment, and the pre-test walkdown of containment by the fire protection staff. The proposed amendment will not affect the ability of the plant to maintain safe shutdown conditions, and no unusual plant evolutions will take place. The accidents analyzed in Chapter 15 of the Updated Final Safety Analysis Report bound the conditions created by the proposed amendment. Therefore, the proposed change does not create the possibility of anew or different kind of accident from any accident previously evaluated.

2. The proposed amendment does not involve a significant reduction in the margin of safety.

As discussed in item 1, above, the margin of safety could be considered to be impacted by the proposed amendment. However, by de-energizing all nonessential components within the containment which are not required for ILRT performance or maintenance of shutdown core cooling, potential fire ignition sources will be minimized. Also, a thorough containment walkdown by the fire protection staff prior to ILRT pressurization will ensure that any combustible materials are minimized or eliminated. Since the containment will be secured following this walkdown, there will be no change in the combustible loading within the containment, and a once per shift inspection for fire hazards should not be needed.

Therefore, there is adequate assurance that any postulated impact on the margin of safety will be minimal and the proposed change does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within fifteen (15) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By March 30, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board Panel will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of 30 days, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that

failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Elinor G. Adensam: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to R.E. Jones, General Counsel, Carolina Power & Light Company, P.O. Box 1551, Raleigh, North Carolina 27602, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board Panel that the petition and/or request should be granted based upon balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated March 6, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room, located at Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

Dated at Rockville, Maryland, this 10th day of March 1992.

For the Nuclear Regulatory Commission.

George F. Wunder,

Acting Project Manager, Project Directorate II–I, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–267]

Public Service Co. of Colorado; Consideration of Issuance of Orders Authorizing Decommissioning of Fort St. Vrain Nuclear Generating Station and Termination of Possession Only License

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an order to authorize Public Service Company of Colorado (PSC) to decommission the Fort St. Vrain Nuclear generating Station (FSV) and subsequently an order to terminate Possession Only License No. DPR–34. This action is in response to PSC's application dated November 5, 1990, as revised December 17 and 21, 1990, January 14, 1991, April 15 and 26, 1991, May 15, 1991, June 6 and 17, 1991, July 1, 1991, August 28 and 30, 1991, November 15, 1991, December 6, 1991, and January 9, 1992.

The proposed FSV Decommissioning Plan involves prompt decontamination of FSV and removal of radioactive components (DECON option) and a revision to the Technical Specifications (TS) to be consistent with the plan. The first order would be issued following the Commission's review and approval of PSC's detailed plan for decommissioning of FSV and the related TS revision. It would amend the FSV operating license to allow implementation of the FSV Decommissioning Plan and would also revise the TS. Following completion of FSV decommissioning and verification by the Commission that acceptable radioactive contamination levels had been achieved, the Commission would issue a second order terminating Possession Only License No. DPR–34 and any further NRC jurisdiction over the FSV 10 CFR Part 50 reactor facility. Before issuance of each order, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By April 13, 1992, the licensee may file a request for a hearing with respect to issuance of the subject Orders and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" on 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, and at the Local Public Document Room located at the Greeley Public Library, City Complex Building, Greeley, Colorado 80631. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board Panel will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who had been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the orders under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Seymour H. Weiss: Petitioner's name and telephone number; date petition was mailed; Public Service Company of Colorado; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mr. J. K. Tarpey, Public Service Company Building, room 900, 550 15th Street, Denver, Colorado 80202, attorney for licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board Panel that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for a hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the licensee's application dated November 5, 1990 as revised, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Greeley Public Library, City Complex Building, Greeley, Colorado 80631.

Dated at Rockville, Maryland, this 6th day of March 1992.

For the Nuclear Regulatory Commission.

Seymour H. Weiss,

Director, Non-Power Reactors, Decommissioning and Environmental Project Directorate, Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 92–5943 Filed 3–12–92; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–445]

TU Electric Company; Consideration of Issuance of Amendment to Facility Operating License, Proposed no Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–87 issued to TU Electric Company (the licensee) for operation of the Comanche Peak Steam Electric Station, Unit 1, (CPSES) located in Somervell County, Texas.

The proposed amendment would revise the CPSES Technical Specifications (TS) by removing the Boron Dilution Mitigation System (BDMS) from the TS.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident form any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) The proposed change does not involve a significant increase in the probability or consequences of accidents previously evaluated.

The CPSES Unit 1 safety analyses were reviewed to determine the impact of removing the surveillance requirements and actions related to the BDMS from the CPSES Unit 1 Technical Specifications. This review concluded that the proposed changes to the CPSES Unit 1 Technical Specifications do not affect the failure scenarios leading to an inadvertent boron dilution event, but instead affect the transient response for an inadvertent boron dilution event initiated from MODE 3, 4, or 5. Furthermore, no additional failure scenario were identified that result in an inadvertent boron dilution event. Therefore, the probability of initiating an inadvertent boron dilution event is unaffected by the proposed changes.

The consequences of an inadvertent boron dilution event initiated from MODE 3, 4, or 5 are not increased by the proposed Technical Specification changes. These analyses provide reasonable confidence that the reactor operators have sufficient time to identify and mitigate an inadvertent boron dilution event prior to a return to critical. In addition, the inadvertent boron dilution event has been analyzed by both Westinghouse and the NRC. The results of these analyses have concluded that the consequences of an inadvertent boron dilution event are not severe enough to jeopardize the health and safety of the public, i.e., no fuel failure or system overpressurization is expected following a return to critical.

Thus, the proposed Technical Specification changes do not involve an increase in the probability of consequences of an accident previously evaluated.

(2) The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The CPSES Unit 1 safety analyses were reviewed to determine the impact of removing the surveillance requirements and actions related to the BDMS from the CPSES Unit 1 Technical Specifications. This review concluded that the proposed changes to the CPSES Unit 1 Technical Specifications affect only the transient response of an inadvertent boron dilution event initiated from MODE 3, 4, or 5. This review also concluded that the proposed changes do not create the possibility of an accident that is different than any accident previously evaluated. Furthermore, the proposed changes do not affect any equipment important to safety in such a way as to increase the probability of a previously evaluated malfunction or to create the possibility of a malfunction different than previously evaluated.

Therefore, the proposed Technical Specification changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The proposed change does not involve significant reductions in the margin of safety.

The CPSES Unit 1 safety analyses were reviewed to determine the impact of removing the surveillance requirements and actions related to the BDMS from the CPSES Unit 1 Technical Specifications. As described in the FSAR and the SER, the margin of safety is established by precluding a return to critical for a postulated boron dilution event initiated from MODE 3, 4, or 5. The inadvertent boron dilution event has been analyzed for CPSES Unit 1 to demonstrate that at least 15 minutes are available, from the initiation of the event, for the reactor operators to detect and mitigate an inadvertent boron dilution during MODE 3, 4, or 5. These analyses incorporate CPSES Unit 1 plant-specific requirements for available shutdown margin and administrative procedures to restrict the maximum dilution flow rate. Conservative assumptions with respect to active RCS volume for dilution, boron worth, and critical boron concentration are also incorporated into the analyses. These analyses provide reasonable confidence that the reactor operators have sufficient time to identify and mitigate an inadvertent boron dilution event. In addition, TU Electric will continue to implement controls equivalent to existing procedures, operator guidelines, and surveillance requirements for the BDMS and associated circuitry and subsystems. The use of the BDMS during CPSES Unit 1 operation provides additional assurance that an inadvertent boron dilution event will be detected and mitigated.

In addition, analyses of the inadvertent boron dilution event have been conducted by both Westinghouse and the NRC. These analyses have concluded that the consequences of an inadvertent boron dilution event are not severe enough to jeopardize the health and safety of the public, i.e., no fuel failures or system overpressurization is expected following a return to critical.

Due to the increased reliance on operator action the proposed change results in a reduction in the margin on safety. However, based on the analyses above and the controls established by TU Electric, it is concluded that the reduction in margin of safety is not significant.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within thirty (30) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 13, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the University of Texas at Arlington Library, Government Publications/Maps, 701 South Cooper, P.O. Box 19497, Arlington, Texas 76019. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel, designated by the Commission or by the chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board Panel will issue a notice of hearing or an appropriate order. As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Suzanne C. Black: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to George L. Edgar, Esq., Newman and Holtzinger, 1615 L Street NW., suite 1000, Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding office or the Atomic Safety and Licensing Board Panel that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated February 28, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at University of Texas at Arlington Library, Government Publications/Maps, 701 South Cooper, P.O. Box 19497, Arlington, Texas 76019.

Dated at Rockville, Maryland, this 9th day of March 1992.

For the Nuclear Regulatory Commission.

Thomas A. Bergman,

Project Manager, Project Directorate IV-2, Division of Reactor Projects—III/IV/V, Office of Nuclear Reactor Regulation.

[FR Doc. 92-5940 Filed 3-12-92; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 30-03255, License 42-00084-06, EA 91-096]

Order Imposing Civil Monetary Penalty

I

In the matter of Department of Veterans Affairs, Veterans Administration Medical Center, Houston, Texas.

The Department of Veterans Affairs, Veterans Administration Medical Center (VAMC), Houston, Texas (Licensee) is the holder of NRC Materials License No. 42-00084-06 issued by the Nuclear Regulatory Commission (NRC or Commission) on August 27, 1986. The license authorizes the Licensee to possess a variety of radioactive byproduct materials for use in medical research, diagnosis and therapy in accordance with the conditions specified therein.

II

An inspection of the Licensee's activities was conducted on June 10-12 and June 18-20, 1991. The results of this inspection indicated that the Licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty (Notice) and Confirmatory Order Modifying License (Effective Immediately) were served upon the Licensee by letter dated November 15, 1991. The Notice stated the nature of the violations, the provisions of the NRC's requirements that the Licensee had violated, and the amount of the civil penalty proposed for the violations. The Licensee responded to the Notice in two letters dated December 11, 1991. In its response, the Licensee requested mitigation of the proposed penalty based on its contention that: (1) Three of the violations (F, I, and L) involved procedures not required at the time of the inspection; (2) the external audits described in the Confirmatory Order and internal audits described in the VAMC response to the Notice are sufficient to attain and maintain compliance with NRC requirements; and (3) the amount of the civil penalty was excessive.

III

After consideration of the Licensee's response and the statements of fact, explanation, and arguments for mitigation contained therein, the NRC staff has determined, as set forth in the Appendix to this Order, that the violations occurred as stated and that the penalty proposed for the violations designated in the Notice should be imposed by Order.

IV

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, *It Is Hereby Ordered That:*

The Licensee pay a civil penalty in the amount of $25,000 within 30 days of the date of this Order, by check, draft, or money order, or electronic transfer, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Attn: Document Control Desk, Washington, DC 20555.

The Licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a "Request for an Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Attn: Document Control Desk, Washington, DC 20555. Copies also shall be sent to the Assistant General Counsel for Hearings and Enforcement at the same address and to the Regional Administrator, NRC Region IV, 611 Ryan Plaza Drive, suite 1000, Arlington, Texas 76011.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the Licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the Licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the Licensee was in violation of the Commission's requirements as set forth in Violations F, I, and L of the Notice referenced in section II above, and

(b) Whether, on the basis of such violations, and the additional violations set forth in the Notice which the Licensee has admitted, this Order should be sustained.

Dated at Rockville, Maryland this 4th day of March 1992.

For the Nuclear Regulatory Commission.

Hugh L. Thompson Jr.,

Deputy Executive Director for Nuclear Materials Safety, Safeguards and Operations Support.

Appendix—Evaluations and Conclusions

On November 15, 1991, a Notice of Violation and Proposed Imposition of Civil Penalty (Notice) and Confirmatory Order were issued for violations identified during an NRC inspection. The licensee responded to the Notice on December 11, 1991. The licensee admitted all the violations with the exception of Violations F, I, and L, argued that the Confirmatory Order was sufficient to attain and maintain compliance, and requested mitigation of the civil penalty. The NRC's evaluation and conclusion regarding the licensee's request are as follows:

Restatement of Violations

A. License Condition 20 requires, in part, that licensed material be possessed and used in accordance with statements, representations, and procedures contained in the application dated May 22, 1985, and letter dated August 20, 1986.

1. Item 23.D.3(d) of the application dated May 22, 1985, specifies that a bioassay will be performed within 2 weeks of the last possible exposure to (volatile) I–125 or I–131 when operations (in research areas) are being discontinued or when the worker is terminating activities with potential exposure to radioiodine.

Contrary to the above, the licensee failed to perform a bioassay for an individual within 2 weeks of the individual's last exposure to (volatile) I–125 and I–131, at which time the worker had terminated activities involving the use of radioiodine. Specifically, the individual had last worked with millicurie quantities of liquid radioiodine at the licensee's facility in August 1990, and a bioassay was not performed until March 31, 1991.

2. Item 8 of the letter dated August 20, 1986, specifies, in part, that for bioassays, the radiation safety officer (RSO) will perform the counting and calculations necessary to determine the amount of activity present in the person.

Contrary to the above, as of June 20, 1991, the RSO had failed to perform the calculations necessary to determine the activity present in individuals for whom bioassays were performed. Specifically, the bioassays performed during the period from January 1990 to June 1991 for individuals working in nuclear medicine consisted of a thyroid count using a scintillation detection system, but did not include the calculations necessary to determine and evaluate the activity present in the individuals' thyroid glands.

3. Item 21.B.1 of the application dated May 22, 1985, specifies that xenon-133 will be stored in a RADX Corp. "Xenon-Kow II" located in the fume hood in room 747A of Building 1A.

Contrary to the above, the licensee did not limit the storage of xenon-133 to the RADX Corp. "Xenon-Kow II" within the designated fume hood in Room 747A of Building 1A, but also stored xenon-133 in Room B–11 of Building 28D on numerous occasions from January 1990 to June 1991.

This is a repeat violation.

4. Item 7.B(.3) of the application dated May 22, 1985, specifies that the radiation safety committee (RSC) will review the training and experience of users of radioactive material and determine that their qualifications are sufficient to enable them to perform their duties safely and in accordance with Nuclear Regulatory Commission regulations and the conditions of the license.

Contrary to the above, the RSC had not reviewed a physician user's training and experience prior to the individual's use of gold-198 brachytherapy sources for patient treatments during December 1989 and February 1990.

5. Item 3 of the letter dated August 20, 1986, specifies, in part, that all radioactive material ordered by the V. A. Medical Center is ordered through the RSO who insures that the individual ordering the material is approved for the activity being ordered and that the activity ordered does not exceed the individual's possession limit.

Contrary to the above, as of June 20, 1991, the RSO had failed to insure that an individual who ordered xenon-133 in curie quantities was approved for the activity ordered and that the activity ordered did not exceed the individual's possession limit. Specifically, the individual ordered and received 3-4 vials of xenon-133 containing 1 curie each per month over several years, although the individual was only approved by the RSC for maximum possession limit of 400 millicuries.

6. Item 1 of the letter dated August 20, 1986, describes the conditions required for radionuclide use requests and approval by the RSC. Item 1.B specifies, in part, that the procurement of all radioactive material must be approved by the Radionuclide Use Subcommittee (RUS) of the RSC.

Contrary to the above, from January 10, 1990, to June 20, 1991, the RUS and RSC failed to approve an individual's procurement of radioactive material. Specifically, the individual had procured microcurie quantities of hydrogen-3, a material that the individual had not been approved to use or procure.

7. Items 22.B.3 and 22.B.4 of the application dated May 22, 1985, specify, in part, that contaminated (animal) carcasses will be placed in labeled plastic bags and stored in labeled radioactive waste drums specifically [designed] for biological waste, and the drums will be turned over to the appropriate commercial firm for disposal.

Contrary to the above, during the week of May 27, 1991, the licensee failed to place four contaminated animal carcasses, containing approximately 1 millicurie total of cerium-141, strontium-85, scandium-46, and chromium-51, in a waste drum specified for radioactive biologic waste and to transfer the carcasses to a commercial firm for disposal. The carcasses were instead incinerated at the licensee's facility on May 30, 1991.

8. Item 15.H of the application dated May 22, 1985, specifies, in part, that the immediate areas, e.g., hoods, benches, etc., in which radioactive materials are used will be checked at least daily for contamination; that a log record will be maintained of these survey results which are entirely negative; and that any contamination observed will be clearly marked and the RSO notified.

Contrary to the above, from January 10, 1990, to June 20, 1991, the licensee failed to check at least daily for contamination in all laboratory areas where radioactive material was used, and failed to maintain a record of survey results for laboratory areas which were surveyed daily. Specifically, surveys were not conducted in Rooms 212 and 212A on each day of use, and records were not maintained for surveys conducted in rooms 116, 118, and 119.

9. Item 15.M of the application dated May 22, 1985, specifies, in part, that users will perform decontamination procedures when necessary. Item 15.R specifies, in part, that if contamination exceeds a level of 200 disintegrations per minute (dpm) per 100 square centimeters, decontamination will be done.

Contrary to the above, from January 10, 1990 to June 20, 1991, users of radioactive material had failed to routinely perform decontamination procedures when levels of contamination from phosphorus-32 exceeded 200 dpm per 100 square centimeters in room 207A, a research area.

10. Item 15.R of the application dated May 22, 1985, specifies, in part, that periodic surveys will be conducted monthly in areas where less than 200 microcuries of radioactive material are used and weekly in all other lab areas. Weekly and monthly surveys will consist of a measurement of radiation levels with a survey meter and a series of smear tests to measure contamination levels.

Contrary to the above, from December 1990 to June 1991, the licensee failed to conduct monthly surveys in laboratory areas where less than 200 microcuries of radioactive material were used, and failed to conduct weekly surveys in other laboratory areas where greater than 200 microcuries of radioactive material were used. Specifically, room 225, where less than 200 microcuries of phosphorus-32 were used, was not surveyed monthly between December 1990 and June 1991. Additionally, rooms 116, 118, and 119, were quantities in excess of 200 microcuries of phosphorus-32 were used, were not surveyed weekly between January and June 1991.

This is a repeat violation.

B. 10 CFR 20.201(b) requires that each licensee make such surveys as may be necessary to comply with the requirements of part 20 and which are reasonable under the circumstances to evaluate the extent of radiation hazards that may be present. As defined in 10 CFR 20.201(a), "survey" means an evaluation of the radiation hazards incident to the production, use, release, disposal, or presence of radioactive materials or other sources of radiation under a specific set of conditions.

10 CFR 20.202(a)(1) requires that each licensee supply appropriate personnel monitoring equipment to, and require the use of such equipment by, each individual who enters a restricted area under such circumstances that he receives, or is likely to receive, a dose in any calendar quarter in excess of 25 percent of the applicable value specified in 10 CFR 20.101(a).

10 CFR 20.101(a) requires that the license limit the whole body and extremity radiation dose of an individual in a restricted area to 1.25 and 18.75 rems per calendar quarter, respectively.

Contrary to the above, as of June 20, 1991, the licensee did not make surveys to assure compliance with that part of 10 CFR 20.101 that limits the radiation exposure to the whole body and extremities, and did not provide personnel monitoring equipment to each individual who entered a restricted area under circumstances such that they were likely to receive a dose in any calendar quarter in excess of 25 percent of the applicable values specified in 10 CFR 20.101(a). Specifically, the licensee failed to evaluate exposures for, or issue monitoring equipment to: (1) Two physicians who had physically implanted brachytherapy sources during patient treatments completed in December 1989 and February 1990, and (2) nuclear medicine technology students who physically withdrew and administered radiopharmaceutical doses during 1990. The licensee also failed to evaluate an exposure received by an individual during the fourth quarter of 1990, a period when the individual's monitoring badge was determined to have been overexposed while not in use.

This is a repeat violation.

C. 10 CFR 35.315(a)(8) requires, in part, that a licensee measure the thyroid burden of each individual who helped prepare or administer dosages of iodine-131 in amounts that required the patient to be hospitalized for compliance with 10 CFR 35.75, and that the measurements be performed within 3 days after the administration of the dosage.

Contrary to the above, on September 12, and October 16, 1990, the licensee administered to two patients approximately 100 millicuries each of iodine-131 (in liquid form), dosages which required hospitalization for compliance with 10 CFR 35.75, and the licensee did not measure the thyroid burden of the nuclear medicine technologists and physicians who helped prepare and administer the dosages until September 17 and October 23, 1990, respectively, periods in excess of 3 days.

D. 10 CFR 20.401(c)(1) requires, in part, that records of bioassays made pursuant to 10 CFR 20.108 be preserved until the Commission authorizes disposition. 10 CFR 20.108 states that where necessary or desirable in order to aid in determining the extent of an individual's exposure to concentrations of radioactive material, the Commission may incorporate appropriate provisions in any license directing the licensee to make available to the individual appropriate bioassay services. Item 23 of the license application dated May 22, 1985, describes the licensee's bioassay procedures.

Contrary to the above, as of June 20, 1991, records of bioassays made pursuant to the conditions of the license for bioassays performed during the third quarter of 1990 were not preserved. Specifically, records regarding routine bioassays for certain individuals in the research staff were not kept, although the NRC had not authorized their disposition.

E. 10 CFR 35.70(a) requires that a licensee survey with a radiation

detection survey instrument at the end of each day of use all areas where radiopharmaceuticals are routinely prepared for use or administered.

Contrary to the above, (1) from January 1990 to June 1991, the licensee failed to survey with a radiation detection instrument at the end of each day of use imaging rooms within the nuclear medicine department where radiopharmaceuticals were routinely administered; and (2) from April to June 1991, the licensee failed to survey with a radiation detection instrument at the end of each day of use the nuclear medicine hot lab where radiopharmaceuticals were routinely prepared.

F. 10 CFR 35.70(h) requires, in part, that a licensee retain a record of each survey required by 10 CFR 35.70(e). The record must include, among other items, the removable contamination in each area expressed in disintegrations per minute per 100 square centimeters.

10 CFR 35.70(e) requires that a licensee survey for removable contamination once each week all areas here radiopharmaceuticals are routinely prepared for use, administered, or stored.

Contrary to the above, from April 1991 to June 1991, the licensee did not include in records of removable contamination surveys conducted in areas where radiopharmaceuticals were routinely prepared for use and administered, the removable contamination in each area expressed in disintegrations per minute per 100 square centimeters.

This is a repeat violation.

G. 10 CFR 35.50(c) requires a licensee to perform appropriate checks for constancy and tests for accuracy, linearity, and geometry dependence required by 10 CFR 35.50(b) following adjustments or repair of the dose calibrator.

Contrary to the above, following the repair of the RADX Assayer I dose calibrator in March and April 1991, the licensee did not perform a test for geometry dependence, and such test was appropriate due to the nature of the repair. The licensee had used the dose calibrator to measure patient radiopharmaceutical doses form April to June 1991.

H. 10 CFR 35.51(a)(3) requires that a licensee conspicuously note the apparent exposure rate from a dedicated check source, as determined at the time of calibration, and the date of calibration on any survey instrument used to show compliance with 10 CFR part 35.

10 CFR 35.51(c) requires, in part, that a licensee check each survey instrument for proper operation with the dedicated check source each day of use.

Contrary to the above, from February to June 20, 1991, the licensee did not conspicuously note on a Ludlum Model 14C survey instrument (Serial No. 81934) used to show compliance with 10 CFR Part 35, the apparent exposure rate from a dedicated check source as determined at the time of calibration, and the date of calibration; and from February to June 20, 1991, the licensee routinely did not check its survey instrument with a dedicated check source on days when the instrument was used. Specifically, the licensee had used the survey instrument for routine surveys in the nuclear medicine department from February to June 1991.

This is a repeat violation.

I. 10 CFR 35.205(e) requires, in part, that a licensee check each month the operation of reusable collection systems for radioactive gases.

Contrary to the above, the licensee used two reusable collection systems for radioactive xenon-133 gas and did not check the operation of the collection systems from January 1990 to June 1991.

J. 10 CFR 35.59(g) requires, in part, that a licensee in possession of a sealed source or brachytherapy source shall conduct a quarterly physical inventory of all such sources in its possession.

Contrary to the above, the licensee did not conduct a physical inventory of three sealed sources containing cesium-137, iodine-125, and iodine-129 (Serial Nos. 052, 524927, and 222032179A, respectively) from January 10, 1990, to June 20, 1991, a period in excess of a calendar quarter.

This is a repeat violation.

K. 10 CFR 30.51(a) requires that each licensee keep records showing the receipt, transfer, and disposal of byproduct material.

Contrary to the above, as of June 20, 1991, the licensee did not keep records of the disposal of byproduct material. Specifically, no records were kept for the disposal of hydrogen-3 and iodine-125 via the sanitary sewerage system within the nuclear medicine RIA lab.

L. 10 CFR 35.92(b) requires that a licensee retain for 3 years a record of each disposal of byproduct material permitted under 10 CFR 35.92(a), and that the record include the date of the disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.

Contrary to the above, from January 1990 to June 1991, the licensee's records of disposal of byproduct material permitted under 10 CFR 35.92(a) did not include the date on which the byproduct material was placed in storage.

M. 10 CFR 20.403(b) requires, in part, that each licensee shall within 24 hours of discovery of the event, report any event involving licensed material possessed by the licensee that may have caused or threatens to cause (1) a loss of 1 day or more of the operation of any facilities affected or (2) damage to property in excess of $2,000.

Contrary to the above, the licensee failed to report within 24 hours of discovery an event of May 30, 1991, involving licensed material which resulted in the loss of more than 10 days of operation of an incinerator at the licensee's facility, and damage which required decontamination of the incinerator assessed at $6,000.00. Specifically, the licensee incinerated animal carcasses containing licensed material on May 30, 1991, and the incinerator was not decontaminated and returned to operation until June 13, 1991.

Summary of Licensee's Response to Violations F, I, and L

The Licensee contended that three violations—Violations F, I and L in the Notice—were invalid. In each case, the Licensee argued that the license that was in effect during the inspection period did not require the Licensee to meet the specific 10 CFR part 35 requirement that was cited. The license in effect at the time of the inspection was issued on August 27, 1986, prior to the issuance of the subject requirements in 10 CFR part 35 that became effective on April 1, 1987. The Licensee relies upon their interpretation of an October 16, 1986 Federal Register Notice to argue that the provisions of such a license (issued prior to April 1, 1987) take precedence over the current part 35 regulations.

Based on the argument that the provisions of its license at the time of the inspection did not require it to maintain records of removable contamination surveys in units of disintegrations per minute 100 square centimeters (dpm/100cm^2), the License denies Violation F.

The Licensee denies Violation I and contends that their license does not require the performance of monthly operability checks of reusable radioactive gas collection systems for the same reasons as stated in Violation F.

Violation L is contested by the Licensee based on the same reasons as were stated in Violations F and I. The Licensee states that their license did not require that records of radioactive waste disposed of by decay-in-storage include the date waste was placed in storage.

NRC Evaluation of Licensee's Response to Violations F, I, and L

Violation F

The Licensee received a violation of 10 CFR 35.70(h) in an earlier Notice of Violation and Proposed Imposition of Civil Penalties issued on April 11, 1990. In the Licensee's response of May 10, 1990, the Licensee acknowledged that the violation had occurred and stated that future removable contamination survey results would be expressed in units of dpm rather than counts per minute. Thus, Violation F is a recurring violation initially identified by the NRC during the previous 1990 inspection.

The staff notes that the Licensee's application dated May 22, 1985, committed the VAMC to comply with the guidance of Appendix I of Regulatory Guide 10.8, Revision 1, October 1980, which did not state explicitly that removable contamination survey results be expressed in units of dpm/100cm^2. However, Appendix I stated that the method for performing such surveys will be sufficient to detect 200 dpm/100cm^2 and stated that areas will be cleaned if the contamination levels exceeded 200 dpm/100cm^2. Thus, the Licensee's practice of recording the results of such surveys in units of cpm/100cm^2 does not ensure compliance with procedures described in Appendix I.

Furthermore, the staff does not agree with the Licensee's reliance on the October 16, 1986 Federal Register notice (Volume 51, No. 200), which published significant revisions to 10 CFR part 35. The notice said: "The Commission has decided to resolve possible temporary inconsistencies between license conditions and the regulation by providing in the regulation a transition period between the effective date of the rule and the expiration date of each license. During this transition period, if there is an inconsistency between a provision in a license (issued prior to the regulation) and the regulation, the license condition takes precedence over the regulation."

10 CFR 35.999, which addressed the transition period, states: "If the rules in this part conflict with the licensee's radiation safety program as identified in its license * * * then the requirements in the license will apply."

In this case, there is no inconsistency or conflict between the provisions in the license and the regulation. Both the provisions in the license and regulation require (one implicitly and the other explicitly) that removable contamination survey results be recorded in units of dmp/100cm^2.

The staff concludes that the citation was valid.

Violation I

The Licensee's application dated May 22, 1985, committed the VAMC to comply with radioactive gas use procedures outlined in Item 21 of the application. These procedures established requirements for radioactive gas use and storage areas, but did not address the frequency of operability checks of reusable gas collection systems. 10 CFR 35.205(e) requires licensees to check the operation of such systems monthly.

Therefore, the Licensee's procedures were not inconsistent with and did not conflict with 10 CFR 35.25(e). The procedure simply neither addressed the frequency of operability checks nor made any reference to such checks. Since there is no inconsistency or conflict between the license and part 35, the staff does not agree with the Licensee's assertion that statements contained in the cited October 16, 1986 Federal Register notice exempt the Licensee from this requirement.

The staff concludes that the citation was valid.

Violation L

The Licensee's application dated May 22, 1985, committed the VAMC to comply with the provisions of Appendix J of Regulatory Guide 10.8, Revision 1, October 1980. Appendix J does not address recordkeeping requirements. 10 CFR 35.92(b) requires that records of byproduct material disposal permitted under 10 CFR 35.92(a) include the date on which the byproduct material was placed in storage.

However, nothing in the version of Appendix J referenced in the Licensee's application was inconsistent with or in conflict with the recordkeeping requirements of 10 CFR 35.92 because Appendix J simply did not address recordkeeping. Furthermore, recording the placed-in-storage date of waste that is held for decay before disposal is important in ensuring that the waste has been held for the required minimum time of the half-lives prior to its disposal. The staff does not agree with the Licensee's assertion that statements contained in the cited October 16, 1986 Federal Register notice would exempt the Licensee from this requirement.

The staff concludes that the citation was valid.

Summary of Licensee's Request for Mitigation

The Licensee's request for mitigation of the proposed penalty was based on: (1) Its contention that three of the violations (F, I and L) involved procedures not required at the time of the inspection; (2) its position that the external audits described in the Confirmatory Order and the internal audits described in the VAMC response to the Notice were sufficient to attain and maintain compliance with NRC requirements; and (3) its position that the amount of the civil penalty was excessive.

NRC Evaluation of Licensee's Request for Mitigation

Violations F, I, and L

As discussed above, the staff concludes that Violations F, I, and L were valid citations. Thus, the Licensee's argument for mitigation on this basis is not persuasive.

Confirmatory Order

The Licensee argues that a civil penalty is not necessary to achieve the goal of bringing VAMC procedure into compliance with all applicable NRC regulations. The Licensee contends that the Confirmatory Order, which makes the Licensee's voluntary audit plan a condition of its NRC license, and other actions taken by the Licensee to improve compliance with NRC requirements, will result in improved compliance and will assure that Licensee employees take their responsibilities seriously.

While NRC considers audits and the other actions taken by the Licensee important, the VAMC's actions to assure compliance with NRC requirements are not extraordinary measures given the circumstances that led NRC to take enforcement action. Measures to assure compliance are assumed when NRC grants a license. In this case, NRC found the measures taken by the VAMC lacking in 1990 and again in 1991, despite a penalty of $7,500 having been issued in 1990. As NRC said in the letter transmitting the Notice, "Inspection findings of this nature in successive inspections reduces NRC's confidence in the VAMC's ability to manage its NRC-licensed activities in a manner consistent with NRC's expectations of a holder of a broad-scope medical license."

The purpose of the civil penalty in this case is to emphasize the importance of establishing effective and lasting measures to assure licensee compliance, and to emphasize the responsibility

incumbent upon a broad-scope medical licensee to initiate measures to assure compliance with NRC requirements rather than relying upon NRC to discover noncompliance during its infrequent inspections. The VAMC argues that a civil penalty is not necessary to bring about the desired improvements. Prior to the 1990 and 1991 inspections, the VAMC had not properly conducted licensed activities in certain program areas. The VAMC now suggests it will conduct licensed activities in compliance with NRC requirements as it did both at the time of initial licensing and after the issuance of the Notice of Violation and Proposed Imposition of Civil Penalties on April 11, 1990. It is clear that based on past performance, a civil penalty is necessary in this case to emphasize continuous, lasting corrective actions and to deter future noncompliance.

The staff concludes that the issuance of the Confirmatory Order does not warrant reconsideration of he civil penalty.

Civil Penalty Amount Excessive

The Licensee argues that the civil penalty amount is excessive because: (1) The proposed penalty will have the unintended effect of decreasing funds available for patient care; (2) the amount of the penalty is out of proportion to the severity of he violations; (3) the proposed penalty exceeds $25,000 when the costs of the audits are included; and (4) the NRC's deviation from the civil penalty formula prescribed in its Enforcement Policy was unreasonable.

NRC would not expect a $25,000 civil penalty to have a significant financial impact on a facility with an annual operating budget of greater than $160 million. In addition, the VAMC should not fail to recognize the direct connection between patient care and radiation safety. As indicated in the letter transmitting the Notice, failing to follow radiation safety standards can affect the safety of VAMC employees, patients, and the general public. One of NRC's purposes in issuing the penalty was to emphasize to the VAMC its responsibility to take radiation safety seriously so as not to compromise personnel and patient safety.

NRC's Enforcement Policy permits it to consider violations collectively and to assign a single severity level to a number of violations, as was done in this case. The fact that the violations would not individually be classified at Severity Level III or above has no bearing on NRC's decision to treat the violations collectively. As was indicated to VAMC representatives at the enforcement conference and in the letter transmitting the Notice, NRC attached greater significance to the collection of violations because they indicated a potentially significant lack of attention to licensed responsibilities. This is the basis for classifying the violations at Severity Level III in the aggregate and assessing a civil penalty.

NRC considers the conduct of the audits a necessary step to ensure that the VAMC in fact maintains its programs in compliance with NRC radiation safety requirements. While the audits will certainly result in additional costs to the VAMC, NRC does not believe that the conduct of the audits negates the need to assess a civil penalty to emphasize the importance that NRC attaches to the situation. As indicated above, NRC believes that civil penalties ply an important role in assuring lasting corrective actions and in deterring future noncompliance.

NRC is authorized by law (Section 234 of the Atomic Energy Act of 1954, as amended) to assess civil penalties up to $100,000 per violation per day. As the Licensee notes in its reply, NRC has established, in Section V.B. of its Enforcement Policy, the usual base civil penalty values that reflect the class of licensee and the severity of the violation or violations, and a number of factors that may be considered in making adjustments to the usual base values. As stated in the policy, the civil penalty tables generally take into account the gravity of the violation as a primary consideration and the ability to pay as a secondary consideration, but the deterrent effect of civil penalties is best served when the amount of such penalties takes into account a licensee's ability to pay.

The opening paragraph of the Enforcement Policy states: "The Commission may deviate from this statement of policy as is appropriate under the circumstances of a particular case." Section V.B. of the Enforcement Policy states: "* * * ineffective licensee programs for problem identification or correction are unacceptable. In cases involving willfulness, flagrant NRC-identified violations, repeated poor performance in an area of concern, or serious breakdown in management controls, NRC intends to apply its full enforcement authority where such action is warranted, including issuing appropriate orders and assessing civil penalties for continuing violations on a per day basis up to the statutory limit of $100,000 per violation per day."

NRC clearly articulated in the letter transmitting the Notice a reasonable basis for deviating from its statement of policy. NRC's reasons included the following: (1) A large number of violations was found in each of two successive inspections conducted in 1990 and 1991, despite a $7,500 civil penalty being assessed in the 1990 inspection, indicating a failure of the VAMC to resolve fundamental shortcomings in management of licensed activities; (2) NRC inspectors discovered the violations as opposed to their having been detected and corrected by the Licensee; (3) six of the violations were identical to violations cited in 1990, indicating a failure of the VAMC to take specific corrective actions despite commitments to do so; and (4) in some instances the VAMC failed to act to correct violations that had been discovered by its own radiation safety staff.

In addition, in accordance with the statements in section V.B. of the Enforcement Policy, the staff believes that $25,000 is more likely to have a deterrent effect because, although still a small amount of money relative to the size of the VAMC's annual operating budget, it more appropriately reflects the Licensee's ability to pay than would application of the usual base civil penalty in Tables 1.A and 1.B of the Enforcement Policy.

The staff does not accept the Licensee's argument that the civil penalty proposed in this case was excessive.

NRC Conclusion

The NRC concludes that Violations F, I, and L, denied by the Licensee, occurred as stated. The NRC further concludes that the Licensee has not made a convincing argument for a reduction in the amount of the civil penalty. Consequently, the proposed civil penalty in the amount of $25,000 should be imposed.

BILLING CODE 7590-01-M

[Docket No. 72-2 (50-280/281)]

Virginia Electric and Power Company; Issuance of Amendment to Materials License No. SNM-2501

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 6 to Materials License No. SNM-2501 held by the Virginia Electric and Power Company for the receipt and storage of spent fuel at the Surry Independent Spent Fuel Storage Installation, located on the Surry Power Station site, Surry County, Virginia. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications making administrative changes which do not affect fuel receipt, handling, and storage safety.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that, pursuant to 10 CFR 51.22(c), an environmental assessment need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated November 20, 1991, and (2) Amendment No. 6 to Materials License No. SNM-2501, and (3) the Commission's letter to the licensee dated March 5, 1992. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the Local Public Document Room at the Swem Library, College of William and Mary, Williamsburg, Virginia, 23185.

Dated at Rockville, Maryland, this 5th day of March 1992.

For the U.S. Nuclear Regulatory Commission.

Charles J. Haughney,

Chief, Source Containment and Devices Branch, Division of Industrial and Medical Nuclear Safety, Office of Nuclear Material Safety and Safeguards.

POSTAL RATE COMMISSION

Commission Visit

March 9, 1992.

On March 23, 1992, a Commission group comprising Commissioners and advisory staff members will visit the Advo, Inc. facility in Columbia, Maryland. A report of the visit will be filed with the Commission's Docket Room.

For further information, contact William Ferguson, the Commission's Assistant Director of Technical Analysis and Planning, at (202) 789-6855.

Charles L. Clapp,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30449; File No. SR-OCC-92-2]

Self-Regulatory Organizations; The Options Clearing Corporation; Order Approving a Proposed Rule Change Relating to the Addition of a Public Director to Its Board of Directors

March 6, 1992.

On January 10, 1992, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") under section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] a proposed rule change (File No. SR-OCC-92-2) relating to the addition of a Public Director to its Board of Directors. The Commission published notice of this proposed rule change in the **Federal Register** on February 7, 1992.[2] OCC amended its original filing on January 30, 1992.[3] No public comments were received. For the reasons discussed below, the Commission is approving the proposed rule change.

I. Description

To broaden the viewpoint of OCC's Board of Directors, OCC is proposing to amend its By-Laws by adding a Public Director category. To help ensure that each Public Director will be a representative of the public, any person nominated to serve as a Public Director must be unaffiliated with any national securities exchange or national securities association or with any broker or dealer in securities.[4] Under the proposal, each Public Director will be nominated by the Chairman with the approval of the Board of Directors and will be elected by the stockholders at their annual meeting. Each Public Director will serve a two-year term. To ensure diversity in the position of Public Director, the amendments to the By-Laws provide that no person shall be eligible to serve as Public Director for consecutive two-year terms.[5]

OCC proposes to amend article III, sections 1 and 3 of its By-Laws to include one Public Director on OCC's Board of Directors and to revise the formula for determining the number of Member Directors. The formula is being amended to ensure that Member Directors will at all times constitute a majority of the Board of Directors regardless of the number of Exchange Directors and Public Directors. Amendments to article III, section 12 provide that a majority of the directors then in office, even though they may be less than a quorum, shall appoint a successor to fill any vacancy occurring in the position of Public Director. The person appointed to fill such a vacancy would serve for the remainder of the predecessor's term of office and until a successor is elected and qualified.

Finally, the remaining proposed changes to OCC's By-Laws would delete certain obsolete language and would conform other language more closely to Delaware law where OCC is chartered.

II. Discussion

The Commission believes that OCC's proposal is consistent with the Act and in particular with section 17A(b)(3)(C) thereunder.[6] That section requires that the rules of a clearing agency assure a fair representation of OCC's shareholders, members, and participants in the administration of its affairs. Because the Public Director will be unaffiliated with any national securities exchange, national securities association, or with any broker or dealer in securities, the Public Director's presence on OCC's board should provide a fresh perspective to the deliberations and decision making of OCC's Board of Directors in the administration of OCC's affairs. Moreover, addition of a Public Director also should enhance the composition of OCC's Board of Directors by including persons with different expertise and backgrounds.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the Act and in particular with section 17A thereunder.

It is Therefore Ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change (File No. SR-OCC-91-2) be, and hereby is, approved.

[2] Securities Exchange Act Release No. 30328 (January 31, 1992), 57 FR 4784.

[3] Amendment No. 1 revised the proposed rule change to include the requirement that Public Directors mut be elected by OCC's stockholders. As originally filed, in order to serve as a Public Director, a person needed only to be nominated by the Chairman with the approval of the Board of the Directors. The amendment was made to reflect the law of Delaware where OCC is chartered.

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Paperwork Reduction Act of 1980, as amended by Public Law 99-591; Information Collection Under Review by the Office of Management and Budget

AGENCY: Tennessee Valley Authority.

ACTION: Information Collection Under Review by the Office of Management and Budget (OMB).

SUMMARY: The Tennessee Valley Authority (TVA) has sent to OMB the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), as amended by Public Law 99-591.

Requests for information, including copies of the information collection proposed and supporting documentation, should be directed to the Agency Clearance Officer whose name, address, and telephone number appear below. Questions or comments should be made within 30 days directly to the Agency Clearance Officer and also to the Desk Officer for the Tennessee Valley Authority, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; Telephone: (202) 395-3084.

Agency Clearance Officer: Mark R. Winter, Tennessee Valley Authority, 1101 Market Street (EB 4B), Chattanooga, TN 37402-2801; (615) 751-2523.

Type of Request: Regular submission.

Title of Information Collection: Power Distributors Monthly Report to TVA.

Frequency of Use: Monthly.

Type of Affected Public: Businesses or other for-profit, small businesses or organizations.

Small Businesses or Organizations Affected: Yes.

Federal Budget Functional Category Code: 271.

Estimated Number of Annual Responses: 1920.

Estimated Total Annual Burden Hours: 960.

Estimated Average Burden Hours Per Response: .5.

Need For and Use of Information: This monthly collection supplies TVA with financial information to assist in making timely management decisions on electric power rates, finances, and other long- and short-term plans.

Louis S. Grande,

Vice President, Information Services, Senior Agency Official.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[(Order 92-3-16), Docket No. 47703]

Application of Reno Air, Inc.; For Certificate Authority Under Subpart Q

AGENCY: Department of Transportation.

ACTION: Notice of Order to Show Cause.

SUMMARY: The Department of Transportation is directing all interested persons to show cause why it should not issue an order finding Reno Air, Inc., fit, willing, and able and award it a certificate of public convenience and necessity to engage in interstate and overseas scheduled air transportation.

DATE: Persons wishing to file objections should do so no later than March 24, 1992.

ADDRESSES: Objections and answers to objections should be filed in Docket 47703 and addressed to the Documentary Services Division (C-55, room 4107), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590 and should be served upon the parties listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Mrs. Kathy Lusby Cooperstein, Air Carrier Fitness Division (P-56, room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2337.

Dated: March 9, 1992.

Jeffrey N. Shane,

Assistant Secretary for Policy and International Affairs.

BILLING CODE 4910-62-M

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q during the Week Ended March 6, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et. seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48022.

Date filed: March 3, 1992.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 31, 1992.

Description: Application of Aerolineas Centrals De Colombia, S.A. d/b/a ACES, pursuant to section 402 of the Act, applies for a foreign air carrier permit to engage in the foreign air transportation of persons, property and mail as follows: Between Bogota and Medellin, Colombia, on the one hand, and Miami, Florida, on the other hand. ACES also requests exemption authority to engage in charter foreign air transportation of persons, property and mail.

Phyllis T. Kaylor,

Chief, Documentary Services Division.

[1] 17 CFR 200.30-3(a)(12).

Federal Aviation Administration

Approval of Noise Compatibility Program for Lanai Airport (LNY), Lanai City, Lanai, HI

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the State of Hawaii, Department of Transportation under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On February 1, 1990, the FAA determined that the noise exposure maps submitted by the State of Hawaii, Department of Transportation under Part 150 were in compliance with applicable requirements. On January 28, 1992, the Administrator approved the Lanai Airport noise compatibility program. Two of the four recommendations of the program were approved, one was approved conditionally and no action was required on the fourth.

EFFECTIVE DATE: The effective date of the FAA's approval of the Lanai Airport noise compatibility program is January 28, 1992.

FOR FURTHER INFORMATION CONTACT: David J. Welhouse, Airport Engineer/Planner, Honolulu Airports District Office, Federal Aviation Administration, P.O. Box 50244, Honolulu, Hawaii 96850, Telephone: (808) 541-1243. Street Address: 300 Ala Moana Blvd, room 7116. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for the Lanai Airport, effective January 28, 1992.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatability program are delineated in FAR part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Honolulu, Hawaii.

The State of Hawaii, Department of Transportation submitted to the FAA on December 27, 1989, the noise exposure maps, descriptions, and other documentations produced during the noise compatibility planning study conducted from August 1988 through September 1989. The Lanai Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on February 1, 1990. Notice of this determination was published in the **Federal Register** on February 13, 1990.

The Lanai Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 2000. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on August 1, 1991 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control. Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained four proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective January 28, 1992.

Outright approval was granted for two (2) of the four (4) specific program elements, one was approved conditionally and no action was required at this time on the fourth. Approved program measures include: Initiate negotiations to purchase all lands within the forecast 75 Ldn contour (conditional); monitor development proposals on Lanai; annually monitor aircraft noise levels and operations at Lanai Airport. No action was taken on

the measure to implement modifications to the informal runway use program.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on January 28, 1992. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the State of Hawaii.

Issued in Hawthorne, California on February 27, 1992.

Herman C. Bliss,

Manager, Airports Division, AWP-600, Western Pacific Region.

[FR Doc. 92-5958 Filed 3-12-92; 8:45am]

BILLING CODE 4910-13-M

Approval of Noise Compatibility Program for Lihue Airport (LIH), Lihue, Kauai, HI

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the State of Hawaii, Department of Transportation under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On May 17, 1990, the FAA determined that the noise exposure maps submitted by the State of Hawaii, Department of Transportation under part 150 were in compliance with applicable requirements. On January 28, 1992, the Administrator approved the Lihue Airport noise compatibility program. Four of the seven recommendations of the program were approved, two were disapproved and no action was required at this time on one.

EFFECTIVE DATE: The effective date of the FAA's approval of the Lihue Airport noise compatibility program is January 28, 1992.

FOR FURTHER INFORMATION CONTACT: David J. Welhouse, Airport Engineer/ Planner, Honolulu, Hawaii 96850, Telephone: (808) 541-1243. Street Address: 300 Ala Moana Blvd., room 7116. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for the Lihue Airport, effective January 28, 1992.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violates the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented with the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR part 150, § 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Honolulu, Hawaii.

The State of Hawaii, department of Transportation submitted to the FAA on December 28, 1989, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from March 1987 through November 1989. The Lihue Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on May 17, 1990. Notice of this determination was published in the **Federal Register** on June 1, 1990.

The Lihue Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1995. It was requested that the FAR evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on August 1, 1991 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained seven (7) proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAA Part 150 have been satisfied. The overall program, therefore, was approved by the Administrator effective January 28, 1992.

Outright approval was granted for four (4) of the seven (7) specific program elements. Approved program measures include: Initiate negotiations to purchase all lands within the forecast 75 Ldn contour; monitor development proposals in the Lihue Airport environs; annually monitor aircraft noise levels and operations at Lihue Airport; initiate negotiations to relocate resident near Ahukini Landing. Measures disapproved include: Provide sound attenuation for residence near Ahukini Landing and the Vidinha Stadium announcer's booth. No action was taken on the measure to implement modifications to the informal runway use program.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on January 28, 1992. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the State of Hawaii.

Issued in Hawthorne, California on February 27, 1992.

Herman C. Bliss,

Manager, Airports Division, AWP-600, Western Pacific Region.

BILLING CODE 4910-13-M

Approval of Noise Compatibility Program for Molokai Airport (MKK), Kaunakakai, Molokai, HI

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the State of Hawaii, Department of Transportation under the provisions of title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193) and 14 CFR part 150. These findings are made in recognition of the description of Federal and nonfederal responsibilities in Senate Report No. 96-52 (1980). On August 1, 1991 the FAA determined that the noise exposure maps submitted by the State of Hawaii, Department of Transportation under part 150 were in compliance with applicable requirements. On January 28, 1992, the Administrator approved the Molokai Airport noise compatibility program. Three (3) of the four (4) recommendations of the program were approved and no action was required at this time on the fourth.

EFFECTIVE DATE: The effective date of the FAA's approval of the Molokai Airport noise compatibility program is January 28, 1992.

FOR FURTHER INFORMATION CONTACT: David J. Welhouse, Airport Engineer/ Planner, Honolulu Airports District Office, Federal Aviation Administration, P.O. Box 50244, Honolulu Hawaii 96850, Telephone: (808) 541-1243. Street Address: 300 Ala Moana Blvd, room 7116. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program for the Molokai Airport, effective January 28, 1992.

Under section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the noise exposure maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures for FAR part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatibile land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Honolulu, Hawaii.

The State of Hawaii, Department of Transportation submitted to the FAA on November 20, 1990, the noise exposure maps, descriptions, and other documentation produced during the noise compatibility planning study conducted from January 1990 through December 1990. The Molokai Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on August 1, 1991. Notice of this determination was published in the **Federal Register** on August 13, 1991.

The Molokai Airport study contains a proposed noise compatibility program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to the year 1995. It was requested that the FAA evaluate and approve this material as a noise compatibility program as described in section 104(b) of the Act. The FAA began its review of the program on August 1, 1991 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted program contained four (4) proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part

150 have been satisfied. The overall program, therefore, was approved by the Administrator effective January 28, 1992.

Outright approval was granted for three (3) of the four (4) of the specific program elements. Approved program measures include: Monitor development proposals in the Molokai Airport environs; annually monitor aircraft noise levels and operations at Molokai Airport; initiate a planning study to locate lands to exchange with Hawaiian Home Lands within the forecasted CY 2010 55 Ldn noise contour. No action was taken on the measure to implement modifications to the informal runway use program.

These determinations are set forth in detail in a Record of Approval endorsed by the Administrator on January 28, 1992. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the State of Hawaii.

Issued in Hawthorne, California on February 27, 1992.

Herman C. Bliss,

Manager, Airports Division, AWP-600, Western Pacific Region.

BILLING CODE 4910-13-M

Federal Transit Administration

Announcement of Bus Testing Program Fee Sharing

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Transit Administration (FTA) announces an 80 percent Federal share of the testing fee for new model buses tested at the Altoona Bus Testing Center, as provided for under the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). This Federal sharing of costs associated with the testing program will reduce the financial burden for those who have vehicles required to be tested at the facility.

EFFECTIVE DATE: December 18, 1991.

FOR FURTHER INFORMATION CONTACT: For technical issues, Steven A. Barsony, Director, Office of Engineering, Office of Technical Assistance and Safety, (202) 366-0090; for legal issues, Richard Wong (202) 366-1936. The test facility can be reached by contacting Bohdan Kulakowski, Director, Bus Research and Testing Program (814) 863-1893.

SUPPLEMENTARY INFORMATION: On December 18, 1991, President Bush signed the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) (Pub. L. 102-240). Section 3009 of ISTEA amends section 3 of the Federal Transit Act, as amended (49 U.S.C. app. 1602) to authorize the FTA to fund 80 percent of the cost of bus testing, subject to a ceiling of FTA funds of $1,500,000 for FY 1992, $2,000,000 in FY 1993, the lesser of $2,000,000 or an amount the Secretary determines to be necessary in each of the fiscal years 1994, 1995, and 1996, and the lesser of $3,000,000 or an amount the Secretary determines to be necessary in FY 1997.

FTA considers the "costs" of testing to be the fees established by the Altoona Bus Testing Center and approved by the Secretary of Transportation, as delegated to the Administrator of the FTA (49 CFR 1.51). These fees include the normal costs for testing, vehicle servicing and routine maintenance, inspections, and fuel. The requirement to pay testing fees, which are approved by FTA is included in the current bus testing regulation (49 CFR part 665).

FTA will pay the 80 percent fee share directly to the Pennsylvania Transportation Institute (PTI), the operator of the Altoona Testing Center, on a reimbursement basis for tests performed. The remaining 20 percent of the testing fee will be paid by the vehicle manufacturer to PTI, due in full at the time of the delivery of the bus for testing.

Since this provision was effective when President Bush signed the legislation into law (December 18, 1991), the FTA will pay the 80 percent share of the testing fee for buses that begin testing on or after December 18, 1991. For buses undergoing tests on December 18, 1991, the FTA will subsidize on a prorated basis 80 percent of the fee for those tests performed after December 17, 1991.

Issued on: March 9, 1992.

Brian W. Clymer,

Administrator.

BILLING CODE 4910-57-M

Research and Special Programs Administration

Office of Hazardous Materials Safety; Notice of Applications for Modification of Exemptions or Applications to Become a Party to an Exemption

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of Application for Modification of Exemptions or Applications to Become a Party to an Exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of applications have been shown in earlier Federal Register publications, they are not repeated here. Requests for modifications of exemptions (e.g., to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix "X" denote a modification request. Application numbers with the suffix "P" denote a party to request. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comments must be received on or before March 30, 1992.

ADDRESS COMMENTS TO: Dockets Unit, Research and Special Programs Administration, U.S. Department of Transportation Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption number.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Unit, room 8426, Nassif Building, 400 7th Street SW., Washington, DC.

Application No.	Applicant	Renewal of exemption
8611-X	Air Products and Chemicals, Inc., Allentown, PA [1].	8611
8686-X	Chilton Metal Products Div., Weston Industries, Chilton, WI [2].	8686
8556-X	Air Products and Chemicals, Inc., Allentown, PA [3].	8556
8814-X	Structural Composites Industries, Pomona, CA [4].	8814
8956-X	Oil Mock Company, Conroe, TX [5].	8956

[1] To modify the exception to decrease design pressure on non-DOT specification portable tanks from 1⅛ to 1¼, for shipment of helium, refrigerated liquid.

[2] To modify the exemption to include cargo vessel as an additional mode of transportation.

[3] To modify the exemption to provide for overstowage of portable tanks containing helium, refrigerated liquid.

[4] To modify the exemption to increase the maximum service pressure from 3000 to 5000 psig, for cylinders with higher service pressure in the water capacity range of 100 to 200 lbs., for shipment of certain flammable or nonflammable gas.

[5] To modify the exemption to increase disks burst pressure from 1800 psi, to up to 2800 psi., on non-DOT specification cylinders for shipment of flammable liquids; flammable or nonflammable gases.

[6] To increase sodium content per cell from 50 to 60 increase cells per enclosure from 360 to 480 and to add rail, water and cargo aircraft as additional modes of transportation.

Application	Applicant	Parties to exemption
5403-P	Brown & Root Industrial Services, Inc., Houston, TX.	5403

BILLING CODE 4910-60-M

Research and Special Programs Administration,

Office of Hazardous Materials Safety, Notice of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of Applicants for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Applications" portion of the table below as follows: 1—Motor vehicle, 2—Rail fright, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenager-carrying aircraft.

DATES: Comments must be received on or before (April 13, 1992.)

ADDRESS COMMENTS TO: Dockets Branch, Research and Special Programs Administration, U.S. Department of Transportation Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption application number.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, room 8426, Nassif Building, 400 7th Street, SW. Washington, DC.

New Exemptions

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10745-N	Air Transport, International, Inc., Little Rock, AR.	49 CFR 172.101, 172.11, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b).	To authorize the transportation of Class A, B, and C explosives which are forbidden for shipment by cargo aircraft or exceed quantity limitations authorized for cargo aircraft. (Mode 4.)
10747-N	Shell Oil Company, Houston, TX	49 CFR 171.2(b)+(c), 173.22(a)(2), 173.28(c)(2).	To authorize the transportation of a 1200 gallon non-DOT specification trailer mounted meter prover tank with residual vapors of flammable or combustible liquids. (Mode 1.)

NEW EXEMPTIONS—Continued

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10751-N	Ireco, Incorporated, Salt Lake City, UT	49 CFR 177.848	To authorize the transportation of oxidizers and high explosives contained in a separate compartment in the same vehicle. (Mode 1.)
10752-N	Miami Products and Chemical Company, Dayton, OH.	49 CFR 172.300, 172.400, 177.848, 178	To authorize the transportation of corrosive material and oxidizers exempted from segregation criteria. (Mode 1.)
10753-N	Pestcon Systems, Inc., Raleigh, NC	49 CFR 172.500(f), 172.504	To authorize transportation of aluminum phosphide, classed as a flammable solid, in private owned pest control vehicles without placards. (Mode 41.)
10754-N	Kern Testing & Inspection Corporation, Bakersfield, CA.	49 CFR 173.415	To exempt from testing a non-DOT specification box constructed of 19 inch gauge steel sheeting with electrically welded seams for use in transporting radioactive material. (Mode 1.)
10755-N	Minnesota Mining and Manufacturing Company, (3M) St. Paul, MN.	49 CFR 172.203, 172.400, 172.402 172.504, 173.116, 173.153, 173.244, 173.25, 173.345, 173.346, 173.359, 173.364, 173.370, 173.377, 174.380, 174.480, 174.580, 174.660, 175.25, 175.3, 175.33, 175.630(a)+(b), 176.331, 176.419, 176.600, 177.841.	To authorize the manufacture, mark, and sell of specially designed composite type packaging for use in transporting limited quantities of various classes of hazardous materials without labels and placards. (Modes 1, 2, 3, 4, 5)
10756-N	Taylor-Wharton Cryogenics, Theodore, AL	49 CFR 172.203, 173.318, 173.320, 178.30, 178.76(h).	To authorize the transportation of a non-DOT specification doubled vacuum portable tank with a working pressure of 20 psig. for transportation of argon and nitrogen. (Mode 1, 3.)
10757-N	BW/IP International, Inc. Van Nuys, CA	49 CFR 173.302(a)(4), 175.3, 178.65	To authorize the manufacture, mark and sell of non-DOT specification cylinder for a one-time shipment of helium, classed as nonflammable gas. (Mode 1, 2, 4.)
10758-N	PML Microbiologicals Spokane, WA	49 CFR 172.101, 173.153	To authorize the shipment of 0.74 grams of sodium borohydride, flammable solid, dangerous when wet, contained in a specially designed packaging, as essentially nonregulated. (Mode 1, 2, 3, 4.)

This notice of receipt of applications for new exemptions is published in accordance with part 107 of the Hazardous Materials Transportations Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on March 9, 1992.

BILLING CODE 6720-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Trade Policy Staff Committee (TPSC); Request for Comments Concerning Foreign Government Discrimination in Procurement

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of request for public comments.

SUMMARY: This notice requests written submissions from the public concerning discrimination against United States products and services by foreign governments in their procurement practices. This information will be used in compiling the annual report on foreign discrimination in government procurement specified by section 305 of the Trade Agreements Act of 1979 (Trade Agreements Act), as amended by title VII of the Omnibus Trade and Competitiveness Act of 1988 (19 U.S.C. 2515).

Section 305 of the Trade Agreements Act specifies that the President submit an annual report on the extent to which foreign countries discriminate against United States products or services in making government procurements. In the annual report, the President is required to identify any countries that:

(i) Are Signatories to the GATT Agreement on Government Procurement (Agreement) and are not in compliance with the requirements of the Agreement;

(ii) Are Signatories to the Agreement and are in compliance with the Agreement, but that maintain a significant and persistent pattern or practice of discrimination in the government procurement of products or services from the United States not covered by the Agreement, which results in identifiable harm to U.S. business, and whose products or services are acquired in significant amounts by the United States Government; or

(iii) Are not Signatories to the Agreement and maintain a significant and persistent pattern or practice of discrimination in government procurement of products or services from the United States, which results in identifiable harm to U.S. business, and whose products or services are acquired in significant amounts by the United States Government.

The functions vested in the President under section 305 of the Trade Agreements Act were delegated to the United States Trade Representative (USTR) pursuant to section 4-101 of Executive Order 12661 (54 FR 779).

On February 21, 1992, the Administration, as a result of an "Early Review" which it conducted, formally identified the European Community for the discriminatory procurement policies of government-owned telecommunications and electrical utilities in certain EC member states. Specifically cited was the EC's "Utilities Directive." Information provided for the Early Review need not be resubmitted.

DATES: Submissions containing the information described below must be received on or before March 30, 1992.

ADDRESSES: Comments must be submitted to the Executive Secretary, Trade Policy Staff Committee, Office of the United States Trade Representative, 600 17th Street NW. Washington, DC 20506, and must include not less than twenty (20) copies. Submissions will be available for public inspection by appointment with the staff of the USTR Public Reading Room, except for information granted "business confidential" status pursuant to 15 CFR 2003.6. Any business confidential material must be clearly marked as such and accompanied by a nonconfidential summary thereof.

FOR FURTHER INFORMATION CONTACT: Richard Meier, Deputy Assistant United States Trade Representative for GATT Affairs, at (202) 395-6843. Legal questions should be directed to Sanford Reback, Assistant General Counsel, at (202) 395-7203.

SUPPLEMENTARY INFORMATION: Section 305 of the Trade Agreements Act specifies that the annual report be submitted no later than April 30, 1992, and annually thereafter through 1996, to the appropriate Committees of the House of Representatives and the Senate. The USTR is required to request consultations with any countries identified in the report to obtain their compliance with the Agreement or the elimination of their discriminatory procurement practices.

USTR invites submissions from interested parties concerning foreign government procurement practices that should be considered in developing the annual report. Pursuant to section 305(d)(5) of the Trade Agreements Act, submissions are sought from any interested parties in the United States and in countries that are Signatories to the Agreement, as well as in other foreign countries whose products or services are acquired in significant amounts by the United States Government.

Each submission should provide, in order, the following general information: (1) The party submitting the information; (2) the foreign country or countries that are the subject of the submission and the entities of each subject country's government whose practices are being identified, and (3) the U.S. products or services that are affected by the non-compliance or discrimination.

Each submission should provide, in order, the following specific information on non-compliance with the Agreement or discrimination: (1) The circumstances under which discrimination has occurred, including information regarding the date and nature of procurement(s) where discrimination was encountered; (2) policies or practices which are deemed to be discriminatory (where possible, include copies of discriminatory laws, policies or regulations), and (3) the extent to which noncompliance with the Code or discrimination has impeded the ability of U.S. supplies to participate in procurements on terms comparable to those available to suppliers of the country in question when they are seeking to sell goods or services to the United States Government. Wherever possible, submissions should address the extent to which countries identified:

(i) Use sole-sourcing or otherwise noncompetitive procedures for procurements that could have been conducted using competitive procedures; (ii) conduct what normally would have been one procurement as two or more procurements, in order to decrease the anticipated contract value below the Agreement's value threshold or to make the procurement less attractive to U.S. businesses; (iii) announce procurement opportunities providing inadequate time for U.S. businesses to submit bids, and (iv) employ specifications in such a way as to limit the ability of U.S. suppliers to participate in procurements.

Finally, each submission should: (1) Identify requirements of the Agreement which are not being observed by a country identified or describe how the country has maintained a significant and persistent pattern or practice of discrimination in government procurement; (2) identify the specific impact of the discriminatory policy or practice on United States businesses (including an estimate of the value of market opportunities lost and, if any, the cost of preparing bids which are rejected during the course of a procurement evaluation for discriminatory reasons), and (3) describe the extent to which the products or services of the country identified are acquired in significant amounts by the United States Government.

David Weiss,

Chairman, Trade Policy Staff Committee.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 50
Friday, March 13, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552(e)(2)), notice is hereby given that at its open meeting held at 10:03 a.m. on Tuesday, March 10, 1992, the Corporation's Board of Directors determined, on motion of director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), concurred in by Vice Chairman Andrew C. Hove, Jr., Director Stephen R. Steinbrink (Acting Comptroller of the Currency), and Chairman William Taylor, that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Memorandum and resolution re: Delegations of Authority to the Resolution Trust Corporation's Division of FSLIC Operations.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable.

Dated: March 10, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[FR Doc. 92-6024 Filed 3-11-92; 9:01 am]

BILLING CODE 6714-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552(e)(2)), notice is hereby given that at its closed meeting held at 10:20 a.m. on Tuesday, March 10, 1992, the Corporation's Board of Directors determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), concurred in by Director Stephen R. Steinbrink (Acting Comptroller of the Currency), Vice Chairman Andrew C. Hove, Jr., and Chairman William Taylor, that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of matters relating to the Corporation's assistance agreements with certain financial institutions.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

Dated: March 10, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

FEDERAL REGISTER CITATION OF PREVIOUS ANNOUNCEMENT: [57 FR 8383 March 9, 1992]

STATUS: Open meeting.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Wednesday, march 4, 1992.

CHANGE IN THE MEETING: Additional items.

The following items were inadvertently omitted from the notice of the Commission's open meeting to be held March 11, 1992, announced in 57 FR 8383, March 9, 1992.

Consideration of whether to send to Congress proposed legislation that would amend:

The Investment Company Act of 1940 to:

(1) lessen restrictions in both the exception from the Act's regulation for "private" investment companies (section 3(c)(1)) and the exemption for "intrastate" investment companies (section 6(d));

(2) add two new provisions, one excepting companies whose securities are held exclusively by sophisticated investors, as defined by the Commission, and the other exempting certain state-regulated business and industrial development companies;

(3) to reduce the extent to which business development companies have to provide managerial assistance to small businesses, allow business development companies flexibility in acquiring portfolio securities from persons other than the issuer, permit business development companies to issue multiple classes of publicly held debt, and allow business development companies more flexibility in issuing warrants, options, and rights.

The Securities Act of 1933 to:

(1) increase the dollar limit of offerings over which the Commission has exemptive authority under Section 3(b) from $5,000,000 to $10,000,000.

Commissioner Schapiro, as duty officer, determined that Commission business required the above change and that no earlier notice thereof was possible.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Holly Smith at (202) 272-2100.

Dated: March 10, 1992.

Jonathan G. Katz,

Secretary.

Allocations Attributable to Partnership Nonrecourse Liabilities

Correction

In rule document 91-30843 beginning on page 66978 in the issue of Friday, December 27, 1991, make the following corrections:

1. On page 66979, in the 1st column, in the 3d paragraph, in the 12th line, "regulation" should read "regulations".

2. On page 66980, in the third column, in the third paragraph, in the sixth line from the bottom, remove "still".

3. On page 66981, in the first column, in the third line from the top of the page, after the word "are" insert "still".

4. On the same page, in the same column, in the 2d full paragraph, in the 13th line, "partner's" should read "partners'".

5. On page 66982, in the second column, in the third line from the bottom of the page, "But" should read "Both".

§1.704-2 [Corrected]

6. In § 1.704-2(a), in the table of contents, in (f)(2), in the seventh line, remove "capital" and in (f)(3), in the fifth line, insert "capital" after "certain".

7. On page 66984, in the third column, in § 1.704-2(d)(4)(ii), in the third line, the sentence beginning with "See paragraph ***" should be set flush, and in the seventh line after "increases" insert "or decreases".

8. On page 66985, in the third column, in § 1.704-2(f)(7), in *Example 1*, in the first paragraph, in the third line from the bottom, "partner's" should read "partners'".

9. On page 66986, in the first column, in § 1.704-2(g)(1)(ii), the second paragraph should be set flush; and in the first line, "§ 1.704(b)(2)(ii)(*d*)" should read "§ 1.704-1(b)(2)(ii)(*d*)".

10. On page 66987, in the third column, in § 1.704-2(j)(1)(i)(B) and (ii)(B), the second paragraphs, beginning with "Depreciation", should be set flush.

11. On page 66988, in the first column, in § 1.704-2(j)(2)(i)(B) and (ii)(B), the second sentences, beginning with "Gain", should be set flush.

12. On the same page, in the third column, in § 1.704-2(l)(1)(iii)(A), in the fourth line from the bottom, "section" should read "section)".

13. On page 66989:

a. In the second column, in § 1.704-2(l)(3)(ii), the second paragraph should be set flush.

b. In the same column, in § 1.704-2(m), in *Example 1*, in the second line, "partnership" should read "partnerships".

c. In the third column, in § 1.704-2(m), in the same example, in the tenth line, "§ 1.704-1(b)(2)(ii)(*b*)(T33)" should read "§ 1.704-1(b)(2)(ii)(*b*)(*3*)".

d. In the same column, in § 1.704-2(m), in the same example, in the 15th line, "section;" should read "section:".

e. In the same column, in § 1.704-2(m), in the same example, in the third line from the end of the paragraph, "percent of" should read "percent to".

f. In the same column, in § 1.704-2(m), in the same example, in the table, in the second and third columns, in the last two lines insert "$" before the numeric figures.

g. In the same column, in § 1.704-2(m), in the same example, the last paragraph should be set flush.

14. On page 66990:

a. In the first column, in § 1.704-2(m), in *Example 1*(i), in the table, in the second and third columns, in the last two lines insert "$" before the numeric figures but after "(".

b. In the same column, in § 1.704-2(m), in *Example 1*(i), in the second full paragraph, in the ninth line, "the" was misspelled.

c. In the second column, in § 1.704-2(m), in *Example 1*(ii), in the table, in the second and third columns, in the last two lines insert "$" before the numeric figures but after "(".

d. In the same column, in § 1.704-2(m), in *Example 1*(ii), the first full paragraph should be set flush; and in the third line from the bottom "percent of" should read "percent to".

e. In the third column, in § 1.704-2(m), in *Example 1*(iv), in the table, in the second and third columns, in the last two lines insert "$" before the numeric figures.

f. In the same column, in § 1.704-2(m), in *Example 1*(v), in the 1st full paragraph, "*priority*" should read "*priority.*"; in the 14th line, "the year" should read "that year"; and in the 15th

line, "(700,000)" should read "($700,000)".

15. On page 66991:

a. In the 1st column, in § 1.704-2(m), in *Example 1*(vi), in the 10th line, insert "$" before "95,000" but after "("; in the 12th line, "expenses" should read "expense"; and in the 14th line from the end of the paragraph, after "because" remove "of".

b. In the same column, in the table, in the third column, "(18,000" should read "(18,000)"; and in the second and third columns, in the last two lines insert "$" before the numeric figures.

c. In the same column, the last paragraph should be set flush.

d. In the same paragraph, in the last line, "(1,000,000)" should read "($1,000,000)" and insert "$" before "550,000".

e. In the 2d column, in § 1.704-2(m), in *Example 1*(vi), in the 19th line, "(200,000)" should read "($200,000)"; and in the third line from the end of the same paragraph, insert "$" before "180,000".

f. In the same column, in the table, "(403,000)" should read "($403,000)" and "(47,000)" should read "($47,000)".

16. On page 66992:

a. In the second column, in § 1.704-2(m), in *Example 3*, in the third and sixth, lines, "Example 3" should read "*Example 3*" and "*Examples 3*", respectively.

b. In the same column, in the 23d line from the end of the same paragraph, "§ 1.704-1(b)(2)(ii)–(*d*)" should read "§ 1.704-1(b)(2)(ii)(*d*)".

c. In the same column, in the table, insert "$" before "50,000" the last two times it appears.

d. In the same column, in § 1.704-2(m), in *Example 3*, the last paragraph should be set flush.

e. In the third column, in the table, insert "$" before "35,000" the last two times it appears.

17. On page 66993:

a. In the 3d column, in § 1.704-2(m), in the 1st full paragraph, in the 10th line, "year" should read "year."; and in the 15th line from the end of the same paragraph, insert a comma after "agreement".

b. In the same column, in the table, in the heading, "c" should read "C", and in the second and fourth columns, "(35,000)" should read "($35,000)", and there should be a horizontal rule inserted before the last line of numbers.

18. On the same page, in the first column, the first paragraph after the table, beginning with "Because", should be set flush.

19. On page 66994:

a. In § 1.704-2(m), in the table, in the second and fourth columns, "(75,000)" should read "($75,000)", and there should be a horizontal rule inserted before the last line of numbers.

b. In the first column, the first paragraph should be set flush and in the second to last line of the same paragraph, a comma should be inserted after "year".

c. In the same column, in the second table, a horizontal rule should be inserted before the last line of numbers.

d. In the third column, the last full paragraph should be set flush.

Department of Commerce

National Oceanic and Atmospheric Administration

15 CFR Chapter IX

Natural Resource Damage Assessments; Advance Notice of Proposed Rulemaking

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Chapter IX

Natural Resource Damage Assessments

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: NOAA is providing a status report concerning the natural resource damage assessment regulations being developed under section 1006 of the Oil Pollution Act of 1990 and is seeking additional comment concerning the content and procedures of the future regulations.

DATES: Written comments should be received no later than April 27, 1992.

ADDRESSES: Written comments are to be submitted to Randall Luthi, Project Manager, or Linda Burlington, Assistant Project Manager, Damage Assessment Regulations Team (DART), 6001 Executive Boulevard, room 422, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Randall Luthi, Office of General Counsel, NOAA, telephone (202) 377–1400, or Linda Burlington, Office of General Counsel, DART, 6001 Executive Boulevard, room 422, Rockville, Maryland 20852, telephone (301) 227–6332.

SUPPLEMENTARY INFORMATION: The Oil Pollution Act of 1990 (OPA), 33 U.S.C. 2701 *et seq.*, provides for the prevention of, liability for, removal of and compensation for the discharge, or substantial threat of discharge, of oil into or upon the navigable waters of the United States, adjoining shorelines, or the Exclusive Economic Zone. Section 1006(e) requires the President, acting through the Under Secretary of Commerce for Oceans and Atmosphere, to develop regulations establishing procedures for natural resource trustees in the assessment of damages for injury to, destruction of, loss of, or loss of use of natural resources covered by OPA. Section 1006(b) provides for the designation of Federal, State, Indian tribal and foreign natural resource trustees to determine resource injuries, assess natural resource damages (including the reasonable costs of assessing damages), present a claim, recover damages and develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the natural resources under their trusteeship.

NOAA has published two **Federal Register** Notices, 55 FR 53478 (December 28, 1990), and 56 FR 8307 (February 28, 1991), requesting information and comments on approaches to developing damage assessment procedures. NOAA conducted a public meeting on March 20, 1991, to allow additional public participation into the process and held four regional workshops during 1991 in Rockville, Maryland; Houston, Texas; San Francisco, California; and Chicago, Illinois to learn of regional concerns in coastal and inland waters. One workshop held in Alexandria, Virginia, provided a forum for early discussions of various economic issues likely to be raised during the damage assessment rulemaking process. This Notice briefly summarizes the written comments received by the agency, summarizes many of the specific issues raised at the public meeting and workshops, identifies NOAA's possible position on many of the issues and invites further comment upon the issues addressed in this Notice. NOAA emphasizes that the possible positions indicated within this Notice are for the purpose of inviting discussion and comment and do not necessarily indicate any final positions or definitive assessment procedures. Following a thorough review of all comments received as a result of this Notice, in addition to those already received, NOAA will propose the assessment procedures by the statutory deadline of August 18, 1992.

The brief summary of oral and written comments is provided for background information and to indicate to the reader the range of views that have been expressed concerning possible assessment procedures. As such, the comments are not responded to by NOAA in this Notice. However, all comments received will be specifically addressed when the assessment/restoration procedures are proposed.

Introduction

In addition to specific issues identified in the earlier FR notices and the public meeting, NOAA raised various issues and possible positions during the workshops. This Notice provides a summary of information, concerns, recommendations received thus far in this rulemaking process and possible NOAA positions concerning certain assessment activities. Discussion points for the workshops serve as headings in this notice. These points include:

—Trustee Coordination
—Coordination with Response Agencies
—Coordination with the Public
—Role of the Responsible Party
—Preassessment Phase
—Early Resource Protection and Restoration Actions
—Baseline Determination, Early Sampling and Data Collection
—Coordination with Economists, and Economic Issues
—Range of Assessment Procedures
—Injury and Pathway Determination
—Restoration Guidance and Costs
—Coordination with Legal Counsel
—Coordination with State Law
—Use of Sums Recovered
—Definitions for OPA Regulations

These issues are certainly not inclusive of all of the issues to be determined in this rulemaking process, nor do they represent all of the issues involved in a natural resource damage assessment. Therefore, some initial explanation of how the agency is currently viewing these issues might be helpful in order to generate pertinent comments. The concepts and issues identified in this Notice represent the issues the agency considers important to discuss before the regulations are proposed. Many of the topics in this Notice are procedural and involve more planning than do technical aspects of an assessment. These topics (including Trustee Coordination, Coordination with Response Agencies, Coordination with the Public, Coordination with State Law, Coordination with Legal Counsel and the Role of the Responsible Party) are concepts that will essentially "set the tone" for any damage assessment. Many aspects of these issues apply to nearly all spills and questions of "who is going to do what" can be decided, or at least planned for, in advance.

The Preassessment Phase; Early Resource Protection and Restoration Actions; Baseline Determination, and Early Sampling and Data Collection, represent activities more technical and scientific in nature and are indicative of activities that should be completed in the first few days and weeks following a spill. Also in this scientific and technical category is Injury and Pathway Determination, which would play a vital role in any oil spills requiring a comprehensive damage assessment. This topic is being brought forward for additional comment at this time because of its complexity and overall importance to any damage assessment scheme.

The Range of Assessment Procedures section indicates the various assessment procedures currently being considered by NOAA in this rulemaking. After these procedures are selected and fully developed, they will be submitted for additional public review and comment.

OPA requires the measure of damages to be the costs of restoration, rehabilitation, replacement or acquisition of the equivalent resources, plus the diminution in value of those resources, pending restoration. Therefore, the Coordination with Economists and Economic Issues and Restoration Guidance and Costs sections represent very important aspects of this rulemaking and are being presented at this time to generate additional comments and discussion before the agency proposes the assessment regulations.

The Use of Sums Recovered section applies to the trustees' placement and use of any monetary recoveries received through OPA. Finally, the Definitions are provided for information and comment.

The agency recognizes that there is a current set of natural resource damage assessment procedures, located at 43 CFR part 11, that have been promulgated by the Department of the Interior, authorized under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA), 42 U.S.C. 9601 *et seq.* These regulations establish an administrative process as well as procedures for the assessment of damages for injuries to natural resources affected by a release of a hazardous substance or a discharge of oil. These regulations were formulated through an extensive rulemaking procedure and are the current standard for all damage assessments (both oil and hazardous substances) until the procedures in this rulemaking process are developed specifically for oil. After the OPA regulations are promulgated, the 43 CFR part 11 procedures will still be used to assess damages for natural resource injuries resulting from a release of a hazardous substance.

The procedures identified in 43 CFR part 11 have now been tested in the field and provide a solid base from which to identify assessment procedures to be promulgated under OPA. NOAA has asked for comment on the applicability to oil spills of 43 CFR part 11, as modified by the court decisions of *Ohio* v. *U.S. Department of the Interior*, 880 F.2d 432 (DC Cir. 1989) and *Colorado* v. *U.S. Department of the Interior*, 880 F.2d 481 (DC Cir. 1989). While this OPA rulemaking effort is separate and distinct from the existing regulation, it is possible that concepts from the existing regulations could be adopted, adapted or added to by NOAA in developing the OPA assessment procedures. In addition, NOAA and the Department of the Interior are coordinating their respective rulemakings to ensure consistency, when practicable, for the trustees and responsible parties in conducting natural resource damage assessments as a result of either a discharge of oil or release of a hazardous substance.

The starting point for NOAA's workshops and this Notice is some aspects of the existing natural resource damage assessment regulations. NOAA's discussion of the selected existing procedures is not intended to be exhaustive, nor to suggest changes to the existing regulations, but only to provide a point of departure for discussion of selected issues discussed in this Notice. Each section of today's Notice begins with a summary of the current damage assessment regulations as background information.

Today's Notice: (1) Summarizes the process for each issue under the current regulations; (2) summarizes comments received to date through the NOAA rulemaking and workshop process; (3) provides NOAA's possible proposal on each issue for comment and (4) in certain cases, provides additional issues for comment.

Discussion of Issues

Trustee Coordination

Current Status Under 43 CFR Part 11

The existing procedures suggest the designation of a lead authorized official (lead trustee) whenever multiple trustees are conducting a joint assessment. Designation of a lead trustee does not relieve the other trustees of their responsibility to protect and manage natural resources, but ensures coordination among the various trustees to avoid duplication of effort and/or gaps in the assessment process. The lead trustee, therefore, should consult with all affected trustees and could function as a decisionmaker when the trustees are unable to resolve a dispute.

Summary of Comments

Both written comments and discussions in the workshops reflected a consensus for coordination of many of the trustee activities. Most agreed that the natural resource trustees should anticipate the possibility of a discharge of oil that could affect resources under their jurisdiction and engage in pre-spill planning for such events.

Some commenters suggested that since OPA requires the formulation of area and regional contingency plans for response purposes, trustees could develop pre-spill plans on similar regional or local geographical bases simultaneously. Trustees could coordinate pre-spill planning and develop a Memorandum of Understanding (MOU) that assigns, or establishes the criteria for assigning, assessment responsibilities among the trustees. In addition, these plans should provide for the selection of a trustee's representative; selection of a lead administrative trustee; notification of the various trustees; coordination with the response agencies; coordination among trustees including their scientific, legal and economic staffs; development of an assessment and restoration plan including coordination of data gathering and other assessment studies; communication with the public; development of procedures governing receipt, management and allocation of funds for a given spill; and monitoring restoration of the natural resources. One commenter suggested that pre-spill planning should include identification of requirements of other regulatory or statutory schemes such as workers' health and safety provisions of the Occupational Safety and Health Act of 1970 (OSHA), 29 U.S.C. 651 *et seq.*

Finally, commenters indicated that lead administrative trustee duties should include: Scheduling meetings of the working groups or committees; preparing agendas; procuring space; coordinating pre-assessment data collection; and maintaining records. A lead administrative trustee should not have arbitration or veto authority over other trustees.

Discussion and Initial Proposal

In many spills, trustees have been able to reach agreement on coordinating assessment and restoration activities. In light of that experience, NOAA may well likely propose that Federal, State, Tribal and foreign trustees in logical geographical areas develop pre-spill plans. This planning process may be instituted through a general MOU between trustees on a state-by-state basis or on a local area or regional basis.

In order to facilitate discussion of trustee coordination, NOAA has provided a draft MOU that has been developed among Federal trustees for review and comment that could establish a coordination framework for trustees for pre-spill planning. This draft MOU is presented in appendix I of this notice. Trustees could develop general plans with provisions for specific areas such as bays, ports, waterways or areas of special sensitivity concerns. The plans could mirror the areas covered by Regional and/or Area Contingency Plans authorized by OPA under the National Contingency Plan. NOAA seeks additional comments regarding

the identification of appropriate areas for regional and local plans.

Without regulating the exact contents of the plans, NOAA may propose that the plans identify the responsibilities of the co-trustees in the event of a discharge of oil covered by OPA, including, but not limited to: Establishment of standing trustee working groups on a regional or local area basis; designation of a lead administrative trustee agency or provision for criteria for the selection of a lead administrative trustee agency; notification of affected trustees; coordination with response agencies; opportunity for participation by all affected trustees; and decision-making by consensus. The plans should identify: early spill/assessment activities, such as forming technical and scientific working groups; contain protocols for baseline determination, early sampling and data collection; identify resources at risk; provide guidelines for informing the public of assessment activities; and provide for health and safety considerations required by law, such as OSHA. The plans should outline long-range damage assessment and restoration management activities such as development of an assessment and restoration plan; acceptance, maintenance and use of funds available or recovered as a result of the incident; public release of data obtained in the assessment and restoration process; and procedures for contracting for scientific, economic and other services or studies. Trustees will be encouraged to develop the plans in cooperation with the response agencies, potentially responsible parties and groups with environmental expertise. The trustees will provide the opportunity for public review of and comment on these plans.

Whether planned for in advance of a spill or not, when assessments involve more than one trustee, trustees should select a Lead Administrative Trustee. The selection of a Lead Administrative Trustee will be by consensus and can be based on such factors as the trustee with a majority of resources at risk or the ability of a particular trustee agency to provide administrative support. While the Federal trustees are required to select a Lead Administrative Trustee under Executive Order 12777, 56 FR 54757 (October 22, 1991), the OPA regulations may not require that the Lead Administrative Trustee be a Federal agency when non-Federal trustees are involved. Where appropriate, trustees may designate co-Lead Administrative Trustees, consisting of a Federal Lead Administrative Trustee and the State, Tribal or foreign trustee. It is also possible that, under certain circumstances, it might be appropriate for the Lead Administrative Trustee to be a single non-Federal agency. In such cases, the Federal trustees will still select a Federal lead Administrative Trustee, who will coordinate Federal efforts with the Lead Administrative Trustee.

The Lead Administrative Trustee will not have veto or arbitration authority over the other trustees, but should be responsible for activities such as: Scheduling meetings of the trustees working group or committee, preparing agendas, procuring space, etc.; acting as a central contact point for trustee agencies involved in the incident, liaison with the appropriate On Scene Coordinator; coordinating preassessment data gathering and other activities; and establishing and maintaining records for trustees.

Coordination With Response Agencies

Current Status Under 43 CFR Part 11

The current rule incorporates the requirement that trustees be notified by the lead response agency when a potential natural resource injury may exist. Trustees once notified pursuant to section 104(b)(2) of CERCLA, shall coordinate their studies and investigations with the lead response agency.

Summary of Comments

Integration of natural resource damage assessment activities with spill response agencies, i.e, U.S. Coast Guard, EPA and State response agencies, was strongly encouraged in the comments and in workshop discussion. Several of the commenters suggested that information gathered through spill response activities should be shared with the trustees. It would be useful, for example, for the trustees to receive information pertaining to the characteristics of the spilled cargo obtained through the sampling efforts undertaken by the response agency, as well as from the data bases of ships' cargo that are maintained by the Coast Guard. To facilitate the exchange of information, the trustees should identify their data needs to the response agencies as part of pre-spill planning. Furthermore, when trustees need additional data, the Coast Guard could increase sampling efforts, share or split samples or provide the trustees with an opportunity to collect samples in conjunction with response activities on a reimbursable basis. A number of commenters noted, however, that the On Scene Coordinator's (OSC) ability to respond to the spill and collect data necessary to manage the response activities should take precedence over trustee assessment activities. Therefore, the OSC should not share information with the trustees or take additional samples if it would hinder rapid response to the spill. One commenter suggested that the trustee agencies should avoid potential interference with the response agencies by refraining from initiating damage assessment activities until after the response is completed.

Some commenters requested that the response and trustee agencies be notified of spills simultaneously. While some agency representatives expressed a desire to be notified of all spills no matter what the size, others were concerned that notification of all the trustees for every spill would overburden the OSC. To avoid this, some trustees indicated that notification by a FAX form every few days, for example, that listed all reported spills in that region would be sufficient. Other commenters requested that the response agencies consult early with the trustees during a spill in order to ensure that resources are not exposed to additional injury as a result of the cleanup. Another suggestion would require the trustee agency to identify important natural resources that would be impacted by a spill hierarchically in terms of value. The response agency could then develop a clean-up strategy that would address the most valuable resources. Other commenters identified mechanisms to coordinate the natural resource damage assessment activities with the response actions. To avoid duplication, improve communication, more efficiently use personnel and budgets and minimize cleanup impacts on resources, some commenters suggested that the damage assessments could be coordinated by the OSC.

Other commenters noted the possibility for a conflict of interest when the response agency is also a natural resource trustee since response activities could be curtailed to allow more assessment activities. These commenters expressed the need for accountability under this scenario. One of these commenters stated that non-trustee agencies should be given a formal role in both response and cleanup activities.

Commenters suggested that as part of pre-spill planning trustees could identify requirements for personnel and field equipment, and ascertain which of those requirements the response agency can provide. In addition, pre-spill plans could establish communication procedures between the response agency and the lead administrative trustee, and establish sampling agreements prior to an actual spill, particularly at the local level. Some commenters suggested that the trustees coordinate pre-spill planning within the established response structure of the National Contingency Plan, 40 CFR part 300, i.e., National Response Team, Regional Response Teams and local area committees authorized under OPA. Such pre-spill activities could include participation by the trustee agencies in spill drills sponsored by the response agencies. In the context of spill drills, the trustees could provide their natural resource expertise and technical assistance to the response agencies. Other pre-spill planning activities by the trustees in support of oil spill response could include mapping of sensitive areas and providing input into the sensitive area plans that industry is required to develop. To avoid inhibiting spill response and damage assessment due to the indecision of trustee agencies, pre-spill planning should include internal coordination within each trustee agency.

Discussion and Initial Proposal

OPA covers inland navigable waters as well as coastal areas. From a Federal perspective, as a general rule the U.S. Coast Guard directs response activities in the coastal zone including the Great Lakes. The U.S. EPA directs response activities in the inland zone. See the National Contingency Plan, 55 FR 8815, 8816 (March 8, 1990). State response agencies may also direct response activities.

Effective coordination with the various response agencies necessitates that coordination procedures be established prior to a spill. As stated in the previous section, the regulations may require the trustees to plan and coordinate their activities prior to a spill. Similarly, trustees will be encouraged to either develop pre-spill agreements with the response agencies or attempt to include them in the planning process outlined above. Agreements or joint-plans should address, but are not limited to, the following issues: establishment of communication roles; identification of a trustee and response contact; health and safety requirements; and development of joint activities, i.e., sampling, spill drills, identification of resources of particular concern and information and data sharing.

Trustees recognize that the response agencies should not be unduly hindered by the trustees' requests for use of equipment and/or information. Conversely, response agencies should recognize the trustees as a potential source of information concerning the weather, history and natural resource characteristics of a particular area.

Procedures for the use of the Oil Spill Liability Trust Fund (Fund) for trustee activities is also an issue appropriate for discussion. The Coast Guard has the responsibility for management of the Fund. The fund contains up to one billion dollars, of which $50 million is available on an annual basis, not subject to appropriations, for the costs of response and the initiation of natural resource damage assessments. The activities included under "the initiation of natural resource damages assessments" will be determined in subsequent regulations. The Federal trustees and the Coast Guard are working together to provide the necessary guidance to trustees on this matter as well as on general access to the fund for uncompensated trustee claims.

Coordination with the Public

Current Status Under 43 CFR Part 11

The current rule provides that the public can participate in a natural resource damage assessment by commenting on the Draft Assessment Plan, significant modifications to the Assessment Plan, the Draft Restoration Plan contained in the Assessment Plan (when developed separate from the Assessment Plan) and the Draft Restoration Plan based upon the amount of monies recovered. The public is notified of the availability of documents to review by publication in a paper of general circulation and in the **Federal Register**, where appropriate. The trustee has the discretion to extend the comment period. The current rule also requires that comments and responses be maintained as part of the administrative record.

Summary of Comments

Many commenters noted that OPA requires public involvement with respect to oil spills. Specifically, section 1006(c) directs natural resource trustees to develop and implement plans for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the natural resources under their trusteeship. Section 1006(c)(5) states that these plans shall be developed and implemented only after adequate public notice, opportunity for a hearing and consideration of all public comment.

Some commenters stated that there should be public participation in each phase of the assessment process, i.e., pre-spill planning through restoration. It was suggested that this participation could be accomplished through the use of oversight committees, consisting of representatives of environmental groups, local governmental officials and other interested individuals. These oversight committees would be in addition to the public meetings and the review and comment periods for the assessment/restoration plans. Having members of the public involved throughout the assessment process would also avoid negotiations by the trustees and responsible party (RP) that might result in less than full compensation to the public for injuries to natural resources. However, others indicated that, since the trustees represent the public, the opportunity for review and comment upon the assessment/restoration plans are sufficient to meet the requirements of OPA.

Some commenters noted that, where circumstances surrounding a spill are too dynamic or the spill is short-lived, it may not be possible to conduct timely public meetings. Such meetings would be so frequent and time consuming that they would drain the staff and budget of both the trustee agencies and private groups. In such cases, it was recommended that local and regional pre-spill plans should identify procedures the trustees will undertake in the event of such a spill. Since the public would be aware of how the trustees will respond to these spills by virtue of the public's involvement in pre-spill planning, separate spill-specific meetings would be unnecessary for many small spills.

Many of those expressing comments were concerned that, due to the possibility of litigation, the data collected during assessments are not made available to the public by those conducting the assessment. Commenters noted that data gathered for an assessment are valuable for understanding environmental processes, toxic effects of oil in the environment and cleanup strategies. Accordingly, some called for a modification of the assessment process to facilitate free exchange of information. Several others suggested that the assessment data be made available to the scientific community for publication in peer-reviewed journals as soon as possible. One commenter even requested that draft materials be made available to the public; however, others suggested that nonvalidated or confidential information should be withheld. One suggested method of sharing data was through the use of an administrative record. This would not only allow greater access to data collected, but would also result in a record that would be judicially

reviewable. Such a review would be limited to the record, which would reduce litigation time and costs. However, another commenter suggested that NOAA not limit the review to the administrative record, since there is sufficient law to guide the courts as to whether the review should be limited to the record.

Discussion and Initial Proposal

OPA requires public notice, opportunity for a hearing and consideration of all public comments prior to implementation of the restoration plan. NOAA, however, will not limit public involvement to the restoration plan alone. NOAA is of the opinion that because the natural resource damage assessment process will be enhanced by public comment, NOAA will seek public review of the natural resource damage assessment component in addition to the restoration plan. The regulations, therefore, may require that the trustees provide the public with an opportunity to review and comment on pre-spill plans discussed in earlier sections of this Notice as well as to comment on the natural resource damage assessment and restoration plans. Additional public involvement, i.e., oversight committees, open trustee meetings, public representation on trustee committees, etc., will be at the option of the trustee. In addition, to allow adequate public participation and to provide a basis for judicial review, NOAA may recommend the use of the open administrative record for appropriate assessments.

Open Record for Assessment

Section 1006(c) of OPA provides that trustees shall "develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent, of the natural resources under their trusteeship." 33 U.S.C. 2706(c)(1)(C), (c)(2)(B), (c)(3)(B) and (c)(4)(B). Section 1006(c)(5), 33 U.S.C. 2706(c)(5), provides that "plans shall be developed and implemented under this section only after adequate public notice, opportunity for a hearing and consideration of all public comment." Thus, Congress intended that restoration plans be developed by trustees pursuant to an administrative process that provides for adequate opportunity for public participation in the selection of restoration measures. Although Congress required public participation (through the comment process) only with respect to restoration plans, experience indicates that damage assessments should not be severed completely from restoration planning. The restoration plan represents the culmination of the assessment process, which consists of trustees selecting injury determination procedures and the identifying of restoration or acquisition methodologies. Therefore, NOAA may propose meeting these statutory mandates by requiring that trustees create an administrative record to document development of the Assessment/Restoration plan.

Adequate notice is an important component of effective public participation. Accordingly, NOAA may require that notice of the availability of the administrative record be published in the **Federal Register**, as well as a local newspaper of general circulation for appropriate spills. However, natural resource damages in the case of small spills and/or spills with a limited effect upon natural resources may be most appropriately determined through the use of a Compensation Table or another expedited process (See later section on Range of Assessment Procedures). NOAA may recommend notice only be provided in the local area in such cases. Identified RPs should also receive notice of the creation of the administrative record and of any opportunities for public participation in the development of the Assessment/Restoration Plan. In addition, publication of the availability of the administrative record in the **Federal Register** should provide the public and any additional RPs with sufficient notice of the opportunity for participation in the assessment/restoration process.

The administrative record has three basic purposes. First, it facilitates selection of restoration measures by providing a central repository for scientific data and by documenting the trustees' consideration of the relevant factors in selecting restoration measures. Second, it facilitates public participation by providing a public repository for information and by documenting compliance with public participation requirements. Third, it provides the basis for judicial review.

The administrative record, based upon current Federal practice, should contain all documents considered or relied upon by the trustees in selecting assessment and restoration measures whether or not they support the trustees' decision. The record should provide an essentially contemporaneous explanation of the basis for selection of the assessment and restoration measures. To the extent practicable, the record should be compiled as documents are generated or received by the trustees.

The specific documents contained in the administrative record will vary by spill. Ordinarily, the record should include documents such as response-generated documents concerning the nature of the spill; damage assessment documents such as preassessment determination, Damage Assessment/Restoration Plan, public comments, response to public comments, transcripts of public hearings, if any, all relevant investigation reports, scientific studies, work plans, quality assurance/quality control plans, quality assured scientific data, health studies, engineering evaluations, decision documents; and an index to the documents in the administrative record

The administrative record should include only documents reflecting information and decisions specifically relied upon in selecting restoration measures. For example, draft documents are generally not part of the record because they are superseded by a final document and therefore are not documents on which the trustee relies. Nevertheless, draft documents will be included in the administrative record if there is no final document at the time of selection of assessment/restoration measures and the draft is in fact relied upon in selecting assessment/restoration measures. Pre-decisional, deliberative internal agency memoranda will ordinarily not be included in the administrative record. Like draft documents, however, portions of these documents may be included if they contain information relied upon in selecting assessment/restoration measures and that information is not included in other documents. Documents relating exclusively to liability will ordinarily not be included in the administrative record unless they are relied upon in selecting restoration measures. Scientific data that fails quality assurance/quality control requirements should not be included in the administrative record except in the unusual case where it is specifically relied upon in some manner in selecting restoration measures.

In certain limited circumstances, the administrative record may require supplementation after selection of the Assessment/Restoration Plan. The administrative record is the body of documents that is considered or relied upon by an administrative agency in reaching a decision. Of course, documents received after the decision has been made cannot have been considered or relied upon in reaching the decision. Therefore, post-decisional documents are not properly part of the administrative record. The administrative record may require supplementation after selection of the Assessment/Restoration Plan. For example, the trustee may modify certain components of the Plan after it has been announced, in which case the documents considered or relied upon by the trustees in modifying the Plan should then be added to the administrative record. Alternatively, the Assessment/Restoration Plan may provide that certain components of restoration will be decided upon at a later date, *e.g.*, because of the need for more information to be obtained during implementation of the Plan. Documents considered or relied upon in selecting these further restoration measures should be added to the administrative record. Also, trustees may consider information submitted by interested parties after selection of the Assessment/Restoration Plan. Trustees may consider information submitted by RPs and/or interested parties outside the public comment period if the interested party did not receive actual or constructive notice of the proposed Assessment/Restoration Plan and the opportunity to comment on the Plan; the information submitted does not duplicate information already contained in the administrative record; and the information raises sufficiently significant issues regarding the scope, effectiveness or cost of the Plan as to warrant having the trustees reconsider their decision. The trustees have the discretion, of course, to reopen or reconsider the Plan at any time. However, the public will have the right to review and comment upon modifications that are, in the opinion of the trustee, significant. One of the most important aspects resulting from the use of the open record would be the level of judicial review to be accorded the Assessment/Restoration process. The use of an administrative record may provide for judicial review only upon the record, giving great deference to the trustee agency. For a detailed explanation of how a judicial review of the Assessment/Restoration record might be justified, see Appendix III.

Role of the Responsible Party

Current Procedures Under 43 CFR Part 11

The existing procedures allow significant involvement of the Potentially Responsible Party (PRP) in the assessment process. Following a release of a hazardous substance or a discharge of oil, the PRPs are identified (if possible) in the preassessment screen. If the trustees decide to conduct an assessment, reasonable efforts are made to locate the PRP and send the PRP a Notice of Intent to Perform An Assessment. This notice describes the nature of the spill and the resources potentially at risk. The trustees are to invite the PRP to participate in the development and scope of the assessment. The trustee is then to allow thirty calendar days, with reasonable extensions, for the PRP to respond before proceeding with the development of the Assessment Plan or any other assessment actions. Following trustee approval of the Assessment Plan, the public (including the PRP) has at least an additional thirty calendar days to review and comment upon the plan. Any significant modifications of the plan require additional public (including PRP) review.

Summary of Comments

Commenters indicated a wide range of views on this issue, from unlimited RP involvement to no RP involvement, except to pay the required damages. Other commenters addressed specific phases of an assessment. Many commenters indicated that the thirty-day waiting period after Notice of Intent To Perform An Assessment is not practicable for oil spills since the RP should assume there will be some level of "assessment." Some commenters reflected that it may be a fallacy to assume that every spill results in injury or recoverable damages.

Many commenters encouraged the early and continued involvement of responsible parties because they would be more likely to cooperate if involved from the start of an assessment. In addition, early cooperation between the responsible party and trustees makes a negotiated settlement easier to achieve. It was also argued that a responsible party is the key party in the assessment process and should therefore have procedural rights of due process including participation and access to information that should not be accorded to the public at large.

Other commenters stressed that cooperation must work both ways. The trustee should also be willing to cooperate with the responsible party. Many responsible parties have the financial and personnel resources to conduct an assessment, and should be permitted to do so, even though the ultimate responsibility for the assessment rests with the trustees. The commenters noted that it can be more expeditious for the RP to fund the work, with oversight or "audit" by the trustees. The RP has a vital interest in the costs/benefits of the assessment. Some suggested that public perception of the responsible party conducting the assessment might be helped by agreeing ahead of time upon a list of "pre-approved" consultants to assist in "peer review" and/or to carry out the actual studies. The use of assessment "oversight" groups consisting of RPs, scientists, environmental groups and the public was also suggested. Restoration activities, including monitoring, may also be conducted by the RP, provided appropriate performance standards were ensured.

Others submitting comments indicated a different view by suggesting that preferential treatment for the RP is not acceptable. In addition, while full and active participation of the RP is fair and rational in theory, in practice the RP should be limited to transferring funds to trustees to conduct damage assessments and reviewing and commenting on assessment plans and other publicly-available assessment documents. It was argued that the regulations should not provide too many incentives for RP participation nor allow the RP to hire a contractor to conduct the assessment, as it would likely appear to be the fox guarding the hen house. Commenters also claimed that it would be inappropriate for the RP to develop a plan, even if the plan was approved by the trustee. Still other commenters suggested that all assessment decisions should be left entirely with the trustees. The RP should be an active participant in the assessment process, but should be subordinate to the trustees.

During the workshops, NOAA presented the concept of a "phased joint-assessment," allowing the trustees and RPs to jointly conduct certain phases of an assessment. Commenters indicated that, for joint work, industry would need some assurance that the damages amount determined by the process is reasonable and supportable. Some comments received during the workshops indicated that the joint assessment process may work well for data collection and analysis determining the extent of injury to the natural resources. However, some thought this cooperation would be unacceptable in the economic valuation portion of the assessment process where the actual amount of damages is determined based upon that injury and because of the controversial nature of such damages.

Discussion and Initial Proposal

While liability and responsibility of the RP for removal and/or response activities are addressed clearly in OPA, little guidance is given in either the statutory language or the legislative history concerning the role of the RP in the assessment process.

The degree of involvement of the RP in the assessment process will likely have a direct bearing on several aspects of the assessment. For instance, active and early involvement of a cooperative responsible party may eliminate some of the problems trustees have encountered immediately following an oil spill, such as the lack of funding, personnel and equipment. In addition, a joint trustee/responsible party assessment may be more cost effective and avoid duplicate studies by the trustees and RPs. However, it is the trustees that have been entrusted with the responsibility for conducting assessments and while NOAA is considering proposing that trustees will be encouraged to involve the RPs, the timing and degree of their involvement will likely be at the discretion of the trustees. Trustees can ill afford to delay assessment activities while attempting to entice RP involvement. In addition, trustees are ultimately responsible for conducting natural resource damage assessments and there may be circumstances where it will be deemed inappropriate by the trustee to allow any RP involvement.

Pre-spill Activities

Just as coordination among the trustees and response agencies will assist in preparing for an effective damage assessment, so can potentially responsible parties be of assistance in identifying areas with a high potential for spills and establishing pre-spill contacts. Of course, it is impossible to identify RPs prior to a spill, but trustees will be encouraged to establish contacts with oil companies, transportation and shipping interests in the local areas where spills are most likely to occur. Trustees may be able to recommend to private response entities; such as the Marine Spill Response Corporation, coastal areas of particular concern from a natural resource aspect and assist in the development of plans for the protection of those areas in the event of a spill.

While the actual degree of involvement of the RP will be at the discretion of the trustee, NOAA may recommend that the RP be invited into the assessment process when practicable. To encourage cooperation between the trustees and the RP, NOAA is considering proposing a phased, joint assessment administrative procedure for conducting assessments.

Jointly-Conducted, Phased Assessments

The assessment process may be divided into distinct steps or phases and the responsible party may be invited to participate in the various steps. Prior to the beginning of each step or phase, the RP and trustees could enter into an enforceable agreement to conduct that particular step or phase. The responsibilities, including financial contributions, of each party will be identified in the agreement and there will be provisions for nonperformance. The agreement should identify who should collect the data and under what guidelines. In addition, the parties should agree who will analyze the data, and what criteria will be used in the analysis.

While it may be most expedient for the trustees and responsible parties to use internal personnel for data collection and analysis, should they not be able to agree upon the use of joint internal personnel, the data gathering and/or preliminary analysis of the data may be contracted out to an agreed upon third party.

A phased approach to conducting joint assessments is being considered due to the possible reluctance of RPs and trustees to agree to work together before the actual assessment process begins. The phased approach may allow a working relationship to develop between the RPs and trustees yet allow maximum freedom to both parties should the joint process be determined to be unworkable.

Management Structure

NOAA does not intend to require a specific management structure in order to conduct either a trustee or joint trustee-responsible party assessment. However, NOAA may recommend that trustees plan to establish committees or teams to manage the assessments. The core members of these committees may already be selected in the pre-spill plans. As discussed earlier, the committees should have a lead administrative trustee and include representatives from all affected trustee agencies and provide opportunities, ad hoc, for involvement from response agencies and other interests, as deemed necessary by the trustees.

Preassessment Phase

This step requires the gathering of basic data concerning the type of oil spilled, extent of the spill, initial effect of the spill upon natural resources and the potential for further injury to natural resources. Based upon this information, the trustees will determine whether to proceed with assessment procedures, and which procedures will be used. While there is no specific time limit for this preassessment phase, the earlier the trustees are able to gather that information, the more effective the phase will be. Since time is of the essence in this crucial phase, NOAA may recommend that it is the option of the trustee whether to invite the RP to participate or enter into an agreement to gather the preassessment phase information. In making this determination, trustees should consider, but not be limited to, the following factors: whether a RP has been identified; the degree and extent of the spill; the willingness of the responsible party to participate; and the ability of the trustees to conduct the preassessment phase in a timely and effective manner.

The completion of the preassessment phase includes the trustees notifying the RP, in writing, if the responsible party has been identified, of the trustees' decision of whether to proceed with further assessment procedures. If they have not done so already, the trustees may invite the RP to enter into an agreement with the trustees to proceed with the assessment. Further assessment procedures could include use of the Compensation Table, Type A model (pending revision), Expedited Damage Assessment Procedures, or the Comprehensive Damage Assessment Procedures.

NOAA will not propose whether the joint-agreement concept should be considered in connection with either the Compensation Formula or the Type A procedure until those procedures and the assumptions within those procedures are proposed and made available for public review.

Assessment Activities

The agreement to conduct portions of the assessment phase should be as specific as possible, with trustee and RP activities identified. NOAA may propose the following steps or phases be considered for joint agreements for Expedited and Comprehensive Damage Assessments: Injury determination data collection; analysis of injury determination data to quantify loss of resources' services; determination of restoration costs; and determination of use and nonuse (i.e., direct and indirect use) values. Whenever possible, NOAA will encourage the combining of data collection and analysis into one agreement, resulting in a more efficient assessment process.

Restoration Activities

The involvement of the appropriate RP in the Restoration Phase should be encouraged whenever possible. Since restoration activities should be identified before determining their costs, the development of a restoration plan is actually initiated in the assessment phase. Some responsible parties may want to actively assist in developing and implementing a restoration plan. Others may prefer to pay the damages and leave the restoration activities to the trustees. The degree of participation of the responsible party in the restoration phase is discretionary with the trustees, but the knowledge and expertise of many RPs in restoration methods could be invaluable to the trustees. Again, agreements should include specific responsibilities of the trustees and RPs. Such agreements could cover the following steps within the overall Restoration Plan: Determination of restoration activities and implementation of restoration activities. The jointly-collected data and analysis will be a part of the Administrative Record discussed in the Coordination with the Public section.

Other Party Involvement

NOAA is considering proposing that the trustees may provide for "outside" review of the assessment/restoration plan. Recommendations from other interested parties and the scientific community will be sought for appropriate reviewers and the reviewers' comments will be a part of the administrative record.

Also, the joint-management team will keep the public informed of the progress of the assessment process and will allow public review and comment of the on-going assessment and restoration plans. In addition, at the trustees' discretion, representatives of local interested groups may be invited to attend assessment management meetings to monitor the decision-making process.

Preassessment Phase

Current Status Under 43 CFR Part 11

The rule requires the trustee to complete a preassessment screen and make a determination as to whether an assessment shall be conducted. The preassessment screen is designed to be mainly a "desktop" review with minimal information gathered concerning characteristics of the spilled substance and which resources have or will likely be injured. The regulations provide criteria for use by the trustees in determining that there is a reasonable probability of making a successful claim before monies and efforts are expended in carrying out an assessment.

Summary of Comments

Some of the commenters spoke to the issue of a "preassessment screen." Generally, these commenters supported a preliminary decision-making step in a damage assessment. One of the commenters noted that a preliminary assessment could be used to establish a probable range of damages and would facilitate settlement negotiations, and which focus future assessment studies if settlement is not reached. Another commenter noted that a preassessment decision would be a good tool to use, should be flexible enough to guide the assessment, should clearly identify funds available for the assessment and could serve as a model of what needs to be done. Finally, another commenter stated that a preliminary hypothesis would be good if used to develop appropriate sampling plans and experimental design, but requiring trustees to meet certain criteria before an assessment is begun is unduly restrictive.

Discussion and Initial Proposal

NOAA is likely to propose that assessments begin with a "Preassessment Phase." The purpose of the preassessment phase is to determine if the discharge of oil warrants continuing a natural resource damage assessment. During this critical phase the trustees identify natural resources at risk from the oil and estimate the costs of the assessment and restoration activities. The trustees will be encouraged to involve the RP in the preassessment phase.

During the preassessment phase, trustees may also tentatively identify their overall plan for conducting the assessment/restoration process. This phase should supply the trustee with enough information regarding the effects of the spill so that the trustee may estimate what assessment and restoration actions will be contemplated and ensure that all such activities will be accomplished in a reasonable and cost-effective manner.

A natural resource damage assessment process generally begins with notification by the lead response agency to a natural resource trustee when a potential natural resource injury may exist, as set forth in the NCP, or when a natural resource trustee is aware of a discharge of oil. In instances where a natural resource trustee is the first to identify a possible injury to a resource under OPA and suspects an OPA-covered discharge as the source, the trustee is directed to the procedures in the NCP for reporting the discharge. Preassessment activities shall be coordinated with the lead response agency consistent with the NCP; and area response contingency plans, regional/local protocols and pre-spill plans developed pursuant to OPA.

Factors to be considered in the preassessment phase include identifying the source and possible distribution of the oil; natural resources at risk; immediate information needs and which assessment actions, if any, should follow the preassessment phase. Part of this review also involves the trustee's determination of whether the discharge is covered by any exclusions to liability contained in OPA or other Federal or State law. Specific information that NOAA may require to be collected during the preassessment phase concerning the spill site and discharge include: (1) The time, type, quantity, duration and frequency of the discharge; (2) response activities occurring at or near the site; and (3) responsible parties.

NOAA may recommend the trustees make a preliminary identification of pathways considering the circumstances of the discharge, the characteristics of the terrain or body of water involved, weather conditions and the known physical, chemical and toxicological properties of the oil. Trustees should also make a preliminary estimate based on information readily available from scientists and natural resource managers of the ecological functions, productivity or economic services of the resources identified as potentially affected. This estimate will be used in determining which resources to study if further assessment efforts are justified.

Based on information gathered during the preassessment phase and on information gathered pursuant to the NCP, NOAA may require that trustees make a preliminary determination that all of the five following criteria are met before proceeding with an assessment: (1) A discharge of oil has occurred; (2) natural resources for which the trustee may assert trusteeship have been or are likely to have been injured by the discharge of oil; (3) the quantity and concentration of the discharged oil is sufficient to potentially cause injury to those natural resources; (4) data sufficient to pursue an assessment are readily available or likely to be obtained at reasonable cost and (5) response actions carried out or planned do not or will not sufficiently remedy the injury to natural resources or the public has not been adequately compensated for a significant loss of natural resource services.

If the trustee determines that the preassessment phase results in a determination that further assessment procedures are appropriate, the next phase is to continue the assessment. If the preassessment phase results in a determination that further assessment actions are not necessary, no further assessment actions are to be taken.

NOAA may recommend that the following categories of reasonable and necessary assessment (not response) costs may be incurred in the preassessment phase of the damage assessment: Discharge detection and identification costs; trustee coordination and notification costs; potentially injured resource identification costs; baseline determination, early sampling and data collection costs; early resource protection and restoration costs; early restoration planning, if appropriate; document preparation, and administrative costs; and any reasonable additional costs deemed necessary by the trustee to carry out the preassessment phase of the damage assessment. Such costs may include indirect costs, but shall not reflect regular activities performed by the trustee in management of the natural resource. Costs shall be supported by appropriate records and documentation. Such activities undertaken as part of the preassessment phase shall be taken in a reasonably cost-effective manner and are recoverable regardless of whether further assessment activities are conducted.

Early Resource Protection and Restoration

Current Status Under 43 CFR Part 11

Emergency "restorations" are for those limited situations where immediate action is required to avoid or reduce danger to natural resources, and where response actions are determined by the trustee to be insufficient. Emergency "restorations" are an exception to the requirement for review and comment, so the trustee must be able to demonstrate that the action was appropriate and that the costs were reasonable. If possible, the potentially responsible party and FOSC should be contacted prior to proceeding with emergency restorations.

Summary of Comments

Some commenters suggested that, in the event of a spill, there is a need to restore the resources and the public's confidence in the condition of the resources as quickly as possible. A restoration hierarchy may be required, preferring as close as possible "in kind" and "on site" restoration. The response agency could plan actions with trustee agencies to ensure that the best response actions for the particular spill and that recognition should be given to the difference between "cleanup" and "abatement". One commenter pointed out that the circumstances of each incident dictate how much response can do towards protection of the resources. Another commenter indicated that planning could be done relatively easily for the many rivers and streams that have already been "classified" under the Clean Water Act and may be useful in identifying "sensitive" areas. Another commenter also stressed the individuality of each event as dictating necessary emergency actions to protect natural resources.

Local area plans will be a vital component in initiating emergency actions so trustees, subject to budget constraints, should participate extensively in developing those plans. Another commenter suggested that involving the public in early spill decisions may not work since committees cannot make rapid decisions for emergency actions at the time of a spill.

Commenters indicated that some mechanism must be developed to provide fair and reasonable funding for restoration prior to the completion of the damage assessment process. Perhaps a phased damage assessment could be instituted, where injury to individual resources are identified as information is collected over time. A sliding scale, based on volume of oil spilled, habitats affected and other factors, could be used to provide up-front funding for both damage assessment and restoration as the process proceeds. Alternatively, actions approved and undertaken by the trustees under damage assessment and early restoration could be made reimbursable by billing the RP, just as cleanup costs approved by the FOSC are reimbursed under response.

It was suggested that industry may be willing to participate in the pre-spill planning for sampling and early restoration activities; such participation may entice a RP to provide up-front funding for early sampling and restoration activities. Industry routinely collects baseline data and may not be opposed to funding sampling or to split samples.

Discussion and Initial Proposal

OPA provides authority for emergency activities to prevent or minimize injury and to hasten recovery which may involve emergency protective actions. The proposed rule may provide guidance for determining whether an emergency exists, require that the emergency be reported to the FOSC and allow for emergency actions to be taken in the event the response agency or responsible party is not taking sufficient action.

Emergency activities are for those limited situations where immediate action is required to avoid or reduce danger to natural resources and where response actions are determined by the trustee to be insufficient. If possible under the circumstances, RPs should be contacted prior to the trustee's proceeding with emergency actions. This contact will give the RP the opportunity to offer financial or personnel resources to help with those actions. Contact can be made through the FOSC.

Any natural resource trustee may take emergency action to protect or abate injury to the habitat of any species that has been identified in a Federal or State list indicating special concern with regard to that species, e.g., those that are threatened or endangered. Emergency actions can only be taken by the trustees in order to prevent or reduce the imminent loss, or threat of imminent loss, of that resource. The trustee will determine whether these actions are necessary prior to the development of an assessment/restoration plan. Such actions and associated reasonable costs must be documented by the trustee. All costs, both direct and indirect, associated with emergency actions are part of the trustees' claim for damages.

Baseline Determination, Early Sampling and Data Collection

Current Status Under 43 CFR Part 11

The current rule states that trustees, prior to the development of an assessment plan, may take the minimum samples necessary to prevent loss of data on conditions that are ephemeral, e.g., injured or dead biological resources that are perishable. Sampling at this stage is not intended to represent average conditions; the rule does not require potentially costly random sampling techniques or sampling of control areas during the preassessment screen.

Summary of Comments

It was suggested that the damage assessment process allow for immediate collection of baseline data when a spill occurs, including biological and water samples and overflights to survey fish and/or protected species. Costs expended by the trustees for baseline data collection should be reimbursed even if no immediate damage is established. Base line data may be necessary to determine injury and accordingly, damages, which may not manifest themselves until more time elapses from the spill. Funding for baseline studies should be immediately available. To avoid missing the opportunity to collect baseline data, funding should not be subjected to lengthy approval process.

One writer pointed out that response agencies often have insufficient budgets to extensively sample during the initial phase of a spill, resulting in inadequate documentation of chemical conditions. Even where a response agency's budget will permit documentation of pre-spill impacts, the agency may not have the time or expertise to conduct proper sampling. Under these circumstances, the response agency must have consultants—a time consuming process—further jeopardizing collection of immediate documentation. Therefore, NOAA should develop regional protocols, in cooperation with state agencies and on a reimbursable basis to support pre-spill surveillance and monitoring schemes to provide adequate baseline information to evaluate natural resource impacts, and develop a cooperative Regional State-Federal Assessment Response and Planning Team.

Concern was expressed that adequate funding should be available to conduct early sampling and data collection so as not to be the limiting factor in conducting a sufficient sampling effort. One commenter pointed out that an important factor to remember in a spill assessment is the size of the company that is the RP. Another suggested that the RP pay for those actions approved by the trustees, and suggested that these actions and funding be pre-approved and incorporated into area contingency plans to be established under OPA. This same commenter stated that public involvement in early sampling and emergency actions can be accomplished through active contributions to pre-spill planning efforts, and advocated establishment of a citizens oversight committee to provide input into all aspects of the area contingency plan (to be established under OPA Sec. 4202).

One commenter suggested the regulations should include planning for sampling and restoration at three levels: a national plan to be described in the regulations that would consist of general guidelines for trustee coordination and sampling, the conduct of damage assessments and the use of initial data for response activities; regional plans that would be called for in the regulations to be developed subsequently and which will provide additional information on the roles of individual agencies, coordination and data acquisition; and local or specific area plans that would be developed for high risk situations. These local plans would provide for gathering and maintaining baseline information, and for early sampling of potentially affected resources immediately following a spill. These regional and local plans would include agency assignments and teams for data acquisition. Several additional participants and commenters indicated that the major planning effort be at the local level and one participant pointed out that local area contingency plans can identify environmental contacts.

Several workshop participants indicated sources of extant or baseline data—consultants, government agencies, academia, industry, waterway operators; and the existence of current data collection programs. One participant indicated that sampling protocols should identify the best indicator species, those that are sensitive to that spill. This same participant said that the sample protocols need scientific appraisals, and further suggested that certain ecosystems that are representative should be selected and that protocols be developed for those ecosystems.

One commenter recommended the inclusion of composition and activity of microbial communities which can serve as sensitive "indicators" of the degree of oil pollution of natural environments for recommended methods in damage assessment procedures. However, another commenter felt that flora and microbial communities should be given lower priority for sampling and indicated that high natural variability, difficulty of quantification and limited knowledge of oil impact influence this recommendation.

One writer pointed out the need for recognizing the importance of regional/local/specific QA/QC plans and indicated that a national plan would be helpful for outline or guidance only. Another commenter urged the use of current QA/QC protocols rather than trying to "reinvent the wheel."

One participant pointed out that because ecosystems are dynamically changing, old baseline data may no longer be accurate at the time of the event. Another commenter suggested that "baseline" data can be obtained from control (reference) areas.

Discussion and Initial Proposal

NOAA's regulations may provide a simple framework by which to encourage the gathering of baseline data both as a desktop exercise and as an immediate field sampling effort, and further encourage early sampling and data collection under appropriate circumstances. Guidance, perhaps in a separate document, will provide procedural methodologies for implementing this effort after an oil spill and provide direction for development of regional and/or local protocols. The information gathered under an early sampling and data collection effort should contribute to the trustee's decision in choosing among the various damage assessment procedures, and be an integral part of subsequent damage assessment/restoration studies.

Close coordination with response, containment and cleanup efforts is needed to identify resources that are at risk of injury and to minimize duplicating efforts. If the magnitude of the oil spill indicates that a Comprehensive Assessment (See Range of Assessment Procedures Section) may be conducted, time constraints may dictate that baseline, initial and early sampling for damage assessment be conducted before the completion of the preassessment phase.

NOAA encourages use of existing information sources, where appropriate, as a means to facilitate early sampling and data collection design. Because existing baseline information may be incomplete or outdated, sampling and data collection may be necessary to establish or to verify baseline levels and document deviations from these levels over a short period of time. NOAA expects this phase of sampling to be conducted immediately following an oil spill, prior to initiation of damage assessment/restoration studies and, possibly, simultaneously with the preassessment phase.

Careful early sampling methodology, adherence to strict QA/QC, chain-of-custody and initiation of data management procedures will be crucial to the overall success of formal studies and, further, the entire damage assessment/restoration process.

NOAA will encourage the development of regional/local protocols, consistent with the national guidance, to cover this phase of sampling, to include provision for Quality Assurance/Quality Control procedures and to recommend the early initiation of a data management program. If developed by local/regional trustees, these protocols will identify existing local/regional data bases, appropriate publications to the area of concern and draw upon local resources (fishermen, resource managers, etc.) to identify sensitive habitats, species and other sources of information. These protocols will also identify local agencies charged with assessing injury and should be developed in close coordination with other trustees and with agencies developing local area contingency plans. These protocols can identify physical and chemical parameters, and specific target organisms (biota) for consideration for sampling, identify ecosystems and habitats of especial

sensitivity, identify local agencies charged with assessing injury and provide detailed sampling methodologies.

The support document will provide generalized direction for the trustees and may indicate minimal requirements for inclusion in the development of regional/local protocols on baseline and early sampling procedures. Some of the topics being considered for inclusion in the supporting document are: factors to be considered by the trustees before initiating an early sampling and data collection effort; guidance and methodology on sampling physical and biological parameters for petroleum hydrocarbon analyses and biological measurements; identification of local key organisms and sensitive habitats; and identification of local natural resources agencies to be involved in early sampling and data collection.

The following are examples of the minimum early sampling efforts that should be conducted to prevent the loss of data from pre-spill or initial impact conditions and to collect chemical and biological data before the initiation of a damage assessment/restoration plan.

Baseline, or Benchmark, Sampling

Where possible and appropriate, samples of water, sediment and fauna and/or flora should be taken to demonstrate hydrocarbon concentrations and biochemical markers in these natural resources at uncontaminated levels. Some of the sampling should be conducted at sites for which previous data are available.

Identification of potential trophic interactions and food chain interactions particularly as they might affect predators, including man. This desktop exercise should identify the presence of various "indicator" organisms, i.e., mussels or other bivalve molluscs which, because of their ability to bioaccumulate hydrocarbons, have been extensively studied and the fate and effect of exposure to petroleum hydrocarbons in these species are well documented. Also, these same organisms often play an important role in the food chain which increases the importance of their consideration for sampling.

Early Sampling

For all sampling conducted in areas of impact, sampling of similar parameters and organisms should be conducted in adjacent areas that have not been contaminated. This reference data will be especially crucial if sampling had not or cannot be conducted in the contaminated area before impact of the oil spill. All sampling should be designed and conducted, where practicable, to allow valid statistical comparisons between impacted and non-impacted conditions to be inferred. Sampling might include:

Physical parameters. Where practicable, samples should include water, sediments and samples of the contaminant itself to document temporal changes which will affect toxicity. Sampling should be conducted to document spatial and temporal changes in hydrocarbon concentrations. Because the presence of petroleum hydrocarbons in the water column is often ephemeral, it is desirable to use a technique that can demonstrate exposure over a given period of time. This can be accomplished by transplanting mussels or other bivalve mollusks from a known hydrocarbon-free area to impacted areas, holding them in cages at appropriate depths, then sampling them and/or replacing them periodically.

Fauna, Invertebrates. For demonstration of hydrocarbon levels in tissues, live or moribund organisms should be sampled, where practicable. Of particular importance is collecting samples of native bivalve molluscan species identical to those used for the cage measurements. Organisms, both surface and burrowing, in the nearshore area and from beaches in area of impact, should be collected for hydrocarbon analyses. Data on spatial and temporal occurrence of dead organisms should be collected. In some cases, actual dead organisms should be collected and preserved or frozen. If practicable, data on biological parameters should be collected.

Fauna, Fish. (Procedures are similar to those mentioned for invertebrate fauna.) Sampling should be not only on resident fish, but also juvenile fish, if they migrate through the impacted area and adult fish if they migrate into the impact area to spawn or feed. Samples representing all life stages, as they occur, should be collected. A note of caution—fish are able to metabolize petroleum hydrocarbons, therefore, demonstrating correlations between specific levels of tissue hydrocarbons and a particular injury is difficult. Sampling here should have lower priority than sampling for invertebrate fauna. For fish that are suspected of being vulnerable to oil contamination, biological data should be collected as time allows.

Fauna, Other Vertebrates. Where practicable, boat or aircraft surveys should be conducted in the area of impact and in the path of the oil spill to determine the abundance and distribution of seabird and marine mammalian species in the area. Statistically valid survey methods should be employed to ensure the accuracy of the estimates. Terrestrial vertebrate fauna (amphibians, reptiles, birds, mammals) in the area of impact are generally dependent upon resources provided by the aquatic marine environment; consequently, they may be vulnerable to injury from exposure to petroleum hydrocarbons. If possible, biological data should be gathered from these organisms.

Carcasses should be collected and preserved, if practicable. Moribund animals (primarily birds and mammals) or otherwise obviously exposed animals may require transportation to rehabilitation centers specially created for this purpose. Animals that subsequently die should be necropsied and tissues preserved for histopathological and contaminant analyses.

Flora. Early sampling is important because of the perishable nature of most plant material. Species should include those both common and unique to the area of impact and should be sampled for both chemical (hydrocarbon) and biological parameters.

Subsequent Sampling

During the continuing active dispersal of the oil and after the major movement of oil, there should be repetitive sampling of water, sediments and contaminant. Sampling of biota and collection of dead flora/fauna should continue. Damage assessment/restoration study plans should be ready to be phased in and sampling for parameters not discussed above may be implemented. Besides specific studies there should be general, periodic monitoring continuing into the restoration phase. There should be close coordination here among all trustee agencies and their investigators for continual scrutiny for identification of impacts to natural resources that have been possibly overlooked.

Sampling Techniques/Procedures

Quality Assurance/Quality Control (QA/QC). To ensure the integrity of data and observations collected, all samples collected under this part will be subjected to QA/QC and chain-of-custody procedures as outlined in regional/local protocols and QA/QC plans. See appendix II for a sample plan.

General Field Methods

Transect lines, randomness of samples or subsamples (pooled), specific sampling methodology, hydrocarbon-free sampling containers and replicates are to be addressed in the regional and local protocols.

NOAA seeks comment on how interested parties could be encouraged to collect baseline information to be used in future assessments. What incentives would encourage parties to conduct these types of studies in areas prone to spills?

Coordination With Economists and Economic Issues

Current Status Under 43 CFR Part 11

Although not specifically mentioned in the existing regulations, economists are intended to play an essential role in translating injuries to natural resources into a dollar figure (damages). Since economists integrate the other components of the damage assessment, close consultation between resource specialists and economists facilitates accurate damage determination.

Quantification

The current rule provides that quantification of the change in the resource be expressed in terms of the change in the level of services that the resource provides. These services include, among others, flood and erosion control, habitat and food chains, as well as such human uses as recreation. The methodology to be used in the Damage Determination phase is critical in determining which services to measure in the Quantification phase.

Damage Determination

The current rule provides that, although the primary measure of damages is the cost of restoration or replacement of the injured resources, the damage claim shall also include the diminution in value of the injured resources pending restoration or replacement. This diminution of value is based upon the reduction in the level of services the injured resources provided to another resource or to humans as a result of the discharge or release. The economic value of the services to be restored or replaced may also be used to determine restoration priorities. In those instances where the trustee determines that the resources should be allowed to recover naturally, the primary measure of damages then will be the value of the lost services pending that natural recovery.

Summary of Comments

Although several comments dealing with economic issues were received in response to the two Advance Notices, many of the comments summarized below were given during the one workshop held in November 1991 that dealt solely with economic principles and issues. Therefore, the following summary of comments is given only to promote and focus additional comments on these issues.

General Comments

Most comments were consistent with the following framework of economic principles for natural resource damage assessment under OPA: Damages under OPA are compensatory rather than punitive; the measure of damages under OPA is the cost of restoration, rehabilitation, replacement or acquisition of the equivalent resources, costs of assessment, plus the diminution in value of those resources pending restoration; the law does not allow double recovery of damages; and any economic studies conducted should be based upon sound economic theory.

Several commenters specifically suggested components that should be included in the damage figure, including social and economic damages, and "stress" and "emotional distress" resulting from a spill. Others stated that the rule should suggest methods which account for the extra harm that might result from a spill in areas that are more susceptible to serious injury due to previous polluting events. Another suggested, however, that economists need to isolate the damage due to a specific spill event from damages due to concurrent events such as droughts, floods, etc. Some commenters suggested that natural resource damages should be limited to those directly resulting from injury to natural resources and are not intended to measure the total social costs of a spill. One commenter also suggested that increased resource impacts caused by an ill-advised cleanup action (e.g., cleanup where natural recovery would have been the best course of action) should not be assessed against the responsible party. Finally, one commenter pointed out that trustees should avoid the fallacy of the statement that "some number is better than no number."

Concerning methods to calculate damages, many commenters indicated that each economic methodology has some shortcomings so the trustee should consider how and when each methodology should be used. Some stated that the trustee should rely on market or behavior-based methods to value the losses, before using other methods. Several commenters stated that, in valuing resources, willingness to accept (or sell) should be the appropriate measure, rather than willingness to pay. Quite a few commenters stated that, if a rate for discounting future damages is specified in the rule, NOAA should not adopt the 10% discount rate contained in 43 CFR Part 11 and upheld in *Ohio* v. *U.S. Department of the Interior.*

Offsetting

Some suggested that benefits from the actions of the RP should be used to offset possible damages for lost use. For instance, where dredging was necessary for navigational enhancement, dredging undertaken by the RP as part of spill clean up should be offset against the damage claim. However, another commenter suggested that one should only count those offsetting benefits that are similar to the lost uses.

Public versus Private Recoveries

On the issue of "public" versus "private" recoveries, several commenters stated that the rule should recognize that the government has no right to recover damages for purely private causes of action, such as the increased transportation costs and economic rents that might result from a spill.

Grossly Disproportionate

Several commenters addressed the issue of when restoration costs might be "grossly disproportionate" to the value of the injured resources. Several commenters suggested that there should be no numeric factor applied to the ratio of "costs" to "value," although a few of the commenters did suggest a specific numeric factor. One commenter stated that attempts to quantify grossly disproportionate are irrelevant if the term "value" includes estimates of nonuse values, claiming that restoration costs would always be smaller than the estimated nonuse value of the injured resources. Finally, another commenter pointed out that according to OPA the "grossly disproportionate" consideration applies only to the trustees' decision to acquire equivalent resources rather than restore, rehabilitate or replace the injured resources.

Reasonable Cost

OPA includes reasonable assessment costs as part of the damage figure. Assessment costs are one of the three basic statutory elements of damages. Some commenters suggested that NOAA consider defining the term "reasonable cost" differently from the definition currently found in 43 CFR Part 11, which suggests that "reasonable" assessment costs would not be greater than the expected damage figure. Others suggested that the rule should not try to define the term since the determination of "reasonable" must be made on a

case-by-case basis and would vary, for example, depending upon the type of habitat affected.

Restoration

Several of the commenters addressed the economic component of restoration. One commenter stated that the trustee should restore "services," rather than resources, since replacing services is equal to restoring resources. Others stated that a trustee may be able to replace resources by restoring the services at a lesser cost than restoring the resources, but such replacement should be with "in kind" resources.

Finally, with respect to the hierarchy of restoration related remedies, one commenter suggested that the requirement in OPA to restore, rehabilitate or replace prior to acquiring equivalent resources is based on the assumption that economists cannot or do not fully identify and value services associated with a specific resource.

Resource Values

Many of the commenters dealt with the issue of valuing lost services. Some of these commenters noted that the important focus in a damage assessment is on the reduction in the flow of services caused by a spill. Other commenters suggested that there may be services for which economic values cannot be calculated. A few commenters specifically raised the issue of trying to put a value on indirect services provided by certain resources, e.g., cultural or religious values.

On the issue of what kinds of values one might include in a damage assessment under OPA, several of the commenters pointed out that OPA, its legislative history and the decision in *Ohio* v. *Department of the Interior*, 880 F.2d 432 (DC Cir. 1989), mandate the recovery of both lost use and nonuse values. There are many categorizations possible for lost services. "Nonuse" values generally refer to values which cannot be inferred from a person's behavior, e.g., the value of knowing that pristine areas continue to exist. Some commenters requested that the rule provide guidance in identifying the different components of resource value in a damage assessment.

Many other commenters suggested that "nonuse" values do not exist for many resources and that, furthermore, where injury is only temporary and resources can be restored, their value would not be diminished. Recovery for nonuse values would be punitive, in these cases, rather than compensatory. One of these commenters also argued that the *Ohio* decision could be, applicable to OPA assessments. As, such, damages could only include all "reliably calculated" values. Since methods to measure nonuse values are considered unreliable by some, this commenter claimed that nonuse values would not be allowable under the *Ohio* decision.

Measurement Methodologies

Some commenters stated that the rule should enumerate which methods can reliably estimate value. Other commenters, however, suggested that the rule should avoid specifying methodologies, and instead allow the trustees to use standard and acceptable economic valuation methodologies, such as travel cost, etc. By allowing the trustees' discretion to invoke standard, acceptable methodologies, the regulations should avoid limiting the use of new methodologies as they become available. Finally, one commenter stated that the rule should not prohibit any specific method.

Travel Cost Methodology

Some commenters stated that the travel cost models reflect people's actions rather than what people say, and are therefore preferable to non-market methods. Several comments were made about how travel cost models should be implemented. Some of these suggested that the rule should give guidance on when to use single-site models and when to use (and how many) multiple sites. Multiple site models may result in better estimates by accounting for substitute sites. These models, however, are more costly and time-consuming to implement. Some commenters pointed out that when using simultaneous equation models with multiple sites, the models must take into account congestion effects and differential quality of substitutes. Finally, some commenters raised the question of how economists should value the opportunity cost for time of the visitor.

Unit Day

One question raised by several of the commenters is whether it is cost-effective to conduct economic valuation studies for "small" spills. Some of the commenters suggested the use of "unit values," average per day values for resource uses, as a possible assessment tool for a small spill or small impacts. Some commenters cautioned that this methodology may be inappropriate where substitute sites are available or when used to quantify the reduced quality of experience.

Hedonic Property Models

Some commenters stated that the hedonic property models should be used in natural resource damage assessments. These models can be used to measure the effect of a spill on property values, i.e., measuring the reduction in value of environmental amenities. For example, one commenter pointed out that an oil spill can have long-term aesthetic impacts on beach-front property. A few of these commenters noted, however, that the use of the hedonic property model may not be cost-effective for most oil spills. One commenter suggested that "average" hedonic effects of oil spills might be inferred by comparing properties which are subject to chronic low level pollution with properties not subject to such pollution.

Other commenters noted that several factors may minimize the usefulness of hedonic property models in damage assessments. Some of these commenters pointed out that hedonic property value models depend upon long-term averages of housing markets and may not be useful to measure short-term effects of a spill. Another commenter indicated that the model should include data collected both before and after the spill. Finally, other commenters stated that it is hard to separate "public" from "private" values when using a hedonic property model.

Contingent Valuation Methodology

The use of Contingent Valuation Methodology (CVM) in natural resource damage assessments precipitated numerous comments. Although CVM is an established economic methodology, its use in measuring "nonuse" values is controversial. CVM is a valuation method which uses surveys to ask people about their values for certain goods or amenities, e.g., how much would they be willing to pay to restore an injured resource. Many of the commenters noted that CVM is a tool that should be available to trustees to measure nonuse values since there is currently no other method that can measure these values. Some of these commenters stated that the rule should place no constraints on the use of CVM. Other commenters suggested that certain factors should be considered in designing a CVM survey, e.g., geographic area covered and the possible effects of the public's outrage over the spill.

Many other commenters expressed reluctance in allowing the use of CVM to measure nonuse values. Since a rebuttable presumption is granted to the trustees for using the damage assessment procedures prescribed by the regulations, these commenters opposed the use of "unreliable methodologies." Other commenters suggested that limitations on the use of CVM should be imposed. They proposed that CVM, for example, should be used only where there is irreversible injury or unique resources involved. Some commenters suggested that the rule should describe the kinds of scenarios where CVM may be used and should provide guidance on how to apply CVM. For example, the rule should specify preference or guidance for: Mail, phone or in-person surveys; open-ended versus close-ended valuation questions; measuring willingness to pay versus willingness to accept; surveys about preventing all spills; broad environmental issues or specific events; testing with real world experiments; animosity towards spiller; what type of CVM survey; and how to test reliability of results. Finally, another commenter suggested that the trustees conduct a survey and other studies in sensitive areas before spills rather than after spills, to avoid "outrage" being a factor in the values, and compare the results to an "after" study to measure the values.

Many commenters noted that there is still much study needed on the use of CVM to measure nonuse values. One commenter suggested that NOAA should commission the National Academy of Sciences to evaluate the use of CVM in a damage assessment context. However, another commenter pointed out that there are no existing published papers measuring nonuse values from oil spills for the Academy to review.

Discussion and Initial Proposal

NOAA has not yet determined its initial position on the various economic issues raised in this section. Therefore, NOAA is seeking further comment concerning all the economic issues to be addressed in the rulemaking, particularly those concerning methodologies for selecting restoration projects, estimating the diminution in value of resources affected by a spill and determining how to avoid double counting. In addition, NOAA seeks comment on the use of contingent valuation methodology and/or alternative methodologies in natural resource damage assessments.

Range of Assessment Procedures

Current Status Under 43 CFR Part 11—The Type A Model

A computer model for estimating damages due to small spills of oil or hazardous substances is available for the Coastal and Marine Environments. The current model estimates injury based upon user input on certain parameters of the spill and bases damages upon average use values. The model is currently being revised to comply with *Colorado* v. *Department of the Interior* and *Ohio* v. *Department of the Interior* to incorporate restoration costs and nonuse values, as well as to update use values. It is expected that the Department of the Interior will propose a model for the Great Lakes in the near future. This model will estimate damages based upon restoration costs and average use and nonuse values.

The Type B Procedures

These procedures contain a step-by-step process for determining the degree of injury to natural resources as a result of the discharge of oil or release of a hazardous substance. They also detail how to quantify that injury, establish restoration costs and develop a compensable value for that injury. The Type B Procedures are also being revised in accordance with *Ohio* v. *Department of the Interior* and *Colorado* v. *Department of the Interior*.

Summary of Comments

Many commenters indicated a preference for providing a variety of assessment procedures, including simplified procedures as well as comprehensive procedures depending on the circumstances. Simplified procedures are most applicable for small spills that would otherwise not be addressed because the cost of conducting an assessment might be greater than the ultimate recovery. Commenters noted that the use of simplified procedures would be less costly to the trustees as well as the responsible party, and will result in more timely recoveries. The benefit of the rebuttable presumption should be granted for use of any of these authorized procedures.

Some commenters questioned whether any procedure less than a comprehensive damage assessment was sufficient under OPA. These commenters noted that only a comprehensive damage assessment would properly estimate use and nonuse values. Others noted that regardless of procedures chosen, OPA requires that the measure of damages must be based upon restoration costs plus use and nonuse values plus reasonable assessment costs. Other commenters represented a different view, indicating that since injuries as a result of oil spills are short-term, damages should be based upon restoration costs and lost use values alone. According to these commenters, since nonuse values cannot be accurately determined, their use in a model or compensation formula may produce recoveries far in excess of what is needed to restore the environment. Therefore, nonuse values, it was argued, should not be required by OPA.

With respect to freshwater/riverine spills, some commenters noted the need for simplified and cost-effective procedures. Regarding urban resources, some commenters noted a need for the development of efficient methods to account for these values.

Compensation Formula or Computer Model

Several commenters indicated that a compensation table or computer model must be based upon an accurate estimate of restoration costs and that such costs must bear a reliable relationship to actual injuries to natural resources as a result of the spill. Comments regarding this premise fell into two very different categories. The first category argued that the factors taken into account by the table or model should be limited. Since the OPA is compensatory and not punitive, a model or table should not incorporate values which may be difficult to measure. Accordingly, this category of commenters would not allow the use of any option or existence values. The second category expressed concern about the use of a model or table because of the possibility that either one would underestimate the injuries. Commenters in this category, therefore, argued for the inclusion of option and existence values. According to these commenters, even if the resource recovered, there will be some diminution in value over the recovery period. Similarly, option values may remain impaired until recovery.

Several commenters agreed that a compensation formula, table or model is practical. Such a scheme could be based upon existing fish kill tables and on similar tables which should be developed for birds. Other studies, including those for existence or option values as well as those that assess values for regional wetlands, could be converted into a database and incorporated into the table or model. Some of these commenters identified factors that the table or model should take into account. These include: The scarcity of a resource in a given area; the size of the spill; and assuring that the compensation value is a significant enough deterrent so that it does not merely become a cost of doing business.

In addition, the data should be periodically updated.

A number of commenters indicated that a table could be similar to a workmen's compensation scheme which includes predetermined values for injuries but requires that those injuries be verified. Another commenter expressed a similar desire for a "reality check" between the table and the observed extent of impact.

With respect to which databases should be incorporated in a table or model, some commenters indicated a preference for databases reflecting national values rather than regional values. Conversely, other commenters stated that any model or table should be developed using regional and local data to correspond more closely to local environments and resource characteristics. One commenter indicated that the values incorporated in either the model or the table should be compared to natural resource damage awards resulting from litigation.

Concerning the use of a computer model, commenters indicated that it would more accurately evaluate variables than a simplistic formula. Models incorporating a number of key variables could be a useful assessment tool and could provide a cost-effective, reliable and rapid assessment.

Expedited Damage Assessment

NOAA proposed an expedited procedure concept in the workshops. In an Expedited Damage Assessment (EDA) the trustee would determine the amount of area affected, observe the direct mortality and then initiate restoration planning based upon those estimates. EDA, therefore, would offer some focused injury determination studies and allow the initiation of restoration more quickly than if a full assessment were undertaken. Commenters suggested that the rule should clearly elaborate the differences between the types of assessment procedures. A poorly defined range of options opens up a good possibility for disputes. A number of commenters noted that the public should be involved in EDA. Other commenters noted that EDA would be particularly useful for scenarios where there is little information regarding impacts. While not directly related to an EDA, some commenters argued for an expedited process where no restoration is required. This would enable the RPs to settle early and would avoid subjecting the RP to an inappropriate penalty.

Comprehensive Damage Assessment

Many commenters indicated that the trustees should maintain the option of conducting a comprehensive damage assessment when simplified procedures would be inadequate to restore the affected resources and services. Other commenters indicated that industry may wish to compel the trustee to undertake a full NRDA where the RP disagrees with the trustee's decision to use a simplified procedure. Under those circumstances, some commenters suggested that industry might agree to be bound by the NRDA. Notwithstanding the fact that the RP would pay for the assessment, some trustees would oppose allowing the RP to compel the trustee to conduct a full NRDA.

Some commenters recommended that the regulations provide a mechanism to calculate the amount of oil spilled. One commenter proposed that the trustee be granted the assumption that the entire cargo was spilled. The RP, therefore, would have the burden to show that a lesser amount was spilled. However, other commenters indicated that such an assumption would be unfair to the responsible party.

Discussion and Initial Proposal

NOAA is considering providing the trustees with a variety of assessment procedures, and providing guidance to the trustees in selecting the procedure most appropriate for a particular spill. The trustees would be able to choose among the various procedures based upon the circumstances of the spill or the resources involved. The availability of a compensation table or computer model for a particular spill, for example, would not necessarily rule out the use of an expedited or comprehensive damage assessment procedure where the trustee finds that the either a compensation table or computer model would not be the best method for assessing damages. Parallel assessments using more than one procedure may be allowed, provided there is no double counting.

Compensation Table

NOAA is proceeding with the development of a compensation table, to be proposed later this year. A compensation table could be used for a range of spills, including smaller spills, spills in industrialized or biologically degraded areas, spills in open water and spills where it would be difficult to ascertain precise injury. It is likely the table would be based upon a dollar per gallon formula taking into account average restoration costs plus average lost use and non-use values pending restoration. The variables will be the amount and type of oil spilled and the region and habitat type in which the spill occurs. It will provide the trustees with procedures that have both national consistency and regional specificity. It is also contemplated that the table may even be estuary- or bay-specific for areas that are likely to experience numerous spills. When the compensation table is proposed, NOAA will provide all supporting documentation concerning the determination of damages to permit a thorough public review and comment opportunity.

Adoption of the Revised Type A Model

The use of the revised Type A model might be appropriate for a range of spills. NOAA is working closely with the Department of the Interior in the revision of the current Coastal and Marine Model, as well as the development of the Great Lakes Model, in anticipation of the recommendation that these models be adopted for certain spills under OPA.

Expedited Damage Assessment

Experience has indicated that where the trustees and responsible parties have best cooperated in conducting a damage assessment, the assessment has been neither a "Type A" nor "Type B" approach, as these are currently constituted, but often has combined aspects of both. To take advantage of this practical experience, NOAA may propose an EDA procedure. This procedure will require more field work than the typical "Type A" assessment including minimal, short-term injury determination studies. The goal of the EDA will be to facilitate early initiation of restoration.

The injury determination studies would be based upon initial mortality and the area and/or types of habitat affected by the oil spill. Predetermined use and nonuse values, possibly from the compensation table or revised Type A model, could also be included as damages. Alternatively, use and nonuse values could be determined through minimal and relatively quick economic studies. Using this initial basis, the trustee would then identify restoration activities that could be implemented in the near future.

While it is impossible to anticipate all the scenarios which would be appropriate for EDA procedures, the regulations will identify a number of factors that could indicate the use of an EDA. These factors include, among others, the size of the spill, environmental sensitivity of the impacted ecosystem to the spill, unique species, type of oil and the time of year. Any of these factors alone or in combination with each other could be sufficient to warrant use of expedited procedures.

Comprehensive Damage Assessment

The trustees may determine that the circumstances of the particular spill will require a more lengthy and detailed damage assessment. Such an assessment would be similar, in concept, to the Type B procedures. NOAA seeks further comment upon the applicability of the Type B procedures and how such procedures should be tailored to meet the requirements of OPA.

Injury and Pathway Determination

Current Status Under 43 CFR Part 11

To assert a natural resource damages claim, authorized officials must establish that an injury, i.e., an adverse change in the resource, occurred and must link that injury through a pathway to a discharge or release. Otherwise, further assessment actions cannot be taken and no assessment costs can be recovered. All of the natural resources specified by CERCLA have been placed into one of the following five groups: Surface water, ground water, air, geologic and biological resources. Specific definitions of injury are provided for each group which focus on the physical, chemical or biological properties of the resource that enable it to provide one or more services. To establish injury, there must be a measurable adverse change in the resource that is detectable by observation or scientific methods. The change must be to the physical or chemical quality or in the viability of the resource. The rule created new standards (based upon FDA standards, State health directives and eighteen measurable adverse changes in viability) that establish injury to biological resources. New injury definitions were also developed for geologic resources. Injury definitions for air, ground water and surface water resources are based upon state and Federal standards. Using these standards, trustees are able to determine that an injury has occurred without having to prove that the specific substance or oil was the sole cause of that injury.

In addition to the injury standards identified above, new standards for injuries may be established through the use of acceptance criteria. Under the current regulations, the acceptance criteria to be used for developing new biological resource viability standards include: (1) The biological response is often the result of exposure to oil or hazardous substances; (2) exposure to oil or hazardous substances is known to cause a given biological response in free-ranging organisms; (3) exposure to oil or hazardous substances is known to cause a given biological response in organisms in controlled experiments; and (4) the biological response measurement is practical to perform and produces scientifically valid results. New research necessary to develop new viability standards that meet the criteria would constitute costs beyond those which the trustees can claim as part of an assessment.

In addition to satisfying the injury definition, the pathway of the discharged or released substance to the resource must be demonstrated, and exposure of the resource to the substance must be confirmed.

Summary of Comments

Several commenters stated that oil spills do not result in permanent or long-lasting environmental impacts. Most of the environmental impacts are transient and are usually rapidly remedied by cleanup and natural processes. One of the commenters, therefore, suggested that any spill of 100 gallons or less should be exempted from the damage assessment process.

Other commenters noted that long-term impacts may not be evident for years after a spill and suggested more research regarding such effects on the environment. Some of the commenters suggested that the assessment should include studies on certain types of sublethal effects such as impacts on reproductive cycles, recovery of diversity and long-term health of the ecosystem itself. Until these effects are identified, each damage assessment should include compensation payment for unknown or cumulative effects. Such awards should be used for monitoring long-term research into such cumulative effects.

Several of the commenters stated that the acceptance criteria are too strict. Some of these commenters suggested that injury should be defined merely by demonstrating that resources were "at risk" as a result of the spill. The trustees, therefore, would be allowed to assume injury rather than meet some "threshold." Others suggested that trustees need only prove that injury to resources is, "more likely than not to have occurred." Other commenters, however, stated that the acceptance criteria should be sustained because they ensure that injuries claimed for are attributable to a spill.

Discussion and Initial Proposal

Certain viability standards that measure biological responses, such as eggshell thinning or death due to brain cholinesterase enzyme activity, which are codified at 43 CFR part 11 as injury standards, are specific to particular kinds of hazardous substances. These standards are inappropriate for the OPA regulations which address only oil, and, accordingly, will not be adopted. The remaining codified biological injury definitions can be linked to exposure to oil. NOAA seeks comment concerning which of the remaining definitions should be incorporated into the proposed rule.

Scientific literature has established that death, as well as certain types of sublethal effects on fish and wildlife, including mammals, can be linked to exposure to oil. For example, oil-induced injuries to fish include fin erosion, cancers, reduced fish reproduction and avoidance behavior. Reduced reproduction in bird populations has also resulted from exposure to oil. Finally, in wildlife, exposure to oil has led to overt external malformations, skeletal deformities, internal whole organ and soft tissue malformations, and histopathological lesions. NOAA seeks comment on whether any of these sublethal effects should be incorporated into the OPA regulations.

Injury definitions should also be addressed for the other resource categories considered in the current rule: Surface water, ground water, air and geologic resources. NOAA seeks comment on whether to develop different injury definitions for these resources, or to adopt or revise the current definitions.

The acceptance criteria in the current rule have been criticized as being too stringent. NOAA is seeking additional comment on the applicability of these acceptance criteria in developing additional adverse viability standards for injuries to biological resources under OPA. Under OPA, a trustee seeking compensation as a result of spills requiring more than a simplified assessment would still have to meet the causation requirement of demonstrating an adverse change in the resources, showing a pathway of contamination and confirming exposure of the resource to the oil. If these criteria are too stringent, what standards would be used to establish than an observed biological response is a measurable adverse change in the viability of that resource as a result of exposure to the discharge oil?

Restoration Guidance and Costs

Current Status Under 43 CFR Part 11

The existing procedures give guidance to trustees in developing a plan for the restoration, rehabilitation, replacement or acquisition of the equivalent of the natural resources under their trusteeship. The procedures allow for adequate public notice, opportunity for a hearing and consideration of all public comment before a final plan is developed and implemented. Trustees are to develop possible alternatives for restoration, rehabilitation, replacement, and/or acquisition of equivalent resources. For large, complex assessments involving a variety of resources and services, there may exist several restoration alternatives. The trustees may consider any combination of restoration, rehabilitation, replacement, and/or acquisition actions under these circumstances, provided that these actions return the injured natural resources and the services that they provide to the public to the levels before the spill.

Summary of Comments

There appeared to be general consensus that only guidance, not rigid requirements, should be provided in the regulations in determining damages through restoration planning and implementation of restoration activities. Concerning a possible hierarchy of restoration, comments varied depending on whether emphasis was on inland spills or coastal spills. The majority of the views expressed on the issue of coastal spills indicated that restoration of the natural resources should be the primary objective followed by replacement, and that acquisition should be considered only as a last resort. Commenters regarding inland spills suggested that the order of preference should be reversed. Some indicated that, in sites where trustees are not sure of how to restore, acquisition should not be a last resort. These commenters indicated that humans may lack the technology to restore an inland system and, furthermore, that restoration may cause more harm than good.

Concern was expressed that because there are few proven restoration techniques, remediation rather than restoration may be the only alternative. Accordingly, trustees indicated that the definition of "technically feasible" in the current rule is too stringent since it requires that restoration techniques be well known and that each element of a restoration plan have a reasonable chance of successful completion in an acceptable period of time. These trustees suggested that the rule allow the use of pilot studies where those studies have a reasonable chance of success.

Additional commenters indicated that timing of the restoration activities is important to facilitate natural biological cycles. Others noted that monitoring must be an integral part of any restoration plan to ascertain whether the restoration has been a success. Some commenters noted that it may be difficult to determine at what level services should be restored. For example, since lower population levels can result from natural variability as well as from the impact of an oil spill, trustees should account for this variability in undertaking a restoration.

Some commenters suggested that the trustees consider restoring systems rather than individual species. Other commenters indicated that trustees should consider the option of natural recovery since it may be infeasible to speed the recovery of local populations to their pre-spill densities. By letting nature perform many key functions, the cost of a restoration or rehabilitation project may meet a "reasonable cost" criterion. Some commenters suggested that natural recovery of an entire ecosystem may be a slow process and may never accomplish a full return to pre-spill species types and/or populations. Another commenter suggested, however, that recoveries for lost use pending restoration can compensate for lost services; perhaps replacing services by adding access to substitute sites.

Discussion and Initial Proposal

NOAA is considering providing the trustees with guidance on a variety of restoration techniques and on the selection of restoration alternatives most appropriate for a particular spill. However, NOAA will encourage the trustee to undertake full scale restoration projects only after pilot projects have been attempted.

The impacts of each oil spill are influenced by a number of factors, including the type and quantity of oil, site of the spill, season, temperature and wind speed and direction. At a minimum, all restoration plans must include some maintenance and monitoring. In addition, since restoration is an emerging technology, the plans must incorporate provisions allowing for mid-course corrections. NOAA will request trustees to address the following issues in their planning: What was the pre-spill condition of the site; is the site frequently exposed to spills; and what is the post-cleanup condition of the site. The answers to these and perhaps other questions (e.g., the amount of money available) should form the basis for defining the goals and objective criteria for restoration.

Cleanup and remediation actions will largely determine the type and amount of post-cleanup activities that trustees should conduct. In addition, the amount and quality of restoration that can be undertaken is largely dependent upon the limited ability of the responsible party to pay. If less than the cost for full restoration is obtained, priorities will have to be established among the natural resources that are candidates for restoration. NOAA may recommend that the approaches used be based on available funds from the settlement or award, scientific and management recommendations to the Restoration Plan and responses of the public during the public review process.

NOAA is considering the use of a range of restoration and/or replacement alternatives and seeks comment on the possible components of that hierarchy. These alternatives should include a "No Action—Natural Recovery" alternative as well as other alternatives that reflect varying rates of recovery, alternate priority resources, management actions or equivalent resource acquisition. Restoring, rehabilitating and replacing injured resources are similar activities, and may be considered simultaneously, however, NOAA may recommend that resource acquisition be selected as a last resort, when it is the only viable method of obtaining lost functions.

NOAA will recommend that all restoration plans include some monitoring and maintenance, as well as the ability to make mid-course corrections. Monitoring and maintenance should continue until there is clear evidence that the system has produced the expected succession of animal and plant assemblages and has stabilized.

While the actual degree of involvement of the RP will be at the discretion of the trustees, NOAA recommends that restoration planning activities be coordinated among the trustees and the responsible party. Decisions should be made by consensus of the trustees. The lead administrative trustee should be responsible for coordinating activities. Once preliminary agreement has been reached relative to the types of activities that are needed and feasible, notice of the preliminary plans should be made public and an opportunity provided for a public hearing for appropriate spills. Public comments should be considered during development of the final restoration plan.

From its research and experience in the area of resource and habitat restoration, NOAA can make certain recommendations in the area of restoration. The following discussion on possible restoration strategies and techniques is given as guidance, not requirements, to other trustees. These recommendations do not, by any means, cover all possible resources, incidents or services provided by resources.

Generally, residual oil or oil products that can impede development or growth, or taint the biota, should be removed from an oiled habitat and any alteration to the hydrology corrected. Sources of contamination must be eliminated for successful on-site restoration to be implemented. Where cleanup may cause additional injury, the trustees must decide if the additional injury and subsequent restoration is preferred to natural recovery. Recommended techniques may include, but are not limited to: Physical removal of contaminated sediments, whereby clean substrate is exposed for revegetation or recolonization. Clean sediment should be added so that the elevation profile and hydrography is restored if scraping is used. This technique applies to both intertidal and subtidal beaches and flats. Pressure spraying is another alternative; and enhanced bioremediation, whereby nutrients are added to enhance the microbial degradation of oil should be considered. Bioremediation has the potential to clean up the oil trapped beneath rocks and in the beach sediments.

Effects of direct mortality, as well as lowered fecundity, on population levels may be alleviated by cleaning up the oil and introducing suitable substrate to provide the opportunity for wild stocks to repopulate the site. Other techniques for restoration of fauna may include, but are not limited to: Limiting fishing or harvesting in order to allow time for species to repopulate an area; enhancing shellfish populations by covering shellfish beds with crushed oyster shells or gravel to enhance larval setting; harvesting natural resources that are in danger of being contaminated; constructing artificial reefs to attract finfish and shellfish into an area; and introducing hatchery-reared juveniles in extreme cases.

Oil in marshes can lead to changes in floral reproductive capacity, abnormalities in growth and seed formation and reduction in plant shoots. Thick layers of oil can prevent gaseous interchange between soil and air, which can lead to chlorotic symptoms and death in plants. Two alternative techniques will be recommended for restoring vegetation: Planting and natural recovery. Natural recovery is frequently recommended for mangroves. Planting is a viable option for restoring some vegetation. In all cases, hydraulic gradient must be appropriate and light attenuation conditions must be appropriate for seagrasses and other submergents. Injury to seagrass may be rectified by using seagrass plugs, bare roots or peat pots. The latter two approaches are thought to be more cost-effective and less labor intensive. Planting of 1–2 year old mangrove seedlings grown from propagules harvested in the wild is a recommended technique for restoring mangroves. Salt marsh transplanting also may be accomplished by bare root and plugs of wild stocks or greenhouse-reared plants. NOAA will recommend that the trustees consult published recommendations that are available.

NOAA may recommend that restoration plans should attempt to restore an injured site to a state that provides the greatest potential for recovery of all of its natural resources. NOAA, however, recognizes that a site cannot always be restored to a level that would be conducive to replenishing populations and services. It also recognizes that recovered damages may not be sufficient to permit adequate restoration. Under these conditions, other alternatives should be considered. Other damaged or altered sites could be rehabilitated to allow the lost populations to increase to a level that would compensate for their loss in the oil spill site. This might require the acquisition of privately-owned property. NOAA may recommend that preference be given to sites adjacent to the impacted site, sites within the same watershed, or sites that have similar resources in another watershed.

Measures that would facilitate or improve use of a site can be undertaken rather than restoring the natural resources where restoration is deemed infeasible or impossible by the trustee. These measures include upgrading a marina or adding a dock to facilitate access for recreational fishing, rather than restoring fish populations. NOAA may recommend that preference be given to sites that are closest to the impacted site. This, however, should be considered a least acceptable option since resources that have been impacted are not being replaced.

NOAA may recommend that costs of habitat restoration, as compensation for injury to trust resources or their uses, be determined from information from nationwide experience in previous, well-conducted restoration attempts, where practicable, and that they be measured by their effectiveness in restoring lost natural ecological function. Restoration is a new and emerging field. Thus, NOAA recommends that the cost estimates for restoration include a monitoring program, mid-course corrections, planning and management costs.

Coordination With Legal Counsel

Current Status Under 43 CFR Part 11

The current regulations do not require trustees to coordinate with respective agency counsel, other than to require that assessment activities must comply with other applicable laws. However, the preamble to the current rule encourages the use of an interdisciplinary team for assessments.

Summary of Comments

Some participants indicated that, since many assessments have been conducted under the threat of litigation, attorneys have more say than the scientists in the assessment process. Others indicated that early and frequent coordination is necessary in order for trustees to maximize claims that will be determined in court.

Discussion and Initial Proposal

Attorneys play a major role in the form and procedure of conducting a damage assessment. It is not likely the regulations will require that attorneys be officially involved in the assessment process. However, trustees should frequently seek their respective counsel's advice. Due to the possibility of litigation in a natural resource damage assessment, the attorneys will generally be a part of the process.

Coordination With State Law

Current Status Under 43 CFR Part 11

Under the current rule, all trustees (State, Federal and Indian tribal trustees) are urged to plan and implement damage assessments jointly. The current rule also recognizes that double recovery is prohibited by law. State law and regulations are used to establish injury threshold levels. Where Federal law allows, appropriate state procedural laws apply to assessment activities. Also, in conducting assessments, trustees are required to comply with any other applicable statutes.

Summary of Comments

Questions were raised on how natural resource trustees could conduct joint assessments and still fulfill their responsibilities. For example, state

compensation tables may not be based upon the same parameters as the OPA table.

Some commenters from potentially responsible parties indicated concern that they would have to deal with at least two sets of trustees and that state and Federal trustees might be conducting parallel, but separate, assessments. Many commenters suggested that the potential for conflicting law and regulations is an excellent reason for the trustees to plan and organize in advance of a spill.

Since the goal of the trustees should be to restore the resource, it was proposed that the trustees should conduct joint assessments and claim damages only for the amount necessary to restore. Otherwise, trustees might attempt to pursue claims under other laws that would allow recovered monies to be used for purposes other than restoration. In addition, it was suggested that the regulations require the trustees to select the statutory scheme, i.e., either State or Federal, at the time of the spill, under which to pursue a damages claim.

Discussion and Initial Proposal

OPA does not preempt state oil spill laws and related regulations, thus allowing for the potential for higher recoveries. However, OPA specifically prohibits the "double recovery" of damages as a result of injuries to natural resources, thus trustees cannot collect more than once for the same injury. Since section 1018 of OPA does not prevent states from establishing additional liability as a result of an oil spill, the OPA regulations cannot require state trustees to adopt or follow the procedures promulgated by NOAA in lieu of other state laws or damage assessment schemes. However, since OPA also prohibits the "double counting" of natural resource damages, all trustees will be encouraged to conduct joint assessments and present a total unified claim for damages. Such claims should be deemed sufficient by the trustees to restore the injured natural resources and services and for diminution in values until restoration is complete. As discussed in the "Use of Sums Recovered" section of today's Notice, any monies received under OPA must be used to restore, rehabilitate, replace or acquire the equivalent of the affected resources and services provided by those resources. NOAA will encourage trustees to concentrate upon "fixing the resources" and not be distracted by ill-fated ventures of attempting to divide the resources and pursue individual claims.

The unified trustee approach will also encourage participation from the responsible party, instead of a multi-assessment process that would encourage the responsible party to pursue litigation in order to lessen the number of claims. In addition, unified trustees will allow the pooling of resources for a more effective assessment and, if necessary, litigation.

NOAA also notes that state trustees should be encouraged to coordinate with Federal trustees, since section 7 of Executive Order 12777, 56 FR 54757 (October 22, 1991), requires that monies from the Oil Spill Liability Trust Fund for the "initiation of assessments" are provided to the Federal trustees. The Federal trustees may then allocate such monies to other trustees.

Use of Sums Recovered

Current Status Under 43 CFR Part 11

CERCLA requires that funds recovered for damages must be used to restore, replace or acquire the equivalent of the injured resource. To accomplish this objective, the current rule requires the establishment of an account into which all monies awarded pursuant to section 107 of CERCLA or section 311(f)(4) and (5) of the Clean Water Act for compensation for damages must be placed. For Federal trustees, this account shall be located in the United States Treasury. States or Indian tribe trustees are given the choice of setting up an account in their treasury or having the responsible party set up an interest-bearing fund. The purpose of these procedures is to ensure that monies obtained for restoration will be available for that use without requiring that the trustee go through the normal appropriations process.

All monies awarded to the Federal natural resource trustee go into non-interest bearing accounts in the Federal Treasury. This procedure requires an adjustment to take into consideration anticipated inflationary effects. Therefore, the rule provides that, for these Federal accounts, the damage award going into the non-interest bearing accounts shall be adjusted by the rate payable on Federal notes and bonds with a maturity that approximates the length of time required to complete the restoration. This procedure is meant to adjust for the effects of inflation when the restoration or replacement is expected to occur over a long period of time. The monies are spent in accordance with the final Restoration Plan.

Since amounts recovered for a type A assessment may be less than the amounts recovered as a result of a type B assessment, it may be infeasible to prepare a separate full-scale restoration plan for each type A assessment award. The rule provides that, when recoveries occur from type A assessments, the natural resource trustee may apply several type A recoveries to one restoration plan, so long as the plan is intended to address the same or similar resource injuries as those identified in each type A assessment.

Summary of Comments

Some commenters indicated that, whenever possible, trustees should establish a "Joint Trustee Fund." The fund would be managed by the Trustees as a group, with disbursements made in accordance with a jointly prepared Restoration Plan. However, it was also pointed out that joint accounts can only be accomplished through the Registry of the Court, do not yield a high rate of interest, and additionally, Federal judges do not like to add to the administrative load of the court.

A few commenters indicated that a joint fund system will only work if the trustees work well together and can agree to a process to manage and disburse the funds. There would have to be a dispute mechanism and a process for dissolving the partnership, if necessary. The issue of whether trustee disputes would result in the funds being tied up in the account rather than directed towards restoration activities was also raised.

One commenter raised the question of whether the responsible party should also have a role in the managing of the funds.

Discussion and Initial Proposal

NOAA may provide the trustees more than one option for the use of sums recovered from a responsible party.

Placement of Funds

NOAA may propose that trustees establish a "joint trustee account" under the registry of the applicable Federal district court. Such an account may be interest bearing, depending upon the rules of the court, and will be jointly managed by all the trustees through a trustee committee or council established by the trustees.

While the joint trustee account may be the preferred alternative, the trustees may also have the option of dividing the recoveries and depositing their respective amounts in their own separate accounts. Such funds shall be retained by the trustee in a revolving trust account, without further appropriation, for use only in the reimbursement or payment of costs of the trustees in performance of section 1006(c) of OPA. Funds under the

management of Federal trustees shall be placed in the interest bearing accounts authorized under section 1006(f) of OPA until expended for the purposes of implementing the final restoration plan. Regardless of the placement of recoveries, the trustees must maintain appropriate accounting and reporting methods to insure the proper use of sums recovered.

Use of the Sums Recovered

Upon the receipt of the monies by the court registry, the trustees may immediately petition the court for that part of the damages that represents the unreimbursed reasonable costs of assessing damages which would include the costs of initiating the development of the restoration plan. Expenditures from the joint fund will be allowed by petition to the court and all expenditures will be used to develop and implement the final restoration plan as approved by the trustees. Appropriate costs include the trustees' base and incremental costs in developing and implementing the restoration plan. In accordance with section 1006(f) of OPA, any funds in excess of the costs or reimbursements for the implementation of the restoration plan shall be transferred to the Oil Spill Liability Trust Fund.

Where the trustees have adopted an overall restoration plan for a specific area, i.e., bay or estuary, recoveries of co-trustees or recoveries from previous spills may be pooled until there is a sufficient amount of money to conduct restoration activities, including the costs of monitoring and maintenance, on an ecosystem, bay or area approach. This option for use of recoveries will likely be most useful in areas with long-term pollution effects where damages recovered from a single spill would be too small to improve the ecosystem. Where an overall restoration plan has not been adopted by the trustees, or is inappropriate for the particular spill, specific restoration plans must be developed in relation to the amount of damages recovered.

Definitions for OPA Regulations

NOAA may propose the following definitions in the regulations. Many of the definitions given here are taken, with some modification, from either OPA or 43 CFR 11.14.

"Acquisition of the equivalent" or "replacement" means the substitution for an injured resource with a similar resource that provides the same or substantially similar services.

"Air" or "air resources" means naturally occurring constituents of the atmosphere including those gases essential for human, plant and animal life.

"Assessment area" means the area or areas within which natural resources have been affected directly or indirectly by the discharge of oil.

"Baseline" means the condition or conditions of the natural resources that would have existed at the assessment area had the discharge of oil under investigation not occurred. The baseline takes into account natural variability that would have existed at the assessment area had the discharge of oil under investigation not occurred.

"Biological Resources" means those natural resources referred to in section 1001(20) of OPA as fish, wildlife and biota. Fish and wildlife include marine and freshwater aquatic and terrestrial species; game, nongame and commercial species; and species listed as endangered or threatened under Federal or State law. Biota encompasses shellfish, terrestrial and aquatic plants and other living organisms not otherwise listed in this definition.

"CERCLA" means Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. 9601 *et seq.*, frequently referred to as the "Superfund Act."

"Control area" or "control resource" means an area or resource unaffected by the discharge of oil under investigation. A control area or resource is selected for its comparability to the assessment area or resource and may be used for establishing the pre-spill condition and for comparison to injured resources. A "control" area or resource is also referred to as a "reference" area or resource.

"Cost-effective" or "cost effectiveness" means that when two or more activities provide the same or a similar level of benefits, the least costly activity providing that level of benefits will be selected.

"Damages" means the amount of money calculated to compensate for injury to, destruction of, loss of or loss of use of natural resources, including the reasonable costs of assessing or determining the damage, which shall be recoverable by a United States, State, Indian tribe or a foreign trustee.

"Destruction" means the total and irreversible loss of a natural resource.

"Discharge" means any emission of oil (other than natural seepage), intentional or unintentional and includes, but is not limited to, spilling, leaking, pumping, pouring, emptying or dumping.

"Drinking water supply" means any raw or finished water source that is or may be used by a public water system, as defined in the Safe Drinking Water Act, or as drinking water by one or more individuals.

"Exclusive economic zone" means the zone established by Presidential Proclamation Number 5030, dated March 10, 1983, including the ocean waters of the areas referred to as "eastern special areas" in Article 3(1) of the Agreement between the United States of America and the Union of Soviet Socialist Republics on the Maritime Boundary, signed June 1, 1990.

"Expedited damage assessments" (EDA) means a range of techniques to assess damages to natural resources that are intermediate between the type A procedure of 43 CFR part 11 and a comprehensive damage assessment. Those procedures include injury assessment studies that would yield sufficient data to make a claim for compensation but would not be so comprehensive as to constitute long-term data collection programs. The goal of an EDA is to enable the trustees to move more quickly into restoration.

"Exposed to" or "exposure of" means that all or part of a natural resource is, or has been, in physical contact with oil or with media containing oil.

"Fund" means the Oil Spill Liability Trust Fund, established by section 9509 of the Internal Revenue Code of 1986 (26 U.S.C. 9509).

"Geologic resources" means those elements of the Earth's crust such as soils, sediments, rocks and minerals, including petroleum and natural gas that are not included in the definitions of ground and surface water resources.

"Ground water resources" means water in a saturated zone or stratum beneath the rocks or sediments through which ground water moves. It includes ground water resources that meet the definition of drinking water supplies.

"Incident" means any occurrence or series of occurrences having the same origin, involving one or more vessels, facilities or any combination thereof, resulting in the discharge or substantial threat of discharge of oil.

"Injury" means a measurable adverse change, either long or short term, in the chemical or physical quality or the viability of a natural resource resulting either directly or indirectly from exposure to a discharge of oil.

"Lead administrative trustee[s]" means the trustee agency that is responsible for coordinating the injury determination, quantification, damage determination and restoration strategy selection processes in the event of a discharge. The lead administrative trustee[s] shall be designated by the Federal, State, Indian tribal and foreign

trustees that have natural resources which have sustained, or are in substantial threat of sustaining, injury, destruction, loss or loss of use as a result of a discharge or the substantial threat of a discharge.

"Loss" means a measurable adverse reduction of a chemical or physical quality or viability of a natural resource.

"Natural resources" or "resources" means land, fish, wildlife, biota, air, water, ground water, drinking water supplies and other such resources belonging to, managed by, held in trust by, appertaining to or otherwise controlled by the United States (including the resources of the exclusive economic zone), and State or local government or Indian tribe or foreign government.

"Natural resource damage assessment" or "assessment" means the process of collecting, compiling and analyzing information, statistics or data through prescribed methodologies to determine damages for injuries to natural resources as set forth in this part.

"Navigable waters" means waters of the United States, including the territorial sea.

"Nonuse value or values" means the value that humans have for services provided by a resource where those humans do not have actual physical or visual contact with that resource. Such services encompass values associated with the option to use a resource in the future, and values associated with knowing that the resource exists or will be conserved in the future.

"Oil" means oil of any kind or in any form, including, but not limited to, petroleum, fuel oil, sludge, oil refuse and oil mixed with wastes other than dredge spoil, but does not include petroleum, including crude oil or any fraction thereof, which is specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of section 101(14) of CERCLA and which is subject to the provisions of that Act. However, for any of the petroleum products that would be specifically listed or designated as a hazardous substance pursuant to the above referenced CERCLA provisions, but are a direct byproduct, component, or derivative of the oil discharge under investigation, then these petroleum products are included in the OPA definition of oil.

Inherent in this definition of oil is the recognition that oil is a complex substance with many chemical constituents. These "toxic" constituents are released during the process of weathering (which includes volatilization, decomposition and dispersion) and therefore, may be injurious to natural resources. Because these constituents are a direct result of the discharge and because they also cause injury to the natural resources that fall under the purview of OPA, constituents of oil that would otherwise be listed as a hazardous substance under CERCLA will be included within the OPA definition of oil, provided that these constituents are derived from the discharge of oil under investigation. The response agency, or the trustee, must make an initial determination at the time of the discharge as to how to classify the substance. If it falls within the hazardous substances classification of CERCLA at the time of the initial determination, then the discharge will be governed under CERCLA. However, once a discharge is classified as oil, as opposed to a hazardous substance, then the oil and its byproducts or constituents are regulated under OPA. This approach avoids the possibility of two complex statutory and regulatory schemes being applied to the same oil discharge incident.

"OPA" means Oil Pollution Act of 1990, 33 U.S.C. 2701 *et seq.*

"Pathway" means any physical, biological or chemical link that connects the natural resource injury to the discharged oil.

"Reasonable cost" means the amount that may be recovered for the cost of performing a damage assessment.

"Recovery Period" means the length of time required for the injured natural resources and the services that the natural resources provide to return to their baseline conditions.

"Reference area" or "reference resource" means an area or resource unaffected by the discharge of oil under investigation. A reference area or resource is selected for its comparability to the assessment area or resource and may be used for establishing the pre-spill condition and for comparison to injured resources. A "reference" area or resource is also referred to as a "control" area or resource.

"Replacement" or "acquisition of the equivalent" means the substitution of a similar resource that provides the same or substantially similar services as an injured resource.

"Responsible party or parties" means a person or persons described in or potentially described in one or more of the categories set forth in section 1003(32) of OPA.

"Restoration" or "rehabilitation" means actions undertaken to return injured natural resources to their baseline condition, as measured in terms of the injured resources' physical, chemical or biological properties and the services they previously provided.

"Services" or "natural resource services" means the physical, biological and aesthetic functions performed by the resource including the human uses of those functions. These services are derived from the physical, chemical or biological quality of the resource.

"Surface water resources" means the waters of the United States including the sediments suspended in water or lying on the bank, bed or shoreline and sediments in or transported through coastal and marine areas. This term does not include ground water or water or sediments in ponds, lakes or reservoirs designed for waste treatment under the Resource Conservation and Recovery Act of 1976, 42 U.S.C. 6901–6987.

"Technical feasibility" or "technically feasible" means that the technology and management skills necessary to implement an Assessment Plan or Restoration Methodology Plan are well known and that each element of the plan has a reasonable chance of successful completion in an acceptable period of time.

"Trustee" means those officials of the Federal and State governments, of Indian tribes and of foreign governments designated according to section 1006(b) of OPA who may present a claim for and recover damages to natural resources.

"Type A procedure" means one of the simplified natural resource damage assessment procedures requiring minimal field observation, found in subpart D of 43 CFR part 11.

"Type B procedure" means an alternative protocol for comprehensive natural resource damage assessments, currently found in subpart E of 43 CFR part 11.

"Use value or values" means the value that humans have for services provided by a resource where those humans have actual physical or visual contact with that resource."

(33 U.S.C. 2706(e))

Dated: March 9, 1992.

Thomas A. Campbell,

General Counsel, National Oceanic and Atmospheric Administration.

Appendix I—Draft Memorandum of Understanding

I. Introduction

This Memorandum of Understanding (MOU) by and between the State of _____ (State), the National Oceanic and Atmospheric Administration of the United States Department of Commerce (NOAA), the United States Department of the Interior (DOI) and the United States Department of Agriculture (USDA) (collectively referred to as the Trustees) is entered into to ensure the coordination and cooperation of the Trustees in the initiation of assessment and assessment of damages for injuries to natural resources resulting from _____, and the application of any natural resource damages recovered toward the restoration, rehabilitation, replacement and/or acquisition of equivalent natural resources.

[Note: Obviously, in any given incident there may be more or fewer trustees than those indicated above.]

II. Parties

The following officials, or their designees, are parties to this MOU and act on behalf of the public as Trustees for natural resources under this MOU:

1. The _____ of the State of _____,
2. The Under Secretary for Oceans and Atmosphere, Administrator of the National Oceanic and Atmospheric Administration, acting on behalf of the Secretary of Commerce,
3. The Secretary of the Department of the Interior,
4. The Secretary of the Department of Agriculture,
5. [The Secretary of DOD, DOE and/or the designated trustee of a Tribe and any foreign [international] trustee.]

III. Location

This MOU is intended to address natural resources injured [damaged] * * *

[Identify as precisely as possible geographic location and incident(s) involved]

* * * (the Incident).

IV. Purpose

The Trustees recognize the importance of integrating and coordinating the assessment of natural resource damages for injuries to natural resources affected by the Incident, seeking compensation for those injuries to natural resources and the services they provide and restoration of those affected resources and services provided by those resources. The purpose of this MOU is to provide a framework for such coordination and cooperation between the Trustees, and for the implementation of the activities of the Trustees in furtherance of their natural resource trustee responsibilities. The Trustees' activities will primarily involve assessing damages for injuries to natural resources, seeking compensation for those injuries to natural resources and the services they provide and restoring the injured natural resources and the services provided by those natural resources affected by the Incident. Nothing in this MOU is to imply that any signatory trustee is in any way abrogating or ceding any responsibility or authority inherent in its control or trusteeship over natural resources.

V. Authority

The Trustees enter into this MOU in accordance with the natural resource trustee authorities provided for each Trustee by the Federal Water Pollution Control Act, 33 U.S.C. 1251 *et seq.*, the Oil Pollution Act of 1990, Public Law 101–380, the Comprehensive Environmental Response, Compensation and Liability Act, as amended, 42 U.S.C. 9601 *et seq.*, and, if utilized, the Natural Resource Damage Assessment Regulations, 43 CFR part 11, or the OPA regulations, when promulgated.

VI. Organization

The Trustees recognize the importance of coordinating their efforts in order to effectively and efficiently meet their respective natural resource trustee responsibilities under applicable Federal and State law. Accordingly, there is hereby created a Trustee Council to implement the MOU to which each Trustee will designate a representative and an alternate. The Council may create subcommittees when they are deemed necessary to effect the purposes of this MOU. A representative designated by unanimous consent of the Trustee Council members will serve as Lead Administrative Trustee for administrative purposes. This representative shall fully coordinate its activities with and act under the direction of the Council. The Trustee Council will also seek advisory participation from the United States Department of Justice, the United States Department of Transportation (Coast Guard), the State Attorney General or other legal advisor and the United States Environmental Protection Agency, when appropriate.

VII. Duties and Responsibilities

On behalf of the Trustees, the Trustee Council shall coordinate and authorize all Trustee activities and matters under this MOU in accordance with the decision making requirements contained in section VIII. The Trustee Council may take whatever actions the Council, in its discretion, determines are necessary to fulfill the trust responsibilities of each Trustee under and to effectuate the purposes of applicable Federal and State law. It is expected that the Trustee Council, in accordance with applicable laws and policies, may take the following actions, among others, to address the Trustees' natural resource trustee responsibilities:

A. Conduct scientific and technical studies, sampling and other matters related to the assessment of natural resource damages for injury to natural resources with respect to trust resources which may be lost, injured or destroyed.

B. Seek compensation from responsible parties for the damages assessed by the Trustees and for the costs of planning and implementing the assessment.

C. Acting in concert with its attorneys, participate in negotiations with responsible parties.

D. In accordance with applicable law, supervise, manage and obligate any money paid to the Trustees by or on behalf of responsible parties for the purpose of assessing, restoring, replacing, rehabilitating, and/or acquiring the equivalent of the affected natural resources.

E. Oversee the development and the implementation of a plan for the restoration, replacement, rehabilitation, and/or acquisition of equivalent resources for those trust resources, and the services provided by those resources, that may be injured, destroyed or lost.

F. In accordance with applicable law, make all necessary decisions for the management and administration of funds pursuant to section IX.

G. In accordance with applicable law, arrange for one or more contracts with professional consultants, technical or otherwise, that the Trustee Council determines are necessary and best qualified to provide services to the Council.

H. Identify a contact for coordination with the Coast Guard regarding access to the Oil Spill Liability Trust Fund.

The duties of the Lead Administrative Trustee shall include, but are not limited to: Coordination and monitoring of the progress of the natural resource damage assessment process; scheduling of meetings of the Trustee Council, and preparation of agendas for those meetings; acting as a central contact point for the Trustee Council; establishment and maintenance of records and relevant documents; and such other duties as directed by the Trustee Council. The Lead Administrative Trustee will be responsible for informing the other Trustees of all pertinent developments on a timely basis.

VIII. Decisionmaking

The Trustees agree that all decisions implementing this MOU shall require unanimous approval. In the event that unanimous agreement cannot be reached among the members of the Trustee Council, the matter in dispute will be elevated to the Trustees for resolution. If necessary, the Trustees may establish further mechanisms by which disputes may be resolved. The Trustees further agree that decision making deliberations will focus upon the Trustees' mutual purpose of assessing, restoring, rehabilitating, replacing and/or acquiring the equivalent of the affected natural resources, rather than upon control or respective trusteeship over those resources.

IX. Funds

The Trustees agree to cooperate in good faith to attempt to establish, to the extent consistent with applicable law, a joint trust account for purposes of receiving, depositing, holding, disbursing, managing and expending all natural resource damage recoveries obtained or received by the Trustees relating to the natural resource injuries arising out of the incident and interest earned thereon. This joint trust account will be established under the registry of the applicable Federal district court. Such recovered damages shall be used for restoration activities conducted under this MOU to address those injuries to natural resources and the services that they provide. Any recoveries for injury to natural resources obtained or received by or on behalf of any Trustee shall be deposited in this joint trust account.

The Trustee Council, in accordance with its decision making process in section VIII, shall establish standards and procedures governing the joint use of all natural resource damages received by the Trustees for the purposes of restoring, replacing, rehabilitating and/or acquiring the equivalent of natural resources injured as a result of the Incident and the reduced or lost services

provided by such resources pursuant to the final Restoration Plan.

The Trustees further agree that the following damage assessment costs shall be advanced or reimbursed to each Trustee out of any damage assessment cost recoveries or payments thereon, including funds received from the Oil Spill Liability Trust Fund: reasonable unreimbursed costs jointly agreed upon for the planning, conduct, evaluation and coordination of all natural resource damage assessment activities pursued by the Trustee Council with respect to injuries incurred resulting from the Incident.

X. Confidentiality

The Trustees agree that it is in the public interest that all scientific data arising out of their review of the injury to natural resources as a result of the Incident be made public. Therefore, such data shall be made public as soon as publication will not prejudice the ongoing assessment. Public sharing of scientific data will be the general policy of the Trustees.

However, all parties to this MOU recognize that all written or oral communications related to the assessment and recovery of damages for injury to natural resources may be undertaken in anticipation of litigation. Accordingly, all oral and written communications and work product will be treated as privileged attorney-client communications, attorney work product or protected by other applicable privilege (or a combination thereof), as appropriate, and will be protected from disclosure to the maximum extent possible under applicable Federal or State law. They further agree that whenever a request for production of such a record is received pursuant to any applicable Federal or State law, the request will be forwarded for response to the Trustee or Trustees to which the privilege applies or whose representatives originally generated or contributed the record requested. Nothing contained herein shall be construed as prohibiting or restraining the Trustees or the Trustee Council from agreeing to release any record.

XI. Reservation of Rights

Except for the confidentiality agreement contained in Section X, all parties understand that this document is not intended to create any further legal rights or obligations between the parties, the Trustees or any other persons not a party to this MOU.

XII. Modification of Agreement

It is acknowledged that additional agreements may be executed by the Trustees with regard to natural resource damage claims that arise and to planning for the restoration, replacement, rehabilitation, and/or acquisition of equivalent natural resources that may be injured, destroyed or lost. Therefore, modification of this MOU must be in writing and upon approval of all Trustees currently parties to the MOU.

XIII. Termination

This MOU shall be in effect from the date of execution until termination by agreement of the Trustees. At any time the Trustees determine that the purposes underlying this MOU have been addressed, the MOU will terminate upon such a finding. In the event any Trustee withdraws from the MOU, such withdrawal must be in writing at least thirty days in advance of the withdrawal. In the event of such withdrawal, this MOU remains in full force and effect for the remaining parties.

In the event of the withdrawal of any Trustee, or at the termination of this MOU, there shall be a full and complete accounting of all funds received, deposited, held, disbursed, managed, expended pursuant to section IX of this MOU, or otherwise controlled in any joint account by the Trustees as a result of the Incident.

XIV. Limitation

Nothing in this MOU shall be construed as obligating the United States, the State or any other public agency, their officers, agents or employees, to expend any funds in excess of appropriations authorized by law.

XV. Third Party Challenges or Appeals

The rights and responsibilities contained in this MOU are subject to the availability of funding and are intended to be guidance for the respective Trustees. They may not be the basis of any third party challenges or appeals.

XVI. Execution: Effective Date

This MOU may be executed in counterparts. A copy with all original executed signature pages affixed shall constitute the original MOU. The date of execution shall be the date of the final Trustee's signature.

Appendix II—Sample Federal/State/Tribal Damage Assessment Plan: Analytical Chemistry Quality Assurance/Quality Control Plan

This Appendix describes an example of a Quality Assurance/Quality Control (QA/QC) plan for analytical chemistry portions of a Damage Assessment/Restoration Plan for an oil spill. This Appendix also provides some minimum requirements for the development of QA/QC plans in Regional/Local Protocols or in Damage Assessment/Restoration Plans for specific oil spills. This can be used in conjunction with existing Analytical Chemistry Quality Assurance Programs of the Trustee Agencies. It describes only those minimum requirements necessary to validate the data generated by analytical chemistry laboratories. QA/QC requirements for other types of measurements are not addressed in this Appendix.

Further instructions in meeting the requirements described in this document should be developed in Regional/Local Protocols or in Assessment/Restoration Plans for specific oil spills. These instructions should include provision for training of field personnel in the collection of samples, methodology for field collection of samples for hydrocarbon analyses, specific chain-of-custody procedures and further detailed validation procedures for the analytical chemistry laboratories.

Table of Contents

1.0 Quality Assurance for Analytical Chemistry
1.1 Study-Specific Quality Assurance Plans
1.2 Technical System Audits
1.3 Standards and Quality Control Materials
1.4 Analytical Performance Evaluations
1.5 Data Reporting and Deliverables
2.0 Minimum Requirements: Sampling and Sampling Equipment
2.1 Sample Identification and Labelling
2.2 Sample Field Chain-of-Custody
3.0 Minimum Requirements: Chemical Analysis
4.0 Minimum Requirements: Reporting and Data Deliverables

1.0 Quality Assurance for Analytical Chemistry

Each trustee agency through their individual standard documented QA programs or through a specifically developed QA/QC plan, shall ensure that all data generated by or for that agency in support of a Damage Assessment/Restoration Plan are of known, defensible and verifiable quality.

These documented QA programs can include but are not limited to:

NOAA National Status and Trends Program, Mussel Watch Phase: Work/QA Project Plan

Quality Assurance of Chemical Analyses Performance Under Contract with the USFWS

EPA SW–846, Chpt 1, QA/QC Requirements

EPA Guidelines and Specification for Preparing Quality Assurance Project Plans, QAMS–005

In addition, an interagency team of leading scientists from the Trustee agencies, hereafter referred to as the Analytical Chemistry Group (ACG), shall develop and oversee a centralized data management program which will demonstrate the quality and comparability of the chemical data obtained by the Trustee agencies.

The major components of this centralized QA program will be: development of study-specific analytical chemistry QA plans; technical on-site system audits of field and laboratory data collection activities; development and provision of appropriate instrument calibration standards and control materials; laboratory performance evaluations by means of intercomparison exercises; and review of data delivesables and all supportive documentation to evaluate data quality.

1.1 Study-Specific Quality Assurance Plans

Prior to the initiation of each Damage Assessment/Restoration study, the study manager must prepare and submit a study-specific analytical chemistry quality assurance plan (QAP) to the ACG for review and concurrence. This plan shall specify each study's goals, sampling procedures, analytical procedures and all quality control measures associated with those procedures.

The QAP must be study-specific, however any documented QA guidance and/or appropriate Standard Operating Procedures (SOPs) used by the Trustee agencies may form the basis of individual study QAPs.

1.2 Technical System Audits

On-site system audits may be performed without prior notification by the ACG after consultation with the responsible Agency.

1.3 Standards and Quality Control Materials

Appropriate standards and quality control materials will be developed and provided. The National Institute of Standards and Technology (NIST) can provide this service.

1.4 Analytical Performance Evaluations

Prior to the initiation of work, each analytical laboratory will be required to demonstrate its capability. This will be accomplished by providing laboratory documentation on the performance of the proposed methods. Any changes in analytical methodology from that proposed in the original QA plan shall be validated under agency procedures and documented to the ACG.

A series of intercomparison exercises, utilizing blind analyses of prepared materials, extracts of environmental matrices (tissue, sediment and water) or the matrices themselves, will be conducted annually. Participation in these exercises is mandatory. Materials will be prepared by, and data returned to, the provider for statistical analysis. Unacceptable performance will result in the discarding of the associated data.

The ACG will review and provide written reports on the results of intercomparison studies to the Management Team.

1.5 Data Reporting and Deliverables

Data deliverables will be reviewed by the generating Agency to verify the quality of the data. A QC report on each data set will be provided to the ACG for review. All data and associated documentation will be held in a secure place under chain-of-custody procedures until the Trustees indicate otherwise.

2.0 Minimum Requirements: Sampling and Sampling Equipment

Sample collection methodology must be described in SOP's. The method of collection should not alter the samples. Samples shall be held in a secure place under appropriate conditions and under chain-of-custody until the Trustees indicate otherwise.

2.1 Sampling Identification and Labelling

An SOP will be in place for each study which describes procedures for the unique identification of each sample. A sample tag or label will be attached to the sample container. A waterproof marker must be used on the tag or label. Included on the tag are the sample identification number, the location of the collection site, the date of collection and the signature of the collector.

The information above will also be recorded in a field notebook, along with other pertinent information about the collection, and signed by the collecting scientist.

2.2 Samplé Field Chain-of-Custody

The field sampler will be personally responsible for the care and custody of the samples collected until they are transferred to another responsible party. Samples will be accompanied by a chain-of-custody record. When samples are transferred from one individual's custody to another's, the individuals relinquishing and receiving will sign, date and note the time on the record. Shipping containers will be custody-sealed for shipment. Whenever samples are split, a separate chain-of-custody record will be prepared for those samples and marked to indicate with whom the samples are being split.

Samples shall be maintained in a manner that preserves their chemical integrity from collection through final analysis. Sample shipper will arrange for sample receipt. After analysis, any remaining sample and all sample tags, labels and containers shall be held under chain-of-custody procedure until the Trustees indicate otherwise.

3.0 Minimum Requirements: Chemical Analysis

The applicable methodology must be referenced or described in detail for each measurement parameter. Method limits of the analytical method in terms of accuracy and precision must be demonstrated. Calibration must be verified at the end of each analysis sequence. Samples must be quantified within the demonstrated linear working range for each analyte. Standard curves must be established with at least 3 points besides 0. Field blanks, procedural blanks, reference materials, replicates and analyte recovery samples must be run at a minimum frequency of 5% each per sample matrix batch. A minimum list of the petroleum hydrocarbon compounds which are to be considered for identification and quantification in water, tissue and sediment include the volatiles, i.e., benzene, toluene, xylene and the polynuclear aromatic and aliphatic hydrocarbons will be provided in the Regional/Local Protocols and in specific Damage Assessment/Restoration Plans.

4.0 Minimum Requirements: Reporting and Data Deliverables

Measurement results as if three figures were significant. Results of quality control samples analyzed in conjunction with the study samples. Documentation demonstrating analytical control of precision and accuracy on an analyte and matrix specific basis.

Appendix III—Judicial Review of the Assessment/Restoration Process

Judicial review of Assessment/Restoration Plans developed pursuant to the procedures eventually specified in the OPA regulations should be conducted on the administrative record. Section 1006(c) of OPA, 33 U.S.C. 2706(c), explicitly provides that the trustees are to develop and implement plans for restoration of natural resources injured by oil spills. OPA does not define the standard of review for selection of assessment/restoration plans. Under general principles of administrative law, where a statute does not provide an explicit standard of review for non-adjudicatory agency action, the standard of review is provided by the Administrative Procedure Act (APA), 5 U.S.C. 706(2)(A). *See American Paper Institute, Inc.* v. *American Electric Power Service Corp.*, 461 U.S. 402, 412 n.7 (1983); *Camp* v. *Pitts*, 411 U.S. 138, 142 (1973); *Citizens to Preserve Overton Park* v. *Volpe*, 401 U.S. 402, 413–14 (1971). The APA requires reviewing courts to sustain agency actions unless they are "arbitrary, capricious, an abuse of discretion or otherwise not in accordance with law." 5 U.S.C. 706(2)(A). The scope of review is limited to the administrative record in existence when the action was taken. See *Florida Power & Light* v. *Lorion*, 470 U.S. 729, 743–44 (1985); *Camp* v. *Pitts*, 411 U.S. at 142; *Citizens to Preserve Overton Park* v. *Volpe*, 401 U.S. at 420.

The proposal to develop an administrative record in order to document the selection of the assessment as well as the restoration plans finds support in the history of the selection of response actions by EPA under CERCLA. Prior to the enactment of the statutory provisions providing for judicial review, on the administrative record, of EPA's selection of response actions (section 113(j) of CERCLA, 42 U.S.C. 9613(j)), EPA adopted as policy the use of administrative record to document it's selection. The CERCLA provision, added by the Superfund Amendments and Reauthorization Act of 1986, Public Law 99–499, 100 Stat. 1647 (1986) merely clarifies and confirms several cases holding S. Rep. No. 11, 99th Cong., 1st Sess. 57 (1985); H.R. Rep. No. 253, Pt. 1, 99th Cong., 1st Sess. 62 (1985). Thus, prior to the explicit provisions of section 113(j) of CERCLA, it was well established that judicial review of selection by EPA of response action under CERCLA was based upon the administrative record using an arbitrary and capricious standard of review. See *United States* v. *Seymour Recycling Corp.*, 679 F. Supp. 859, 861 (S.D. Ind. 1987); *see also United States* v. *Northeastern Pharmaceutical & Chemical Co., Inc.*, 810 F.2d 726, 748 (8th Cir. 1986); *United States* v. *Ward*, 618 F. Supp. 884, 900 (E.D.N.C. 1988), *United States* v. *Western Processing Co.*, No. C83–252M (W.D. Wash. Feb. 19, 1988) (1988 Westlaw 15691); *cf. United States* v. *Ottati & Goss, Inc.*, 900 F.2d 429, 434–36 (1st Cir. 1990) (administrative record review not required where government seeks injunctive relief under CERCLA); *United States* v. *Hardage*, 663 F. Supp. 1280, 1284 (W.D. Okla. 1987) (same).

Like earlier provisions of CERCLA, OPA does not require NOAA to document its selection of the assessment or restoration plan to be on the record nor does OPA require that judicial review be limited to the record. Nevertheless, NOAA may impose a regulatory requirement on the trustees to document selection on the record. Absent statutory language otherwise, whether judicial review will be on the administrative record is yet to be determined.

There are important policies underlying record review of assessment/restoration measures under OPA, as for response action under CERCLA. First, record review is necessary to carry out the congressional mandate that trustees select assessment/restoration measures. See 33 U.S.C. 2706(c). Congress intended that the Assessment/Restoration Plan be developed and implemented by the trustees pursuant to an administrative process, not by a courtroom battle of experts. See 33 U.S.C. 2706(c). Adequate evaluation of the complex

scientific issues involved in assessment/restoration is more likely to result from a public administrative process conducted by agencies with specialized scientific expertise. See, *e.g., United States* v. *Seymour Recycling Corp.*, 679 F. Supp. at 862 (technical and policy considerations involved in CERCLA response actions are entrusted to agencies with special expertise); *see generally, Marsh* v. *Oregon Natural Resources Council*, 109 S. Ct. 1851, 1860–61 (1989) (deferring to administrative agency on questions involving "technical expertise" and "scientific determination[s]").

Second, record review may be necessary to give effect to the congressionally-mandated public participation requirements of OPA. In the CERCLA context, the courts have recognized that trial *de novo* of response action is inconsistent with meaningful public involvement in selection of remedies for hazardous waste sites. *See United States* v. *Seymour Recycling Corp.*, 679 F. Supp. at 863. The general public does not have the resources or the procedural vehicle to protect its interests in the courtroom. Trial *de novo* is also more likely to become a contest between interest groups. Furthermore, trial *de novo* of assessment/restoration measures creates significant incentives for parties to withhold scientific data for use at trial. One of the most significant criticisms of the *Exxon Valdez* case noted by commenters was the unavailability of scientific data produced by the parties to the litigation. A public administrative process may create precisely the opposite incentive. The government will be required to publicly disclose its scientific data and conclusions in the administrative record developed in connection with the Assessment/Restoration Plan. Other parties will be required to publicly disclose their scientific data and conclusions in connection with the administrative development of the Assessment/Restoration Plan or risk waiving their objections to the Plan. Third, the development of an Assessment/Restoration Plan will result in a thorough and complete process geared towards the restoration of injured resources in a timely manner. As such, the assessment portion of the plan may be considered an interim agency decision and not eligible for judicial review. The development of the Restoration Plan will constitute a final agency action and will avoid a disjointed, piece-meal review of the assessment/restoration process. Also appropriate for discussion at this point is the concept that by fulfilling the public review and open record requirements throughout the entire assessment process, the trustees have also met the requirements of other environmental statutes. For example, the public involvement in this planning process may constitute a "functional equivalent" of the process required by the National Environmental Policy Act.

While it may be preferable that the record review standard apply to the entire assessment process, it is possible that concerns could be raised that economic damages (diminution of value) are not appropriate for record review. In the CERCLA context, some parties have argued that there is an inconsistency between administrative record review of restoration measures and the right to jury trial under the Seventh Amendment to the United States Constitution. Where the government has sought natural resource damages for both restoration costs and lost use and non-use values under CERCLA, several courts have held that there is a right to a jury trial. *See United States* v. *City of Seattle*, No. C90–395WD (W.D. Wash. Nov. 28, 1990); *In re Acushnet River & New Bedford Harbor: Proceedings re Alleged PCB Pollution*, 712 F. Supp. 994, 1000 (D. Mass. 1989); *United States* v. *Allied Chemical Co.*, No. C–83–5898 (N.D. Cal. Sept. 14, 1984).

These decisions should pose no obstacle to administrative record review of Assessment/Restoration Plans under OPA. First, oil spills from vessels fall within the admiralty jurisdiction of Federal courts where traditionally there is no right to jury trial. See, Rule 9(h) and Rule 38(e) of the Fed.R.Civ.P. See also, *United States* v. *Redwood City*, 640 F.2d 963, 969–70 (9th Cir. 1981) (pollution is a maritime tort wholly aside from any statutory bases of liability); *United States* v. *M/V BIG SAM*, 681 F.2d 432, 443 (5th Cir. 1983) (same). Moreover, spills into navigable waters squarely fall within the Supreme Court's general tests regarding admiralty jurisdiction. See, e.g., *Sission* v. *Ruby*, 497 U.S. ——, 111 L.Ed. 2d 292 (1990); *Foremost Ins. Co.* v. *Richardson*, 457 U.S. 668 (1982); *Executive Jet Aviation* v. *City of Cleveland*, 409 U.S. 249 (1972). Even marine spills into navigable waters which ultimately cause shoreside damage would also be within the admiralty jurisdiction of the Federal courts. Extension of Admiralty Act, 46 U.S.C. 740. Second, to the extent that other types of cases fall outside admiralty jurisdiction, no right to jury trial attaches to the components of the government's claim for natural resource damages, which are restitutionary in nature. *United States* v. *Wade*, 653 F. Supp. 11, 13 (E.D. Pa. 1984). Finally, where certain claims would otherwise be tried to a jury at common law, Congress can entrust those claims to determination by administrative agencies. The Supreme Court has repeatedly held that "the Seventh Amendment is not applicable to administrative proceedings." *Tull* v. *United States*, 481 U.S. 412, 418 n.4 (1987); *Chauffeurs, Teamsters and Helpers, Local No. 391* v. *Terry*, 110 S. Ct. 1339, 1345 n.4 (1990); *Atlas Roofing Co.* v. *OSHA*, 430 U.S. 442, 454–55. Thus, there is no constitutional impediment to effectuating the congressional intent that the trustees, not juries, determine the components of an Assessment/Restoration Plan. See 33 U.S.C. 2706(c).

For purposes of discussion in this Notice, if there is a right to jury trial over certain components of a natural resource damage claim under OPA, this right might easily be accommodated through carefully drawn jury instructions and established case management techniques. The right to a jury trial on certain components of a claim does not prevent the court from reserving to itself decisions on other equitable or administrative review components of claims. See, *e.g., Tull* v. *United States, supra.*

Trial of a natural resources claim under OPA may require integration of both administrative record review of the Assessment/Restoration Plan and the rebuttable presumption for the trustees' calculation of damages. See 33 U.S.C. 2706(e)(2). The factfinder, be it court or jury, will determine liability. The court has ample authority under the Federal Rules of Civil Procedure to bifurcate or consolidate the components of the case in the interest of resolving the litigation.

Part III

Federal Election Commission

11 CFR Part 106

Allocation of Federal and Non-Federal Expenses; Final Rule

FEDERAL ELECTION COMMISSION

[Notice 1992–4]

11 CFR Part 106

Allocation of Federal and Non-Federal Expenses

AGENCY: Federal Election Commission.

ACTION: Final rule; transmittal of regulations to Congress.

SUMMARY: The Federal Election Commission has revised its regulations at 11 CFR 106.5 and 106.6. These rules implement the contribution and expenditure limitations and prohibitions established by 2 U.S.C. 441a and 441b, provisions of the Federal Election Campaign Act of 1971, as amended ("the Act" or "FECA"), 2 U.S.C. 431 *et seq.*, by providing for allocation of expenses for activities that jointly benefit both federal and non-federal candidates and elections. Under the first revision, state and local party committees may add one additional non-federal point to the ballot composition ratio computed under 11 CFR 106.5(d). They may also include non-federal point(s) for local offices if partisan local candidates are expected on the ballot in any regularly scheduled election during the two-year congressional election cycle. Second, the former 40-day "window" for transfers from a non-federal to a federal account, to reimburse the federal account for the non-federal portion of joint expenditures, at 11 CFR 106.5(g)(2)(ii)(B), has been expanded to 70 days. Finally, covered entities may now, under 11 CFR 106.5(f), recalculate the federal/non-federal ratio for a particular fundraising program or event within 60 days after that program or event, and make corresponding transfers between their federal and non-federal accounts. These latter two changes apply to all party committees that make disbursements on behalf of both federal and non-federal candidates and elections. Parallel changes are included for nonconnected committees and separate segregated funds. Further information is provided in the supplementary information which follows.

DATES: Further action, including the announcement of an effective date, will be taken after these regulations have been before Congress for 30 legislative days pursuant to 2 U.S.C. 438(d). A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463, (202) 219–3690 or (800) 424–9530.

SUPPLEMENTARY INFORMATION: The Commission is publishing today the final text of revised regulations at 11 CFR 106.5 and 106.6. These rules implement the contribution and expenditure limitations and prohibitions established by 2 U.S.C. 441a and 441b, provisions of the Federal Election Campaign Act of 1971, as amended ("the Act" or "FECA"), 2 U.S.C. 431 *et seq.*, by providing for allocation of expenses for activities that jointly benefit both federal and non-federal candidates and elections.

The final allocation rules were published on June 26, 1990 (55 FR 26058). They were the result of an extensive rulemaking process, the history of which is set forth in that document. The rules became effective, and the new forms implementing their reporting provisions took effect, on January 1, 1991 (55 FR 40377).

On March 26, 1991, the Commission received a Petition for Rulemaking from the Association of State Democratic Chairs ["ASDC"]. The petition requested reconsideration of three aspects of the allocation rules: (1) The ballot composition ratio, 11 CFR 106.5(d); (2) the payment, recordkeeping and reporting requirements, 11 CFR 104.10, 106.5(g); and (3) the requirement that state parties allocate their administrative expenses between federal and state elections before July of a federal election year.

The Commission published a Notice of Availability seeking comments on this ASDC petition on April 24, 1991. 56 FR 18780. It received 45 comments in response to this Notice.

The Commission believes that, with limited exceptions, it is premature to reopen this rulemaking before the end of the 1991–92 election cycle. These rules are the result of a lengthy and carefully considered rulemaking process. They serve the dual purposes of curbing the use of money raised outside of the FECA's requirements in federal elections, and of allowing the Commission and the public to monitor compliance with these requirements. *See Common Cause* v. *FEC*, 692 F.Supp. 1391 (D.D.C. 1987). Both the Commission and the regulated entities will be in a better position to evaluate what future adjustments might be needed to the allocation rules, after they have worked with these rules over the course of an entire election cycle.

However, after consideration of the petition and comments, the Commission decided to reopen the allocation rulemaking in the three areas discussed below. A Notice of Proposed Rulemaking seeking comments on these proposals was published in the **Federal Register** on November 14, 1991. 56 FR 57864.

The Commission received 24 comments in response to the NPRM. Most were from state party committees, although national party committees, public interest groups, and private individuals also submitted comments. After reviewing all of the comments, the Commission has decided to adopt the first two proposals as set forth in the NPRM, but has modified the third to make it more workable.

The NPRM also solicited comments on allocation reporting requirements, with the understanding that no changes in these requirements would be made at this time. Some comments did address these requirements; and, as stated in the Notice, these comments will be considered at the end of the cycle, as part of a general review of the reporting provisions.

Section 438(d) of title 2, United States Code, requires that any rules prescribed by the Commission to carry out the provisions of title 2 of the United States Code be transmitted to the Speaker of the House of Representatives and the President of the Senate thirty legislative days before they are finally promulgated. These regulations were transmitted to Congress on March 9, 1992.

Explanation and Justification

The new rules reflect the following revisions: First, state and local party committees, which are required to allocate their administrative expenses and generic voter drive costs using the "ballot composition method" set forth at 11 CFR 106.5(d), may add an additional non-federal point in computing this ratio. They may also include non-federal point(s) for local offices if partisan local candidates are expected on the ballot in any regularly scheduled election during the two-year congressional election cycle. Second, the 40-day "window" for transfers from a committee's non-federal to its federal account, to reimburse the federal account for the non-federal share of joint expenditures, has been expanded to 70 days. 11 CFR 106.5(g)(2)(ii)(B). Finally, committees are specifically allowed, under 11 CFR 106.5(f), to recalculate the federal/non-federal ratio for a particular fundraising program or event within 60 days after that fundraising program or event, and make corresponding transfers between their federal and non-federal accounts. The latter two changes apply to all party committees, including national party committees. The Commission has made parallel amendments to 11 CFR 106.6, which parallels section 106.5 but applies to separate segregated funds ("SSF's") and nonconnected committees, to ensure continued consistency in these areas.

Part 106—Allocations of Candidate and Committee Activities

Section 106.5 Allocation of Expenses Between Federal and Non-Federal Activities by Party Committees

Paragraph 106.5(d) State and Local Party Committees; Method for Allocating Administrative Expenses and Costs of Generic Voter Drive Activity

This paragraph sets forth the ballot composition ratio by which party committees with separate federal and non-federal accounts must allocate their administrative and generic voter drive expenses. Paragraph (d)(1)(i) states that this method is "based on the ratio of federal offices expected on the ballot to total federal and non-federal offices expected on the ballot in the next general election to be held in the committee's state or geographic area." However, not all offices are included in this calculation. Rather, the Commission has specified various categories of offices which are assigned points to be used in computing the ratio.

The petition and most of the comments submitted in response to the Notice of Availability argued that the ratio underrepresented the percentage of funds spent on non-federal elections. After a comprehensive review, the Commission's NPRM proposed that state and local party committees be allowed to add one additional non-federal point in computing their ballot composition ratios, to compensate for underrepresentation of non-federal offices in the current formula. Because state situations differ widely, this point was not tied to a particular category of offices, such as partisan judicial elections or ballot questions. Rather, it was proposed as a generic point available to all state and local party committees.

Most of the comments to the NPRM supported the Commission's proposal to add an additional non-federal point to the ballot composition ratio. Some state party committees argued that still more non-federal points should be authorized, because of particular ballot situations in their states. One national committee supported adding the additional point, while another felt the original formula more accurately reflected federal/non-federal spending patterns.

The Commission notes that the ballot composition ratio was never anticipated to precisely reflect all state and local party activity in all states in all election cycles. It believes that the formula's use of the "average ballot concept," which reflects variations in different states and localities in each election, as well as the special rules for states that hold statewide elections in non-federal election years, provide the necessary flexibility in this area. This approach represents a reasoned balance between the need for greater standardization, required by a federal district court in *Common Cause* v. *FEC*, *supra* (which struck down the "any reasonable [allocation] method" standard then in use), and the need to reflect differences between different states and types of political committees.

Also, while many comments to both the Notice of Availability and the NPRM requested that greater weight be given to the non-federal share of expenses, they offered no viable suggestions as to how this might be done. The original petition and some of the comments to both Notices expressed the view that all state and local offices, partisan judicial offices, and ballot questions should be included in the ballot composition ratio. However, this approach could lead to an inappropriately low federal percentage, and thereby permit impermissible money to enter federal campaigns, especially in areas where the ballot contains large numbers of local offices or numerous ballot questions, and only two or three federal offices.

Two public interest groups argued that no transfers whatsoever should be allowed from the non-federal to the federal account—that is, that all joint expenditures should be paid entirely with funds meeting FECA requirments. However, the court in *Common Cause* v. *FEC* found that the Commission had not acted arbitrarily and capriciously in originally rejecting this approach, since some comments submitted in response to the 1984 petition "adamantly stated that there were no abuses of the type alleged" by the plaintiff (i.e., impermissible use of non-FECA money in federal campaigns). 692 F.Supp. at 1396.

While the court noted it was possible for the Commission to conclude that no method of allocation would effectuate the Congressional goal that all monies spent by state political committees on federal campaigns meet the FECA standards, *id.*, in which case it would be necessary that all joint expenditures be paid with funds raised consistent with FECA standards, this option proved unnecessary. Rather, the Commission was able to develop allocation rules which both prevent non-FECA money from entering federal campaigns, and allow for satisfactory monitoring of this process, as required by the court. Comments submitted in connection with the ASDC petition support the Commission's continued use of its present approach.

In addition to the generic non-federal point, the NPRM proposed that paragraph (d)(1)(ii) be amended to allow state and local party committees to include non-federal point(s) for local offices in their ballot composition ratios, if partisan local candidates were expected on the ballot in any regularly scheduled election during the two-year congressional election cycle. Under the former rules, these committees computed their ratios based on the "next general election." The rules did not contemplate the situation in states where statewide officers are elected in even-numbered years, but local officers are elected in odd-numbered years.

Advisory Opinion 1991–25 authorized state party committees in such states to include a non-federal point for local offices in computing their ballot composition ratios. The NPRM proposed amending paragraph (d)(1)(ii), consistent with that ruling. It also proposed clarifying that local party committees may include up to two non-federal points for local offices, under these same circumstances.

Most comments that addressed this issue supported the proposed change. Two public interest groups opposed it, one characterizing this action as "allowing non-federal points for local offices to be taken in the year after the local election has occurred." However, with the exception of states that hold statewide elections in odd-numbered years, the ballot composition formula was intended to reflect the offices in each two-year congressional election cycle. The Explanation and Justification to the final rules, which added the non-federal point for partisan local offices, stated the Commission's intent to create a "non-federal slot [that would be] available to virtually every state party committee." 55 FR 26058, 26064. However, those rules did not comtemplate the situation in states where statewide offices are elected in even-numbered years, but local offices are elected only in odd-numbered years. The Commission believes that party committees in those states should be able to consider local elections in their ballot composition ratios, just as do party committees in states that hold elections for both statewide and local offices in even-numbered years. Paragraph (d)(1)(ii) has thus been amended to clarify that all state and local party committees may include non-federal points for partisan local offices

in computing their ballot composition ratios, if elections for such offices are held at any regularly scheduled election during the two-year congressional election cycle.

Paragraph 106.5(f) All Party Committees; Method for Allocating Direct Costs of Fundraising

This paragraph sets forth the rules by which all party committees are to allocate the direct costs of each fundraising program or event, where both federal and non-federal funds are collected by one committee through such program or event. It applies to national, state and local party committees.

Party committees must allocate the direct costs of each such fundraising program or event according to the funds received method. The committee estimates the federal/non-federal ratio for each program or event prior to the first disbursement made in connection with that activity, and later adjusts this ratio to reflect the actual ratio of funds received. The former rules did not specify at what points these adjustments were to be made, and could be read to require a readjustment whenever additional funds were received.

The Notice proposed that committees be given 60 days following each fundraising program or event to recalculate the appropriate ratio based on funds received, to apply the recalculated ratio to program or event expenditures, and to transfer funds between the federal and non-federal accounts to reflect the adjusted ratio. However, it stated that this amendment would not supersede the 60 day post-expenditure limit, contained in 11 CFR 106.5(g)(2)(ii)(B), for non-federal accounts to reimburse federal accounts for the non-federal share of joint expenditures.

After further consideration, however, the Commission has decided that the 60 day reimbursement window should be waived, for purposes of this limited exception. Under these new rules, committees are still required to allocate their pre-program or event expenditures based on their past experience. However, they are given an additional opportunity to transfer funds from their non-federal to their federal accounts: They have 60 days after the program or event to recalculate this ratio and transfer funds from the non-federal to the federal account, if receipts at that time indicate that the committee originally underestimated the non-federal percentage of these receipts. The Commission notes, however, that the new requirement does not rule out the possibility of further adjustments after that date, should additional Federal receipts come in.

In order to monitor these transfers, the Commission is also requiring, under this new rule, that committees report the date of the fundraising program or event, at the time they report any transfer made to reflect a readjusted ratio. (The former rules had no requirement that the date of a fundraising program or event be reported.) In the case of a telemarketing or direct mail campaign, the "date" for purposes of this rule is the last day of the telemarketing campaign, or the day on which the final direct mail solicitations are mailed.

Paragraph 106.5(g) Payment of Allocable Expenses by Committees With Separate Federal and Non-Federal Accounts

This paragraph sets forth the procedures by which party committees with separate federal and non-federal accounts are to pay the bills for their administrative expenses and shared federal and non-federal activities. These procedures apply to all covered expenditures, with the exception of the shared fundraising expenditures discussed under subsection 106.5(f), *supra*.

As originally promulgated, the "window" in paragraph (g)(2)(ii)(B), during which funds must be transferred from a non-federal to a federal account to reimburse the federal account for the non-federal share of joint activities, was 40 days, extending from 10 days before until 30 days after payment is made from the federal account for a particular allocable expense. This 40-day limit was adopted in place of the 10-day limitation contained in the 1988 NPRM, 53 FR 38012, 38017, and exceeds the 30-day limit advocated by comments to that NPRM. The deadline was extended to allow committees to consolidate monthly payments, rather than requiring every expense to be paid with two separate checks.

The ASDC petition and some of the comments to the Notice of Availability asked that further expansion of the reimbursement period be considered. They noted, for example, that a committee that pays its bills once a month could face cash flow problems under the 30-day post-payment deadline. After reviewing this material, the Commission proposed that the reimbursement "window" be extended to 70 days, from 10 days before until 60 days after the payment from the federal account.

This approach allows greater consolidation of payments than is possible under the current system, and should thus ease possible compliance and cash flow problems in this area. All of the party committees which submitted comments supported this proposed change; and no comments were received which opposed it.

Finally, the word "payment" in paragraph (g)(2)(ii)(B) has been amended to read, "payments." This clarifies that one check from the non-federal to the federal account may be used to reimburse the federal account for the non-federal share of more than one allocable expenditure.

Section 106.6 Allocation of Expenses Between Federal and Non-Federal Activities by Separate Segregated Funds and Nonconnected Committees

The amendments to paragraphs (d) and (e) of this section parallel those made in 11 CFR 106.5(f) and 106.5(g), respectively. These revisions have been made to maintain the consistency in treatment of party committees, nonconnected committees and separate segregated funds in these areas.

Effective Dates

One comment specifically inquired about possible retroactive application of the new rules, although most party committees asked that they be effectuated as soon as possible. The Commission believes it is appropriate, and consistent with past Commission action, to make the amendments to the ballot composition ratio contained in revised 11 CFR 106.5(d) retroactive to the start of the current allocation cycle, January 1, 1991. See Advisory Opinions 1991–15 and 1991–25.

While these rules will not be promulgated until after the expiration of the 30 legislative days review period pursuant to 2 U.S.C. 438(d), the Commission plans to include in its announcement of effective date a statement that the revisions to section 106.5(d) apply retroactively to January 1, 1991. State and local party committees that choose to apply the new rule retroactively will have 30 days after the publication of the effective date announcement in the **Federal Register** to calculate the ballot composition ratios pursuant to the revised formula, and make any necessary transfers from their non-federal to their federal accounts.

The other amendments will be effective when prescribed, following the expiration of the 30 legislative day review period required by 2 U.S.C. 438(d).

Certification of No Effect Pursuant to 5 U.S.C. 605(b) (Regulatory Flexibility Act)

The attached rules will not have a significant economic impact on a substantial number of small entities. The basis of this certification is that the rules modify provisions governing how political party committees, nonconnected committees and separate segregated funds allocate certain joint expenditures between their federal and non-federal accounts. This does not impose a significant economic burden, because any small entities affected are already required to comply with the Act's requirements in this area.

List of Subjects in 11 CFR Part 106

Campaign funds, Political candidates, Political committees and parties.

For the reasons set out in the preamble, subchapter A, chapter I of title 11 of the Code of Federal Regulations is amended as follows:

PART 106—ALLOCATIONS OF CANDIDATE AND COMMITTEE ACTIVITIES

1. The authority citation for Part 106 continues to read as follows:

Authority: 2 U.S.C. 438(a)(8), 441a(b), 441a(g).

2. Section 106.5 is amended by revising the final two sentences and adding an additional sentence to paragraph (d)(1)(ii), revising paragraph (f), and revising paragraph (g)(2)(ii)(B), to read as follows:

§ 106.5 Allocation of expenses between federal and non-federal activities by party committees.

* * * * *

(d) * * *

(i) * * *

(ii) * * * State party committees shall also include in the ratio one additional non-federal office if any partisan local candidates are expected on the ballot in any regularly scheduled election during the two-year congressional election cycle. Local party committees shall also include in the ratio a maximum of two additional non-federal offices if any partisan local candidates are expected on the ballot in any regularly scheduled election during the two-year congressional election cycle. State and local party committees shall also include in the ratio one additional non-federal office.

* * * * *

(f) *All party committees; methods for allocating direct costs of fundraising.*

(1) If federal and non-federal funds are collected by one committee through a joint activity, that committee shall allocate its direct costs of fundraising, as described in paragraph (a)(2) of this section, according to the funds received methods. Under this method, the committee shall allocate its fundraising costs based on the ratio of funds received into its federal account to its total receipts from each fundraising program or event. This ratio shall be estimated prior to each such program or event based upon the committee's reasonable prediction of its federal and non-federal revenue from that program or event, and shall be noted in the committee's report for the period in which the first disbursement for such program or event occurred, submitted pursuant 11 CFR 104.5. Any disbursements for fundraising costs made prior to the actual program or event shall be allocated according to this estimated ratio.

(2) No later than the date 60 days after each fundraising program or event from which both federal and non-federal funds are collected, the committee shall adjust the allocation ratio for that program or event to reflect the actual ratio of funds received. If the non-federal account has paid more than its allocable share, the committee shall transfer funds from its federal to its non-federal account, as necessary, to reflect the adjusted allocation ratio. If the federal account has paid more than its allocable share, the committee shall make any transfers of funds from its non-federal to its federal account to reflect the adjusted allocation ratio within the 60-day time period established by this paragraph. The committee shall make note of any such adjustments and transfers in its report for any period in which a transfer was made, and shall also report the date of the fundraising program or event which serves as the basis for the transfer. In the case of a telemarketing or direct mail campaign, the "date" for purposes of this paragraph is the last day of the telemarketing campaign, or the day on which the final direct mail solicitations are mailed.

(g) * * *

(2) * * *

(i) * * *

(B) Except as provided in paragraph (f)(2) of this section, such funds may not be transferred more than 10 days before or more than 60 days after the payments for which they are designated are made.

* * * * * *

3. Section 106.6 is amended by revising paragraphs (d) and (e)(2)(ii)(B), to read as follows:

§ 106.6 Allocation of expenses between federal and non-federal activities by separate segregated funds and nonconnected committees.

* * * * *

(d) *Method for allocating direct costs of fundraising.* (1) If federal and non-federal funds are collected by one committee through a joint activity, that committee shall allocate its direct costs of fundraising, as described in paragraph (a)(2) of this section, according to the funds received method. Under this method, the committee shall allocate its fundraising costs based on the ratio of funds received into its federal account to its total receipts from each fundraising program or event. This ratio shall be estimated prior to each such program or event based upon the committee's reasonable prediction of its federal and non-federal revenue from that program or event, and shall be noted in the committee's report for the period in which the first disbursement for such program or event occurred, submitted pursuant to 11 CFR 104.5. Any disbursements for fundraising costs made prior to the actual program or event shall be allocated according to this estimated ratio.

(2) No later than the date 60 days after each fundraising program or event from which both federal and non-federal funds are collected, the committee shall adjust the allocation ratio for that program or event to reflect the actual ratio of funds received. If the non-federal account has paid more than its allocable share, the committee shall transfer funds from its federal to its non-federal account, as necessary, to reflect the adjusted allocation ratio. If the federal account has paid more than its allocable share, the committee shall make any transfers of funds from its non-federal to its federal account to reflect the adjusted allocation ratio within the 60-day time period established by this paragraph. The committee shall make note of any such adjustments and transfers in its report for any period in which a transfer was made, and shall also report the date of the fundraising program or event which serves as the basis for the transfer. In the case of a telemarketing or direct mail campaign, the "date" for purposes of this paragraph is the last day of the telemarketing campaign, or the day on which the final direct mail solicitations are mailed.

(e) * * *

(2) * * *

(i) * * *

(B) Except as provided in paragraph (d)(2) of this section, such funds may not be transferred more than 10 days before

or more than 60 days after the payments for which they are designated are made.

* * * * *

Dated: March 6, 1992.

Joan D. Aikens,

Chairman, Federal Election Commission.

Part IV

Department of Education

34 CFR Part 791

Javits Gifted and Talented Students Education Grant Program; Final Regulations

DEPARTMENT OF EDUCATION

34 CFR Part 791

RIN 1850-AA38

Javits Gifted and Talented Students Education Grant Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary issues regulations governing the Javits Gifted and Talented Students Education Grant Program. These final regulations implement a program of discretionary grants authorized by the Jacob K. Javits Gifted and Talented Students Education Act of 1988 (Act), Part B of Title IV of the Elementary and Secondary Education Act of 1965, as amended. This program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by seeking to help gifted and talented students develop their abilities and reach the high levels of achievement called for by the Goals.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Beverly E. Coleman, U.S. Department of Education, 555 New Jersey Avenue, NW., room 506 C, Washington, DC 20208-5644. Telephone: (202) 219-2187. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: On October 9, 1991, the Secretary published a notice of proposed rulemaking (NPRM) for the Javits Gifted and Talented Students Education Grant Program in the **Federal Register** (Vol. 56, No. 196, Page 51122). On pages 51122-51123, the NPRM included a discussion of the major issues, including activities that may be funded under this program, funding priorities, selection criteria and other program requirements. Except for one change in § 791.22 where a phrase has been added to paragraph (a) to include, as a factor for selection, the extent to which funding an application would contribute to the provision of services to students with more than one of several enumerated characteristics, and some minor technical corrections, there are no differences between the NPRM and the final regulations.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, five parties submitted comments on the proposed regulations. One commenter fully supported the proposed regulations. An analysis of the remaining comments and of the change in the regulations since publication of the NPRM follows.

Selection Criteria—(§ 791.21)

Comment: One commenter was concerned that the selection criteria would place low priority on ensuring that projects will benefit the economically disadvantaged.

Discussion: Consistent with section 4105(b) of the Act (20 U.S.C. 3065(b)), the Secretary assures that in each fiscal year at least one-half of the applications approved contain a component designed to serve gifted and talented students who are economically disadvantaged individuals. In past competitions for this program at least ninety percent of the applications funded served economically disadvantaged populations.

Changes: None.

Comment: One commenter raised the issue that obtaining an evaluation control group, while not impossible, would pose a burden because of dire economic conditions in the writer's state. The commenter expressed concern that an applicant would be penalized for not providing an evaluation control group.

Discussion: Paragraph (f)(1)(ii)(B) of § 791.21 provides an applicant the opportunity to propose an alternative method of evaluation if the use of a control group is not feasible.

Changes: None.

Additional Factors—(§ 791.22)

Comments: Two commenters suggested that because of the special needs of deaf and hearing impaired students, a separate category and pool of funds should be established to ensure inclusion of this group.

Discussion: The Secretary recognizes that there are many students with disabilities, each with unique and specialized needs. The regulations require the Secretary to give priority to applications for projects that would serve students with disabilities, including those with hearing disabilities.

Changes: None.

Comments: Two commenters suggested that the paragraph describing students who are economically disadvantaged, limited English proficient, or disabled be revised to take into account that gifted and talented students may have a combination of these characteristics.

Discussion: The Secretary recognizes that gifted and talented students may have more than one of these characteristics.

Changes: A phrase has been added to paragraph (a) of § 791.22 to reference students with more than one of the enumerated characteristics.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States. Based on the response to the proposed rules and its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 791

Education Department, Elementary and secondary education, Gifted and talented grant programs—education, Indians—education, Institutions of higher education, Reporting and recordkeeping requirements, Local educational agencies, State educational agencies.

(Catalog of Federal Domestic Assistance Number: 84.206 Javits Gifted and Talented Students Education Grant Program)

Dated: February 25, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary amends title 34 of the Code of Federal Regulations by adding a new part 791 to read as follows:

PART 791—JAVITS GIFTED AND TALENTED STUDENTS EDUCATION GRANT PROGRAM

Subpart A—General

Sec.

791.1 What is the Javits Gifted and Talented Students Education Grant Program?
791.2 Who is eligible for an award?
791.3 What activities may the Secretary fund?
791.4 What priorities may the Secretary establish?
791.5 What regulations apply?
791.6 What definitions apply?

Subpart B—Reserved

Subpart C—How Does the Secretary Make an Award?

791.20 How does the Secretary evaluate an application?
791.21 What selection criteria does the Secretary use?
791.22 What additional factors does the Secretary consider in making new awards?

Subpart D—What Conditions Must Be Met After an Award?

791.30 What are the conditions on the use of an award?
791.31 What are a grantee's responsibilities for serving students and teachers in private schools?

Authority: 20 U.S.C. 3061-3066, unless otherwise noted.

Subpart A—General

§ 791.1 What is the Javits Gifted and Talented Students Education Grant Program?

Under the Javits Gifted and Talented Students Education Grant Program, the Secretary supports activities designed to help build a nationwide capability in elementary and secondary schools to identify and meet the special education needs of gifted and talented elementary and secondary school students.

(Authority: 20 U.S.C. 3062)

§791.2 Who is eligible for an award?

The following are eligible to apply under this program:

(a) State educational agencies.

(b) Local educational agencies.

(c) Institutions of higher education.

(d) Other public agencies and private agencies and organizations (including Indian tribes and organizations, as defined by the Indian Self-Determination and Education Assistance Act, and Hawaiian native organizations).

(Authority: 20 U.S.C. 3064)

§791.3 What activities may the Secretary fund?

The Secretary may fund projects that are designed to meet the educational needs of gifted and talented elementary and secondary school students through such activities as—

(a) Pre-service or in-service training, or both, including summer institutes for teachers, administrators, counselors, and other educational personnel;

(b) Assessment and identification of gifted and talented students;

(c) Planning of gifted and talented programs;

(d) Demonstration of provision of services to gifted and talented students, which may include one or more of the following:

(1) Summer programs.

(2) Programs involving business and industry.

(3) Use of technology in instruction.

(4) Improving individualized instruction within the regular classroom.

(5) Activities to involve parents in all aspects of gifted and talented children's education.

(e) Collaboration among schools and other organizations;

(f) Development of curricula appropriate for gifted and talented students;

(g) Evaluation of established gifted and talented education programs;

(h) Technical assistance, and

(i) Dissemination.

(Authority: 20 U.S.C. 3064)

§791.4 What priorities may the Secretary establish?

Each fiscal year the Secretary may give funding priority to activities that support the Javits Gifted and Talented Program, including—

(a) One or more of the activities listed in § 791.3;

(b) One or more of the following subject areas—

(1) English, including literature;

(2) History, geography, and civics;

(3) Other subjects in the humanities, including philosophy, linguistics, archeology, and the history and theory of the arts;

(4) Social and behavioral sciences;

(5) Mathematics;

(6) Science;

(7) Computer science;

(8) Foreign languages; and

(9) Visual and performing arts; and

(c) One or more instructional levels such as elementary or secondary education.

(Authority: 20 U.S.C. 3064-3065)

§ 791.5 What regulations apply?

The following regulations apply to the Javits Gifted and Talented Students Education Grant Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), part 75 (Direct Grant Programs), part 77 (Definitions that Apply to Department Regulations), part 79 (Intergovernmental Review of Department of Education Programs and Activities), part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Government), part 81 (General Education Provisions Act—Enforcement), part 82 (New Restrictions on Lobbying), part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)), and part 86 (Drug-Free Schools and Campuses).

(b) The regulations in this part 791.

(Authority: 20 U.S.C. 3061-3066)

§ 791.6 What definitions apply?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Applicant
Applications
Award
Budget period
Department
EDGAR
Equipment
Facilities
Grantee
Local educational agency (LEA)
Nonprofit
Project
Private
Public
Secretary
State educational agency (SEA)

(b) *Other definitions.* The following definitions also apply to this part:

Gifted and talented students means children and youth who—

(1) Give evidence of high performance capability in such areas as intellectual, creative, artistic, or leadership capacity or in specific academic fields; and

(2) Require services or activities not ordinarily provided by the school in order to develop those capabilities fully.

Hawaiian native means any individual whose ancestors were natives, prior to 1778, of the area that now comprises that State of Hawaii.

Hawaiian native organization means any organization recognized by the Governor of the State of Hawaii

primarily serving and representing Hawaiian natives.

Institution of higher education has the same meaning given that term in section 435(b) of the Higher Education Act of 1965, as amended.

(Authority: 20 U.S.C. 3063)

Subpart B—Reserved

Subpart C—How Does the Secretary Make an Award?

§ 791.20 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application according to the criteria in § 791.21.

(b) The Secretary awards up to 115 points, including a reserved 15 points distributed in accordance with paragraph (d) of this section for the criteria in § 791.21.

(c) Except for the reserved points distributed under paragraph (d) of this section, the maximum number of points for each criterion is indicated in parentheses.

(d) In a notice published in the **Federal Register**, the Secretary distributes the reserved 15 points among the criteria in § 791.21.

(Authority: 20 U.S.C. 3061–3068)

§ 791.21 What selection criteria does the Secretary use?

The Secretary uses the following criteria to evaluate an application for a new grant under the Javits Gifted and Talented Students Education Grant Program:

(a) *Need for the project.* (15 points) The Secretary reviews each application to determine the need for the proposed project, including—

(1) The extent to which the applicant has demonstrated the magnitude of the need, including the scope and severity of the need for the project; and

(2) The extent to which the applicant has demonstrated the specific needs of the students, teachers, administrators, parents, or paraprofessionals who will participate in the project.

(b) *National significance.* (10 points) The Secretary reviews each application to determine the potential of the project to produce nationally significant results, including—

(1) The likely impact of the proposed project on nationwide issues of educational improvement;

(2) The contribution of the proposed project to building a nationwide capability to identify and meet the special educational needs of gifted and talented students; and

(3) The potential of project activities to be implemented elsewhere.

(c) *Plan of operation.* (30 points) The Secretary reviews each application to determine the quality of the design for the proposed project and the applicant's plan for carrying it out, including—

(1) The extent to which the methods, activities, and goals will meet the needs identified in a well-conceived and coherent manner;

(2) The extent to which the methods, activities, and goals will meet the needs identified in a comprehensive way;

(3) If the project will provide instruction to students, the extent to which the applicant will use techniques and methods for teaching gifted students that are appropriate to particular grade levels or subject areas;

(4) The extent to which the project is based on current and relevant research on effective educational practices; and

(5) For projects involving more than one eligible applicant, the extent to which all of the applicants were involved in the planning of the project and the extent to which the appropriate officials from each applicant have agreed to participate in the project.

(d) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application to determine the quality of key personnel the applicant plans to use on the project, including—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project; and

(iii) How the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or disabling condition.

(2) To determine the qualifications of personnel referred to in paragraphs (d)(1) (i) and (ii) of this section, the Secretary considers—

(i) Experience and training in fields related to the objectives of the project; and

(ii) Any other qualifications that pertain to the project.

(e) *Budget and cost effectiveness.* (10 points) The Secretary reviews each application to determine the extent to which—

(1) The budget is adequate to support the project;

(2) Costs, particularly equipment costs, are reasonable in relation to the objectives of the project.

(f) *Evaluation plan.* (15 points) The Secretary reviews each application to determine the quality of the evaluation plan for the project, including the extent to which—

(1) The applicant's methods of evaluation—

(i) Are appropriate to the project;

(ii) In a project that will provide instruction to students—

(A) Compare the educational progress of students served by the project with the progress of a suitable control group; or

(B) If the applicant demonstrates that use of such a control group is not feasible, include an alternative evaluation measure that is both valid and reliable to assess the educational progress of students served by the project; and

(iii) Are likely to produce reliable, valid, and significant data; and

(2) The applicant's plan specifies the data to be collected in order to evaluate the project, including, if appropriate, socioeconomic, education, demographic, and assessment data.

(g) *Adequacy of resources.* (10 points) The Secretary reviews each application to determine the adequacy of the resources that the applicant plans to devote to the project, including facilities, equipment and supplies.

(Approved by the Office of Management and Budget under control number 1850–0635)

(Authority: 20 U.S.C. 3061–3068)

§ 791.22 What additional factors does the Secretary consider in making new awards?

In determining the order of selection for new awards—under EDGAR, 34 CFR 75.217(d)—the Secretary considers, in addition to the criteria in § 791.21, the extent to which funding an application would contribute to—

(a) The provision of services to gifted and talented students who are economically disadvantaged, are limited English proficient, or have disabling conditions, or who have any combination of these characteristics;

(b) The diversity of projects funded under this program; and

(c) The geographical distribution of projects funded under this program.

(Authority: 20 U.S.C. 3061–3068)

Subpart D—What Conditions Must Be Met After an Award?

§ 791.30 What are the conditions on the use of an award?

(a) A grantee shall use any funds received under the Javits Gifted and Talented Students Education Grant Program to supplement and make more effective the expenditure of State and local funds, and Federal funds under chapter 2 of Title I and Title II of the Elementary and Secondary Education Act of 1965, for the education of gifted and talented students.

(b) The Secretary may restrict the amount of funds used to purchase equipment and supplies.

(Authority: 20 U.S.C. 3062)

§ 791.31 What are a grantee's responsibilities for serving students and teachers in private schools?

If a project includes provision of services to students or teachers, the grantee shall provide for the equitable participation in the project of students and teachers in private nonprofit elementary and secondary schools, including the participation of teachers and other personnel in pre-service and in-service training programs for serving gifted and talented students.

(Authority: 20 U.S.C. 3066)

Part V

Department of Education

Javits Gifted and Talented Students Education Grant Program; Inviting Applications for New Awards for Fiscal Year (FY) 1992; Notice

DEPARTMENT OF EDUCATION

[CFDA No.: 84.206A]

Javits Gifted and Talented Students Education Grant Program; Inviting Applications for New Awards for Fiscal Year (FY) 1992

Purpose of Program: To provide financial assistance for activities designed to help build a nationwide capability in elementary and secondary schools to identify and meet the special educational needs of gifted and talented students. This program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by helping to create better and more accountable schools for today's students.

Eligible Applicants: State educational agencies; local educational agencies; institutions of higher education; other public and private agencies and organizations (including Indian tribes and organizations as defined by the Indian Self-Determination and Education Assistance Act and Hawaiian Native organizations).

Deadline for Transmittal of Applications: 5/7/92.

Deadline for Intergovernmental Review: 7/7/92.

Applications Available: 3/23/92.

Available Funds: $4.8 Million.

Estimated Range of Awards: $100,000–$250,000.

Estimated Average Size of Awards: $200,000.

Estimated Number of Awards: 24.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 85, and 86; and (b) the regulations for this program in 34 CFR Part 791, as published in this issue of the **Federal Register**.

Priorities: Under 34 CFR 75.105(c)(3) and 34 CFR 791.4 the Secretary gives an absolute preference to applications that meet one or more of the following priorities. The Secretary funds under this competition only applications that meet one or more of these absolute priorities:

Absolute Priority 1—Early Childhood

Projects designed to meet the educational needs of gifted and talented elementary school students in grades K–3 through any one or more of the activities described under 34 CFR 791.3.

Absolute Priority 2—Subject Areas

Projects designed to meet the educational needs of gifted and talented elementary and secondary school students at any grade level in any one or more of the following subject areas:

(1) English, including literature; (2) History, geography and civics; (3) Mathematics; (4) Science; and (5) the Visual and performing arts.

Absolute Priority 3—In-Service and Pre-service Education

Projects designed to meet the educational needs of gifted and talented elementary and secondary school students through pre-service and in-service training, or both, including summer institutes for teachers, administrators, counselors and other educational personnel.

Selection Criteria: In evaluating applications for grants under this competition, the Secretary uses the selection criteria in 34 CFR 791.21. The Secretary assigns the 15 additional points described in 34 CFR 791.20(b) as follows: 5 points will be added to National Significance; and 10 points will be added to Plan of Operation.

For Applications or Information Contact: Beverly E. Coleman, U.S. Department of Education, 555 New Jersey Avenue, NW., room 506 C, Washington, DC 20208–5644. Telephone: (202) 219–2187. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Dated: March 9, 1992.

Diane Ravitch,

Assistant Secretary, Office of Educational Research and Improvement.

March 13, 1992

Part VI

Department of Education

34 CFR Parts 642 et al.

Training Program for Special Programs Staff and Leadership Personnel, Final Regulations

DEPARTMENT OF EDUCATION

34 CFR Parts 642, 643, 644, 645, 646 and 668

RIN 1840-AB53

Training Program for Special Programs Staff and Leadership Personnel; Talent Search, Educational Opportunity Centers, Upward Bound, and Student Support Services Programs; and Student Assistance General Provisions

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary amends the regulations governing the Training Program for Special Programs Staff and Leadership Personnel; the regulations governing the Talent Search, Educational Opportunity Centers, Upward Bound, and Student Support Services programs; and the Student Assistance General Provisions regulations. These amendments conform those regulations to statutory changes in the Higher Education Act of 1965, as amended (HEA), that were made by Public Laws 100–369 and 102–73.

These regulatory amendments affect residents of and institutions located in the "Freely Associated States." These jurisdictions are the Federated States of Micronesia and the Republic of the Marshall Islands.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person. A document announcing the effective date will be published in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Jerry M. Whitlock, Senior Policy Analyst, Office of Policy Development, Office of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue SW., room 4060, Regional Office Building 3, Washington, DC 20202–5444, Telephone: (202) 708–9069. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: Public Law 102–73 made several amendments to the HEA. The amendment made by section 801(c) of Public Law 102–73 allows an otherwise eligible institution of higher education located in the "Freely Associated States" to receive TRIO Program grants (i.e., grants under the Training Program for Special Programs Staff and Leadership Personnel, and the Talent Search, Educational Opportunity Centers, Upward Bound, and Student Support Services Programs). The amendments made by section 801(a) of Public Law 102–73 allow residents of the Freely Associated States, who attend a public or nonprofit private institution of higher education located in the Freely Associated States, to receive financial aid under the Pell Grant, Supplemental Educational Opportunity Grant (SEOG) and College Work-Study (CWS) Programs. In addition, the latter section allows those residents to participate in TRIO Programs offered by such an institution. The Secretary is amending the TRIO Program regulations to conform those regulations to these statutory changes.

The Secretary is also amending the Student Assistance General Provisions regulations to conform § 668.7(a)(4)(iv) to statutory changes made by section 9 of Public Law 100–369. That section provided that residents of the Freely Associated States were eligible to receive assistance under the Pell Grant, Supplemental Educational Opportunity Grant, and College Work-Study Programs.

AMERICA 2000, the President's strategy for moving the Nation toward the National Educational Goals, seeks to create a nation of students. The amendments made by the National Literacy Act of 1991 and by Public Law 100–369 are consistent with this goal because the amendments expand the counseling, tutorial, and financial aid resources available to citizens of the Freely Associated States.

Waiver of Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, these final regulations merely conform the regulations to statutory changes. Accordingly, the Secretary finds that soliciting further public comment with respect to these regulations is unnecessary and contrary to the public interest under 5 U.S.C. 553(b)(B).

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. The small entities affected by these proposed regulations are two institutions of postsecondary education in the Freely Associated States. These changes will not increase these institutions' workloads, or the costs associated with administering those title IV, HEA programs for which they are now eligible.

Assessment of Education Impact

The Secretary has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Paperwork Reduction Act of 1980

These regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Dated: February 3, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary amends parts 642, 643, 644, 645, 646, and 668 of title 34 of the Code of Federal Regulations as follows:

PART 642—TRAINING PROGRAM FOR SPECIAL PROGRAMS STAFF AND LEADERSHIP PERSONNEL

1. The authority citation for part 642 continues to read as follows:

Authority: 20 U.S.C. 1070d–1d, unless otherwise noted.

2. In § 642.5(b), the definition of "institution of higher education" is revised to read as follows:

§ 642.5 Definitions.

* * * * *

(b) * * *

Institution of higher education means an educational institution as defined in section 481, 1201(a), or 1204 of the Act.

(Authority: 20 U.S.C. 1088, 1141(a) and 1144a)

* * * * *

PART 643—TALENT SEARCH PROGRAM

3. The authority citation for part 643 continues to read as follows:

Authority: 20 U.S.C. 1070d–1, unless otherwise noted.

4. Section 643.3 is amended by removing "or;" after paragraph (a)(1)(iii), and by adding paragraphs (a)(1) (v) and (vi) to read as follows:

§ 643.3 Eligible project participants: General.

(a) * * *

(1)(i) * * *

(v) Is a citizen of the Republic of Palau; or

(vi) Is a resident of the Freely Associated States—the Federated States of Micronesia or the Republic of the Marshall Islands—and attends a public or nonprofit institution of higher education in the Freely Associated States;

* * * * *

5. In § 643.6(b), the definition of "institution of higher education" is revised to read as follows:

§ 643.6 Definitions that apply to the Talent Search Program.

* * * * *

(b) * * *

Institution of higher education means an educational institution as defined in section 481, 1201(a), or 1204 of the Act.

(Authority: 20 U.S.C. 1088, 1141(a), and 1144a)

* * * * *

PART 644—EDUCATIONAL OPPORTUNITY CENTERS PROGRAM

6. The authority citation for part 644 continues to read as follows:

Authority: 20 U.S.C. 1070d–1c, unless otherwise noted.

7. Section 644.3 is amended by removing "or;" after paragraph (a)(3), and by adding paragraphs (a) (5) and (6) to read as follows:

§ 644.3 Eligible project participants: General.

* * * * *

(a)(1) * * *

(5) Is a citizen of the Republic of Palau; or

(6) Is a resident of the Freely Associated States—the Federated States of Micronesia or the Republic of the Marshall Islands—and attends a public or nonprofit institution of higher education in the Freely Associated States;

* * * * *

8. In § 644.6(b), the definition of "institution of higher education" is revised to read as follows:

§ 644.6 Definitions that apply to the Educational Opportunity Center Program.

* * * * *

(b) * * *

Institution of higher education means an educational institution as defined in section 481, 1201(a), or 1204 of the Act.

(Authority: 20 U.S.C. 1088, 1141(a) and 1144a)

* * * * *

PART 645—UPWARD BOUND PROGRAM

9. The authority citation for part 645 continues to read as follows:

Authority: 20 U.S.C. 1070d–1a, unless otherwise noted.

10. Section 645.3 is amended by removing "or;" after paragraph (a)(1)(iii), and by adding paragraphs (a)(1)(v) and (vi) to read as follows:

§ 645.3 Eligible project participants: General.

(a) * * *

(1)(i) * * *

(v) Is a citizen of the Republic of Palau; or

(vi) Is a resident of the Freely Associated States—the Federated States of Micronesia or the Republic of the Marshall Islands—and attends a public or nonprofit institution of higher education in the Freely Associated States;

* * * * *

11. In § 645.6(b), the definition of "institution of higher education" is revised to read as follows:

§ 645.6 Definitions that apply to the Upward Bound Program.

* * * * *

(b) * * *

Institution of higher education means an educational institution as defined in section 481, 1201(a), or 1204 of the Act.

(Authority: 20 U.S.C. 1088, 1141(a) and 1144a)

* * * * *

PART 646—STUDENT SUPPORT SERVICES

12. The authority citation for part 646 continues to read as follows:

Authority: 20 U.S.C. 1070d–1b, unless otherwise noted.

13. Section 646.3 is amended by removing "or;" after paragraph (a)(3), and by adding paragraphs (a)(5) and (6) to read as follows:

§ 646.3 Eligible project participants: General.

* * * * *

(a)(1) * * *

(5) Is a citizen of the Republic of Palau; or

(6) Is a resident of the Freely Associated States—the Federated States of Micronesia or the Republic of the Marshall Islands—and attends a public or nonprofit institution of higher education in the Freely Associated States;

* * * * *

14. In § 646.6(b), the definition of "institution of higher education" is revised to read as follows:

§ 646.6 Definitions that apply to the Support Services Program.

* * * * *

(b) * * *

Institution of higher education means an educational institution as defined in section 481, 1201(a), or 1204 of the Act.

(Authority: 20 U.S.C. 1088, 1141(a), and 1144a)

* * * * *

PART 668—STUDENT ASSISTANCE GENERAL PROVISIONS

15. The authority citation for part 668 continues to read as follows:

Authority: 20 U.S.C. 1085, 1088, 1091, 1092, 1094, and 1141, unless otherwise noted.

16. Section 668.7 is amended by revising paragraph (a)(4)(iv) and the authority citation at the end of the section to read as follows:

§ 668.7 Eligible student.

(a) * * *

(4) * * *

(iv) For purposes of the Pell Grant, SEOG, and CWS Programs—

(A) Is a resident of the Federated States of Micronesia; or

(B) Is a resident of the Republic of the Marshall Islands;

* * * * *

(Authority: 20 U.S.C. 1070a–1070c–1, 1077, 1078, 1078–1–1078–3, 1082, 1085, 1087a 1087cc, 1091, 42 U.S.C. 2753, section 9 of Pub. L. 100–369)

Department of Education

Fund for the Improvement of Postsecondary Education—Special Focus Competition (Invitational Priority: Projects in Science and the Humanities); Notice

DEPARTMENT OF EDUCATION

[CFDA No. 84.116K]

Fund for the Improvement of Postsecondary Education—Special Focus Competition (Invitational Priority: Projects in Science and the Humanities)

ACTION: Amendment of notice inviting applications for new awards for fiscal year (FY) 1992.

On September 18, 1991, the Secretary of Education published in the **Federal Register** (56 FR 47289) a notice inviting applications for FY 1992 under the Fund for the Improvement of Postsecondary Education—Special Focus Competition (Invitational Priority: Projects in Science and the Humanities). This amendment to that notice alerts potential applicants that, in the case of this competition, the Department of Education will accept applications mailed or delivered to the Department of Education (ED), the National Science Foundation (NSF), or the National Endowment for the Humanities (NEH).

The Department of Education, NSF, and NEH are collaborating to fund projects that link science, social science, and the humanities. To assist those applicants that are interested in applying to more than one of the collaborating agencies, each of the collaborating agencies has agreed to receive applications for the other two agencies.

Therefore, for the purposes of this Special Focus Competition, an application mailed or delivered to the National Endowment for the Humanities' Division of Education Programs: Projects in Science and the Humanities, or to the National Science Foundation's Division of Undergraduate Science, Engineering and Mathematics Education: Projects in Science and the Humanities, will be deemed to have been properly submitted to the Department of Education if the application meets the following criteria: (1) If mailed, the application is mailed to NEH, NSF, or ED on or before the deadline date of April 1, 1992, and shows proof of mailing in accordance with 34 CFR 75.102(d); (2) if hand delivered, the application is delivered to NEH, NSF, or ED by 4:30 p.m. (Washington, DC time) of the deadline date of April 1, 1992; (3) the application includes an appropriately signed and authorized Department of Education title page (Form ED0001, OMB No. 1840–0639, available in the Information and Application Procedures); and (4) except for an NEH or NSF mailing address or place of delivery, the application meets all other Department of Education submission requirements set forth in the Information and Application Procedures for this Special Focus Competition and in Department of Education regulations.

For Applications or Information Contact: For application materials and submission instructions, contact Brian Lekander, FIPSE, U.S. Department of Education, 400 Maryland Ave., SW., room 3100, ROB–3, Washington, DC 20202–5175. Telephone: (202) 708–5750. For further information about submitting applications to NSF, contact Bill Haver, USEME, room 639, National Science Foundation, 1800 G Street, NW., Washington, DC 20550. Telephone: (202) 357–7051. For further information about submitting applications to NEH, contact Susan Greenstein, National Endowment for the Humanities, Division of Education Programs, room 302, 1100 Pennsylvania Avenue, NW., Washington, DC 20506. Telephone: (202) 786–0380.

Program Authority: 20 U.S.C. 1135–1135a–3.

Dated: March 5, 1992.

Carolynn Reid-Wallace,

Assistant Secretary for Postsecondary Education.

Part VIII

Department of the Interior

Bureau of Land Management

43 CFR Parts 3150 and 3160

Onshore Oil and Gas Geophysical Exploration; Onshore Oil and Gas Operations; Interim Final Rule and Proposed Rule

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 3150 and 3160

[WO-610-4111-24-1A; Circular No. 2635]

RIN 1004-AC02

Onshore Oil and Gas Geophysical Exploration; Onshore Oil and Gas Operations

AGENCY: Bureau of Land Management, Interior.

ACTION: Interim final rule.

SUMMARY: This interim final rule adds to 43 CFR part 3150 a section governing appeals of decisions and approvals relating to onshore oil and gas geophysical exploration operations to allow the decisions and approvals of an authorized officer to remain in full force and effect when an appeal is filed, unless the appellant shows sufficient justification to the Interior Board of Land Appeals (IBLA) that a stay is necessary. It similarly amends the section in part 3160 governing appeals of decisions and approvals relating to onshore oil and gas operations to allow the decision of an authorized officer to remain in full force and effect during the pendency of an appeal. Such provisions are needed to allow the IBLA to determine whether the issues involved in an appeal warrant a stay of onshore oil and gas activities and the accompanying delays and economic consequences. A proposed rule with similar provisions has been published simultaneously in this issue. The purpose of the proposed rule is to request public review and comment to aid the agency in determining whether or not to publish a subsequent and permanent final rule for these provisions, which would be effective prior to or concurrently with the expiration date of this interim final rule.

DATES: This interim final rule will be effective for a limited duration. It is effective March 13, 1992 and will expire on December 31, 1992.

ADDRESSES: Inquiries or suggestions should be sent to: Director, (140) Bureau of Land Management, room 5555, Main Interior Building, 1849 C Street, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Frank Lanzetta, (202) 653–2127, or Richard Hopkins (202) 653–2095.

SUPPLEMENTARY INFORMATION:

I. Background

The urgency to amend these regulations arises from an October 4, 1991, decision of the IBLA in the case, Utah Chapter of the Sierra Club, Southern Utah Wilderness Alliance, 121 IBLA 1, which was an appeal of a decision by a Bureau of Land Management (BLM) field office. The IBLA decision abruptly overturned previously well-established administrative precedents and BLM policy by allowing an appellant to render decisions regarding oil and gas operational activities temporarily ineffective without any showing that the appellant has a legally viable claim. Because of the urgency caused by this decision, BLM has good cause to dispense with the ordinary agency procedures for rulemaking.

Historically, decisions of the authorized officer concerning oil and gas activities such as Applications for Permits to Drill (APDs) were effective while the decision was pending appeal. This interim final rule is necessary to restore prior longstanding appeals procedures that have consistently been relied upon by the BLM and the public in the area of oil and gas operations under part 3160. This rule is also necessary to create appeals procedures for decisions and Notice of Intent approvals relating to exploratory activities under part 3150 so as to be consistent with the treatment of appeals from decisions made pursuant to part 3160.

The BLM has long operated its oil and gas program on the assumption that an appealed decision relating to operations for oil and gas remains in full force and effect during the pendency of the appeal unless affirmatively stayed by the IBLA. This policy was based on the BLM's understanding of 43 CFR 3165.4(c). In the Southern Utah Wilderness Alliance case, the IBLA ruled that this regulation did not apply to BLM decisions and approvals regarding operational activities, such as APDs. As a result of the decision, only operator appeals from compliance orders benefit from the full force and effect provisions of paragraph 3165.4(c). The Board held that the automatic stay provisions of 43 CFR 4.21(a) apply to appeals from BLM decisions and approvals related to all other operational activities under part 3160.

The result of the decision has caused great turmoil, not only within BLM's oil and gas program, but also within the oil and gas industry, which had come to rely on certain general timetables within which it planned its activities and financial commitments. These Federal and private plans are frustrated by the general application of § 4.21(a) to these activities. Significant potential exists for expiration of many existing leases, delays in drilling operations, decreases in revenues to the Treasury, decreases in revenue sharing with the affected States, additional strain on the industry, loss of employment opportunities, and additional and unnecessarily redundant costs to the government in re-leasing these areas. The BLM's previously well-settled practices have been relied upon by both the Federal and private sectors, and this rule, as it applies to part 3160, simply enables pre-existing expectations to continue. In addition, in order to allow exploratory decisions and approvals made under part 3150 to be handled consistently with appeals under part 3160, an appeals provision is added to part 3150.

Sixteen instances of pending appeals filed by third-party appellants in the areas of oil and gas exploration and operations currently exist. Growing numbers are expected. Without immediately remedying this disruption in government operations, the due and required execution of agency functions are unavoidably prevented while ordinary rulemaking proceeds. The Southern Utah Wilderness Alliance decision prevents BLM from meeting its mission to implement the Mineral Leasing Act, to carry out the terms of existing oil and gas leases, and to provide for multiple use of the public lands pursuant to the Federal Land Policy and Management Act. Therefore, using ordinary rulemaking procedures to restore the *status quo ante* would be impracticable.

Unless the rule is made final on an interim basis and is made effective immediately, appeals that are lacking in merit and are filed to prevent oil and gas activities from occurring on the public lands may now delay those activities for up to two years. Making this rule interim final is less disruptive to government operations and private interests than would be ordinary rulemaking procedures, since it is made to counter the disruptive effects of the October 4, 1991, decision by the IBLA. To slow the effectiveness of this rule would, therefore, be contrary to the public interest.

II. Agency Review and Public Involvement Prior to Oil and Gas Exploration and Development Operations

Many recent appeals, filed by appellants who are third parties to exploratory agreements between the BLM and operators or to lease agreements between the BLM and lessees or operators, are a result of concern for the BLM's compliance with environmental review requirements. The most effective time for such public participation in the environmental review process, however, is in the planning stage of oil and gas leasing. Beginning with the Resource Management Plan (RMP), which is an area-by-area plan for effective multiple-use of resources, public scoping meetings are conducted before any BLM planning and National Environmental Protection Agency (NEPA) documents are started. During these meetings, the BLM asks for comments from all interested and affected parties, identifies issues, and presents a schedule that will be followed during document preparation. These schedules are important because the BLM encourages and solicits public input and comment throughout the entire process. A draft document is prepared and a time period allowed for public review and comment in accordance with established regulatory requirements. Whenever a final document is prepared, public comments received on the draft document are addressed as to how the comments were accommodated or why they were not. After the proposed RMP is published, a 30-day protest period is provided. If any protest is filed, administrative review is completed before the RMP is approved. The process described above is standard before any oil and gas exploration, leasing, or operational activities are allowed to proceed.

III. 43 CFR 3150—Oil and Gas Exploration

Following completion of the planning document, BLM accepts Notices of Intent to Conduct Oil and Gas Exploration Operations in the areas open to such activities under the plan. Notices of Intent require approval from the authorized officer of BLM. Such approvals are experiencing third-party appeals. However, the existing regulations for oil and gas exploration in part 3150 are silent on the subject of appeals procedures and the effect of an appeal during pendency. Due to the silence of the regulations, it is not evident which appeals procedures apply. This rule will fill this void.

Prior to approval of oil and gas exploratory operations, such activities receive additional environmental scrutiny from the public and from the BLM. It is Department policy to encourage oil and gas exploration in an environmentally sound manner. When a specific action is proposed, such as a Notice of Intent to Conduct Oil and Gas Geophysical Exploration Operations, BLM receives the proposal and conducts several reviews. Before authorizing surface disturbing activities, the BLM conducts an environmental review of each proposed action and determines whether it conforms with the RMP provisions. If the conformance review determines that the RMP does not provide for the exploration operations or that the proposed operation cannot be modified, it is considered further through an appropriate NEPA document and/or plan amendment process. As a matter of policy, an environmental review is made of every proposed oil and gas activity involving surface disturbance. Those data collection activities which involve no surface disturbance are categorically excluded in the Department Categorical Exclusion list (516 DM 2, appendix 1.6).

The BLM must, therefore, balance the environmental review and other considerations with its mission to approve exploration in a timely manner for parties wishing to conduct it. Considerable investment of private finances is required to conduct geophysical exploration. Reasonable and timely returns are necessary on those investments in order for them to be undertaken. Prior to conducting exploration activities, large expenditures of time and money are needed for consultation with private, State, and other Federal agencies before a geophysical program can begin. Some exploration programs on BLM lands are restricted by time limitations. For example, a condition of approval may be that operations begin on a specified date and end on another date. Such limitations could be precipitated by a hunting season on the land in question, seasonal recreation restrictions, weather conditions, wildlife species habitat requirements, or other protective measures of other resource values, which are identified in the BLM planning and NEPA documents. In some areas there is very little time to complete exploration because of such timing limitations. Therefore, it is in the public interest and the operators' interests to complete an exploration program in accordance with BLM plan provisions. As stated above, without the added appeals provision in part 3150, appeals from approving decisions in the area of oil and gas exploration would be stayed pending the appeal. An automatic stay could cause seasonal windows of opportunity to be missed. This has great potential for economic hardship on operators who are trying in good faith to meet their responsibilities for environmental protection while at the same time remaining competitive in private enterprise. Therefore, the appeals language is added to part 3150 in this rule.

IV. 43 CFR 3160—Oil and Gas Operations

As to the oil and gas operations regulations found in part 3160, the existing regulations at 43 CFR 3165.4(c) provide that appeals of decisions of the authorized officer are to be handled under 43 CFR part 4, which provides in § 4.21(a) that an appeal stays the decision of the authorized officer until a decision is issued by the IBLA. Part 4 provides for a lifting of the stay if the IBLA or the Director of the Office of Hearing and Appeals determines that the effectiveness of the decision would be in the public interest. Subsection 3165.4(c) creates a clear exception for operator appeals of BLM compliance requirements, allowing compliance orders to remain in full force and effect. However, the topic of the effect of appeals by third parties is not addressed in the rule. That void will be filled by this rule.

The environmental review for oil and gas operations and the BLM's permit approval process under the regulations at 43 CFR 3162.3–1 and 3162.5–1 are designed to identify and fully address all concerns over proposed operations, to determine whether the proposed operations will be approved, and to require adequate environmental and public health and safety protective measures by the operator. It is unlikely that there would be any unidentified significant potential impacts raised in an appeal that would have not already been assessed and mitigated by the time a proposal is approved. The lessees and operators have, in good faith, properly applied to the BLM under part 3160 for approval to conduct operational activities. However, after their application proceeds through required public notification and comment period, and compliance with NEPA by the BLM, an appeal by any party opposed to the action may prevent the operators from acting on the BLM's approval. Under the current regulation, any approved activities are required to be discontinued upon the filing of any appeal, regardless of the merit of the appeal. For the stated reasons, the appeals procedures for part 3160 are amended by this rule.

V. Effect on Third-Party Appellants

The IBLA has affirmed on numerous BLM's determinations that its proposed actions will not have a significant impact on the quality of the human environment. On December 31, 1991, in an expedited review, the IBLA affirmed BLM's Record of Decision and Finding of No Significant Impact in the Southern

Utah Wilderness Alliance case, 122 IBLA 6. The requirements for coordination, public input, and environmental documentation will continue to be followed by the BLM, and therefore, this change in the regulations places some reasonable responsibilities on appellants without taking away any substantive appeal rights.

This change in the regulations places a burden on the appellant to show clearly why a stay of approved exploratory or operational activities is warranted. Parties pursuing appeals may obtain a stay of the BLM decision from the IBLA upon a showing of sufficient justification based on the following standards: (1) The relative harm to the parties if the stay is granted or denied, (2) the likelihood of the appellant's success on the merits, (3) the likelihood of irreparable harm to the appellant or resources if the stay is not granted, and (4) whether the public interest favors granting the stay.

VI. Conclusion and Determinations

In conclusion, for the reasons stated above, we find that notice of proposed rulemaking and delay in the effective date would be impracticable and contrary to the public interest. Accordingly, such notice and delay are not required under 5 U.S.C. 553 (b) and (d).

Elsewhere in this issue of the **Federal Register** is published a proposed rule containing provisions identical to those in this proposed rule, but which allows a 30 day public comment period.

The principal authors of this interim final rule are Frank Lanzetta, Division of Fluid Mineral Lease and Reservoir Management, and Richard Hopkins, Division of Fluid Mineral Leasing, assisted by the staff of the Division of Legislation and Regulatory Management, BLM.

It is hereby determined that this interim final rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required. The BLM has determined that this rule would have no impact on any physical attributes of the public lands or any environmental resource values. By the time of the lodging of an appeal, under standard BLM procedures an environmental review and analysis will have been performed on the activity that is the subject matter of the appeal. Therefore, no additional environmental analysis is needed merely because this rule would change the effect of the pendency of an appeal.

The Department of the Interior has determined under Executive Order 12291 that this document is not a major rule. A major rule is any regulation that is likely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions, or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Expenses currently being incurred by geophysical exploration operators or lessees/operators for Federal lease operations will not increase. There are no expected increases in costs or prices for consumers. Costs may actually decline because of a possible decrease in the number of appeals. There would be no need for increase in Federal, State, or local agency budgets or personnel requirements to implement this rule. The gross annual effect on the United States economy is not likely to approach $100 million. Further, for the same reasons, and because the effect of the rule is to restore to small entities the authority to act that had been granted by the BLM, the Department has determined under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that it will not have a significant economic impact on a substantial number of small entities.

The Department certifies that this interim final rule does not represent a governmental action capable of interference with constitutionally protected property rights. It does not infringe any private property rights. Therefore, as required by Executive Order 12630, the Department of the Interior has determined that the rule would not cause a taking of private property.

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subjects

43 CFR Part 3150

Oil and gas exploration; Public lands—mineral resources.

43 CFR Part 3160

Environmental protection, oil and gas resources, Government contracts, Public lands—mineral resources, Reporting and recordkeeping requirements.

For reasons stated in the preamble, and under the authorities stated below, parts 3150 and 3160 of Group 3100, subchapter C, chapter II, subtitle B, of title 43 of the Code of Federal Regulations are proposed to be amended as follows:

PART 3150—ONSHORE OIL AND GAS GEOPHYSICAL EXPLORATION [AMENDED]

1. The authority citation for part 3150 is revised to read as follows:

Authority: 30 U.S.C. 181 *et seq.*, 30 U.S.C. 351–359, 43 U.S.C. 1701 *et seq.*, 16 U.S.C. 3101 *et seq.*, 31 U.S.C. 483a, 42 U.S.C. 6504, 42 U.S.C. 6508.

2. Section 3150.2 is added to read as follows:

§ 3150.2 Appeals.

(a) A party adversely affected by a decision or approval of the authorized officer may appeal that decision to the Interior Board of Land Appeals as set forth in part 4 of this title.

(b) All decisions and approvals of the authorized officer under this part shall remain effective pending appeal unless the Interior Board of Land Appeals determines otherwise upon consideration of the standards stated in this paragraph. The provisions of 43 CFR 4.21(a) shall not apply to any decision or approval of the authorized officer under this subpart. A petition for a stay of a decision or approval of the authorized officer shall be filed with the Interior Board of Land Appeals, Office of Hearings and Appeals, Department of the Interior, and shall show sufficient justification based on the following standards: (1) The relative harm to the parties if the stay is granted or denied, (2) the likelihood of the appellant's success on the merits, (3) the likelihood of irreparable harm to the appellant or resources if the stay is not granted, and (4) whether the public interest favors granting the stay.

PART 3160—OIL AND GAS OPERATIONS [AMENDED]

3. The authority citation for 43 CFR part 3160 continues to read as follows:

Authority: 30 U.S.C. 181 *et seq.*; 30 U.S.C. 351–359; 30 U.S.C. 301–306; 25 U.S.C. 396; 25 U.S.C. 396a–396g; 25 U.S.C. 397; 25 U.S.C. 398; 25 U.S.C. 398a–398e; 25 U.S.C. 399; 43 U.S.C. 1457, see also Attorney General's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41); 40 U.S.C. 471 *et seq.*; 42 U.S.C. 4321 *et seq.*; 42 U.S.C. 6508; Pub. L. 97–78; 30 U.S.C. 1701 *et seq.*; and 25 U.S.C. 2102.

4. Section 3165.4 is amended by redesignating paragraphs (c), (d), and (e) as (d), (e), and (f), respectively, and adding a new paragraph (c) to read as follows:

§ 3165.4 Appeals.

(a) * * *

* * * * *

(c) *Effect of an appeal on an approved decision by the authorized officer.* All decisions and approvals of the authorized officer under this part shall remain effective pending appeal to the Interior Board of Land Appeals unless the Interior Board of Land Appeals determines otherwise upon consideration of the public interest. The provisions of 43 CFR 4.21(a) shall not apply to any decision or approval of the authorized officer under this subpart. A petition for a stay of a decision or approval of the authorized officer shall be filed with the Interior Board of Land Appeals, Office of Hearings and Appeals, Department of the Interior, and shall show sufficient justification based on the following standards: (1) The relative harm to the parties if the stay is granted or denied, (2) the likelihood of the appellant's success on the merits, (3) the likelihood of irreparable harm to the appellant or resources if the stay is not granted, and (4) whether the public interest favors granting stay.

Dated: January 28, 1992.

Richard Roldan,

Acting Assistant Secretary of the Interior.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 3150 and 3160

[WO-610-4111-24-1A]

RIN 1004-AC02

Onshore Oil and Gas Geophysical Exploration; Onshore Oil and Gas Operations

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule would add to 43 CFR part 3150 a section governing appeals of decisions and approvals relating to onshore oil and gas geophysical exploration operations to allow an authorized officer's decision or approval to remain in effect when an appeal is filed, unless the appellant convinces the Interior Board of Land Appeals (IBLA) that a stay is necessary. It would also amend the section in part 3160 governing appeals of decisions relating to onshore oil and gas operations to allow an authorized officer's decision to remain in effect during the pendency of an appeal. Such provisions are needed to allow the IBLA to determine whether the issues involved in an appeal warrant a stay of onshore oil and gas activities and the accompanying delays and economic consequences. An interim final rule with similar provisions has been published in this issue also. That interim final rule will expire on December 31, 1992.

DATES: Comments should be submitted by April 13, 1992.

ADDRESSES: Comments should be sent to: Director, (140) Bureau of Land Management, room 5555, Main Interior Building, 1849 C Street, NW., Washington, DC 20240. Comments will be available for public review at the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Sie Ling Chiang, (202) 653-2127.

SUPPLEMENTARY INFORMATION: It is Department policy to encourage oil and gas exploration in an environmentally sound manner. The Bureau of Land Management (BLM) has the responsibility to approve operations in a timely manner for parties wishing to conduct exploration. Considerable investment of private finances is required to conduct geophysical exploration operations. Reasonable and timely returns are necessary on these investments for them to be profitable. Prior to conducting exploration operations, large expenditures of time and money are needed for negotiations with private, State, and other Federal agencies before a geophysical program can begin. Some exploration programs on BLM lands are restricted by time limitations. For example, a Condition of Approval (COA) may be that operations begin on a certain specified date and end on another specified date. These conditions could be due to a hunting season, recreation seasonal restrictions, wildlife species habitat requirements, weather conditions, or other circumstances or protection of other resource values, which are all identified in the BLM planning and assorted National Environmental Policy Act (NEPA) documents. In some areas there is very little time to complete operations because of timing limitations; therefore, it is in the public interest and the operators' interest to complete an exploration program in conformance with BLM plan provisions. An automatic stay resulting from an appeal could cause a work season to be missed. This has great potential to cause economic hardship on operators who are trying in good faith to meet their responsibilities for environmental protection and remain competitive in private enterprise.

The existing regulations governing onshore oil and gas operations are silent on the subject of filing of an appeal by any parties other than the operator. The current oil and gas regulations at 43 CFR 3165.4 provide that appeals of decisions of the authorized officer are handled under 43 CFR 4.21 General Provisions. Part 4 provides that an appeal stays the decision of the authorized officer until a decision is issued by the IBLA, whether the appeal has merit or not. Such stays can have and have had serious financial impacts on operators, by making it difficult or impossible for them to meet rigid deadlines to begin oil and gas operations. Delays in beginning drilling and other operations caused by stays due to appeals typically result in a significant economic impact. The IBLA routinely takes 9 months or longer to decide appeals, and even expedited reviews by IBLA can take 6 months or longer. Delay or cancellation of operations may reduce or eliminate royalty income to the Federal Government and States. Recent and current world events make it more imperative than ever that the United States develop domestic oil and gas resources in an acceptable manner to reduce its reliance on foreign oil.

Decisions by the BLM authorized officer to approve an operational proposal are required to conform to the planning documents, including the associated NEPA analysis. Before any BLM planning and NEPA documents are started, public scoping meetings are conducted as a part of the resource management planning process. During these meetings, the BLM asks for comments from all interested and affected parties, identifies issues, and presents a schedule that will be followed during document preparation. These schedules are important because the BLM encourages and solicits public input and comment throughout the entire process. A draft document is prepared and a time period allowed for public review and comment in accordance with established regulatory requirements. Whenever a final document is prepared, public comments received on the draft document are addressed as to how the comments were accommodated or why they were not. After the proposed resource management plan (RMP) is published, a 30-day protest period is provided. If any protest is filed, administrative review is completed before the RMP is approved.

When a specific action is proposed, such as a Notice of Intent to Conduct Geophysical Exploration, BLM receives the proposal and conducts several reviews. Before authorizing surface disturbing activities, the BLM conducts an environmental review of each proposed action and determines its conformance with RMP provisions. If the conformance review determines that the RMP does not provide for the exploration operations or that the proposed operation cannot be modified, it is considered further through an appropriate NEPA document and/or plan amendment process. An environmental review is made of every proposed action involving surface disturbance. Those data collection activities that involve no surface disturbance are categorically excluded in the Department Categorical Exclusion list (516 DM 2, appendix 1.6).

Similar circumstances apply to operations of onshore oil and gas lessees and operators. These operators have, in good faith, properly applied to the BLM under the regulations for approval to conduct activities. However, after their application proceeds through required public participation, and compliance with NEPA by the BLM, an appeal by any party opposed to the action may prevent the operators from acting on BLM's approval. The current regulations clearly address the effect of an appeal on operators' compliance requirements, but do not specify the effect of an appeal by a third party. In the absence of clear language in 43 CFR 3165.4 for an authorized officer's decision to remain effective pending

appeal to the IBLA, 43 CFR 4.21(a) will apply, so that any appeal properly filed will stay the approval or decision of the authorized officer.

The BLM's permit approval process under the regulations at 43 CFR 3162.3-1 is designed to identify and fully address all concerns over proposed operations, to determine whether the proposed operations will be approved, and to require adequate environmental and public health and safety protective measures by the operator. It is unlikely that there would be any unidentified significant potential impacts raised in an appeal that would have not already been assessed and mitigated by the time a proposal is approved.

The rule would add an Appeals section to the regulations in 43 CFR 3150, providing that all decisions and approvals of the authorized officer relating to geophysical exploration shall remain in full force and effect if appealed. It would also amend the Appeals section at 43 CFR 3165.4 to make it clear that a decision or permit approval by the authorized officer as to oil and gas operations remains in full force and effect during the pendency of an appeal by a third party. Both would allow decision approvals to be stayed upon a determination by the IBLA that a stay is warranted, and would state how petitions for stay of decisions may be filed. The rule would provide the IBLA the opportunity to determine whether the issue raised in an appeal and the potential for significant environmental or public health and safety impact, warrant a stay of an approval or decision until IBLA rules on the appeal. The BLM proposes these amendments to the regulations in order to simplify the appeal process. This proposed rule would not take away any substantive right of appeal that currently exists. It would require the appellant to be responsible for filing a petition for a stay pending appeal if the appellant desires a stay.

The IBLA has affirmed on numerous occasions BLM's determinations that its proposed actions will not have a significant impact on the quality of the human environment. The requirements for coordinations, public imput, and environmental documetation will continue to be followed by the BLM, and therefore, this proposed change in the regulations would place some reasonable responsibilities on appellants without taking away any substantive appeal rights that presently exist.

This proposed change in the regulations would place a burden on the appellant to show clearly why a stay of approved exploratory and operational activities is warranted. The proposed change in regulations would not remove any substantive appeal rights that currently exist. However, a stay of operations would only be allowed when appellant could justify the need for a stay to the IBLA.

Elsewhere in this issue of the **Federal Register** is published an interim final rule containing provisions identical to those in this proposed rule, but which is effective immediatley and will expire on December 31, 1992. The reasons for adopting that interim final rule are explained in the supplementary information accompanying the rule. The experience gained during the period that the interim final rule is in effect should also help the public and the BLM to evaluate whether the proposed amendments should be adoped as permanent changes to the oil and gas regulations.

The principal authors of this proposed rule are Frank Lanzetta, Divison of Fluid Mineral Lease and Reservoir Management, and Richard Hopkins, Division of Fluid Mineral Leasing, assisted by the staff of the Division of Legislation and Regulatory Management.

It is hereby determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required. The BLM has determined that this proposed rule would have no impact on any physical attributes of the public lands or any environmental resource values. By the time of the lodging of an appeal, under standard BLM procedures an environmental review and analysis will have been performed on the activity that is the subject of the appeal. Therefore, no additional environmental analysis is needed merely because the proposed rule would change the effect of the pendency of an appeal.

The Department of the Interior has determined under Executive Order 12291 that this document is not a major rule. A major rule is any regulation that is likely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, innovation, productivity, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Expenses currently being incurred by geophysical exploration operators or lessees/operators of Federal leases will not increase. There are no expected increases in costs or prices for consumers. Costs may actually decline because of a possible decrease in the number of appeals. There would be no need for increase in Federal, State, or local agency budgets or personnel requirements to implement this rule. The gross annual effect on the United States economy is not likely to approach $100 million. Further, for the same reasons, and because the effect of the rule is to restore to small entities the authority to act that had been granted by the BLM, the Department has determined under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that it will not have a significant economic impact on a substantial number of small entities.

The Department certifies that this proposed rule does not represent a governmental action capable of interference with constitutionally protected property rights. It would not infringe any private property rights. Therefore, as required by Executive Order 12630, the Department of the Interior has determined that the rule would not cause a taking of private property.

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subjects

43 CFR Part 3150

Oil and gas exploration; Public lands—mineral resources.

43 CFR Part 3160

Environmental protection, oil and gas resources, Government contracts, Public lands-mineral resources, Reporting and recordkeeping requirements.

For reasons stated in the preamble, and under the authorities stated below, parts 3150 and 3160 of Group 3100, subchapter C, chapter II, subtitle B, of title 43 of the Code of Federal Regulations are proposed to be amended as follows:

PART 3150—ONSHORE OIL AND GAS GEOPHYSICAL EXPLORATION [AMENDED]

1. The authority citation for part 3150 is revised to read as follows:

Authority: 30 U.S.C. 181 *et seq.*, 30 U.S.C. 351-359, 43 U.S.C. 1701 *et seq.*, 16 U.S.C. 3101 *et seq.*, 31 U.S.C. 483a, 42 U.S.C. 6504, 42 U.S.C. 6508.

2. Section 3150.2 is added to read as follows:

§ 3150.2 Appeals.

(a) A party adversely affected by a decision or approval of the authorized officer may appeal that decision to the Interior Board of Land Appeals as set forth in part 4 of this title.

(b) All decisions and approvals of the authorized officer under this part shall remain effective pending appeal unless the Interior Board of Land Appeals determines otherwise upon consideration of the standards stated in this paragraph. The provisions of 43 CFR 4.21(a) shall not apply to any decision or approval of the authorized officer under this subpart. A petition for a stay of a decision or approval of the authorized officer shall be filed with the Interior Board of Land Appeals, Office of Hearings and Appeals, Department of the Interior, and shall show sufficient justification based on the following standards: (1) The relative harm to the parties if the stay is granted or denied, (2) the likelihood of the appellant's success on the merits, (3) the likelihood of irreparable harm to the appellant or resources if the stay is not granted, and (4) whether the public interest favors granting the stay.

PART 3160—OIL AND GAS OPERATIONS [AMENDED]

3. The Authority Citation for 43 CFR part 3160 continues to read as follows:

Authority: 30 U.S.C. 181 *et seq.*; 30 U.S.C. 351–359; 30 U.S.C. 301–306; 25 U.S.C. 396; 25 U.S.C. 396a–396g; 25 U.S.C. 397; 25 U.S.C. 398; 25 U.S.C. 398a–398e; 25 U.S.C. 399; 43 U.S.C. 1457, see also Attorney General's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41); 30 U.S.C. 471 *et seq.*; 42 U.S.C. 4321 *et seq.*; 42 U.S.C. 6508; Pub. L. 97–78; 30 U.S.C. 1701 *et seq.*; and 25 U.S.C. 2102.

4. Section 3165.4 is amended by redesignating paragraphs (c), (d), and (e) as (d), (e), and (f), respectively, and by adding a new paragraph (c) to read as follows:

§ 3165.4 Appeals.

(a) * * *

* * * * * *

(c) *Effect of an appeal on an approval/decision by the authorized officer.* All decisions or approvals of the authorized officer under this part shall remain effective pending appeal unless the Interior Board of Land Appeals determines otherwise upon consideration of the standards stated in this paragraph. The provisions of 43 CFR 4.21(a) shall not apply to any decision or approval of the authorized officer under this subpart. A petition for a stay of a decision or approval of the authorized officer shall be filed with the Interior Board of Land Appeals, Office of Hearings and Appeals, Department of the Interior, and shall show sufficient justification based on the following standards: (1) The relative harm to the parties if the stay is granted or denied, (2) the likelihood of the appellant's success on the merits, (3) the likelihood of irreparable harm to the appellant or resources if the stay is not granted, and (4) whether the public interest favors granting the stay.

Dated: January 28, 1992.

Richard Roldan,

Acting Assistant Secretary of the Interior.

Department of Health and Human Services

Administration for Children and Families

Office of Community Services; Request for Applications Under the Office of Community Services' Fiscal Year 1992 Community Food and Nutrition Program; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Program Announcement No. OCS 92-2]

Office of Community Services; Request for Applications Under the Office of Community Services' Fiscal Year 1992 Community Food and Nutrition Program

AGENCY: Office of Community Services, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for applications under the Office of Community Services' Community Food and Nutrition Program.

SUMMARY: The Office of Community Services (OCS) announces that competing applications will be accepted for new grants pursuant to the Secretary's discretionary authority under section 681A of the Community Services Block Grant Act of 1981 as amended. This Program Announcement contains forms and instructions for submitting an application. Grants made under this program announcement are subject to the availability of funds for support of these activities.

CLOSING DATE: The closing date for submission of applications is June 11, 1992.

CONTACT: Office of Community Services, Division of Community Discretionary Programs, 370 L'Enfant Promenade, SW., Washington, DC 20447, (202) 401-9345.

Part A—Preamble

1. Legislative Authority

The Community Services Block Grant Act as amended authorizes the Secretary of Health and Human Services to make funds available under several programs to support program activities which will result in direct benefits targeted to low-income people. This Program Announcement covers the grant authority found at section 681A, Community Food and Nutrition, which authorizes the Secretary to make funds available for grants to be awarded on a competitive basis to eligible entities for local and statewide programs (1) to coordinate existing private and public food assistance resources, whenever such coordination is determined to be inadequate, to better serve low-income communities; (2) to assist low-income communities to identify potential sponsors of child nutrition programs and to initiate new programs in underserved or unserved areas; and (3) to develop innovative approaches at the State and local levels to meet the nutrition needs of low-income people.

The act also requires that 20 percent of appropriated funds in excess of $6 million be awarded on a competitive basis to eligible agencies for nationwide programs, including programs benefitting Native Americans and Migrant Farmworkers.

2. Definitions of Terms

For purposes of this Program Announcement the following definitions apply:

—Displaced worker: An individual who is in the labor market but has been unemployed for six months or longer.

—Indian tribe: A tribe, band, or other organized group of native American Indians recognized in the State or States in which it resides or considered by the Secretary of the Interior to be an Indian tribe or an Indian organization for any purpose.

—Innovative project: One that departs from or significantly modifies past program practices and tests a new approach.

—Migrant farmworker: An individual who works in agricultural employment of a seasonal or other temporary nature who is required to be absent from his/her place of permanent residence in order to secure such employment.

—Seasonal farmworker: Any individual employed in agricultural work of a seasonal or other temporary nature who is able to remain at his/her place of permanent residence while employed.

—Underserved area (as it pertains to child nutrition programs): A locality in which less than one-half of the low-income children eligible for assistance participate in any child nutrition program.

—Budget Period: The term "budget period" refers to the interval of time into which a grant period of assistance (project period) is divided for budgetary and funding purposes.

—Eligible Entity: States and other public and private non-profit agencies/organizations including agencies which administer nationwide programs, and which have complied with all the terms of previous OCS and Federal government grants.

—Project Period: The term "project period" refers to the total time a project is approved for support, including any approved extensions.

—Self-Sufficiency: A condition where an individual or family does not need and is not eligible for public assistance.

Part B—Application Prerequisites

1. Eligible Applicants

Eligible applicants are States, public and private non-profit agencies/organizations with a demonstrated ability to successfully develop and implement programs and activities similar to those enumerated above. OCS encourages Historically Black Colleges and Universities to submit applications. In addition, applications for the set-aside must be either: (1) Indian tribes, (2) private non-profit groups whose governing board is comprised of a majority of Indians and whose primary purpose is serving Indian populations, or (3) groups whose sole purpose is serving migrant and seasonal farmworker populations.

Proof of non-profit status must be included in the Appendices of the Project Narrative where applicable.

2. Availability of Funds and Grant Amounts

a. FY 92 Funding

The funds available for grant awards under the CFN Program in FY 92 are;
General Projects—$2,400,000
Set-Asides—$400,000
Nationwide Programs—$200,000

b. *Grants Amounts*

No individual grant request will be considered for an amount which is in excess of $50,000, (except for Nationwide Programs).

c. *Mobilization of Resources*

OCS would like to mobilize as many resources as possible to enhance projects funded under this program. Proposals submitted by applicants whose programs will leverage other resources, either cash or third party in-kind, will be looked upon favorably and will be eligible to receive additional points in the competitive review process.

3. Project Periods and Budget Periods

For most projects OCS will grant funds for one year. However, in rare instances, depending on the characteristics of any individual project and on the justification presented by the applicant in its proposal, a grant may be made for a period of up to 17 months.

4. Administrative Costs/Indirect Costs

There is no administrative cost limitation for projects funded under this program.

OCS accepts approved indirect cost rates as allowable costs. Applicants should enclose a copy of the current approved rate agreement if it was negotiated with a Federal agency other than the Department of Health and Human Services. However, it should be understood that indirect costs are part of, and not in addition to, the amount of funds awarded in the subject grant.

5. Program Beneficiaries

Projects proposed for funding under this announcement must result in direct benefits targeted toward low-income people as defined in the most recent Annual Update of Poverty Income Guidelines published by DHHS.

Attachment A to this announcement is an excerpt from the most recently published guidelines. Annual revisions of these guidelines are normally published in the Federal Register in February or early March of each year and are applicable to projects being implemented at the time of publication. Grantees will be required to apply the most recent guidelines throughout the project period. The Federal Register may be obtained from public libraries, Congressional offices, or by writing the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

No other government agency or privately defined poverty guidelines are applicable to the determination of low income eligibility for this OCS program.

6. Number of Projects in Application

An application may contain only one project and this project must address the basic criteria found in Part C. Applications which are not in compliance with these requirements will be ineligible for funding.

7. Multiple Submittals

There is no limit to the number of applications that can be submitted as long as each application contains a proposal for a different project. However, no agency proposing to administer statewide or local projects may receive funds under this program in excess of $50,000.

8. Sub-Contracting or Delegating Projects

OCS will not fund any project where the role of the eligible applicant is primarily to serve as a conduit for funds to other organizations.

9. Previous Performance

An applicant must have fulfilled completely the terms and conditions of previous grants from OCS and Federal agencies, except grants which are within their initial project period. Applications which are not in compliance with these requirements will be ineligible for funding.

Part C—Purpose

The Department of Health and Human Services is committed to improving the health and well-being of individuals through improved preventive health care and promotion of personal responsibility. The Department seeks to unify the approach to health promotion and disease prevention activities with personal messages aimed at families and communities, in various settings and environments in which individuals and groups can most effectively be reached.

The Department is specifically interested in improving the health status of minority and low-income persons. HHS encourages community efforts to improve the coordination and integration of health services for all low-income families, and to identify opportunities for integrating other programs and services for this population.

1. Project Requirements

Projects funded under this program should:

a. Be designed and intended to provide nutrition benefits, including those which incorporate the benefits of disease prevention, to a targeted low-income group of people;

b. Provide outreach or public education to inform low-income individuals and displaced workers of the services available to them under the various Federally-assisted nutrition programs;

c. Focus on one or more legislatively mandated program activities:

(1) Coordination of existing private and public food assistance resources, whenever such coordination is determined to be inadequate, to better serve low-income populations; (2) assistance to low-income communities in identifying potential sponsors of child nutrition programs and initiating new programs in underserved or unserved areas; and (3) development of innovative approaches at the national, state or local levels to meet the nutrition needs of low-income people.

2. Project Elements

Projects must: Focus on one or more of the legislatively mandated program activities in the above—Part C.

3. General Projects

The application should include a description of the target area and population to be served as well as a discussion of the nature and extent of the problem to be solved. The application must contain a detailed and specific work program that is both sound and feasible. Projects funded under this announcement must produce permanent and measurable results that fulfill the purposes of this program as described in the above Part C. The OCS grant funds, in combination with private and/or other public resources, must be targeted to low-income individuals and communities.

Applicants will certify in their submission that projects will only serve the low-income population as stipulated in the DHHS Poverty Income Guidelines (Attachment A). If an applicant is proposing a project which will affect a property listed in or eligible for inclusion in the National Register of Historic Places, it must identify this property in the narrative and explain how it has

complied with the provisions of Section 106 of the National Historic Preservation Act of 1966 as amended. If there is any question as to whether the property is listed in or eligible for inclusion in the National Register of Historic Places, applicant should consult with the State Historic Preservation Officer. The applicant should contact OCS early in the development of its application for instructions regarding compliance with the Act and data required to be submitted to the Department of Health and Human Services. Failure to comply with the cited Act may result in the application being ineligible for consideration for funding.

In the case of projects proposed for funding which mobilize or improve the coordination of existing public and private food assistance resources, the guidelines governing those resources apply. However, in the case of projects providing direct assistance to beneficiaries through grants funded under this program, beneficiaries must fall within the official DHHS Poverty Income Guidelines as set forth in Attachment A.

Submissions which propose the use of grant funds for the development of any printed or visual materials must contain convincing evidence that these materials are not available from other sources. OCS will not provide funding for such items if justification is not sufficient. Any films or visual presentations approved for development under the grant must be submitted to the Office of Community Services for clearance by the Department of Health and Human Services prior to dissemination. In cases where material outlays for equipment (audio and visual) are requested, specific evidence must be presented that there is a definite programmatic connection between the equipment (audio and visual) usage and the outreach requirements described in part C (1)(b) of the announcement.

OCS also is interested in projects that address the needs of homeless families, welfare families in public housing, low-income and minority health initiatives.

OCS welcomes project proposals which seek to develop innovative approaches to promote health particularly among low-income and minority populations. These proposals should have as their goals the reduction of incidences of premature death and chronic disease among these populations.

4. Set-Asides

In recognition of the special needs of Indians and Migrant and Seasonal Farmworkers, a set-aside will be established to afford priority consideration to proposals submitted by agencies serving these populations.

Applications which are not funded within this limited set-aside will also be considered competitively within the larger pool of eligible applicants.

See part D, section 2, (Criterion II) for special instructions on developing a work program.

5. Nationwide Programs

Projects funded must be nationwide in scope and must meet the requirements of part C.3 (General Projects).

Part D—Review Criteria

Applications which pass the initial screening and prerating review (See part F, section 5) will be assessed and scored by reviewers. Each reviewer will give a numerical score for each application reviewed. These numerical scores will be supported by explanatory statements on a formal rating form describing major strengths and weaknesses under each applicable criterion published in the Announcement.

The in-depth evaluation and review process will use the following criteria coupled with the specific requirements as described in part F.

Applicants should write their project narrative to the review criteria using the same sequential order.

(Note: The following review criteria reiterate collection of information requirements contained in part D of this announcement. These requirements are approved under OMB Control Number 0970–0062.)

Criteria for Review and Evaluation of Applications Submitted Under This Program Announcement

1. Criterion I: Analysis of Needs/ Priorities (Maximum: 13 points)

(a) Target area and population to be served are adequately described (0–5 points).

In addressing the above criterion, the application should include the following: The applicant should include a description of the target area and population to be served including specific details on the minority population(s).

(b) Nature and extent of problem are adequately described and documented (0–8 points).

In addressing the above criterion, the applicant should include the following: Applicant should discuss the nature and extent of the problem including specific information on minority population(s).

2. Criterion II: Adequacy of Work Program (Maximum: 15 points).

(a) Set forth realistic quarterly time targets by which the various work tasks will be completed (0–7 points).

(b) Activities are adequately described and appropriately related to goals (0–8 points).

In addressing the above criterion, the applicant should include the following: The application should address the basic criteria and legislatively-mandated activities found in Part C (1.c) and should include:

(a) Project priorities and rationale for selecting them;

(b) Goals and objectives; and

(c) Project activities.

3. Criterion III: Significant and Beneficial Impact (Maximum 38 points).

(a) Applicant proposes to significantly improve or increase nutrition services to low-income people and such improvements or increases are quantified. (0–12 points).

(b) Project incorporates minority low-income health prevention activities along with nutritional services (0–8 points).

(c) Project will significantly leverage or mobilize other community resources and such resources are detailed and quantified (0–6 points).

(d) Project builds on an existing outreach activity (0–5 points).

(e) Proposal addresses a problem which can be resolved by one-time OCS funding or demonstrates that non-Federal funding is available to continue the project without Federal support (0–7 points).

Quantitative data must be provided with regard to items (a), (b), (c), and (d).

4. Criterion IV: Coordination/Services Integration (Maximum 15 points).

Proposal addresses applicant's understanding of the importance of improving the integration, coordination, and continuity of various HHS-funded services potentially available to families with children living in poverty, and the difficulty of undertaking collaborative efforts between organizations.

In addressing the above criterion, the applicant should include the following: Strategies should be identified which support coordinated community-based planning, maximize the efficient and effective use of scarce resources, reduce duplicative overhead, improve accountability, and result in measurable outcomes.

If the applicant is receiving funds from the State for community food and nutrition activities, the applicant should address how the funds are being utilized. If State funds are being used in the project for which OCS funds are being requested, their usage should be specifically described.

5. Criterion V: Organization Experience in Program Area and Staff Responsibilities (Maximum 12 points).

(a) Organization experience in program area (0–4 points).

Documentation provided indicates that projects previously undertaken have been relevant and effective and have provided permanent benefits to the low-income population. Organizations which propose providing training and technical assistance have detailed competence in the specific program priority area and as a deliverer with expertise in the fields of training and technical assistance. If applicable, information provided by these applicants also addresses related achievements and competence of each cooperating or sponsoring organization.

(b) Management History (0–4 points).

Applicants must fully detail their ability to implement sound and effective management practices and if they have been recipients of other Federal or other governmental grants, they must also detail that they have consistently complied with financial and program progress reporting and audit requirements. Applicants should submit any available documentation on their management practices and progress reporting procedures along with a statement by a Certified or Licensed Public Accountant as to the sufficiency of the applicant's financial management system to protect adequately any Federal funds awarded under the application submitted.

(c) Staffing skills, Resources and Responsibilities (0–4 points).

The application describes in brief resume form the experience and skills of the proposed project director showing that the individual is not only well qualified, but that his/her professional capabilities are relevant to the successful implementation of the project. If the key staff person has not yet been identified, the application contains a comprehensive position description which indicates that the responsibilities to be assigned to the project director are relevant to the successful implementation of the project.

The application must indicate that the applicant has adequate facilities and resources (i.e. space and equipment) to successfully carry out the work plan.

In addressing the above criterion, the applicant should include the following: The applicant must fully describe the experience and skills of the proposed project director showing that the individual is not only well qualified but that his/her professional capabilities are relevant to the successful implementation of the project. It must clearly show that sufficient time of the Project Director and other senior staff will be budgeted to assure timely implementation and oversight of the project and that the assigned responsibilities of the staff are appropriate to the tasks identified for the project.

6. Criterion VI: Adequacy of Budget (Maximum: 7 points).

(a) Budget is adequate and administrative costs are appropriate in relation to the services proposed (0–7 points).

In addressing the above criterion, the applicant should include the following: The applicant should describe how the project will continue after the completion of the grant, including what funds will be available for its continuation.

Part E—Additional Instructions for Completing Application Package

(Approved by the OMB under Control Number 0970–0062)

The standard forms attached to this announcement shall be used when submitting applications for all funds under this announcement.

It is recommended that the applicant reproduce the SF–424 (Attachment B), SF–424A (Attachment C), and SF–424B (Attachment D), and that the application be typed on the copies. If an item on the SF–424 cannot be answered or does not appear to be related or relevant to the assistance requested, the applicant should write "NA" for "Not Applicable."

The application should be prepared in accordance with the standard instructions in Attachments B and C corresponding to the forms, as well as the OCS specific instructions set forth below:

1. SF–424 "Application for Federal Assistance"

Item

1. For the purposes of this announcement, all projects are considered "Applications"; there are no "Pre-Applications."

5/6. The legal name of the applicant must match that listed as corresponding to the Employer Identification Number. Where the applicant is a previous Department of Health and Human Services grantee, enter the Central Registry System Employee Identification Number (CRS/EIN) and the Payment Identifying Number, if one has been assigned, in the Block entitled "Federal Identifier" located at the top right hand corner of the form.

7. If the applicant is a non-profit corporation, enter "N" in the box and specify "non-profit corporation" in the space marked "Other." Proof of non-profit status such as IRS determination, Articles of Incorporation, or by-laws, must be included as an appendix to the project narrative.

8. For the purposes of this announcement, all applications are "New".

9. Enter "DHHS–ACF/OCS".

10. The Catalog of Federal Domestic Assistance number for the OCS program covered under this announcement is [ ].

The title is "Community Services Block Grant Discretionary Awards—Community Food and Nutrition Program." 15a. For purposes of this Announcement, this amount should reflect the amount requested for the entire project period. 15b–e. These items should reflect both cash and third party in-kind contributions for the total project period.

2. SF–424A—"Budget Information-Non-Construction Programs"

See Instructions accompanying this page as well as the instructions set forth below:

In completing these sections, the "Federal Funds" budget entries will relate to the requestd OCS Community Food and Nutrition Program funds only, and "Non-Federal" will include mobilized funds from all other sources—applicants, state, and other. Federal funds other than those requested from the Community Food and Nutrition Program should be included in "Non-Federal" entries.

Sections A and D of SF–424A must contain entries for both Federal (OSC) and non-Federal (mobilized funds).

Section A—Budget Summary

Line 1–4
Col. (a):
Line 1 Enter "OCS Community Food and Nutrition Program";
Col. (b):
Line 1 Enter "93.033".
Col. (c) and (d): Not applicable
Col. (e)–(g)

For each line 1–4, enter in columns (e), (f) and (g) the appropriate amounts needed to support the project for the entire project period.

Line 5 Enter the figures from Line 1 for all columns completed, (e), (f), and (g).

Section B—Budget Categories

This section should contain entries for OCS funds only. For all projects, the first budget period of 12 months will be entered in Column #1. If the budget/project period exceeds twelve (12) months, applicant should submit additional copies of SF–424A to

document the appropriate number of budget/project quarters for the specific budget project period.

Allowability of costs are governed by applicable cost principles set forth in 45 CFR parts 74 and 92.

A separate itemized budget justification should be included to explain fully and justify major items, as indicated below. The budget justification should immediately follow the Table of Contents.

Column 5: Enter total requirements for Federal funds by the Object Class Categories of this section.

Personnel—Line 6a: Enter the total costs of salaries and wages.

Justification. Identify the project director. Specify by title or name the percentage of time allocated to the project, the individual annual salaries and the cost to the project (both Federal and non-Federal) of the organization's staff who will be working on the project.

Fringe Benefits—Line 6b: Enter the total costs of fringe benefits unless treated as part of an approved indirect cost rate which is entered on line 6j.

Justification. Enter the total costs of fringe benefits, unless treated as part of an approved indirect cost rate.

Travel—Line 6c. Enter total cost of all travel by employees of the project. Do not enter costs for consultant's travel.

Justification. Include the name(s) of traveler(s), total number of trips, destinations, length of stay, transportation costs and subsistence allowances.

Equipment—Line 6d: Enter the total costs of all non-expendable personal property to be acquired by the project. "Non-expendable personal property", for purposes of non-governmental entities, means tangible personal property having a useful life of more than two years and an acquisition cost per unit of $500. "Non-expendable personal property", for purposes of governmental entities, means tangible personal property having a useful life of more than one year and an acquisition value of $5,000 or more.

Justification. Equipment to be purchased with Federal funds must be required to conduct the project, and the applicant organization or its subgrantees must not already have the equipment or a reasonable facsimile available to the project. The justification also must contain plans for future use or disposal of the equipment after the project ends.

Supplies—Line 6e. Enter the total costs of all tangible personal property (surplus) other than that included on line 6d.

Other—Line 6h. Enter the total of all other costs. Such costs, where applicable, may include, but are not limited to, insurance, food, medical and dental costs (noncontractual), fees and travel paid directly to individual consultants, local transportation (all travel which does not require per diem is considered local travel), space and equipment rentals, printing and publication, computer use training costs including tuition and stipends, training service costs including wage payments to individuals and supportive service payments, and staff development costs.

Indirect Charges—Line 6j: Enter the total amount of indirect costs. This line should be used only when the applicant currently has an indirect cost rate approved by the Department of Health and Human Services or other Federal agencies. With the exception of local governments, applicants should enclose a copy of the current approved rate agreement if it was negotiated with a Federal agency other than the Department of Health and Human Services.

If the applicant organization is in the process of initially developing or renegotiating a rate, it should immediately upon notification that an award will be made, develop a tentative indirect cost rate proposal based on its most recently completed fiscal year in accordance with the principles set forth in the pertinent DHHS Guide for Establishing Indirect Cost Rates, and submit it to the appropriate DHHS Regional Office.

It should be noted that when an indirect cost rate is requested, those costs included in the indirect cost pool should not be also charged as direct costs to the grant.

The total amount shown in Section B, Column (5), Line 6k, should be the same as the amount shown in Section A, Line 5, Column (e).

Program Income—Line 7: Enter the estimated amount of income, if any, expected to be generated from this project. Separately show expected program income generated from OCS support and income generated from other mobilized funds. Do not add or subtract this amount from the budget total. Show the nature and source of income in the program narrative statement.

Column 5: Carry totals from Column 1 to Column 5 for all line items.

Justification. Describe the nature, source and anticipated use of program income in the Program Narrative Statement.

Section C—Non-Federal Resources

This section is to record the amounts of "Non-Federal" resources that will be used to support the project. "Non-Federal" resources mean other than OCS funds for which the applicant is applying. Provide a brief explanation, on a separate sheet, showing the type of contribution, broken out by Object Class Category, (See section B.6) and whether it is cash or third-party in-kind. The firm commitment of these required funds must be documented and submitted with the application in order to be given credit in the criterion.

Except in unusual situations, this documentation must be in the form of letters of commitment or letters of intent from the organization(s)/individuals from which funds will be received.

Line 8:
Col. (a) Enter the project title.
Col. (b) Enter the amount of cash or donations to be made by the applicant.
Col. (c) Enter the State contribution.
Col. (d) Enter the amount of cash and in-kind contributions to be made from all other sources.
Col. (e) Enter the total of columns (b), (c), and (d).
Lines 9, 10, and 11 should be left blank.
Line 12: Carry the total of each column of Line 8, (b) through (e).

The amount in Column (e) should be equal to the amount on Section A, Line 5, Column (f).

Justification—Describe third party in-kind contributions, if included.

Section D—Forecasted Cash Needs

Line 13—Enter the amount of Federal (OCS) cash needed for this grant, by quarter, during the first 12 month budget period.
Line 14—Enter the amount of cash from all other sources needed by quarter during the first year.
Line 15—Enter the total of Lines 13 and 14.

Section F—Other Budget Information

Line 21—Include narrative justification required under Section B for each object class category for the total project period.
Line 22—Enter the type of HHS or other Federal agency approved indirect cost rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied and the total indirect expense. Also, enter the date the rate was approved, where applicable. Attach a copy of the approved rate agreement if it was negotiated with a Federal agency other than the Department of Health and Human Services.
Line 23—Provide any other explanations and continuation sheets required or deemed necessary to justify or explain the budget information.

3. SF–424B "Assurances-Non-Construction"

All applicants must sign and return the "Assurances" with the application.

4. Project Narrative

Each narrative should include the following major Sections:

a. Analysis of Need.
b. Project Design (Work Programs).
c. Organizational Experience in Program Areas.
d. Management History.
e. Staffing and Resources.
f. Staff Responsibilities.

The project narrative must address the specific purposes mentioned in part C of this Program Announcement. The narrative should provide information on how the application meets the evaluation criteria in part D of this Program Announcement.

Part F—Application Procedures

1. Availability of Forms

Applications for awards under this OCS program must be submitted on Standard Forms (SF) 424, 424A, and 424B. Part F and attachments B, C, and D to this Program Announcement contain all the instructions and forms required for submittal of applications. The forms may be reproduced for use in submitting of applications. Copies of the **Federal Register** containing this announcement are available at most local libraries and Congressional District Offices for reproduction. If copies are not available at these sources they may be obtained by writing or telephoning the office listed in the section entitled "For Further Information" at the beginning of this announcement.

2. Application Submission

The date by which applications must be received is indicated under "Closing Date" at the beginning of this announcement. An application will be considered to be received on time under either one of the following two circumstances:

a. Applications may be mailed to: Administration For Children and Families, Division of Grants Management, 6th floor OFM/DGM, 370 L'Enfant Promenade, SW., Washington, DC 20447.

b. Hand delivered applications are accepted during normal working hours of 8 a.m. to 4:30 p.m., Monday through Friday, on or prior to the established closing date at: Administration For Children and Families, Division of Grants Management, 901 D Streets, SW., Sixth Floor OFM/DGM, Washington, DC 20447.

An application will be considered to be received on time if sent on or before the closing date as evidenced by a legible U.S. Postal Service postmark or a legibly dated receipt from a commercial carrier. Private metered postmarks will not be considered acceptable as proof of timely mailing. Applications submitted by any means other than through the U.S. Postal Service or commercial carrier shall be considered as acceptable only if physically received at the above address before close of business on or before the deadline date.

Note: Applicants should note that the U.S. Postal Service does not uniformly provide a dated post mark. Before relying on this method, applicants should check with their local post office. In some instances packages presented for mailing after a pre-determined time are postmarked with the next day's date. In other cases, postmarks are not routinely placed on packages. Applicants are cautioned to verify that there is a date on the package, and that it list the correct date of mailing, before accepting a receipt.

Applications which have a postmark later than the closing date, or which are hand-delivered after the closing date, will be returned to the sender without consideration in the competition.

One signed original application and four copies is required. The first page of the SF–424 must contain in the lower right-hand corner, one of the following designations:

FN—for general grants.
SA—for projects where migrant and seasonal farmworker organizations and Indian tribes or Indian organizations are applying specifically for set-aside funds described in Part B.
NP—for grants to organizations with nationwide programs.

3. Intergovernmental Review

This program is covered under Executive Order 12372, "Intergovernmental Review of Federal Program," and 45 CFR Part 100, "Intergovernmental Review of Department of Health and Human Services Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs.

All States and Territories except Alaska, Idaho, Kansas, Louisiana, Minnesota, Nebraska, Pennsylvania, Virginia, American Samoa and Palau have elected to participate in the Executive Order process and have established Single Points of Contact (SPOCs). Applicants from these ten jurisdictions need take no action regarding E.O. 12372. Applicants for projects to be administered by Federally-recognized Indian Tribes are also exempt from the requirements of E.O. 12372. Applicants must submit any required material to the SPOCs as soon as possible to alert them of the prospective applications and receive any necessary instructions, so that the program office can obtain and review SPOC comments as part of the award process. It is imperative that the applicant submit all required materials, if any, to the SPOC and indicate the date of this submittal (or the date of contact if no submittal is required) on the Standard Form 424, item 16a.

Under 45 CFR 100.8(a)(2), a SPOC has 60 days from the application deadline date to comment on proposed new or competing continuation awards. Therefore, the comment period for State processes will end 150 days after the date of publication of this Announcement to allow time for ACF to review, consider and attempt to accommodate SPOC input. SPOCs are encouraged to eliminate the submission of routine endorsements as official recommendations. Additionally, SPOCs are requested to clearly differentiate between mere advisory comments and those official State process recommendations which they intend to trigger the "accommodate or explain" rule.

When comments are submitted directly to ACF, they should be addressed to: Department of Health and Human Services, Administration for Children and Families, Division of Grants Management, 6th Floor, 370 L'Enfant Promenade SW., Washington, DC, 20447.

A list of the Single Points of Contact for each State and Territory is included as Attachment G of this announcement.

4. Application Consideration

Applications which meet the screening requirements in section 5 below will be reviewed competitively. Such applications will be referred to reviewers for a numerical score and explanatory comments based solely on responsiveness to program guidelines and evaluation criteria published in this announcement. Applications will be reviewed by persons outside of the OCS unit which would be directly responsible for programmatic management of the grant. The results of these reviews will assist the Director and OCS program staff in considering competing applications. Reviewers' scores will weigh heavily in funding decisions but will not be the only factors considered.

Applications will generally be considered in order of the average scores assigned by reviewers. However, highly ranked applications are not guaranteed funding since the Director may also consider other factors deemed relevant including, but not limited to, the timely and proper completion of projects funded with OCS funds granted in the last five (5) years: Comments of reviewers and government officials; staff evaluation and input; geographic distribution; previous program performance of applicants; compliance with grant terms under previous DHHS grants; audit reports; investigative reports; and applicant's progress in resolving any final audit disallowances on OCS or other Federal agency grants. OCS reserves the right to discuss applications with other Federal or non-Federal funding sources to ascertain the applicant's performance record. Incomplete prior performance is grounds for rejecting the application.

5. Criteria for Screening Applications

a. Initial Screening

All applications that meet the published deadline for submission will be screened to determine completeness and conformity to the requirements of this announcement. Only those applications meeting the following requirements will be reviewed and evaluated competitively. Others will be returned to the applicants with a notion that they were unacceptable.

(1) The application must contain a completed Standard Form (SF) 424.

(2) The SF–424 must be signed by an official of the organization applying for the grant who has authority to obligate the organization legally.

b. Pre-rating Review

Applications which pass the initial screening will be forwarded to reviewers for analytical comment and scoring based on the criteria detailed in the section below and the specific requirements contained in part C of this Announcement. Prior to the programmatic review, these reviewers and/or OCS staff will verify that the applications comply with this program announcement in the following areas:

(1) Eligibility: Applicant meets the eligibility requirements found in Part B.

(2) Number of Projects: The application contains only one project.

(3) Target Populations: The application clearly targets the specific outcomes and benefits of the project to low-income participants and beneficiaries as defined in the DHHS Poverty Income Guidelines (Attachment A).

(4) Grant Amount: The amount of funds requested does not exceed $50,000, (except for nationwide programs).

(5) Program Focus: The application addresses the purposes described in part C of this announcement.

c. Evaluation Criteria

Applications which pass the initial screening and prerating review will be assessed and scored by reviewers. Each reviewer will give a numerical score for each application reviewed. These numerical scores will be supported by explanatory statements on a formal rating form describing major strengths and major weaknesses under each applicable criterion published in this announcement.

Part G—Contents of Application Package and Application

(Approved by the Office of Management and Budget under Control Number 0970–0062.)

Application Package

Each application submission must include:

A signed original and four additional copies of the application

Each copy of the application must contain in the order listed each of the following:

a. Table of Contents with page numbers noted for each major section and subsection of the proposal and each section of the appendices. Each page in the application, including those in all appendices, must be numbered consecutively.

b. Standard Form 424. Application for Federal Assistance. (See Attachment B) The SF–424 should be completed in accordance with instructions provided with the form, as well as OCS specific instruction set forth in part E of this Announcement.

Applicants must also be aware that the applicant's legal name as required in SF–424 (Item 5) must match that listed as corresponding to the Employer Identification Number (Item 6).

c. Standard Form 424A, Budget Information. (See Attachment C) Pages 1 and 2 should be completed.

d. Standard Form 424B, Assurances—Non-Construction Programs. (See Attachment D) This form must be signed and submitted with the Application.

e. Restriction on Lobbying Activities—Certification for Contracts, Grants, Loans, and Cooperative Agreements: (Required only if lobbying has actually taken place or is expected to take place in trying to obtain the grant for which the applicant is applying.) Fill out, sign and date form found at Attachment H.

f. Disclosure of Lobbying Activities—SF–LLL: Fill out, sign and date form found at Attachment H.

g. Project Narrative—(See part E, section 4.)

Please note the following:

—Applications may not exceed 30 pages in their entirety.

—The SF–424 must contain an original signature of the certifying representative of the applicant organization.

—Applications must be uniform in composition since OCS may find it necessary to duplicate them for review purposes. Therefore applications must be submitted on 8½ x 11 inch paper only. They must not include colored, oversized or folded materials, organizational brochures, or other promotional materials, slides, films, clips, etc., in the proposal. Such materials will be discarded if included.

—Applications should be submitted in ringbinders that will allow for easy separation and reassembly.

—While applications must be comprehensive, OCS encourages conciseness and brevity in the presentation of materials and cautions the applicant to avoid unnecessary duplication of information.

—All applicants will receive an acknowledgement postcard with an identification number which will be noted on the acknowledgement. This number must be referred to in all subsequent communications with OCS concening the application. If an acknowledgment is not received within three weeks after the deadline date, applicants must notify ACF by telephone (202) 401–9230.

—Applicant should also submit a mailing label for the acknowledgement card.

Part H—Award Recipient Reporting Requirements

Following approval of the applications selected for funding, notice of project approval and authority to draw down project funds will be made in writing. The official award document is the Notice of Grant Award which provides the amount of Federal funds approved for use in the project, the budget period for which support is provided, and the terms and conditions of the award.

In addition to the General Conditions and Special Conditions (where the latter are warranted) which will be applicable to grants, grantees will be subject to the provisions of 45 CFR parts 74 (non-governmental) and 92 (governmental).

Grantees will be required to submit quarterly progress and financial reports (SF–269) as well as a final progress and financial report.

Grantees are subject to the audit requirements in 45 CFR parts 74 and 92. Note, with incomplete performance, the Grantee may be subject to financial penalties and refunding to the grant amount.

Section 319 of Public Law 101–121, signed into law on October 23, 1989, imposes new prohibitions and requirements for disclosure and certification related to lobbying when applicant has engaged in lobbying activities or is expected to lobby in trying to obtain the grant. It provides limited exemptions for Indian tribes and tribal organizations. Current and prospective recipients (and their subtier contractors and/or grantees) are prohibited from using appropriated funds for lobbying Congress or any Federal agency in connection with the award of a contract, grant, cooperative agreement or loan. In addition, for each award action in excess of $100,000 (or $150,000 for loans) the law requires recipients and their subtier contractors and/or subgrantees (1) to certify that they have neither used nor will use any appropriated funds for payment to lobbyists, (2) to submit a declaration setting forth whether payments to lobbyists have been or will be made out of non-appropriated funds and, if so, the name, address, payment details, and purpose of any agreements with such lobbyists whom recipients or their subtier contractors or subgrantees will pay with the nonappropriated funds and (3) to file quarterly up-dates about the use of lobbyists if any event occurs that materially affects the accuracy of the information submitted by way of declaration and certification. The law establishes civil penalties for noncompliance and is effective with respect to contracts, grants, cooperative agreements and loans entered into or made on or after December 23, 1989. See Attachment H for certification and disclosure forms to be submitted with the applications for this program.

Attachment I indicates the regulations which apply to all applicants/grantees under the Discretionary Grants Program.

Dated: March 10, 1992.

Eunice S. Thomas,

Director, Office of Community Services.

Attachment A—1992 Poverty Income Guidelines for all States (Except Alaska and Hawaii) and the District of Columbia:

Size of family unit	Poverty guideline
1	$6,810
2	9,190
3	11,570
4	13,950
5	16,330
6	18,710
7	21,090
8	23,470

For family units with more than 8 members, add $2,380 for each additional member.

Poverty Income Guidelines for Alaska:

Size of family unit	Poverty guideline
1	$8,500
2	11,480
3	14,460
4	17,440
5	20,420
6	23,400
7	26,380
8	29,360

For family units with more than 8 members, add $2,980 for each additional member.

Poverty Income Guidelines for Hawaii:

Size of family unit	Poverty guideline
1	$7,830
2	10,570
3	13,310
4	16,050
5	18,790
6	21,530
7	24,270
8	27,010

For family units with more than 8 members, add $2,740 for each additional member.

Standard Form 424 (REV 4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

INSTRUCTIONS FOR THE SF 424

This is a standard form used by applicants as a required facesheet for preapplications and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item:	Entry:
1.	Self-explanatory.
2.	Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3.	State use only (if applicable).
4.	If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new project, leave blank.
5.	Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6.	Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7.	Enter the appropriate letter in the space provided.
8.	Check appropriate box and enter appropriate letter(s) in the space(s) provided: — "New" means a new assistance award. — "Continuation" means an extension for an additional funding/budget period for a project with a projected completion date. — "Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.
9.	Name of Federal agency from which assistance is being requested with this application.
10.	Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11.	Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
12.	List only the largest political entities affected (e.g., State, counties, cities).
13.	Self-explanatory.
14.	List the applicant's Congressional District and any District(s) affected by the program or project.
15.	Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16.	Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17.	This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18.	To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

INSTRUCTIONS FOR THE SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A,B,C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A,B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary
Lines 1-4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1-4, Columns (c) through (g.)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the appropriate amounts of funds needed to support the project for the first funding period (usually a year).

Lines 1-4, Columns (c) through (g.) (continued)

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Columns (e) and (f).

Line 5 — Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1-4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a-i — Show the totals of Lines 6a to 6h in each column.

Line 6j – Show the amount of indirect cost.

Line 6k – Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)-(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

Attachment D—SF 424B, Assurances—Non-Construction Programs

OMB Approval No. 0348-0040

ASSURANCES — NON-CONSTRUCTION PROGRAMS

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.
2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.
3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.
4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.
5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. §§ 4728-4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in Appendix A of OPM's Standards for a Merit System of Personnel Administration (5 C.F.R. 900, Subpart F).
6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88-352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681-1683, and 1685-1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101-6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92-255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91-616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd-3 and 290 ee-3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.), as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.
7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91-646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.
8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.
9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a-7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327-333), regarding labor standards for federally assisted construction subagreements.

Authorized for Local Reproduction

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93-234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91-190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. § 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93-523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93-205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a-1 et seq.).

14. Will comply with P.L. 93-348 regarding the protection of human subjects involved in research, development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89-544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

Attachment E—U.S. Department of Health and Human Services Certification Regarding Drug-Free Workplace Requirements Grantees Other Than Individuals

By signing and/or submitting this application or grant agreement, the grantee is providing the certification set out below.

This certification is required by regulations implementing the Drug-Free Workplace Act of 1988, 45 CFR part 76, subpart F. The regulations, published in the January 31, 1989 Federal Register, require certification by grantees that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the U.S. Department of Health and Human Services determines to award the grant. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of the grant, or governmentwide suspension or debarment.

A. The grantee certifies that it will provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing a drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Make it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will:

(1) Abide by the terms of the statement; and

(2) Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace not later than five days after such conviction;

(e) Notifying the agency within ten days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction;

(f) Taking one of the following actions, within 30 days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted:

(1) Taking appropriate personnel action against such an employee, up to and including termination; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, state or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), and (f).

B. The grantee shall insert in the space provided below the site(s) for the performance of work done in connection with the specific grant (Street address, city, county, state, zip code):

_____

_____

_____

Attachment F—Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions

By signing and submitting this proposal, the applicant, defined as the primary participant in accordance with 45 CFR part 76, certifies to the best of its knowledge and belief that its principals involved:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) Have not within a 3-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted or otherwise criminally or civilly charged by a government entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(b) Have not within a 3-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

The inability of a person to provide the certification required above will not necessarily result in denial of participation for this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the Department of Health and Human Services' (HHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction. The prospective primary participant agrees that by submitting this proposal, it will include the clause entitled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transactions", provided below, without modification in all lower tier covered transactions and in all solicitations for lower tier covered actions.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusions—Lower Tier Covered Transactions (To Be Supplied to Lower Tier Participants)

By signing and submitting this lower tier proposal, the prospective lower tier participant, as defined in 45 CFR part 76, certifies to the best of its knowledge and belief that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(b) Where the prospective lower tier participant is unable to certify to any of the above, such prospective participant shall attach an explanation to this proposal.

The prospective lower tier participant further agrees by submitting this proposal that it will include this clause entitled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusions—Lower Tier Covered Transactions" without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

Restrictions on Lobbying

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for subawards at all tiers (including subcontracts, subgrants and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall compete and submit Standard Form LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

16.	
Information requested through this form is authorized by title 31 U.S.C. section 1352. This disclosure of lobbying activities is a material representation of fact upon which reliance was placed by the tier above when this transaction was made or entered into. This disclosure is required pursuant to 31 U.S.C. 1352. This information will be reported to the Congress semi-annually and will be available for public inspection. Any person who fails to file the required disclosure shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.	**Signature:** _____ **Print Name:** _____ **Title:** _____ **Telephone No.:** _____ **Date:** _____

Federal Use Only:	Authorized for Local Reproduction Standard Form - LLL

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.
2. Identify the status of the covered Federal action.
3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.
4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.
5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.
6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.
7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.
8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."
9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.
10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).
11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.
12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.
13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.
14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.
15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.
16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

Presidential Documents

Title 3—

The President

Proclamation 6411 of March 12, 1992

To Amend the Generalized System of Preferences

By the President of the United States of America

A Proclamation

1. Pursuant to section 504(a)(1) of the Trade Act of 1974, as amended (the 1974 Act) (19 U.S.C. 2464(a)(1)), the President may withdraw, suspend, or limit the application of the duty-free treatment afforded under the Generalized System of Preferences (GSP) with respect to any article or any country after considering the factors set forth in sections 501 and 502(c) of the 1974 Act (19 U.S.C. 2461 and 2462(c)). Accordingly, after taking into account the factors set forth in sections 501 and 502(c) of the 1974 Act, I have determined that it is appropriate to withdraw the duty-free treatment afforded under the GSP to imports from Malaysia of vulcanized rubber thread and cord provided for in heading 4007.00.00 of the Harmonized Tariff Schedule of the United States (HTS).

2. Section 604 of the 1974 Act (19 U.S.C. 2483) authorizes the President to embody in the HTS the substance of the provisions of that Act, and of other acts affecting import treatment, and actions thereunder.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, acting under the authority vested in me by the Constitution and the laws of the United States of America, including but not limited to sections 501, 502(c), 504(a)(1), and 604 of the 1974 Act, do proclaim that:

(1) In order to provide that Malaysia should no longer be treated as a beneficiary developing country with respect to HTS heading 4007.00.00 for purposes of the GSP, the Rates of Duty 1–Special subcolumn for HTS heading 4007.00.00 is modified: (i) by deleting the symbol "A" in parentheses, and (ii) by inserting the symbol "A*" in lieu thereof.

(2) In order to provide that Malaysia should no longer be treated as a beneficiary developing country with respect to HTS heading 4007.00.00 for purposes of the GSP, general note 3(c)(ii)(D) to the HTS is modified by adding, in numerical sequence, "4007.00.00 Malaysia".

(3) Any provisions of previous proclamations and Executive orders inconsistent with the provisions of this proclamation are hereby superseded to the extent of such inconsistency.

(4) The modifications to the HTS made by paragraphs (1) and (2) of this proclamation shall be effective with respect to articles both: (i) imported on or after January 1, 1976, and (ii) entered, or withdrawn from warehouse for consumption, on or after 15 days after the date of publication of this proclamation in the **Federal Register**.

IN WITNESS WHEREOF, I have hereunto set my hand this twelfth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 57, No. 51
Monday, March 16, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 34

[TB-92-08]

Tobacco Seed and Plant Exportation Act

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Department of Agriculture is removing the regulations at 7 CFR part 34 containing the procedures for implementing the Tobacco Seed and Plant Exportation Act and reserving the Part for future use. These regulations are no longer needed as the legislation on which they are based has been repealed.

EFFECTIVE DATE: March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Larry L. Crabtree, Chief, Market Information and Program Analysis Branch, Tobacco Division, AMS, USDA, P.O. Box 96456, room 506 Annex, Washington, DC 20090-6456, telephone (202) 205-0489.

SUPPLEMENTARY INFORMATION: On December 13, 1991, the President signed the Food, Agriculture, Conservation, and Trade Act Amendments of 1991, Public Law 102-237. Section 1019 of this Act repealed the Tobacco Seed and Plant Exportation Act, Public Law 76-543, 7 U.S.C. 516. Therefore, this final rule removes the regulations which were issued pursuant to the repealed legislative provisions.

This action has been reviewed in accordance with Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be "non major" since it does not meet the criteria for major regulatory action as stated in the Order.

The Administrator, Agricultural Marketing Service (AMS), has certified that this action will not have a significant impact on a substantial number of small entities since it relieves a restriction by deleting a requirement for a permit prior to exportation of tobacco seed and plants.

Moreover, pursuant to 5 U.S.C. 553, it is found and determined that it is impractical, unnecessary, and contrary to the public interest to give preliminary notice concerning this action or engage in further public procedure with respect to this amendment, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. This is because it merely removes regulations which were issued pursuant to legislative provisions which were repealed on December 13, 1991.

List of Subjects in 7 CFR Part 34

Exports, Plants, Seeds, and Tobacco.

For the reasons set forth in the preamble, the regulations at 7 CFR part 34 are removed and the part is reserved for future use.

PART 34—[REMOVED AND RESERVED]

Authority: Sec. 109, 105 Stat. 1818, December 13, 1991.

Dated: March 9, 1992.

Kenneth C. Clayton,
Acting Administrator.

[FR Doc. 92-6003 Filed 3-13-92; 8:45 am]
BILLING CODE 3410-02-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 323

RIN 3064-AB05

Appraisals

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Final rule.

SUMMARY: In accordance with the proposed rule published September 17, 1991 (56 FR 47035), the FDIC is amending Part 323 to identify additional transactions for which the services of an appraiser are not required. This final rule: Eliminates the requirement for FDIC-regulated institutions to obtain appraisals by certified or licensed appraisers for real estate-related financial transactions having a value, as defined in the rule, of $100,000 or less; permits FDIC-regulated institutions to use appraisals prepared for loans insured or guaranteed by an agency of the federal government if the appraisal conforms to regulations or other written requirements of the federal insurer or guarantor; excepts appraisals involving 1-to-4 family residential properties from certain minimum appraisal standards under specified conditions; and adds a definition of "real estate" and "real property" to clarify that the appraisal regulation does not apply to transactions involving mineral rights, timber rights, growing crops, water rights, or similar interests in real estate when the transaction does not involve the associated parcel or tract of land.

The final rule also incorporates three technical amendments. The first technical amendment clarifies that the requirements of the appraisal regulation must be met for all real estate-related financial transactions except those in which the services of an appraiser are not required under the rule. The second technical amendment confirms that in accordance with the Federal Deposit Insurance Corporation Improvement Act of 1991, Public Law No. 102-242, 105 Stat. 2236, the FDIC has delayed until December 31, 1992, the date by which certified and licensed appraisers must be used for all federally related transactions. The third technical amendment clarifies that the appraisal regulation does not apply to loans not secured by real property.

EFFECTIVE DATE: This final rule is effective March 16, 1992.

FOR FURTHER INFORMATION CONTACT: (For information on supervisory issues) James D. Leitner, Examination Specialist, Division of Supervision (202) 898-6790, or Robert F. Miailovich, Assistant Director, DOS (202) 898-6916; (for information on legal issues) Walter P. Doyle, Counsel, Legal Division (202) 898-3682; (for information on liquidation issues) N. Jack Taylor, Senior Liquidation Specialist, Division of Liquidation, (202) 898-7326; FDIC, 550 17th Street, NW., Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

A. Background

Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act

of 1989 ("FIRREA") directed the FDIC, and the other financial institutions regulatory agencies,[1] to publish appraisal rules for federally related transactions within the jurisdiction of each agency. In accordance with statutory requirements, the FDIC published an appraisal rule which established minimum standards for appraisals used in connection with federally related transactions and identified those federally related transactions that require a state certified appraiser and those that require either a state certified or licensed appraiser. The final rule was published August 20, 1990 (55 FR 33879).

On September 17, 1991, the FDIC published a proposal to amend its appraisal regulation to address concerns raised by regulated institutions. Their concerns related to complying with the appraisal regulation's requirements for certain low dollar amount real estate secured loans which have not caused them substantial losses, government guaranteed and insured loans, and transactions involving mineral rights, timber rights, and growing crops independent of the associated parcel or tract of land. To address these concerns, the FDIC proposed to: (1) Increase from $50,000 to $100,000 the threshold above which the services of certified and licensed appraisers would be required; (2) permit the use of appraisals prepared for loans insured or guaranteed by an agency of the federal government if the appraisal conforms to regulations or other written requirements of the federal insurer or guarantor; and (3) add a definition of "real estate" and "real property" to clarify that the appraisal regulation does not apply to mineral rights, timber rights, or growing crops.

B. Comments on the Proposed Rule

The FDIC received approximately 1775 comment letters on the proposed amendments to its appraisal rule. Of these, about 950 letters were received from banks and banking organizations while approximately 775 comment letters were received from appraiser organizations and appraisers. In addition, there were approximately 50 letters from other organizations and individuals. These comments are discussed below.

[1] These are: the Board of Governors of the Federal Reserve System, the Office of the Comptroller of the Currency, the Office of Thrift Supervision, and the National Credit Union Administration. In addition, the Resolution Trust Corporation has issued appraisal rules under title XI of FIRREA.

Authority to Establish Threshold

Appraisers and appraiser associations argued that the FDIC lacked authority to establish any threshold level below which real estate-related financial transactions would not require the services of an appraiser. They asserted that Congress intended that appraisers were to be used in connection with all real estate-related financial transactions. Alternatively, they argued that title XI of FIRREA requires regulated institutions to use appraisers in all cases in which any form of evaluation of real estate is undertaken by or on behalf of the institution. The FDIC disagrees with these assertions.

Title XI of FIRREA establishes a framework for regulating appraisals and appraiser services used in connection with certain transactions involving real estate, referred to in the legislation as a "federally related transaction." Section 1121 of FIRREA, 12 U.S.C. 3350, defines a "federally related transaction" as a real estate-related financial transaction which, *inter alia*, requires the services of an appraiser. Consequently, by the express terms of the definitions in title XI of FIRREA, "real estate-related financial transaction" and "federally related transaction" are not equivalent. Instead, federally related transactions are a subset of real estate-related financial transactions, with one of the distinguishing factors being whether the services of an appraiser are required in connection with the transaction.

Title XI of FIRREA does not state when the services of an appraiser are required in connection with a real estate-related financial transaction. However, the legislation does state that its purpose is to protect "Federal financial and public policy interests in real estate related transactions." *See* section 1101 of FIRREA, 12 U.S.C. 3331. From a review of the legislation and the committee reports issued in conjunction with title XI of FIRREA, the FDIC understands these federal financial and public policy interests to include reducing losses to the deposit insurance funds due to faulty and fraudulent appraisals in connection with real estate-related financial transactions, improving the professional conduct and supervision of appraisers, and ensuring the stability of the residential mortgage markets. These considerations parallel our broader concern that banks not engage in unsafe and unsound banking practices when conducting their activities. See 12 U.S.C. 1818.

Consequently, in determining which real estate-related financial transactions should require appraisals, the FDIC examined whether the services of an appraiser were necessary either to protect federal financial and public policy interests in particular transactions, or as a matter of safe and sound banking practice. This approach to determining when the services of an appraiser are required not only ensures that the purposes of title XI of FIRREA are met, but also meets the FDIC's pre-existing statutory obligation to ensure that regulated institutions conduct their activities in accordance with principles of safe and sound banking. Using this approach, the FDIC concluded that neither title XI of FIRREA nor principles of safe and sound banking require the use of appraisers in connection with all real estate-related financial transactions.

By explicitly recognizing that the services of an appraiser are not required for all real estate-related financial transactions, title XI of FIRREA provides for the existence of evaluations of real estate that are not appraisals. The FDIC has incorporated this distinction in its appraisal regulation based on its conclusion that, for transactions of $100,000 or less, the use of evaluations meets the purposes of title XI of FIRREA, satisfies principles of safe and sound banking, and will reduce costs for regulated institutions and borrowers.

Different formulations of these arguments that the FDIC lacked authority to establish a threshold level for use of an appraiser in real estate-related financial transactions were repeated in other comment letters. For instance, a comment letter from a national association of appraisers argued that the premise of title XI of FIRREA is that the use of certified or licensed appraisers is required whenever the value of real estate collateral is a material factor in determining credit quality so that in the event of default the sale of the collateral will satisfy the indebtedness. Obviously, the use of a certified or licensed appraiser does not guarantee against a loss in foreclosed property.

Just as title XI of FIRREA does not require the use of an appraiser in connection with all real estate-related financial transactions, it also does not provide that the only persons who may evaluate real estate collateral are appraisers. An evaluation is an assessment of the probable value of a property. It would be performed by an individual who has the knowledge and experience necessary to make an informed assessment of the property's value, but who is not expected to render an appraisal of the property. Clearly, banking personnel and others have long performed such evaluations in connection with bank lending activities. To the extent that title XI requires a change in this practice, the change is mandated only where the services of an appraiser are necessary to protect federal financial and public policy interests in the real estate-related financial transactions involved. For these reasons, the FDIC concludes that there is no violation of the letter or intent of title XI of FIRREA by accepting an evaluation for real estate-related financial transactions when the services of an appraiser are not necessary to protect federal financial and public policy interests in those transactions.

Others assert that all transactions which were covered in the Guidelines for Real Estate Appraisal Policies and Review Procedures ("Guidelines") issued jointly by the FDIC, Office of the Comptroller of the Currency, and the Board of Governors of the Federal Reserve System, require appraisals by certified or licensed appraisers under title XI of FIRREA. Alternatively, some comment letters argued that title XI of FIRREA did not recognize a distinction between appraisals and evaluations and that there is no distinction between them. Again the FDIC does not agree. The Guidelines were issued prior to passage of title XI of FIRREA and generically referred to all evaluations of real estate, regardless of how informal or by whom they were performed, as appraisals.

The Threshold Level

Of the approximately 1775 comment letters received, over 1525 commented on whether the threshold level should be increased from $50,000 to $100,000. Of these, approximately 750 favored increasing the threshold level to $100,000 or more, while approximately 775 favored retaining or lowering the $50,000 threshold.

Comment letters that favored increasing the threshold level came primarily from bankers and bank related organizations. These letters stated that the institutions involved had experienced very few losses in connection with real estate transactions below $100,000. The majority of their losses were from loans greater than $100,000 and did not result from faulty or fraudulent appraisals, but rather from other factors including economic declines. Comment letters that opposed increasing the threshold, or suggested that it be lowered, came primarily from appraisal organizations and individual appraisers. Many of these letters argued that it is inappropriate to increase the threshold level from $50,000 to $100,000 in light of the losses experienced by insured depository institutions on real estate loans, including loans below the proposed $100,000 threshold. In addition, some argued that the $50,000 threshold level originally adopted by the FDIC was too high and was not supported by the rulemaking record.

After a careful review of the information provided in the comment letters on loss experience associated with real estate-related financial transactions of $100,000 or less, and based on FDIC's experience in examining banks, the FDIC concludes that the threshold may appropriately be set at $100,000. The FDIC has determined that the losses experienced by regulated institutions on transactions below this level are not sufficient to implicate federal financial and public policy interests in those transactions. Moreover, while requiring the use of certified or licensed appraisers may reduce the level of losses experienced on transactions of $100,000 or less, the FDIC does not believe that the aggregate reduction in losses would justify the continued imposition of this requirement for transactions between $50,001 and $100,000 as a matter of safe and sound banking practice.

In this regard it is important to note that by adopting the proposal to increase the threshold to $100,000, the FDIC is simply restoring the practices and procedures that were in place prior to the promulgation of the final appraisal rule for those transactions below the threshold level. This means that regulated institutions may continue to use the same reliable individuals to evaluate real estate in connection with transactions of $100,000 or less, as they used prior to adoption of the appraisal regulation. It recognizes that the evaluation prepared by these individuals will not be a written appraisal as defined in title XI of FIRREA and will not contain all of the detailed information and analysis required by the FDIC appraisal regulation, but instead will contain information and analysis that is consistent with the risk imposed by the transaction.

The FDIC requested comments on the current proposal to increase the threshold from $50,000 and $100,000 include specific information about the losses sustained on loans of $50,000 or less, of $50,001 to $100,000, and of more than $100,000. In addition, the FDIC requested that specific comments be provided on the estimated cost and delay in obtaining appraisals, prior to August 20, 1990, since August 20, 1990, and after the use of certified and licensed appraisers is requied for all federally related transactions. Approximately 575 banks provided loss information on real estate loans by size categories (loans of $50,000 or less, loans between $50,001 and $100,000 and loans of $100,000 or more). The following table shows the aggregate loss experiences based on the information provided.

TABLE A

Categories of loans secured by real estate (R.E. loans)	No. of R.E. loans (000)	Dollar amount of loans held by category ($000)	Loss on loans by category within 12 month period ($000)	Losses as a percent of dollar amount held by category (%)
Real Estate Secured Loans Above $100,000	34,213	13,695,756	188,103	1.37
Real Estate Secured Loans of $50,001 to $100,000	44,424	2,914,373	14,008	.48
Real Estate Secured Loans of $50,000 or below	259,582	5,046,966	15,470	.31

The schedule indicates that larger loans experience a higher loss ratio than smaller loans. Losses as a percent of amount held is 1.37% for loans above $100,000, 0.48% for loans of $50,001 to $100,000 and 0.31% for loans $50,000 or below. When comparing aggregate loss for each loan, loans greater than $100,000 average $5,498 of loss per loan while loans less than $100,000 average $98 per loan. The loss ratio and the average loss per loan clearly support the need for regulation for real estate loans above $100,000.

For real estate loans less than $100,000 it is probable that any reduction in average loss per loan that could be achieved through the appraisal regulation would be less than the cost of requiring an appraisal that meets all the regulatory requirements. An appraisal could not reduce the average loss of $90 per loan to $0 because poor quality appraisals are not the sole cause for real estate loan losses. Recessions or other economic conditions can cause a precipitous decline in local real estate values which can impact both the borrower's ability to repay as well as the level of collateral protection. Even when a conforming appraisal is available, lenders can make poor underwriting decisions by not properly assessing the borrower's financial condition or allowing excessive loan to value ratios. In addition, the appraisal regulation by itself does not assure "good" appraisals—it is only a supervisory tool for effecting corrective action and disciplining incompetent and/or unethical appraisers.

Banks were also asked to provide an estimate of the cost and time to obtain appraisals. It is difficult to tabulate the data because the respondents did not always specify the type of appraisal (such as commercial, farm or residential). It appears that the average cost of residential appraisals increased from approximately $150 before the effective date of the regulation to about $225 after the effective date. Bankers anticipated another $100 increase when the requirement for licensed and certified appraisers is in place. Similarly, bankers reported that on average the lapse of time between ordering and obtaining appraisals increased from approximately one week before the regulation's effective date to over two weeks currently. Banks anticipate the delay to increase to over three weeks in the future.

A few comment letters objected to basing any conclusing about the level of the threshold on the data provided in the comment letters. One letter argued that the data obtained would be unscientific because it was voluntarily provided and may not represent the experience of the banking system as a whole. The FDIC believes that the data provided in the comment letters is representative of the experience of the commercial banks and has generally confirmed the results shown by that data through experience gained during examinations.

Other financial entities also commented on losses on real estate loans. Citing $873 million in losses on 57,000 claims paid by its members in 1989, an association of mortgage insurance companies argued against increasing the threshold level in its comment letter and stated that the majority of the losses experienced by its members had occurred on properties valued less than $100,000. The association stated its belief that inadequately trained appraisers were the cause of a large part of their losses. Although the FDIC believes that the comments of the association of mortgage insurers is a basis of continuing to observe trends in losses on loan below the threshold level, there may be several reasons for loss experience of mortgage insurance companies. It could relate to the demographics of the mortgage insurer's portfolio, as well as their client base. Furthermore, if a majority of their portfolio of insured loans consists of transactions valued at $100,000 or less, then it would be a statistical necessity that the majority of their losses would occur in those transactions. It was also noted in a graph attached to the comment letter that the cumulative claim rate for loan amounts of $100,000 or greater is significantly higher than the claim rate for loan amounts less than $100,000. In addition, if the mortgage insurers are accepting loans originated by nonregulated institutions, those loans may not be underwritten to the same standards as those employed by banks.

Several letters from appraisers asserted that the $50,000 threshold should be retained as a means of protecting consumers from paying too much for their residences. Generally, bankers do not agree. They cite the cost and time delays associated with requiring the use of licensed and certified appraisers and conclude that the appraisal regulation hurts the consumer. In addition, the focus of title XI of FIRREA is to prevent losses to the deposit insurance funds resulting from faulty or fraudulent appraisals. While homebuyers may obtain an appraisal by a certified or licensed appraiser prior to purchasing a house, or request that a bank obtain an appraisal by a certified or licensed appraiser in connection with their purchase of a residence, the FDIC concludes that Congress did not intend to force homebuyers to bear the cost of obtaining an appraisal by a certified or licensed appraiser as a precondition to purchasing a home, or to confirm the purchaser's judgment with regard to entering into the transaction.

A large number of the comment letters from appraisers point out that approximately 50 percent of all home mortgages in the United States would be below the $100,000 threshold level given the current median price of housing in the United States. These letters suggest that because the services of a certified or licensed appraiser will not be required in connection with these loans, the losses attributable to these transactions will rise. As explained above, banks will be required to obtain an evaluation of the real estate which is the collateral for these loans as a matter of safe and sound banking practice. Evaluations for transactions which do not require an appraisal under the appraisal regulation must provide information that allows a bank to determine whether its participation in the transaction is consistent with the principles of safe and sound banking. For transactions below the threshold level, banks are expected to follow essentially the same practices they followed before adoption of title XI of FIRREA. Consequently, the FDIC does not expect an increase in losses for these transactions.

Another comment letter noted that the increased threshold would apply to real estate-related financial transactions involving commercial property as well as residential property. It argued that commercial properties require more complex analysis and, therefore, transactions involving these properties should require the services of an appraiser. The FDIC agrees that evaluations of commercial real estate can require more complex analyses than evaluations of 1-to-4 family residential properties. Furthermore, the regulation does not prohibit a bank from obtaining an appraisal when it determines one is needed to properly underwrite a transaction. However, as explained above, the losses sustained by banks on all loans of $100,000 or less when using the procedures and analyses in effect prior to enactment of title XI do not rise to a level which implicates federal financial and public policy interests.

In addition, some comment letters argued that title XI of FIRREA does not permit the cost of obtaining appraisals to be considered in determining whether the services of an appraiser are required for any class of real estate-related financial transactions. While title XI does not make cost or delay in obtaining appraisal services an explicit factor in determining whether the services of an appraiser are required to protect federal financial and public policy interests, these issues seem clearly relevant to all rulemaking. In this case, the primary complaint received from banks was that the cost and delay associated with obtaining appraisals that conform to the appraisal regulation were not justified by the risk of loss associated with these transactions. The FDIC cannot justify the imposition of additional costs or other burdens where not required to meet the purposes of title XI or bank safety and soundness.

One comment letter argued that maintaining the status quo is not acceptable under title XI of FIRREA and that past loss experience is not a good gauge of future losses or acceptable losses. The FDIC agrees that title XI is intended to reduce losses to the depository institutions insurance funds through improved appraisal practices in connection with federally related transactions. Consequently, with regard to federally related transactions, the FDIC has required substantial changes in the appraisals which regulated institutions must obtain, including requirements that exceed the minimums established by title XI of FIRREA.

Comment letters from a number of banks made various proposals for higher threshold levels. For instance, one bank proposed a higher threshold for community banks, while several comment letters suggested that a higher threshold was appropriate for commercial transactions. Another letter proposed that communities with populations of 10,000 or less be exempted from the requirements of title XI of FIRREA and in one letter a bank argued in favor of increasing the threshold level for commercial loans, noting the high cost of appraisals for small business borrowers. While the FDIC has concluded, on the basis of the data provided in the comment letters, that the threshold level may be set at $100,000 and still ensure that federal financial and public policy interests are adequately protected, we do not believe that there is sufficient information to support the establishment of higher threshold levels. However, it is noted that as a result of the passage of the Federal Deposit Insurance Corporation Improvement Act of 1991, the Office of Management and Budget ("OMB") is conducting a study of *de minimis* thresholds for commercial real estate. We intend to evaluate the information provided in that study and determine whether any further changes in the threshold level are warranted for real estate-related financial transactions.

Several comment letters cited other policy considerations in support of retaining the $50,000 threshold level. State certification and licensing agencies provided comment letters in which they opposed the increase in the threshold level because of its impact on the revenues to be collected by their states from issuing certificates and licenses to appraisers. The comment letters expressed the writers' belief that fewer individuals will choose to become certified or licensed appraisers if the threshold level is set at $100,000. We note that a large number of all real estate-related financial transactions will require the services of a certified or licensed appraiser under our appraisal regulation even after the $100,000 threshold is adopted. This will include almost 50 percent of all residential real estate transactions and the vast majority of all commercial real estate transactions. Moreover, while the FDIC does not require the use of certified and licensed appraisers for transactions below the threshold level, we encourage the use of certified or licensed appraisers for all real estate-related financial transactions including transactions below the threshold level and we expect that in many cases lenders will voluntarily use them. Consequently, the FDIC does not believe the increase in the threshold level will significantly reduce the number of individuals who will apply to become state certified or licensed appraisers.

Several letters argued that it was important to have an appraiser provide an independent verification of the value of the real estate offered as collateral since the compensation of real estate agents and loan officers frequently depends on completion of the transaction and the amount involved. We agree that it is important for the individual who is providing an evaluation of real estate collateral to exercise independent judgment. Consequently, the FDIC intends to address this issue in guidelines to be published concerning evaluation procedures.

Several letters identified other benefits, such as identification of hazardous waste problems associated with the property, which appraisers would provide through their participation in the transaction. While we encourage banks to use certified or licensed appraisers for transactions below the threshold level, it is our conclusion that the ability of appraisers to offer these benefits is not a sufficient reason for requiring the services of an appraiser in connection with these transactions.

Finally, several letters from appraisers argued that increasing the threshold sends the wrong message regarding the need for professionalism in the appraisal industry and undermines the congressional purpose of improving appraisal services. The FDIC disagrees with this assertion and believes that just the opposite is true. Under the appraisal regulation, the services of a professional appraiser are required where the risk is greatest, where the problems of valuing the real estate involved are most complex, and where the appraiser's experience and training can help bankers arrive at a thorough understanding of the value of the real estate involved so that the banker can accurately analyze risks associated with underwriting those loans. By contrast, evaluations by competent individuals are permitted for transactions below $100,000, where the majority of the transactions involve residential real estate, and where the issues involved do not demand the level of training and experience required of a professional appraiser.

Exemption for Government Guaranteed Loans

The FDIC also is adopting the proposal to exempt any transaction involving a loan insured or guaranted by an agency of the federal government from the requirement to obtain a second appraisal in accordance with the appraisal regulation, provided the loan is supported by a current appraisal that meets the standards of the federal agency providing the insurance or guarantee.

Approximately 125 comments were received regarding this amendment. Of these, approximately 100 were in favor of the change and 25 opposed. Several appraisal organizations and individual appraisers objected to exempting government guaranteed loans from the requirement to obtain a separate appraisal. Their comment letters generally argued that Congress wanted uniformity in appraisals and the qualifications of appraisers to protect federal financial and public policy interests. They further state that the FDIC lacked authority to delegate to another agency the determination of the content of the documentation of value for real estate collateral for transactions involving government guaranteed loans or the qualifications of the individuals who would provide the analysis of value. The FDIC does not agree with these assertions. Neither title XI of FIRREA nor the committee reports issued in connection with the legislation indicate that Congress intended the financial institutions regulatory agencies to impose their appraisal requirements on all other federal agencies. Instead, title XI of FIRREA requires the use of a state certified or licensed appraiser and adherence to specific appraisal requirements only when necessary to protect federal financial and public interests. For loans insured or guaranteed by an agency of the federal government, one of the principal concerns which prompted Congress to

enact title XI of FIRREA—the risk of loss to the deposit insurance funds—is minimized.

Moreover, all of these programs have been enacted to effectuate federal policy to favor lending to those who qualify for the insurance or guarantee program. Imposing bank appraisal requirements on these transactions may tend to frustrate the federal policies which underlie those programs. This is particularly true since additional appraisal requirements would add costs to participating in these programs and would not help to meet the principal objective which title XI of FIRREA was intended to achieve. In addition, some programs prohibit banks from charging for an appraisal which is not required by the insuring or guaranteeing agency with the result that some banks would not be able to afford to participate in the program. The FDIC concludes that Congress did not intend this result by enacting title XI of FIRREA and that the services of a second appraiser engaged by a regulated institution to meet the requirements to protect the federal financial and public policy interests in transactions involving loans insured or guaranteed by agencies of the federal government. This conclusion is supported by the current regulations of the Office of Thrift Supervision ("OTS") which exempt government guaranteed and insured loans from the agency's appraisal regulations. *See* 12 CFR 545.32(b). It also eliminates a competitive disadvantage suffered by banks compared to non-regulated lenders and institutions regulated by the OTS.

The comment letters contain several additional arguments for continuing to require a second appraisal in accordance with the appraisal regulation for transactions involving government guaranteed or insured loans. For instance, a comment letter argued that the requirements for the Veterans Administration and Federal Housing Administration appraisals are less rigorous than those set out in the FDIC regulation and argued that the other standards should not be substituted for those required in the FDIC rule. However, for transactions involving government guaranteed or insured loans, the FDIC has determined that the services of a professional appraisal and imposition of the FDIC appraisal requirements through a second appraisal are not necessary to protect the federal government's financial and public policy interests in these transactions since it is the guarantor or insurer which bears the major share of losses. However, when a bank needs additional information in order to satisfy principles of safe and sound banking, the bank is not prevented from obtaining that information through a second appraisal.

FNMA AND FHLMC

Several banks commented that the FDIC also should exempt loans that are originated by banks to be sold into the secondary market through the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation (FHLMC). Title XI of FIRREA, provides that it is violation of section 1120 of FIRREA, 12 U.S.C. 3349, for FNMA or FHLMC to knowingly contract for the performance of any appraisal by a person who is not a state certified or licensed appraiser in connection with any real estate-related financial transaction as defined in section 1121(5) of FIRREA. Therefore, many of the arguments which support exempting loans directly guaranted or insured by federal agencies apply to loans for 1-to-4 family residential properties which banks underwrite in accordance with FNMA and FHLMC standards. Thus, the minimum requirements of title XI of FIRREA would be met if the appraisals prepared in connection with those loans also meet the Uniform Standards of Professional Appraisal Practice ("USPAP") promulgated by the Appraisal Standards Board of the Appraisal Foundation and codified as appendix A of this part. Given the low levels of losses associated with loans for 1–to–4 family residential properties, the FDIC concludes that imposition of the additional appraisal standards set forth in § 323.4(a) (2)–(14) of this part are not necessary to ensure that these transactions are conducted in accordance with principles of safe and sound banking.

The OTS has reached a similar conclusion and currently does not require appraisals for loans involving 1-to-4 family residential properties and existing multi-family residential properties to comply with all of the appraisal standards set forth in their appraisal rule, provided the appraisals are prepared on forms approved by FNMA or FHLMC and in accordance with appraisal standards approved by those agencies. Based on the foregoing, the FDIC has amended 323.4 to allow regulated institutions to exempt appraisals of 1-to-4 family residential properties prepared in accordance with FNMA or FHLMC appraisal standards from the additional requirements in 323.4(a)(2)–(14). However, the FDIC has determined not to apply this exception to multifamily residential properties until it has had a further opportunity to review the impact of allowing regulated institutions to make loans on these properties without complying with all of the appraisal standards in 323.4.

Definition of Real Estate and Real Property

The third amendment in FDIC's September 17, 1991 proposal adds a definition of "real estate" and "real property" to the FDIC appraisal rule. Title XI of FIRREA does not define "real estate" or "real property" nor does the context in which these terms are used unambiguously suggest that the terms are intended to have different technical meanings. For instance, "real estate-related financial transaction" is defined as:

> Any transaction involving (A) the sale, lease, purchase, investment in or exchange of *real property*, including interests in property, or the financing thereof, (B) the refinancing of *real property* or interests in *real property*; and the use of *real property* or interests in *real property* as security for a loan or investment, including mortgage-backed securities.

FIRREA section 1121(5), 12 U.S.C. 3350 (emphasis supplied).

Title XI of FIRREA also directs the FDIC to issue regulations requiring "that real estate appraisals be performed in accordance with generally accepted appraisal standards promulgated by the Appraisal Standards Board of the Appraisal Foundation." The Appraisal Foundation's standards (USPAP) have separate definitions for real property ("the interest, benefits, and rights inherent in the ownership of real estate") and real estate ("an identified parcel or tract of land, including improvements, if any"). USPAP also recognizes that the terms are used interchangeably in some jurisdictions.

In its appraisal rule, the FDIC used "real property" and "real estate" interchangeably to mean interests in an identified parcel or tract of land and improvements. However, we did not intend these terms to include mineral rights, timber rights, or growing crops when considered separately from the parcel or tract of land, since valuation of such interests generally requires the services of a professional other than an appraiser. To clarify this distinction, the FDIC proposed to define "real property" and "real estate" for purposes of the appraisal regulation as "an identified parcel or tract of land, including easements, rights of way, undivided or future interests and similar rights in a tract of land, but excluding mineral rights, timber rights, or growing crops."

The FDIC received approximately 100 comment letters on this change to the appraisal regulation. Approximately 75 of the letters supported the amendment. Other comment letters either opposed the amendment or recommended changes to correct perceived problems with the original definition.

In many states, minerals, timber, and growing crops which have not been severed from the land are considered interests in real estate or real property. Consequently, if a bank customer pledges mineral rights as collateral for a loan in one of those states, a question arises whether the bank must obtain an appraisal of the parcel or tract of land to which the mineral rights are attached, but in which the bank has no interest, in order to satisfy the requirements of the appraisal regulation. The amendment was intended to clarify that banks are not required to obtain appraisals of the parcel of land to which mineral rights, timber rights or growing crops are attached, if the transaction only involves those mineral rights, timber rights or growing crops rather than the parcel or tract of land.

Where mineral rights, timber rights, or growing crops, *and* the associated parcel or tract of land, are the subject of a real estate-related financial transaction, then the services of an appraiser would be required in connection with that transaction unless one of the provisions in § 323.3(a) of this applied. In addition, the contribution of relevant mineral rights, timber rights, or growing crops should be included when appraising a parcel of land which possesses any of these features. However, valuation of these interests would not be required if they are not part of the transaction, or if they are not relevant to analyses which the appraiser needs to perform to arrive at an estimate of value for the parcel or tract of land. The definition adopted in the final rule has been changed to clarify that mineral rights, timber rights, growing crops, and other severable interests in a parcel or tract of land are excluded from the definition of real estate when the transaction involves only those interests.

A comment letter from a professional association of geologists favored adopting a definition of real estate and real property but proposed adding water rights and rights to other constituents of the earth which benefit or adversely affect mankind. The FDIC has adopted part of this suggestion by broadening the exclusion to cover water rights and similar interests which are severable from the land.

Finally, one comment letter suggested that the definition be modified to make it clear that improvements to the parcel or tract of land are considered part of the real estate or real property and must be included in the appraisal. The FDIC agrees that this change is needed and it is reflected in the final rule.

Other Comments

In addition to comments on the specific amendments to the regulation contained in the September 17, 1991 proposed rule, the FDIC received a number of comments on other provisions of the appraisal regulation. One comment letter suggested that the regulation needs a clearer statement of when an appraisal is required. The FDIC agrees that a technical amendment to § 323.3(a) would clarify that appraisals are required for all real estate-related financial transactions except those identified in that provision.

It was also called to our attention that a literal reading of the definition of "real estate-related financial transaction" in § 323.2 would cover a loan to finance the purchase of real estate even if it were unsecured or secured wholly by personal property and no lien on the real property is taken. We do not believe this was the intent of title XI of FIRREA and, accordingly, have added an exemption to the appraisal regulation covering loans not secured by real property. FDIC examiners will, however, be alert to any abuse of this exception by lenders who display a pattern of not taking a lien on real estate collateral merely for the sake of avoiding application of this regulation. Such a pattern of unsound credit underwriting will trigger appropriate supervisory corrective action.

Several comment letters also asked for clarifications and interpretations of the appraisal regulation which did not require amendment of the regulation. The FDIC, in conjunction with the other financial institutions regulatory agencies, intends to issue additional guidance on the appraisal regulation which will address many of these questions. The FDIC also will consider whether additional rulemaking is required to address any of these issues.

C. Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act, the FDIC certifies that these changes are not expected to have a significant economic impact on a substantial number of small entities.

Overall, the FDIC expects the changes to benefit consumers and regulated institutions regardless of size by reducing costs without substantially increasing the risk of loss for the banks arising from fraudulent or inaccurate evaluations or appraisals of real estate collateral. Accordingly, the changes should not substantially increase the risk of loss to the federal deposit insurance funds arising from the affected transactions.

D. Paperwork Reduction Act

The collection of information contained in this part 323 has been reviewed and approved by the Office of Management and Budget under control number 3064–0103 in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) and the total burden hours have heretofor been estimated at 197,100 per year. Following the amendments now being adopted, the estimated average burden associated with the collection of information in this final rule is 21.2 hours per recordkeeper. The recordkeeping requirement associated with these changes to the FDIC's appraisal regulation will result in a reduction of 32,800 burden hours from the prior 197,100 burden hours per year.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Assistant Executive Secretary (Administration), room F–400, Federal Deposit Insurance Corporation, Washington, DC 20429, with a copy to the Office of Management and Budget, Paperwork Reduction Project (3064–0103), Washington, DC 20503.

Total Burden: 7750 recordkeepers × 21.2 hours = 164,300 total burden hours.

List of Subjects in 12 CFR Part 323

Banks, banking, Mortgages, Real estate appraisal, Reporting and recordkeeping requirements.

Authority and Issuance

For the reasons set out in the preamble, Part 323 of subchapter B of chapter III of title 12 of the Code of Federal Regulations is proposed to be amended as follows:

PART 323—APPRAISALS

1. The authority citation for part 323 is revised to read as follows:

Authority: 12 U.S.C. 1818, 1819; 12 U.S.C. 3331 *et seq.*

2. In § 323.2, existing paragraphs (g) through (k) are redesignated as paragraphs (h) through (l) and a new paragraph (g) is added to read as follows:

§ 323.3 Definitions.

* * * * *

(g) *Real estate* or *real property* means an identified parcel or tract of land, with improvements, and includes easements, rights of way, undivided or future interests and similar rights in a tract of land, but does not include mineral

rights, timber rights, growing crops, water rights and similar interests severable from the land when the transaction does not involve the associated parcel or tract of land.

* * * * *

3. In § 323.3, the introductory text of paragraph (a) and paragraphs (a)(1) and (4)(iv) are revised; paragraph (a)(5) is amended by removing the period at the end of the paragraph and replacing it with a semicolon; and new paragraphs (a)(6), (a)(7) and (d) are added to read as follows:

§ 323.3 Appraisal not required; transactions requiring a State certified or licensed appraiser.

(a) *Appraisal not required.* While supervisory guidelines, general banking practices or other prudent standards may also require an appropriate evaluation of real property collateral, an appraisal performed in accordance with this part is required for any real estate-related financial transaction other than one in which:

(1) The transaction value is $100,000 or less;

* * * * *

(4) * * *

(iv) There has been no obvious and material deterioration in market conditions or physical aspects of the property which would threaten the institution's collateral protection;

* * * * *

(6) A regulated institution makes or purchases a loan secured by real estate, which loan is insured or guaranteed by an agency of the United States government, provided the transaction is supported by an appraisal that conforms to the appraisal rules or other written appraisal requirements of the federal agency providing the insurance or guarantee; or

(7) A regulated institution makes or purchases a loan that is not secured by real property or any interest therein.

* * * * *

(d) *Effective date.* Regulated institutions are required to use state certified or licensed appraisers as set forth in paragraphs (b) and (c) of this section no later than December 31, 1992, unless otherwise required by law.

4. In § 323.4, existing paragraphs (b) and (c) are redesignated as paragraphs (c) and (d), and a new paragraph (b) is added to read as follows:

§ 323.4 Appraisal standards.

* * * * *

(b) *Exception for certain appraisals of 1-to-4 family residential properties.* Appraisals for federally related transactions involving 1-to-4 family residential properties need not comply with the standards set forth in § 323.4(a)(2) through (a)(14), provided the appraisal complies with § 323.4(a)(1) and conforms to the standards approved by the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation.

* * * * *

By order of the Board of Directors.
Dated at Washington, DC this 10th day of March 1992.
Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

26 CFR Part 602

[T.D. 8335]

RIN 1545-AO88

OMB Control Numbers Under the Paperwork Reduction Act; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correcting amendments.

SUMMARY: This document contains corrections to the technical amendments to § 602.101(c) published as T.D. 8335 on Monday, March 4, 1991 (56 FR 8912). This regulation collects and displays the control numbers assigned to regulations by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 and the Paperwork Reduction Reauthorization Act of 1986, which require that agencies display control numbers assigned by that Office to regulations that solicit or obtain information from the public.

EFFECTIVE DATE: March 4, 1991.

FOR FURTHER INFORMATION CONTACT: Dale Goode at 202-566-3935.

SUPPLEMENTARY INFORMATION:

Background

The technical amendments to § 602.101(c) that are the subject of these corrections comply with the requirements of §§ 1320.7(f), 1320.12 and 1320.15 of 5 CFR part 1320 (OMB regulations implementing the Paperwork Reduction Act and amendments thereto by the Paperwork Reduction Reauthorization Act of 1986), for display of control numbers assigned by OMB to collections of information in Internal Revenue Service regulations.

Need for Correction

As published, the technical amendments contain errors which may prove to be misleading and are in need of clarification.

List of Subjects in 26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR, part 602, is corrected as follows:

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Paragraph 1. The authority for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Corrected]

Par. 2. § 602.101(c) is corrected by removing entries from the table as indicated in the following list:

BILLING CODE 4830–01–M

Office of Foreign Assets Control

31 CFR Part 500

Foreign Assets Control Regulations

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Final rule; amendment.

SUMMARY: The Office of Foreign Assets Control is amending the Foreign Assets Control Regulations by the addition of § 500.612, providing for the registration of claims by U.S. nationals against Cambodia. The amendments impose a requirement that reports be filed under § 500.612 with respect to all outstanding claims held by U.S. nationals against the Government of Cambodia or a Cambodian government entity as of 5 p.m. EST, April 30, 1992. The reports are needed to obtain information, on a one-time basis, regarding claims by U.S. nationals against Cambodia, for planning and administrative purposes in contemplation of future claims settlement negotiations. The authorization number assigned by the Office of Management and Budget to the information collection requirements is also included.

EFFECTIVE DATE: March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Loren L. Dohm, Chief, Blocked Assets Division, Tel. : 202/535–4026, or William B. Hoffman, Chief Counsel, Tel.: 202/535–6020, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220.

SUPPLEMENTARY INFORMATION: The Foreign Assets Control Regulations, 31 CFR part 500 ("the Regulations"), were amended to authorize prospectively all new transactions by persons subject to U.S. jurisdiction involving property in which Cambodian or a national thereof has an interest. Property of the Government of Cambodia or Cambodian nationals that was blocked as of January 2, 1992, however, continues to be blocked, despite the lifting of the Cambodian embargo on January 3, 1992. 31 CFR 500.570, 57 FR 1872 (Jan. 16, 1992). New § 500.612 requires U.S. nationals having claims outstanding against the Government of Cambodia or any Cambodian government entity to report their claims by letter, including the information required by paragraph (f) of that section, by April 30, 1992. Observance of the filing deadline is extremely important. The reports are needed to obtain information, on a one-time basis, regarding claims by U.S. nationals against Cambodia, for planning and administrative purposes in contemplation of future claims settlement negotiations. For naturalized U.S. citizens, only claims arising after becoming a U.S. citizen should be reported. Similarly, an entity must have been organized under the laws of a U.S. jurisdiction at the time of loss to have a reportable claim.

The submission of a report of a claim against the Government of Cambodia does not constitute the filing with the United States Government of a formal claim for compensation. No formal claims adjudication program currently exists. However, failure to file a complete report with respect to claims in a timely fashion not only would constitute failure to comply with the Regulations, but would also prevent the inclusion of the information in U.S. Government planning and may therefore be prejudicial to the interests of the claimant and other U.S. claimants. Espousal of claims of U.S. nationals against a foreign government is within the discretion of the United States Government.

Because the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply.

This final rule is being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collection of information contained herein has been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget under control number 1505–0131. Comments concerning the average annual burden and suggestions for reducing this burden should be directed to the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503, with copies to the Office of Foreign Assets Control, Department of the Treasury, 1500 Pennsylvania Avenue NW.—Annex, Washington, DC 20220. Any such comments should be submitted not later than 60 days from publication.

The collection of information in the Regulations is contained in § 500.612. This information is required by the Office of Foreign Assets Control for planning and administrative purposes in contemplation of future claims settlement negotiations. The likely respondents and recordkeepers are individuals and business organizations.

Estimated total annual reporting and/or recordkeeping burden: 60 hours.

The estimated annual burden per respondent/recordkeeper varies from 1 hour to 3 hours, depending on individual circumstances, with an estimated average of 2 hours.

Estimated number of respondents and/or recordkeepers: 30.

Estimated annual frequency of responses: 1.

List of Subjects in 31 CFR Part 500

Cambodia, Foreign claims, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 31 CFR part 500 is amended as follows:

PART 500—FOREIGN ASSETS CONTROL REGULATIONS

1. The authority citation for part 500 continues to read as follows:

Authority: 50 U.S.C. App. 5, as amended; E.O. 9193, 7 FR 5205, 3 CFR 1938–1943 Cum. Supp., p. 1174; E.O. 9989, 13 FR 4891, 3 CFR 1943–1948 Comp., p. 748.

Subpart F—Reports

§ 500.90 [Revised]

2. Section 500.901 is revised to add the following sentence to the end thereto: "The information collection requirement in § 500.612 has been approved by the Office of Management and Budget and assigned control number 1505–0131."

3. Section 500.612 is addded to subpart F to read as follows:

§ 500.612 Registration of claims by U.S. nationals against Cambodia.

(a) *Requirement for reports.* Reports are required to be filed on or before April 30, 1992, in the manner prescribed in this section, with respect to all outstanding claims held by U.S. nationals against the Government of Cambodia or a Cambodian government entity.

(b) *Who must report.* A report must be submitted by each U.S. national having a claim outstanding against the Government of Cambodia or any Cambodian government entity. Reports should be submitted only by persons who were U.S. citizens or entities organized under the laws of a U.S. jurisdiction on the date of the loss.

(c) *How to register.* U.S. nationals filing reports of claims must submit a letter containing the information required by paragraph (f) of this section. The letter must be sent to the Blocked Assets Division, Office of Foreign Assets Control, Department of the Treasury, Washington, DC 20220 to arrive by April 30, 1992. A copy of the submission should be kept by the claimant.

(d) *Certification.* Every report shall bear the signature of the claimant or a person authorized by the claimant to sign the report. The signature will certify that to the best of the reporter's knowledge, the statements set forth in the report, including any papers attached to or filed with the report, are true and accurate, and that all material facts in connection with the report have been set forth.

(e) *Confidentiality of reports.* Reports submitted pursuant to this section are regarded as privileged and confidential.

(f) *Contents of report.* The report must contain the following information (with responses numbered to correspond with the numbers used below):

(1) Identification of claimant.

(i) Claimant's Legal Name.

(ii) Claimant's Address.

(iii) Telephone number of individual to contact regarding the report.

(iv) If claimant is a naturalized citizen of the United States, state the place and date of naturalization.

(v) If claimant is a corporation or business, state the place of incorporation and principal place of business.

(2) Information concerning claim.

(i) Amount of loss in U.S. dollars (indicate exchange or interest rates and relevant dates utilized for any currency translation or interest calculation).

(ii) Describe the circumstances of the loss. Include the date of the loss and description of the property, business, obligation, injury or other damage which is the subject of the claim.

Dated: February 14, 1992.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: February 25, 1992.

Peter K. Nunez,

Assistant Secretary (Enforcement).

BILLING CODE 4810–25–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 147

[CGD11–92–02]

Safety Zone: Platform Irene, Pacific Ocean, Southern California

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rulemaking establishes a 500 meter safety zone around Platform Irene, similar to the safety zones around other platforms off the Southern California coast. The safety zone will be indicated on navigational charts which will make the fixed structure more readily apparent to the mariner. The establishment of a safety zone around an offshore structure is one method recommended by the International Maritime Organization (IMO) to resolve the conflict between oil and gas activities and vessel navigation. The overall impact of this regulation will be to promote the safety of lives and property on Platform Irene, its appurtenances and attending vessels or adjacent waters.

DATES: This regulation becomes effective on March 16, 1992. Comments on this regulation must be received on or before April 15, 1992.

ADDRESSES: Comments should be mailed to Commander (mps), Eleventh Coast Guard District, Union Bank Building, 400 Oceangate, Long Beach, CA 90822–5399. The comments will be available for inspection and copying at the Marine Safety Division, Eleventh Coast Guard District, room 709, 400 Oceangate, Long Beach, CA 90822–5399. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Ensign L.H. Akana, Marine Safety Division, Eleventh Coast Guard District, 400 Oceangate, Long Beach, CA 90822–5399. Phone number: (310) 499–5334.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a Notice of Proposed Rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days from the date of publication. Following normal rulemaking procedures would have been contrary to the public interest. Immediate action is needed to prevent loss of life and damage to Platform Irene by vessels transiting the area. Although this regulation is published as a final rule without prior notice, an opportunity for public comment is nevertheless desirable to ensure that the regulation is both reasonable and workable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under **ADDRESSES** in this preamble. Commenters should include their names and addresses, identify the docket number for the regulations, and give reasons for their comments. Based upon comments received, the regulations may be changed.

Drafting Information

The drafters of this notice are Ensign L.H. Akana, project officer, and J.J. Jaskot, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Regulation

This final rule amends part 147 to reflect the addition of a new structure, Platform Irene, off the Southern California coast. The regulation contains a description of the area of the safety zone, including the location of the center of the structure and information pertinent to its safety zone. The regulation restricts the entry of vessels into the safety zone, except for

attending vessels, vessels under 100 feet in length overall not engaged in towing, or vessels authorized by the Commander, Eleventh Coast Guard District.

Economic Assessment and Certification

This regulation is considered to be non-major under Executive Order 12291 and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. The Coast Guard certifies that this regulation will not have a significant economic impact on a substantial number of small entities.

Federalism Assessment

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this rulemaking does not raise sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Assessment

The Coast Guard has considered the environmental impact of this regulation and concluded that under section 2.B.2.c of Commandant Instruction M16475.1B, it will have no significant environmental impact and it is categorically excluded from further environmental documentation.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements.

List of Subjects in 33 CFR Part 147

Outer Continental Shelf, Marine Safety, Navigation (water).

Final Regulation

In consideration of the foregoing, part 147 of title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for part 147 continues to read as follows:

Authority: 14 U.S.C. 85; 33 U.S.C. 2071; and 49 CFR 1.46.

2. Section 147.1116 is added to read as follows:

§ 147.1116 Platform IRENE safety zone.

(a) Description: The area within a line 500 meters from each point on the structure's outer edge. The position of the center of the structure is 34°–36'–37.5"N, 120°–43'–46"W.

(b) Regulation: No vessel may enter or remain in this safety zone except the following: (1) An attending vessel; (2) a vessel under 100 feet in length overall not engaged in towing; or (3) a vessel authorized by the Commander, Eleventh Coast Guard District.

Dated: January 21, 1992.

M. E. Gilbert,

Rear Admiral,

U. S. Coast Guard, Commander, Eleventh Coast Guard District.

BILLING CODE 4910-14-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

[Docket Number FEMA-7041]

Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Interim rule.

SUMMARY: This rule lists communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer coverage on existing buildings and their contents.

DATES: These modified base flood elevations are currently in effect and revise the Flood Insurance Rate Map(s) (FIRMs) in effect prior to this determination for each listed community.

From the date of the second publication of these changes in a newspaper of local circulation, any person has ninety (90) days in which he can request through the community that the Administrator reconsider the changes. The modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Mr. William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472 (202) 646–2754.

SUPPLEMENTARY INFORMATION: Numerous changes made in the base (100-year) flood elevations on the FIRMs for each community make it administratively infeasible to publish, in this notice, all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are made available for inspection.

Any request for reconsideration must be based upon knowledge of changed conditions, or upon new scientific or technical data.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 65.4.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management measures required by 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, state or regional entities.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical revisions made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

C.M. "Bud" Schauerte,

Administrator, Federal Insurance Administration.

[FR Doc. 92-6069 Filed 3-13-92; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 65

Federal Insurance Administration; Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations will be used in calculating flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

EFFECTIVE DATE: The effective dates for these modified base flood elevations are indicated on the following table and revise the Flood Insurance Rate Map(s) (FIRMs) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the following table.

FOR FURTHER INFORMATION CONTACT: Mr. William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2754.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified base flood elevations for each community listed. These modified elevations have been published in newspaper(s) of local circulation and ninety (90) days have elapsed since that publication. The Administrator has resolved any appeals resulting from this notification.

Numerous changes made in the base (100-year) flood elevations on the FIRMs for each community make it administratively infeasible to publish, in this notice, all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are made available for inspection.

The modifications are made pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program.

These modified elevations, together with the floodplain management measures required by 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities.

These modified base flood elevations shall be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

The changes in base flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical revisions made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718–03–M

44 CFR Part 67

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are determined for the communities listed below.

The base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2754.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for floodplain management in flood-prone areas in accordance with 44 CFR part 60.

Pursuant to the provisions of 5 USC 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67.

Flood insurance, Flood plains.

PART 67—[AMENDED]

The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood

Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. No appeal was made during the ninety-day period and the proposed base flood elevations have not been changed.

Source of flooding and location	#Depth in feet above ground. Elevation in feet (NGVD)
ARIZONA

Sugar Creek Tributary:	
About 700 feet downstream of Second Avenue	*982
About 1,050 feet upstream of Second Avenue	*989
Church Street Branch:	
At mouth	*923
Just downstream of Willow Lane	*925
Just upstream of Willow Lane	*930
Just downstream of Medlock Road	*944
Lamont Drive Branch:	
At mouth	*956
Just downstream of Wilton Drive	*964
Just upstream of Wilton Drive	*979
Maps available for inspection at the City Engineer's Office, Public Works Building, 2635 Talley Street, Decatur, Georgia.	
ILLINOIS	
Naperville (city), DuPage and Will Counties (FEMA Docket No. 7037)	
West Branch Tributary No. 6:	
At mouth	*600
Just upstream of downstream crossing of Hobson Mill Drive	*662
About 450 feet upstream of downstream crossing of Hobson Mill Drive	*662
Maps available for inspection at the City of Naperville, Department of Community Development, 175 West Jackson Avenue, Naperville, Illinois.	
LOUISIANA	
St. Mary Parish (unincorporated areas) (FEMA Docket No. 7037)	
Gulf of Mexico:	
At Southern Pacific Railroad west of Wax Lake Outlet	*8
At intersection of Wax Lake Outlet and Intracoastal Waterway	*12
Local rainfall: At western corporate limits of the Town of Patterson between Wax Lake Outlet and Lower Atchafalaya River	*1.5
Bayou Teche (West of Wax Lake Outlet):	
Approximately 2,100 feet upstream of Charenton Drainage and Navigation Canal	*10
Approximately 1.5 miles upstream of Charenton Drainage and Navigation Canal	*10
Maps available for inspection at the St. Mary Parish Courthouse, 5th Floor, Courthouse Building, Franklin, Louisiana.	
MARYLAND	
Elkton (town), Cecil County (FEMA Docket No. 7034)	
Elk River:	
At the downstream corporate limits	*12
At confluence of Big and Little Elk Creeks	*12
Big Elk Creek:	
At the confluence of Little Elk Creek	*12
Approximately 300 feet upstream of U.S. Route 40	*12
Little Elk Creek:	
At the confluence of Big Elk Creek	*12
Upstream side of CONRAIL	*12
Maps available for inspection at the Building Inspection's Office, 107 North Street, Elkton, Maryland.	
Montgomery County (unincorporated areas) (FEMA Docket No. 7034)	
Whetstone Run:	
At confluence with Great Seneca Creek	*323
At a point approximately 1.4 miles upstream of the confluence with Great Seneca Creek	*343
Muddy Branch:	
At confluence with Muddy Branch Tributary 1	*330
Approximately 0.8 mile upstream of Interstate Route 270	*421
Muddy Branch Tributary 1:	
At confluence with Muddy Branch	*330
At a point approximately .5 mile upstream of the confluence with Muddy Branch	*345
Maps available for inspection at the County Department of Environmental Protection, Stormwater Management, 250 Hungerford Drive, Rockville, Maryland.	
MASSACHUSETTS	
Amesbury (town), Essex County (FEMA Docket No. 7034)	
Powwow River:	
Approximately 700 feet upstream of Lake Gardner Dam	*80
Approximately 100 feet downstream of upstream crossing of Newton Road	*95
Maps available for inspection at the Town Hall, Friend Street, Amesbury, Massachusetts.	
MISSOURI	
Hanley Hills (village), St. Louis County (FEMA Docket No. 7034)	
Northeast Branch River Des Peres:	
At downstream corporate limits	*541
At upstream corporate	*545
Maps available for inspection at the Village Hall, 7713 Utica Drive, St. Louis, Missouri.	
NEW HAMPSHIRE	
Grantham (town), Sullivan County (FEMA Docket No. 7034)	
North Branch Sugar River:	
At downstream corporate limits	*914
At confluence of Stocker and Sawyer Brooks	*959
Stocker Brook:	
At confluence with North Branch Sugar River	*959
Approximately .4 mile upstream of Interstate Route 89	*1,028
Sawyer Brook:	
At confluence with North Branch Sugar River	*959
Approximately .5 mile upstream of Yankee Barn Road	*978
Skinner Brook:	
At confluence with Sawyer Brook	*971
Approximately 150 feet upstream of State Route 10 (second crossing)	*1,003
Buttermut Brook:	
At confluence with Eastman Pond	*1,110
Approximately 0.6 mile upstream of Mill Pond Dam	*1,140
Stocker Pond Outlet Channel:	
At confluence with Stocker Brook	*1,026
At Divergence from Stocker Brook	*1,028
Eastman Pond: Entire shoreline within community	*1,110
Stocker Pond: Entire shoreline within community	*1,026
Maps available for inspection at the Town Office Vault, Town Office, Grantham, New Hampshire.	
South Hampton (town), Rockingham County (FEMA Docket No. 7034)	
Powwow River:	
At downstream corporate limits	*90
Approximately 1,050 feet upstream of Chase Road	*105
Grassy Brook:	
Approximately .5 mile downstream of Main Avenue	*102
Approximately 800 feet upstream of Main Avenue	
Maps available for inspection at the Town Hall, 255 Kilidale Avenue, South Hampton, New Hampshire.	
NEW JERSEY	
Fairfield (township), Cumberland County (FEMA Docket No. 7037)	
Delaware Bay & its estuaries: Entire shoreline within community	*9
Maps available for inspection at the Township Municipal Building, Ferton-Gouldtown Road, Route 553, Fairton, New Jersey.	
Greenwich (township), Cumberland County (FEMA Docket No. 7037)	
Delaware Bay:	
At confluence of the Cohansey River	*9
At confluence of Stow Creek	*9
Maps Available for Inspection at the Township Clerk's Residence, Ye Great Street, Greenwich, New Jersey.	
OHIO	
Crestline (city), Crawford and Richland Counties (FEMA Docket No. 7037)	
East Branch Sandusky River:	
About 340 feet downstream of Thrush Avenue	*1132

BILLING CODE 6718-03-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 13 and 80

[PR Docket No. 90-480; FCC 92-19]

Maritime Radio Services

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Parts 13 and 80 are amended to implement the Global Maritime Distress and Safety System (GMDSS) in the Commission's Rules. The new system will ultimately change international distress communications from manual ship-to-ship system based on 500 kHz Morse code telegraphy to an automated ship-to-shore system based on satellites and digital technology. The new carriage requirements apply to cargo ships of 300 gross tons and over and passenger ships, irrespective of size, that carry more than twelve passengers that sail internationally or in the open sea. The changes do not relieve ships from the requirements specified in the Communications Act of 1934, as amended (Communications Act). Ships that carry radiotelegraphy equipment must continue to carry radio officers until the Communications Act is amended.

DATES: Effective April 15, 1992. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 15, 1992.

FOR FURTHER INFORMATION CONTACT: Kathryn S. Hosford or Sean White, Special Services Division, Private Radio Bureau, Federal Communications Commission, Washington, DC 20554; or telephone (202) 632-7197/7175.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, PR Docket No. 90-480, adopted January 16, 1992, and released February 7, 1992.

The complete text of the Report and Order is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The full text also may be purchased from the Commission's copy contractor: Downtown Copy Center, 1114 21st Street NW., Washington, DC 20037; telephone 202-452-1422.

Summary of Report and Order

1. This Report and Order sets forth the amendments that are necessary to implement international revisions to the Safety of Life at Sea (SOLAS) Convention, 1974, into the Commission's Rules. These amendments implement the Global Maritime Distress and Safety System (GMDSS) for U.S. ships that are subject to the SOLAS Convention or part II of title III of the Communications Act of 1934, as amended. These are cargo ships over 300 gross tons that sail on international voyages or in the open sea, and passenger ships regardless of size carrying more than twelve passengers that sail on international voyages or in the open sea. These ships are called "compulsory ships."

2. The new GMDSS rules do not change or cancel the distress communications requirements specified in part II of title III of the Communications Act. Ships fitting with the GMDSS must continue to carry the equipment and personnel specified by the Communications Act until such time as the Act is amended. In adopting the GMDSS provisions for U.S. vessels, the Commission stated that the GMDSS represented significant improvements for maritime safety such as, worldwide alerting, coordinated search and rescue operations, and dissemination of maritime safety information. It noted that the GMDSS provisions are mandated by the SOLAS Convention, to which the United States is signatory. Compared to a ship equipped under the current distress and safety system, the Commission found that the GMDSS will enhance a ship's ability to communicate during a distress by ensuring multiple communications options. It noted that if U.S. vessels are delayed in implementing the GMDSS, American lives and property could be at risk by perpetuating an outmoded ship-to-ship system that is rapidly being replaced by other nations. Consequently, the Commission found that early implementation of the GMDSS to be in the public interest.

3. The GMDSS differs from the current distress and safety system in several ways. First, communication equipment requirements are based primarily on the areas in which the ship operates, rather than the size of the ship. Second, the GMDSS is primarily a ship-to-shore system, designed to communicate with rescue authorities on shore, where the current system is primarily ship-to-ship. Finally, the GMDSS will ultimately replace the current manual Morse telegraphy system with satellite technology and digital selective calling (DSC) radios. This equipment uses voice and narrow-band direct printing telegraphy for communications.

4. Equipment carriage requirements under the GMDSS depend on the sea area in which the ship is operating. A sea area is established by individual countries by equipping their shore stations with appropriate medium frequency (MF), high frequency (HF), or very high frequency (VHF), or satellite facilities to "cover" particular segments of ocean. Sea Area A1 is defined as the area within VHF radiotelephone coverage of shore stations (approximately 20-30 nautical miles from shore). Sea Area A2 is defined as the area within MF radiotelephone coverage of shore stations (approximately 75-150 nautical miles from shore). Sea Area A3 is the area within coverage of an INMARSAT geostationary satellite (approximately 70 degrees North to 70 degrees South). Sea Area A4 is the area outside of INMARSAT satellite coverage, essentially the polar seas, and it relies on HF communications.

5. The particular GMDSS equipment required for each ship varies by sea area and may have several alternatives. Depending upon the areas of the sea in which they travel, compulsory ships are required to carry digital selective calling (DSC) radiotelephones operating in the MH, HF, or VHF bands. Under the GMDSS rules, ships may also carry satellite earth stations in lieu of HF equipment. All ships must carry an emergency position-indicating radiobeacon operating on 406 MHz (406 MHz EPIRB), a NAVTEX receiver to receive maritime safety information, and a search and rescue transponder (SART) operating in the 9 GHz band. In addition to the NAVTEX receiver, most ships will also be capable of receiving maritime safety information from either the INMARSAT system or via HF narrow-band direct-printing telegraphy. The specific equipment required to set forth in the attached rules.

6. The new rules require all compulsory ships to carry a 406 MHz EPIRB and the NAVTEX receiver by August 1, 1993. The remaining GMDSS requirements become mandatory on February 1, 1995, for newly constructed compulsory ships, and February 1, 1996, for all compulsory ships. Ships may voluntarily start fitting the GMDSS as soon as equipment is authorized by the Commission for GMDSS use. Manufacturers may start applying for authorization of its equipment in accordance with the new GMDSS requirements upon the effective date of this Report and Order.

7. The Commission also established a new class of radio operator's license for the GMDSS, called the GMDSS Radio Operator's License. Under the new rules, each GMDSS ship is required to carry a licensed GMDSS radio operator who has primary responsibility for radiocommunications during distress situations, plus a second licensed GMDSS radio operator for backup purposes. The GMDSS system requires the carriage of a licensed, proficient radio operator, but the GMDSS radio operator need not be a radio officer. The GMDSS rules also permit ship owners the flexibility to choose from three methods of maintenance allowed by the SOLAS Convention: Shore-based maintenance, at-sea maintenance, and duplication of equipment. Most U.S. ships will be required to use two of these methods. The Commission concluded that at-sea maintenance was not the only means to ensure the availability of radiocommunications during a distress situation.[1] Ships which elect the at-sea maintenance option, however, must carry licensed GMDSS radio maintainers. At present, holders of the existing First and Second Class Radiotelegraph Certificates (T-1 and T-2) and the General Radiotelephone Permit (G) will function as GMDSS radio maintainers. Indicating that this is an interim measure, the Commission encouraged the industry to examine this matter further and make recommendations regarding the qualification standards and licensing procedures for GMDSS radio maintainers.

[1] The Commission concluded that the three maintenance options provided by the SOLAS Convention satisfactorily address radiocommunication requirements. It noted that whether ships need additional personnel as a "general electronics technician" for maintaining non-radiocommunications equipment, is a matter under the jurisdiction of the Coast Guard.

8. The decisions contained herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new information collection, recordkeeping, labeling, disclosure, or record retention requirements which will increase the burden imposed on the public. The new category of license, the GMDSS Radio Operator's License, will require the same information of applicants as the current T-1, T-2, and G licenses. The labeling requirement for GMDSS equipment will require no information collection, but merely a notation that the equipment has been type accepted by the Commission.

9. Accordingly, *It is Ordered*, pursuant to the authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r), that parts 13 and 80 of the Commission's Rules *Are Amended* as set forth below.

10. *It is further ordered* That a copy of this Report and Order be provided to the Chief Counsel for Advocacy of the Small Business Administration.

11. *It is further ordered* That this proceeding is *Terminated*.

List of Subjects

Part 13

Commercial radio operator licenses, Radio.

Part 80

Coast stations, Communications equipment, Incorporation by reference, Marine safety, Ship stations, Telegraph, Telephone.

Donna R. Searcy,
Secretary.

Amended Rules

Parts 13 and 80 of title 47 of the Code of Federal Regulations are amended as follows:

PART 13—[AMENDED]

1. The authority citation for part 13 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082 as amended; 47 U.S.C. 154, 303.

2. In Section 13.2, paragraph (b)(7) is added to read as follows:

§ 13.3 Classification of operator licenses and endorsements.

* * * * *

(b) * * *

(7) GMDSS Radio Operator's License (general radio operator's certificate).

* * * * *

3. In Section 13.21, paragraph (a)(7) is added to read as follows:

§ 13.21 Examination elements.

* * * * *

(a) * * *

(7) *GMDSS operating practices.* Radio operating procedures and practices of the knowledge and qualifications enumerated below:

(i) Detailed practical knowledge of the operation of all GMDSS sub-systems and equipment;

(ii) Ability to send and receive correctly by radio telephone and narrow-band direct-printing telegraphy;

(iii) Detailed knowledge of the regulations applying to radiocommunications, knowlege of the documents relating to charges for radiocommunications and knowledge of those provisions of the International Convention for the Safety of Life at Sea which relate to radio; and

(iv) Sufficient knowledge of English to be able to express themselves satisfactorily both orally and in writing;

(v) Knowledge of and ability to perform each of the functions listed in § 80.1061 of this chapter.

(vi) Knowledge covering the requirements set forth in IMO Assembly Resolution on Training for Radio Personnel (GMDSS), Annex 3.

* * * * *

4. In Section 13.22, paragraph (b)(6) is added to read as follows:

§ 13.22 Required qualifications.

* * * * *

(b) * * *

(6) *GMDSS Radio Operator's License.* Written examinations covering elements 1, 2, and 7.

* * * * *

PART 80—STATIONS IN THE MARITIME SERVICES

5. The authority citation for part 80 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609; 3 UST 3450, 3 UST 4726, 12 UST 2377.

6. Part 80 is amended by adding subpart W, consisting of §§ 80.1065-80.1135, to read as follows:

* * * * *

Subpart W—Global Maritime Distress and Safety System (GMDSS)

General Provisions

80.1065 Applicability.

80.1067 Inspection of station.
80.1069 Maritime sea areas.
80.1071 Exemptions.
80.1073 Radio operator requirements for ship stations.
80.1074 Radio maintenance personnel for at-sea maintenance.
80.1075 Radio records.
80.1077 Frequencies.

Equipment Requirements for Ship Stations

80.1081 Functional requirements.
80.1083 Ship radio installations.
80.1085 Ship radio equipment—General.
80.1087 Ship radio equipment—Sea area A1.
80.1089 Ship radio equipment—Sea areas A1 and A2.
80.1091 Ship radio equipment—Sea areas A1, A2, and A3.
80.1093 Ship radio equipment—Sea areas A1, A2, A3, and A4.
80.1095 Survival craft equipment.
80.1099 Ship sources of energy.
80.1101 Performance standards.
80.1103 Equipment authorization.
80.1105 Maintenance requirements.

Operating Procedures for Distress and Safety Communications

80.1109 Distress, urgency, and safety communications.
80.1111 Distress Alerting.
80.1113 Transmission of a distress alert.
80.1115 Transmission of a distress alert by a station not itself in distress.
80.1117 Procedure for receipt and acknowledgement of distress alerts.
80.1119 Receipt and acknowledgement of distress alerts by coast stations and coast earth stations.
80.1121 Receipt and acknowledgement of distress alerts by ship stations and ship earth stations.
80.1123 Watch requirements for ship stations.
80.1125 Search and rescue coordinating communications.
80.1127 On-scene communications.
80.1129 Locating and homing signals.
80.1131 Transmissions of urgency communications.
80.1133 Transmissions of safety communications.
80.1135 Transmission of maritime safety information.

Subpart W—Global Maritime Distress and Safety System (GMDSS)

This subpart contains the rules applicable to the Global Maritime Distress and Safety System (GMDSS). Every ship of the United States subject to part II of title III of the Communications Act or the Safety Convention must comply with the provisions of this subpart. The rules in this subpart are to be read in conjunction with the applicable requirements contained elsewhere in this part; however, in case of conflict, the provisions of this subpart shall govern with respect to the GMDSS. For the purposes of this subpart, distress

and safety communications include distress, urgency, and safety calls and messages.

Note: No provision of this subpart is intended to eliminate, or in anyway modify, other requirements contained in this part with respect to part II of title III of the Communications Act.

General Provisions

§ 80.1065 Applicability.

(a) The regulations contained in § 80.1119 apply to public coast stations and coast earth stations as of February 1, 1992.

(b) The regulations contained within this subpart apply to all passenger ships regardless of size and cargo ships of 300 tons gross tonnage and upwards as follows:

(1) Ships must comply with §§ 80.1085(a)(4) and 80.1085(a)(6) not later than August 1, 1993.

(2) Ships constructed on or after February 1, 1992, must comply with § 80.1095 as of that date. All other ships must comply with § 80.1095 as of February 1, 1995.

(3) Ships constructed on or after February 1, 1995, must comply with all requirements of this subpart.

(4) Ships constructed before February 1, 1995, must comply with all requirements of this subpart as of February 1, 1999.

(5) During the period between February 1, 1992, and February 1, 1999, all ships must comply with:

(i) The requirements of this subpart;

(ii) The requirements of chapter IV of the International Convention for the Safety of Life at Sea, 1974, in force prior to February 1, 1992 (see subparts Q and R of this part); or

(iii) For ships operated solely on domestic voyages, the requirements of § 80.836.

(6) The expression "ships constructed" means "ships the keels of which are laid, or construction identificable with a specific ship begins and assembly of that ship has commenced comprising at least 50 tons gross tonnage or 1% of the estimated mass of all structural material, whichever is less.

(c) The requirements of this subpart do not modify the requirements for ships navigated on the Great Lakes or small passenger boats. The requirements contained in the Agreement Between the United States of America and Canada for Promotion of Safety on the Great Lakes by Means of Radio, 1973, continue to apply (see subpart T of this part). The requirements contained in part III of title III of the Communications Act continue to apply (see subpart S of this part).

(d) No provision in this subpart is intended to prevent the use by any ship, survival craft, or person in distress, of any means at their disposal to attract attention, make known their position and obtain help.

§ 80.1067 Inspection of station.

(a) Ships must have the required equipment inspected at least once every 12 months. If the ship is in compliance with the requirements of the Safety Convention, a Safety Certificate will be issued; if in compliance with the Communications Act, the license will be endorsed accordingly. The effective date of the ship safety certificate is the date the station is found to be in compliance or not later than one business day later.

(b) Certificates issued in accordance with the Safety Convention must be posted in a prominent and accessible place on the ship.

§ 80.1069 Maritime sea areas.

(a) For the purpose of this subpart, a ship's area of operation is defined as follows:

(1) *Sea area A1.* An area within the radiotelephone coverage of at least one VHF coast station in which continuous DSC alerting is available as defined by the International Maritime Organization.

(2) *Sea area A2.* An area, excluding sea area A1, within the radiotelephone coverage of at least one MF coast station in which continuous DSC alerting is available as defined by the International Maritime Organization.

(3) *Sea area A3.* An area, excluding sea areas A1 and A2, within the coverage of an INMARSAT geostationary satellite in which continuous alerting is available.

(4) *Sea area A4.* An area outside sea areas A1, A2 and A3.

(b) Maritime sea areas are delineated in the International Maritime Organization Publication GMDSS Master Plan of Shore-Based Facilities. The Master Plan can be purchased from the International Maritime Organization, 4 Albert Embankment, London SE1 7SR, United Kingdom.

§ 80.1071 Exemptions.

(a) In certain circumstances, partial or conditional exemptions may be granted to individual ships from the requirements of §§ 80.1085, 80.1087, 80.1089, 80.1091, and 80.1093 provided: such ships comply with the functional requirements of § 80.1081 and a showing is made that such an exemption will not have a material effect upon the general efficiency of the service for the safety of all ships.

(b) An exemption may be granted under paragraph (a) of this section only:

(1) If the conditions affecting safety are such as to render the full application of §§ 80.1085, 80.1087, 80.1089, 80.1091, and 80.1093 unreasonable or unnecessary or otherwise not in the public interest;

(2) In exceptional circumstances, for a single voyage outside the sea area or sea areas for which the ship is equipped; or

(3) Prior to February 1, 1999, when the ship will be taken permanently out of service within two years of a requirement date specified in § 80.1065.

§ 80.1073 Radio operator requirements for ship stations.

(a) Ships must carry at least two persons holding GMDSS Radio Operator's Licenses as specified in § 13.2 of this chapter for distress and safety radiocommunications purposes. The GMDSS Radio Operator's License qualifies personnel as GMDSS radio operator for the purposes of operating GMDSS radio installation, including basic equipment adjustments as denoted in knowledge requirements specified in § 13.21 of this chapter.

(1) One of the qualified GMDSS radio operators must be designated to have primary responsibility for radiocommunications during distress incidents.

(2) A second qualified GMDSS radio operator must be designated as backup for distress and safety radiocommunications.

(b) A qualified GMDSS radio operator, and a qualified backup, as specified in paragraph (a) of this section must be:

(1) Available to act as the dedicated radio operator in cases of distress as described in § 80.1109(a);

(2) Designated to perform as part of normal routine each of the applicable communications described in § 80.1109(b);

(3) Responsible for selecting HF DSC guard channels and receiving scheduled maritime safety information broadcasts;

(4) Designated to perform communications described in § 80.1109(c);

(5) Responsible for ensuring that the watches required by § 80.1123 are properly maintained; and

(6) Responsible for ensuring that the ship's navigation position is entered, either manually or automatically through a navigation receiver, into all installed DSC equipment at least every four hours while the ship is underway.

§ 80.1074 Radio maintenance personnel for at-sea maintenance.

(a) Ships that elect the at-sea option for maintenance of GMDSS equipment (see § 80.1105) must carry at least one person who qualifies as a GMDSS radio maintainer, as specified in paragraph (b) of this section, for the maintenance and repair of equipment specified in this subpart. This person may be, but need not be, the person designated as GMDSS radio operator as specified in § 80.1073.

(b) The following licenses qualify personnel as GMDSS radio maintainers to perform at-sea maintenance of equipment specified in this subpart. For the purposes of this subpart, no order is intended by this listing or the alphanumeric designator.

(1) T–1: First Class Radiotelegraph Operator's Certificate;

(2) T–2: Second Class Radiotelegraph Operator's Certificate;

(3) G: General Radiotelephone Operator License.

(c) While at sea, all adjustments of radio installations, servicing, or maintenance of such installations that may affect the proper operation of the GMDSS station must be performed by, or under the immediate supervision and responsibility of, a qualified GMDSS radio maintainer as specified in paragraph (b) of this section.

(d) The GMDSS radio maintainer must possess the knowledge covering the requirements set forth in IMO Assembly on Training for Radio Personnel (GMDSS), Annex 5 and IMO Assembly on Radio Maintenance Guidelines for the Global Maritime Distress and Safety System related to Sea Areas A3 and A4.

§ 80.1075 Radio records.

A record must be kept, as required by the Radio Regulations and § 80.409 (a), (b) and (e), of all incidents connected with the radiocommunication service which appear to be of importance to safety of life at sea.

§ 80.1077 Frequencies.

The following table describes the frequencies used in the Global Maritime Distress and Safety System:

Alerting:	
406 EPIRBs	406–406.1 MHz (Earth-to-space). 1544–1545 MHz (space-to-Earth).
INMARSAT A or C SES.	1628.5–1645.5 MHz (Earth-to-space).
VHF DSC Ch. 70	156.525 MHz [1].
MF/HF DSC [2]	2187.5 kHz [3], 4207.5 kHz, 6312 kHz, 8414.5 kHz, 12577 kHz, and 16804.5 kHz.
On-scene communications:	
VHF Ch. 16	156.8 MHz.
MF radiotelephony.	2182 kHz.
NBDP	2174.5 kHz.
Communications involving aircraft:	
On-scene, including search and rescue.	158.8 MHz [4], 121.5 MHz [5], 123.1 MHz, 136.9 MHz, 2182 kHz, 3023 kHz, 4125 kHz, and 5680 kHz [6].
Locating signals:	
406 MHz EPIRB beacons.	121.5 MHz.
9 GHz radar transponders.	9200–9500 MHz.
Maritime safety information (MSI):	
International NAVTEX.	518 kHz [7].
Warnings	490 kHz [8], 4209.5 kHz [9].
NBDP	4210 kHz, 6314 kHz, 8478.5 kHz, 12579 kHz, 16806.5 kHz, 19680.5 kHz, 22376 kHz, 26100.5 kHz.
Satellite	1530–1545 MHz (space-to-Earth) [10].
General distress and safety communications and calling:	
Satellite	1530–1544 MHz (space-to-Earth) and 1626.5–1645.5 (Earth-to-space) [10].
Radiotelephony	2182 kHz, 4125 kHz, 6215 kHz, 8291 kHz, 12290 kHz, 16420 kHz, and 156.8 MHz.
NBDP	2174.5 kHz, 4177.5 kHz, 6268 kHz, 8376.5 kHz, 12580 kHz, and 16695 kHz.
DSC	2187.5 kHz, 4207.5 kHz, 6312 kHz, 8414.5 kHz, 12577 kHz, 16804.5 kHz, and 156.525 MHz.
Survival craft:	
VHF radiotelephony.	156.8 MHz and one other 156–174 MHz frequency.
9 GHz radar transponders.	9200–9500 MHz.

[1] Frequency 156.525 MHz can be used for ship-to-ship alerting and, if within sea area A1, for ship-to-shore alerting.

[2] For ships equipped with MF/HF equipment, there is a watch requirement on 2187.5 kHz, 8414.5 kHz, and one other frequency.

[3] Frequency 2187.5 kHz can be used for ship-to-ship alerting and, if within sea areas A2, for ship-to-shore alerting.

[4] Frequency 156.8 MHz may also be used by aircraft for safety purposes only.

[5] Frequency 121.5 MHz may be used by ships for aeronautical distress and urgency purposes.

[6] The priority of use for ship-aircraft communications in 4125 kHz, then 3023 kHz. Additionally, frequencies 123.1 MHz, 3023 kHz, and 5680 kHz can be used by land stations engaged in coordinated search and rescue operations.

[7] The international NAVTEX frequency 518 kHz is the primary frequency for receiving maritime safety information. The other frequencies are used only to augment the coverage or information provided on 518 kHz.

[8] Frequency 490 kHz cannot be used for MSI employing NBDP transmissions until February 2, 1999.

[9] Frequency 4209.5 kHz is not used in the United States (see 47 CFR 2.106 footnote 539A).

[10] In addition to EPIRBs, 1544–1545 MHz can be used for narrowband distress and safety operations and 1645.5–1646.5 MHz can be used for relay of distress alerts between satellites. Feeder links for satellite communications are assigned from the fixed satellite service, see 47 CFR 2.106.

Equipment Requirements for Ship Stations

§ 80.1081 Functional requirements.

Ships, while at sea, must be capable:

(a) Except as provided in §§ 80.1087(a)(1) and 80.1091(a)(4)(iii), of transmitting ship-to-shore distress alerts by at least two separate and independent means, each using a different radiocommunication service;

(b) Of receiving shore-to-ship distress alerts;

(c) Of transmitting and receiving ship-to-ship distress alerts;

(d) Of transmitting and receiving search and rescue co-ordinating communications;

(e) Of transmitting and receiving on-scene communications;

(f) Of transmitting and receiving signals for locating;

(g) Of transmitting and receiving maritime safety information;

(h) Of transmitting and receiving general radiocommunications to and from shore-based radio systems or networks; and

(i) Of transmitting and receiving bridge-to-bridge communications.

§ 80.1083 Ship radio installations.

(a) Ships must be provided with radio installations capable of complying with the functional requirements prescribed by § 80.1081 throughout its intended voyage and, unless exempted under § 80.1071, complying with the requirements of § 80.1085 and, as appropriate for the sea area of areas through which it will pass during its intended voyage, the requirements of either §§ 80.1087, 80.1089, 80.1091, or 80.1093.

(b) The radio installation must:

(1) Be so located that no harmful interference of mechanical, electrical or other origin affects its proper use, and so as to ensure electromagnetic compatibility and avoidance of harmful interaction with other equipment and systems;

(2) Be so located as to ensure the greatest possible degree of safety and operational availability;

(3) Be protected against harmful effects of water, extremes of temperature and other adverse environmental conditions;

(4) Be provided with reliable, permanently arranged electrical lighting, independent of the main and emergency sources of electrical power, for the adequate illumination of the radio controls for operating the radio installation; and

(5) Be clearly marked with the call sign, the ship station identity and other codes as applicable for the use of the radio installation.

(c) Control of the VHF radiotelephone channels required for navigational safety must be immediately available on the navigating bridge convenient to the conning position and, where necessary,

facilities should be availalbe to permit radiocommunications from the wings of the navigating bridge. Portable VHF equipment may be used to meet the latter provision.

§ 80.1085 Ship radio equipment—General.

This section contains the general equipment requirements for all ships subject to this subpart.

(a) Ships must be provided with:

(1) A VHF radio installation capable of transmitting and receiving:

(i) DSC on the frequency 156.525 MHz (channel 70), and it must be able to initiate the transmission of distress alerts on channel 70 from the position from which the ship is normally navigated; and

(ii) Radiotelephony on the frequencies 156.300 MHz (channel 6), 156.650 MHz (channel 13), and 156.800 MHz (channel 16);

(2) A dedicated, non-scanning radio installation capable of maintaining a continuous DSC watch on VHF channel 70 which may be separate from, or combined with, that required by paragraph (a)(1)(i) of this section;

(3) A radar transponder capable of operating in the 9 GHz bank, which must be stowed so that it is easily utilized (this transponder may be one of those required by § 80.1095(b) for a survival craft);

(4) A receiver capable of receiving international NAVTEX service broadcasts;

(5) If the ship is engaged on voyages in any area of INMARSAT coverage in which an international NAVTEX service is not provided, a radio facility for reception of maritime safety information by the INMARSAT enhanced group calling system, *i.e.*, SafetyNet, (this requirement does not apply to ships engaged exclusively on voyages in areas where an HF direct-printing telegraphy maritime safety information service, as identified by the IMO GMDSS Master Plan Publication, is provided and the ship is fitted with equipment capable of receiving such service); and

(6) A satellite emergency position-indicating radio beacon (satellite EPIRB) which must be:

(i) Capable of transmitting a distress alert through the polar orbiting satellite service operating in the 406 MHz band (406 MHz EPIRB); and

(ii) Installed in an easily accessible position, ready to be manually released and capable of being carried by one person into a survival craft, capable of floating free if the ship sinks and of being automatically activated when afloat, and capable of being activated manually.

(b) Until February 1, 1999, all ships must be equipped with a radio installation consisting of a radiotelephone distress frequency 2182 kHz watch receiver prescribed by § 80.807. This requirement does not apply to ships constructed on or after February 1, 1997.

(c) Until February 1, 1999, all ships, except ships engaged on voyages in sea area A1 only, must be equipped with a device for generating the 2182 kHz radiotelephone alarm signal as prescribed by § 80.807. This requirement does not apply to ships constructed on or after February 1, 1997.

(d) Ships must carry the most recent edition of the IMO publication entitled *GMDSS Master Plan of Shore-Based Facilities*. Notice of new editions will be published in the **Federal Register** and copies may be obtained from: International Maritime Organization, 4 Albert Embankment, London SE1 7SR, United Kingdom.

§ 80.1087 Ship radio equipment—Sea area A1.

This section contains the additional equipment requirements for ships that remain within sea area A1 at all times.

(a) In addition to meeting the requirements of § 80.1085, ships engaged on voyages exclusively in sea area A1 must be provided with a radio installation capable of initiating the transmission of ship-to-shore distress alerts from the position from which the ship is normally navigated, operating either:

(1) On VHF using DSC; or

(2) Through the polar orbiting satellite service on 406 MHz (this requirement may be fulfilled by the 406 MHz EPIRB, required by § 80.1085(a)(6), either by installing the 406 MHz EPIRB close to, or by allowing remote activation from, the position from which the ship is normally navigated); or

(3) On MF using DSC if the ship is engaged on voyages within coverage of MF coast stations equipped with DSC; or

(4) On HF using DSC; or

(5) Through the INMARSAT geostationary satellite service if within INMARSAT coverage. This requirement may be fulfilled by an INMARSAT ship earth station capable of two way communication.

(b) The VHF radio installation, required by § 80.1085(a)(1), must also be capable of transmitting and receiving general radiocommunications using radiotelephony.

§ 80.1089 Ship radio equipment—Sea areas A1 and A2.

This section contains the additional equipment requirements for ships that remain within sea areas A1 or A2 at all times. Ships fitting in accordance with this section satisfy the sea area A1 requirements denoted in § 80.1087.

(a) In addition to meeting the requirements of § 80.1085, ships engaged on voyages beyond sea area A1, but remaining within sea area A2, must be provided with:

(1) An MF radio installation capable of transmitting and receiving, for distress and safety purposes, on the frequencies:

(i) 2187.5 kHz using DSC; and

(ii) 2182 kHz using radiotelephony;

(2) A radio installation capable of maintaining a continuous DSC watch on the frequency 2187.5 kHz which may be separate from or combined with, that required by paragraph (a)(1)(i) of this section; and

(3) Means of initiating the transmission of ship-to-shore distress alerts by a radio service other than MF operating either:

(i) Through the polar orbiting satellite service on 406 MHz (this requirement may be fulfilled by the 406 MHz EPIRB required by § 80.1085(a)(6), either by installing the 406 MHz EPIRB close to, or by allowing remote activation from, the position from which the ship is normally navigated); or

(ii) On HF using DSC; or

(iii) Through the INMARSAT geostationary satellite service if within INMARSAT coverage; this requirement may be fulfilled by an INMARSAT ship earth station.

(b) It must be possible to initiate transmission of distress alerts by the radio installations specified in paragraphs (a)(1) and (a)(3) of this section from the position from which the ship is normally navigated.

(c) Ships subject to this section must be capable of transmitting and receiving general radiocommunications using radiotelephony or direct-printing telegraphy by either:

(1) A radio installation operating on working frequencies in the bands between 1605–4000 kHz or between 4000–27500 kHz (this requirement may be fulfilled by the addition of this capability to the equipment required by paragraph (a)(1) of this section); or

(2) An INMARSAT ship earth station.

§ 80.1091 Ship radio equipment—Sea areas A1, A2, and A3.

This section contains the additional equipment requirements for ships that remain within sea areas A1, A2, or A3 at all times. Ships fitting in accordance with this section satisfy the requirements denoted in §§ 80.1087 or 80.1089 for sea-areas A1 and A2. Ships fitting in accordance to this section have the option to comply with either the requirements of paragraph (a) or (b) of this section.

(a) In addition to meeting the requirements of § 80.1085, ships subject to this section must be provided with:

(1) An INMARSAT ship earth station capable of:

(i) Transmitting and receiving distress and safety communications using direct-printing telegraphy;

(ii) Initiating and receiving distress priority calls;

(iii) Maintaining watch for shore-to-ship distress alert, including those directed to specifically defined geographical areas;

(iv) Transmitting and receiving general radiocommunications, using either radiotelephony or direct-printing telegraphy; and

(2) An MF radio installation capable of transmitting and receiving, for distress and safety purposes, on the frequencies:

(i) 2187.5 kHz using DSC; and

(ii) 2182 kHz using radiotelephony; and

(3) A radio installation capable of maintaining a continuous DSC watch on the frequency 2187.5 kHz which may be separate from or combined with that required by paragraph (a)(2)(i) of this section; and

(4) Means of initiating the transmission of ship-to-shore distress alerts by a radio service operating either:

(i) Through the polar orbiting satellite service on 406 MHz (this requirement may be fulfilled by the 406 MHz EPIRB required by § 80.1085(a)(6), either by installing the 406 MHz EPIRB close to, or by allowing remote activation from, the position from which the ship is normally navigated); or

(ii) On HF using DSC; or

(iii) Through the INMARSAT geostationary satellite service, by an additional ship earth station.

(b) In addition to meeting the requirements of § 80.1085, ships subject to this section must be provided with:

(1) An MF/HF radio installation capable of transmitting and receiving on all distress and safety frequencies in the bands between 1605–27500 kHz using DSC, radiotelephony, and narrow-band direct-printing telegraphy; and

(2) Equipment capable of maintaining DSC watch on 2187.5 kHz, 8414.5 kHz and on at least one of the distress and safety DSC frequencies 4207.5 kHz, 6312 kHz, 12577 kHz, or 16804.5 kHz although it must be possible to select any of these DSC distress and safety frequencies at any time (this equipment may be separate from, or combined with, the equipment required by paragraph (b)(1) of this section); and

(3) Means of initiating the transmission of ship-to-shore distress alerts by a radiocommunication service other than HF operating either:

(i) Through the polar orbiting satellite service on 406 MHz (this requirement may be fulfilled by the 406 MHz EPIRB required by § 80.1085(a)(6), either by installing the 406 MHz EPIRB close to, or by allowing remote activation from, the position from which the ship is normally navigated; or

(ii) Through the INMARSAT geostationary satellite service (this requirement may be fulfilled by an INMARSAT ship earth station).

(4) In addition, ships must be capable of transmitting and receiving general radiocommunications using radiotelephony or direct-printing telegraphy by an MF/HF radio installation operating on working frequencies in the bands between 1605–4000 kHz and between 4000–27500 kHz (this requirement may be fulfilled by the addition of this capability to the equipment required by paragraph (b)(1) of this section).

(c) It must be possible to initiate transmission of distress alerts by the radio installations specified in paragraphs (a)(1), (a)(2), (a)(4), (b)(1), and (b)(3) of this section from the position from which the ship is normally navigated.

§ 80.1093 Ship radio equipment—Sea areas A1, A2, A3 and A4.

This section contains the additional equipment requirements for ships that sail in all sea areas, *i.e.*, sea areas A1, A2, A3, and A4. Ships fitting in accordance with this section satisfy the requirements denoted in §§ 80.1087, 80.1089, and 80.1091 for sea areas A1, A2, and A3.

(a) In addition to meeting the requirements of § 80.1085, ships engaged on voyages in all sea areas must be provided with the radio installations and equipment required by § 80.1091(b), except that the equipment required by § 80.1091(b)(3)(ii) cannot be accepted as an alternative to that required by regulation § 80.1091(b)(3)(i), which must always be provided.

(b) Ships engaged on voyages in all sea areas also must comply with the requirements of § 80.1091(c).

§ 80.1095 Survival craft equipment.

(a) At least three two-way VHF radiotelephone apparatus must be provided on every passenger ship and on every cargo ship of 500 tons gross tonnage and upwards. At least two two-way VHF radiotelephone apparatus must be provided on every cargo ship of between 300–500 tons gross tonnage. Portable two-way VHF radiotelephones must be stowed in such locations that they can be rapidly placed in any survival craft other than liferafts required by Regulation III/26.1.4 of the SOLAS Convention. Alternatively, survival craft may be fitted with a fixed two-way VHF radiotelephone installation. Two-way VHF radiotelephone apparatus, portable or fixed, must conform to performance standards as specified in § 80.1101. Two-way VHF radiotelephone apparatus provided on board ships prior to February 1, 1992, and not complying fully with the performance standards specified in § 80.1101, may be used until February 1, 1999, provided it is compatible with approved two-way VHF radiotelephone apparatus.

(b) At least one radar transponder must be carried on each side of every passenger ship and every cargo ship of 500 tons gross tonnage and upwards. At least one radar transponder must be carried on every cargo ship of 300 tons gross tonnage and upwards but less than 500 tons gross tonnage. Such radar transponders must conform to performance standards as specified in § 80.1101. The radar transponders must be stowed in such locations that they can be rapidly placed in any survival craft other than liferafts required on cargo ships in forward and aft areas (see Regulation III/26.1.4 of the SOLAS Convention). Alternatively, one radar transponder must be stowed in each survival craft other than those required by Regulation III/26.1.4 of the SOLAS Convention. One of these radar transponders may be radar transponder required by § 80.1085(a)(3).

(c) Survival craft equipment must be tested at intervals not to exceed twelve months. For batteries used for survival craft equipment, the month and year of its manufacture must be permanently marked on the battery. Also, the month and year upon which 50 percent of its useful life will expire must be permanently marked on both the battery and the outside of the transmitter. Batteries must be replaced if 50 percent of their useful life has expired or if the transmitter has been used in an emergency situation.

§ 80.1099 Ship sources of energy.

(a) There must be available at all times, while the ship is at sea, a supply of electrical energy sufficient to operate

the radio installations and to charge any batteries used as part of a reserve source of energy for the radio installations.

(b) A reserve source of energy to supply radio installations must be provided on every ship for the purpose of conducting distress and safety radiocommunications, in the event of failure of the ship's main and emergency sources of electrical power. The reserve sources of energy must be capable of simultaneously operating the VHF radio installation required by § 80.1085(a)(1) and, as appropriate for the sea area or sea areas for which the ship is equipped, either the MF radio installation required by § 80.1089(a)(1), the MF/HF radio installation required by §§ 80.1091(a)(2)(i) or 80.1093(a), or the INMARSAT ship earth station required by § 80.1091(a)(1) and any of the additional loads mentioned in paragraphs (d), (e) and (h) of this section for a period of at least:

(1) One hour, on ships constructed on or after February 1, 1995;

(2) One hour, on ships constructed before February 1, 1995, if the emergency source of electrical power complies fully with all relevant requirements of SOLAS, Chapter II–1, Regulation 42 or 43 (as amended); or

(3) Six hours, on ships constructed before February 1, 1995, and on cargo ships of less than 500 tons gross tonnage, if the emergency source of electrical power is not provided or does not comply fully with all relevant requirements of SOLAS, Chapter II–1, Regulation 42 or 43 (as amended).

(c) The reserve sources of energy need not supply independent HF and MF radio installations at the same time. The reserve sources of energy must be independent of the propelling power of the ship and the ship's electrical system.

(d) Where, in addition to the VHF radio installation, two or more of the other radio installations, referred to in paragraph (b) of this section, can be connected to the reserve sources of energy, they must be capable of simultaneously supplying, for one hour, as specified in paragraph (b) of this section, the VHF radio installation and:

(1) All other radio installations which can be connected to the reserve sources of energy at the same time; or

(2) Whichever of the other radio installations will consume the most power, if only one of the other radio installations can be connected to the reserve sources of energy at the same time as the VHF radio installation.

(e) The reserve sources of energy may be used to supply the electrical lighting required by § 80.1083(b)(4).

(f) Where a reserve source of energy consists of a rechargeable accumulator battery or batteries:

(1) A means of automatically charging such batteries must be provided which must be capable of recharging them to minimum capacity requirements within 10 hours; and

(2) The capacity of the battery or batteries must be checked, using an appropriate method, at intervals not exceeding 12 months. These checks must be performed when the vessel is not at sea.

(g) The accumulator batteries which provide a reserve source of energy must be installed to ensure: The highest degree of service, a reasonable lifetime, reasonable safety; that the battery temperatures remain within the manufacturer's specifications whether under charge or idle; and that when fully charged, the batteries will provide at least the minimum required hours of operation under all weather conditions.

(h) If an uninterrupted input of information from the ship's navigational or other equipment to a radio installation required by this subpart is needed to ensure its proper performance, means must be provided to ensure the continuous supply of such information in the event of failure of the ship's main or emergency source of electrical power.

(i) An uninterruptible power supply or other means of ensuring a continuous supply of electrical power, within equipment tolerances, shall be provided to all GMDSS equipment that could be affected by normal variations and interruptions of ship's power.

§ 80.1101 Performance standards.

(a) The abbreviations used in this section are as follows:

(1) International Maritime Organization (IMO).

(2) International Telegraph and Telephone Consultative Committee (CCITT).

(3) International Electrotechnical Commission (IEC).

(4) International Organization for Standardization (ISO).

(5) International Radio Consultative Committee (CCIR).

(b) All equipment specified in this subpart must meet the general requirements for shipboard equipment as listed below which are incorporated by reference.

(1) IMO Resolution A.694(17), "General Requirements for Shipborne Radio Equipment Forming Part of the Global Maritime Distress and Safety System (GMDSS) and for Electronic Navigational Aids," adopted 6 November 1991.

(2) CCITT Recommendation E.161, "Arrangement of Figures, Lettters and Symbols on Telephones and Other Devices that Can Be Used for Gaining Access to a Telephone Network," 1988.

(3) CCITT Recommendation Q.11, "Numbering Plan for the International Telephone Service," 1988.

(4) IEC Publication 92–101, "Electrical Installations in Ships," Third Edition 1980 with amendments through 1984.

(5) IEC Publication 533, "Electromagnetic Compatibility of Electrical and Electronic Installations in Ships," First Edition 1977.

(6) IEC Publication 945, "Marine Navigational Equipment," First Edition 1988.

(7) ISO Standard 3791, "Office Machines and Data Processing Equipment—Keyboard Layouts for Numeric Applications," First Edition 1976(E).

(c) The equipment specified in this subpart must also conform to the appropriate performance standards listed below which are incorporated by reference.

(1) *NAVTEX receivers*: (i) IMO Resolution A.525(13), "Performance Standards for Narrow-band Direct Printing Telegraph Equipment for the Reception of Navigational and Meteorological Warnings and Urgent Information to Ships," adopted 17 November 1983.

(ii) CCIR Recommendation 540–2, "Operational and Technical Characteristics for an Automated Direct-printing Telegraph System for Promulgation of Navigational and Meteorological Warnings and Urgent Information to Ships," 1990.

(2) *VHF radio equipment*: (i) IMO Resolution A.609(15), "Performance Standards for Shipborne VHF Radio Installations Capable of Voice Communication and Digital Selective Calling," adopted 19 November 1987.

(ii) CCIR Recommendation 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(3) *MF radio equipment*: (i) IMO Resolution A.610(15), "Performance Standards for Shipborne MF Radio Installations Capable of Voice Communication and Digital Selective Calling," adopted 19 November 1987.

(ii) CCIR Recommendation 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(4) *MF/HF radio equipment:* (i) IMO Resolution A.613(15), "Performance Standards for Shipborne MF/HF Radio Installations capable of Voice Communication, Narrow-band Direct Printing and Digital Selective Calling," adopted 19 November 1987.

(ii) CCIR Recommendations 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(iii) CCIR Recommendation 625–1, "Direct-printing Telegraph Equipment Employing Automatic Identification in the Maritime Mobile Service," 1990. Equipment may conform to CCIR Recommendation 476–4, "Direct-Printing Telegraph Equipment in the Maritime Mobile Service," 1986, in lieu of CCIR Recommendation 625–1, where such equipment was installed on ships prior to February 1, 1993.

(5) *406 MHz EPIRBs*:

(i) IMO Resolution A.611(15), "Performance Standards for Float-free Satellite Emergency Position-indicating Radio Beacons Operating on 406 MHz," adopted 19 November 1987.

(ii) IMO Resolution A.662(16), "Performance Standards for Float-free Release and Activation Arrangements for Emergency Radio Equipment," adopted 19 October 1989.

(iii) CCIR Recommendation 633–1, "Transmission Characteristics of a Satellite Emergency Position-indicating Radiobeacon (Satellite EPIRB) System Operating Through a Low Polar-orbiting Satellite System in the 406 MHz Band," 1990.

(iv) The 406 MHz EPIRBs must also comply with § 80.1061.

(6) *9 GHz radar transponders*: (i) IMO Resolution A.604(15), "Performance Standards for Survival Craft Radar Transponders for Use in Search and Rescue Operations," adopted 19 November 1987.

(ii) CCIR Recommendation 628–1, Technical Characteristics for Search and Rescue Radar Transponders," 1990.

(7) *Two-way VHF radiotelephone.* IMO Resolution A.605(15), "Performance Standards for Survival Craft Two-way VHF Radiotelephone Apparatus," adopted 19 November 1987.

(8) *INMARSAT–A SES:* (i) IMO Resolution A.698(17), "Performance Standards for Ship Earth Stations Capable of Two-way Communications," adoted 6 November 1991.

(ii) CCIR Recommendation 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(9) *INMARSAT–C SES:* (i) IMO Resolution A.663(16), "Performance Standards for INMARSAT Standard–C Ship Earth Stations Capable of Transmitting and Receiving Direct-printing Communications," adopted 19 October 1989.

(ii) CCIR Recommendation 493–4, "Digital Selective-calling System for use in the Maritime Mobile Service," 1990.

(10) *INMARSAT EGC:* IMO Resolution A.664(16), "Performance Standards for Enhanced Group Call Equipment," adopted 19 October 1989.

(d) The above-referenced documents have been approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Identification data and place to purchase for each of the above-referenced documents are listed as follows:

(1) Copies of IMO Resolutions, the 1974 SOLAS Convention, and the 1983 and 1988 amendments to the 1974 SOLAS Convention can be purchased from Publications, International Maritime Organization, 4 Albert Embankment, London SE1 7SR, United Kingdom.

(i) IMO Resolution A.525(13) is contained in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 13th Session, 1983, (IMO, London, 1984), Sales Number 073 84.07.E.

(ii) IMO Resolutions A.604(15), A.605(15), A.609(15), A.610(15), A.611(15) and A.613(15) are contained in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 15th Session, 1987, (IMO, London, 1988), Sales Number 130 88.03.E.

(iii) IMO Resolutions A.662(16), A.663(16) and A.664(16) are contained in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 16th Session, 1989, (IMO, London, 1990), Sales Number 136 90.04.E.

(iv) IMO Resolutions A.694(17) and A.698(17) can be ordered from IMO by requesting "A.694 and A.698 from the seventeenth session" until they are published in the Resolutions and Other Decisions of the Assembly of the International Maritime Organization, 17th Session, 1991.

(2) CCIR Recommendations, ITU Radio Regulations, and CCITT publications can be purchased from the International Telecommunications Union (ITU), Place des Nations, CH–1211 Geneva 20, Switzerland.

(i) All CCIR Recommendations referenced in this Section are contained in Recommendations of the CCIR, 1990, Volume VIII, (ITU, Geneva, 1990), 92–61–0424104.

(ii) CCITT Recommendation E.161 is contained in CCITT Volume II—Telephone and Network ISDN—Operation, Numbering, Routing and Mobile Service, (ITU, Geneva, 1989), ISBN 92–61–03261–3.

(iii) CCITT Recommendation Q.11 is contained in CCITT Blue Book Volume VI, General Recommendation on Telephone Switching and Signalling, (ITU, Geneva, 1989), ISBN 92–61–03451–9.

(3) IEC Publications can be purchased from the International Electrotechnical Commission, 3 Rue de Varembe, CH–1211 Geneva 20, Switzerland, or from the American National Standards Institute (ANSI), 11 West 42nd Street, New York, NY 10036, telephone (212) 642–4900.

(4) ISO Standards can be purchased from the International Organization for Standardization, 1 Rue de Varembe, CH–1211 Geneva 20, Switzerland, or from the American National Standards Institute (ANSI), 11 West 42nd Street, New York, NY 10036, telephone (212) 642–4900.

(5) Copies of the publications listed in this Section that are incorporated by reference may be inspected at the Federal Communications Commission, 1919 M Street NW, Dockets Branch (Room 239), Washington, DC. or at the Office of the Federal Register, 1100 L Street, NW., room 8401, Washington, DC.

§ 80.1103 Equipment authorization.

(a) All equipment specified § 80.1101(b) must be type accepted in accordance with 47 CFR part 2, except equipment used in the INMARSAT space segment. Equipment intended for use in the INMARSAT space segment must be type-approved by INMARSAT and notified in accordance with 47 CFR part 2. The technical parameters of the equipment must conform to the performance standards as specified in § 80.1101.

(b) Applicants for type acceptance must submit with their applications measurement data sufficiently complete to ensure compliance with the technical parameters. The application must include the items listed in 47 CFR 2.983. Additional measurement data or information may be requested depending upon the equipment. For items not listed in § 2.983 of this chapter, the applicant must attest that the equipment complies with performance standards as specified in § 80.1101 and, where applicable, that measurements have been made that demonstrate the necessary compliance. Submission of representative data demonstrating compliance is not required unless requested by the Commission.

(c) Applicants for notification must attest that the equipment complies with performance standards as specified in § 80.1101 and, where applicable, that measurements have been made that demonstrate the necessary compliance. Submission of representative data demonstrating compliance is not

required unless requested by the Commission. An application must include the items listed in § 2.975 of this chapter and a copy of the INMARSAT type approval certificate indicating that equipment meets GMDSS standards and includes all peripheral equipment associated with the specific unit under review.

(d) Submission of a sample unit is not required unless specifically requested by the Commission.

(e) In addition to the requirements in part 2 of this chapter, equipment specified in § 80.1101(b) shall be labelled as follows: "This device complies with the GMDSS provisions of Part 80 of the FCC Rules."

§ 80.1105 Maintenance requirements.

(a) Equipment must be so designed that the main units can be replaced readily, without elaborate recalibration or readjustment. Where applicable, equipment must be constructed and installed so that it is readily accessible for inspection and on-board maintenance purposes. Adequate information must be provided to enable the equipment to be properly operated and maintained (see IMO Resolution A.569(14)).

(b) Radio equipment required by this subpart must be maintained to provide the availability of the functional requirements specified in § 80.1081 and to meet the performance standards specified in § 80.1101.

(c) On ships engaged on voyages in sea areas A1 and A2, the availability must be ensured by duplication of equipment, shore-based maintenance, or at-sea electronic maintenance capability, or a combination of these.

(d) On ships engaged on voyages in sea areas A3 and A4, the availability must be ensured by using a combination of at least two of the following methods: duplication of equipment, shore-based maintenance, or at-sea electronic maintenance capability.

(e) Irrespective of the maintenance methods used, a ship must not depart from any port unless and until the ship is capable of performing all distress and safety functions as specified in § 80.1081.

(f) Irrespective of the maintenance methods used, all manufacturers' instruction manuals and maintenance manuals for each piece of equipment required and installed must be available on-board ship. Adequate tools, spare parts, and test equipment appropriate to the methods used by the ship as recommended by the manufacturer should be provided. The manuals, tools, spare parts, and test equipment, as applicable, should be readily accessible.

(g) If the duplication of equipment maintenance method is used, the following radio installations, in addition to other equipment requirements specified in this subpart, must be available on-board ships for their sea areas as applicable. Equipment carried in accordance with this paragraph must comply with §§ 80.1101 and 80.1103. Additionally, each radio installation must be connected to a separate antenna and be installed and be ready for immediate operation.

(1) Ships, equipped in accordance with § 80.1067 for sea area A1, must carry a VHF radio installation complying with the requirements of § 80.1085(a)(1).

(2) Ships, equipped in accordance with § 80.1069 for sea areas A1 and A2, must carry a VHF radio installation complying with the requirements of § 80.1085(a)(1) and an MF radio installation complying with the requirements of § 80.1069(a)(1) and being able to fully comply with watch requirements as specified in § 80.1123(a)(2). The MF radio installation installed for duplication must also comply with the requirements § 80.1069(c).

(3) Ships, equipped in accordance with § 80.1091 for sea areas A1, A2, and A3, must carry a VHF radio installation complying with the requirements of § 80.1085(a)(1) and either an MF/HF radio installation complying with the requirements of § 80.1091(b)(1) and being able to fully comply with watch requirements as specified in § 80.1123(a)(2) or an INMARSAT ship earth station complying with the requirements of § 80.1091(a)(1). The MF/HF radio installation or the INMARSAT ship earth station installed for duplication must also comply with the requirements § 80.1091(c).

(4) Ships, equipped in accordance with § 80.1093 for sea areas A1, A2, A3, and A4, must carry a VHF radio installation complying with the requirement of § 80.1085(a)(1) and an MF/HF radio installation complying with the requirements of § 80.1091(b)(1) and being able to fully comply with watch requirements as specified in § 80.1123(a)(2). The MF/HF radio installation installed for duplication must also comply with the requirements § 80.1091(c).

(h) The radio installations specified in paragraph (g) of this section (referred as "duplicated equipment"), in addition to the appropriate radio equipment specified in § 80.1099 (referred as "basic equipment"), must be connected to the reserve sources of energy required by § 80.1099. The capacity of the reserve sources of energy should be sufficient to operate the particular installation (*i.e.*, the basic equipment or the duplicated equipment) with the highest power consumption, for the appropriate period specified in § 80.1099. However, the arrangement for the reserve sources of energy must be such that a single fault in this arrangement cannot affect both the basic and the duplicated equipment.

(i) If the shore-based maintenance method is used, the following requirements apply.

(1) Maintenance services must be completed and performance verified and noted in the ship's record before departure from the first port of call entered after any failure occurs.

(2) Each GMDSS equipment must be tested and performance verified and the results noted in the ship's record before departure from every port. To accomplish this, each ship shall carry a performance checkoff sheet listing each GMDSS equipment carried on a mandatory basis.

(j) If the at-sea maintenance method is used, the following requirements apply.

(1) Adequate additional technical documentation, tools, test equipment, and spare parts must be carried on-board ship to enable a qualified maintainer as specified in § 80.1074 to perform tests and localize and repair faults in the radio equipment.

(2) Only persons that comply with the requirements of § 80.1074 may perform at-sea maintenance on radio installations required by this subpart.

Operating Procedures for Distress and Safety Communications

§ 80.1109 Distress, urgency, and safety communications.

(a) Distress traffic consists of all messages relating to the immediate assistance required by the ship in distress, including search and rescue communications and on-scene communications. Distress traffic must as far as possible be on the frequencies contained in § 80.1077.

(b) Urgency and safety communications include: navigational and meteorological warnings and urgent information; ship-to-ship safety navigation communications; ship reporting communications; support communications for search and rescue operations; other urgency and safety messages and communications relating to the navigation, movements and needs of ships and weather observation messages destined for an official meteorological service.

(c) Intership navigation safety communications are those VHF radiotelephone communications conducted between ships for the purpose of contributing to the safe movement of ships. The frequency 156.650 MHz is used for intership navigation safety communications (see § 80.1077).

§ 80.1111 Distress alerting.

(a) The transmission of a distress alert indicates that a mobile unit or person is in distress and requires immediate assistance. The distress alert is a digital selective call using a distress call format in bands used for terrestrial radiocommunication or a distress message format, which is relayed through space stations.

(b) The distress alert must be sent through a satellite either with absolute priority in general communication channels or on exclusive distress and safety frequencies or, alternatively, on the distress and safety frequencies in the MF, HF, and VHF bands using digital selective calling.

(c) The distress alert must be sent only on the authority of the person responsible for the ship, aircraft or other vehicle carrying the mobile station or the mobile earth station.

(d) All stations which receive a distress alert transmitted by digital selective calling must immediately cease any transmission capable of interfering with distress traffic and must continue watch until the call has been acknowledged.

§ 80.1113 Transmission of a distress alert.

(a) The distress alert must identify the station in distress and its position. The distress alert may also contain information regarding the nature of the distress, the type of assistance required, the course and speed of the mobile unit, the time that this information was recorded and any other information which might facilitate rescue.

(b) The format of distress calls and distress messages must be in accordance with CCIR Recommendation 493 as specified in § 80.1101.

(c) Ship-to-shore distress alerts are used to alert Rescue Coordination Centers via coast stations or coast earth stations that a ship is in distress. These alerts are based on the use of transmissions via satellites (from a ship earth station or a satellite EPIRB) and terrestrial services (from ship stations and EPIRBs).

(d) Ship-to-ship distress alerts are used to alert other ships in the vicinity of the ship in distress and are based on the use of digital selective calling in the VHF, MF, and HF bands.

(e) Shore-to-ship distress alert relays are used by a station or Rescue Coordination Center to relay information about a ship in distress to, as appropriate, all ships, a selected group of ships, or a specific ship by satellite and/or terrestrial means. The distress alert relay must contain the identification of the mobile unit in distress, its position and all other information which might facilitate rescue.

§ 80.1115 Transmission of a distress alert by a station not itself in distress.

(a) A station in the mobile or mobile-satellite service which learns that a mobile unit is in distress must initiate and transmit a distress alert relay in any of the following cases:

(1) When the mobile unit in distress is not itself in a position to transmit the distress alert; or

(2) When the master or person responsible for the mobile unit not in distress or the person responsible for the land station determines that further help is necessary.

(b) A station transmitting a distress alert relay in accordance with paragraph (a) of this section or § 80.1121(c) must indicate that it is not itself in distress.

§ 80.1117 Procedure for receipt and acknowledgement of distress alerts.

(a) Acknowledgement by digital selective calling of receipt of a distress alert in the terrestrial services must comply with CCIR Recommendation 541, which is incorporated by reference.

(b) Acknowledgement through a satellite of receipt of a distress alert from a ship earth station must be sent immediately (see § 80.1119).

(c) Acknowledgement by radiotelephony of receipt of a distress alert from a ship station or a ship earth station must be given in the following form:

(1) The distress signal MAYDAY;

(2) The call sign or other identification of the station sending the distress message, spoken three times;

(3) The words THIS IS (or DE spoken as DELTA ECHO in case of language difficulties);

(4) The call sign or other identification of the station acknowledging receipt, spoken three times;

(5) The word RECEIVED (or RRR spoken as ROMEO ROMEO ROMEO in case of language difficulties);

(6) The distress signal MAYDAY.

(d) The acknowledgement by direct-printing telegraphy of receipt of a distress alert from a ship station must be given in the following form:

(1) The distress signal MAYDAY;

(2) The call sign or other identification of the station sending the distress alert;

(3) The word DE;

(4) The call sign or other identification of the station acknowledging receipt of the distress alert;

(5) The signal RRR;

(6) The distress signal MAYDAY.

(e) The acknowledgement by direct-printing telegraphy of receipt of a distress alert from a ship earth station must be given by the coast earth station receiving the distress alert by retransmitting the ship station identity of the ship transmitting the distress alert.

§ 80.1119 Receipt and acknowledgement of distress alerts by coast stations and coast earth stations.

(a) Coast stations that receive a distress alert should defer acknowledgement for a short interval so that receipt may be acknowledged by a Rescue Coordination Center. Where an acknowledgement is not forthcoming within 3 minutes, the coast station in receipt of distress alerts must ensure that they are routed to a Rescue Coordination Center as soon as possible. Coast stations must provide assistance for distress communications when requested to do so by the U.S. Coast Guard. (This subpart does not specify any radio watches for coast stations.)

(b) Coast earth stations in receipt of distress alerts must ensure that they are routed as soon as possible to a Rescue Coordination Center. Coast earth stations must relay, as soon as possible, an acknowledgement of a distress alert from a Rescue Coordination Center.

(c) Certain messages must be carried without charge, regardless of the means by which they are transmitted:

(1) Distress alert messages;

(2) Search and rescue coordination messages;

(3) Medical assistance messages where an imminent danger to life is present, or

(4) Urgent meteorological or navigational danger messages passed in the ship-to-shore direction.

§ 80.1121 Receipt and acknowledgement of distress alerts by ship stations and ship earth stations.

(a) Ship or ship earth stations that receive a distress alert must, as soon as possible, inform the master or person responsible for the ship of the contents of the distress alert.

(b) In areas where reliable communications with one or more coast stations are practicable, ship stations in receipt of a distress alert should defer acknowledgement for a short interval so that receipt may be acknowledged by a coast station.

(c) Ship stations operating in areas where reliable communications with a coast station are not practicable that receive a distress alert from a ship station which is, beyond doubt, in their vicinity, must, as soon as possible and if appropriately equipped, acknowledge receipt and inform a Rescue Coordination Center through a coast station or coast earth station (see § 80.1115(a)(2)). However, a ship station receiving an HF distress alert must not acknowledge it but must observe the requirements of § 80.1123, and must, if the alert is not acknowledged by a coast station within 3 minutes, relay the distress alert.

(d) A ship station acknowledging receipt of a distress alert in accordance with paragraphs (b) or (c) of this section should:

(1) Acknowledge receipt of the alert by using radiotelephony on the distress and safety traffic frequency in the band used for the alert;

(2) If acknowledgement by radiotelephony of the distress alert received on the MF or VHF distress alerting frequency is unsuccessful, acknowledge receipt of the distress alert by responding with a digital selective call on the appropriate frequency.

(e) A ship station in receipt of a shore-to-ship distress alert relay (see § 80.1113(e)) should establish communication as directed and render such assistance as required and appropriate.

§ 80.1123 Watch requirements for ship stations.

(a) While at sea, all ships must maintain a continuous watch:

(1) On VHF DSC channel 70, if the ship is fitted with a VHF radio installation in accordance with § 80.1085(a)(2);

(2) On the distress and safety DSC frequency 2187.5 kHz, if the ship is fitted with an MF radio installation in accordance with §§ 80.1089(a)(2) or 80.1091(a)(3);

(3) On the distress and safety DSC frequencies 2187.5 kHz and 8414.5 kHz also on at least one of the distress and safety DSC frequencies 4207.5 kHz, 6312 kHz, 12577 kHz, or 16804.5 kHz appropriate to the time of day and the geographical position of the ship, if the ship is fitted with an MF/HF radio installation in accordance with §§ 80.1091(a)(2)(ii) or 80.1093(a) of this part (this watch may be kept by means of a scanning receiver limited to six distress and safety DSC frequencies); and

(4) For satellite shore-to-ship distress alert, if the ship is fitted with an INMARSAT ship earth station in accordance with § 80.1091(a)(1).

(b) While at sea, all ships must maintain radio watches for broadcasts of maritime safety information on the appropriate frequency or frequencies on which such information is broadcast for the area in which the ship is navigating.

(c) Until February 1, 1999, every ship while at sea must maintain, when practicable, a continuous listening watch on VHF Channel 16. This watch must be kept at the position from which the ship is normally navigated or at a position which is continuously manned.

(d) Until February 1, 1999, every ship required to carry a radiotelephone watch receiver must maintain, while at sea, a continuous watch on the radiotelephone distress frequency 2182 kHz. This watch must be kept at the position from which the ship is normally navigated or at a position which is continuously manned.

(e) On receipt of a distress alert transmitted by use of digital selective calling techniques, ship stations must set watch on the radiotelephone distress and safety traffic frequency associated with the distress and safety calling frequency on which the distress alert was received.

(f) Ship stations with narrow-band direct printing equipment must set watch on the narrow-band direct-printing frequency associated with the distress alert signal if it indicates that narrow-band direct-printing is to be used for subsequent distress communications. If practicable, they should additionally set watch on the radiotelephone frequency associated with the distress alert frequency.

§ 80.1125 Search and rescue coordinating communications.

(a) The distress signal consists of the word MAYDAY, pronounced in radiotelephony as the French expression "M'aider". For distress traffic by radiotelephony, when establishing communications, calls must be prefixed by the distress signal MAYDAY.

(b) Error correction techniques, in accordance with CCIR Recommendation 625 as specified in § 80.1101, must be used for distress traffic by direct-printing telegraphy. All messages must be preceded by at least one carriage return, a line feed signal, a letter shift signal and the distress signal MAYDAY.

(c) Distress communications by direct-printing telegraphy should be in the ARQ mode when ships are communicating directly to the Coast Guard or other coast stations on channels which they normally guard. Other distress communications, including those on simplex channels provided for that purpose, should be in the broadcast forward error correction mode. The ARQ mode may subsequently be used when it is advantageous to do so.

(d) The Rescue Coordination Center responsible for controlling a search and rescue operation will also coordinate the distress traffic relating to the incident or may appoint another station to do so.

(e) The Rescue Coordination Center coordinating distress traffic, the unit coordinating search and rescue operations, or the coast station involved may impose silence on stations which interfere with that traffic. This instruction may be addressed to all stations or to one station only, according to circumstances. In either case, the following will be used:

(1) In radiotelephony, the signal SEELONCE MAYDAY, pronounced as the French expression "silence, m'aider";

(2) In narrow-band direct-printing telegraphy normally using forward-error correcting mode, the signal SILENCE MAYDAY. However, the ARQ mode may be used when it is advantageous to do so.

(f) Until they receive the message indicating that normal working may be resumed (see paragraph (h) of this section), all stations which are aware of the distress traffic, and which are not taking part in it, and which are not in distress, are forbidden to transmit on the frequencies in which the distress traffic is taking place.

(g) Stations following distress traffic that are able to continue normal service may do so when the distress traffic is well established and on condition that it observes the provisions of paragraph (f) of this section and that it does not interfere with distress traffic.

(h) When distress traffic has ceased on frequencies which have been used for distress traffic, the Rescue Coordination Center controlling a search and rescue operation must initiate a message for transmission on these frequencies indicating that distress traffic has finished.

(i) In radiotelephony, the message referred to in paragraph (h) of this section consists of:

(1) The distress signal MAYDAY;

(2) The call "Hello all stations" or CQ (spoken as CHARLIE QUEBEC) spoken three times;

(3) The words THIS IS (or DE spoken as DELTA ECHO in the case of language difficulties);

(4) The call sign or other identification of the station sending the message;

(5) The time when the distress situation has ceased;

(6) The name and call sign of the mobile station which was in distress;

(7) The words SEELONCE FEENEE pronounced as the French words "silence fini"

(j) In direct-printing telegraphy, the message referred to in paragraph (h) of this section consists of:

(1) The distress signal MAYDAY;

(2) The call CQ;

(3) The word DE;

(4) The call sign or other identification of the station sending the message;

(5) The time when distress situation has ceased;

(6) The name and call sign of the mobil station which was in distress; and

(7) The words SILENCE FINI.

§ 80.1127 On-scene communications.

(a) On-scene communications are those between mobile unit in distress and assisting mobile units, and between the mobile units and unit coordinating search and rescue operations.

(b) Control of on-scene communications is the responsibility of the unit coordinating search and rescue operations. Simplex communications must be used so that all on-scene mobile stations may share relevant information concerning the distress incident. If direct-printing telegraphy is used, it must be in the forward error-correcting mode in accordance with CCIR Recommendation 625 as specified in § 80.1101.

(c) The preferred frequencies in radiotelephony for on-scene communications are 156.8 MHz and 2182 kHz. The frequency 2174.5 kHz may also be used for ship-to-ship on-scene communications using narrow-band direct-printing telegraphy in the forward error correcting mode in accordance with CCIR Recommendation 625 as specified in § 80.1101.

(d) In addition to 156.8 MHz and 2182 kHz, the frequencies 3023 kHz, 4125 kHz, 5680 kHz, 123.1 MHz and 156.3 MHz may be used for ship-to-aircraft on-scene communications.

(e) The selection or designation of on-scene frequencies is the responsibility of the unit coordinating search and rescue operations. Normally, once an on-scene frequency is established, a continuous aural or teleprinter watch is maintained by all participating on-scene mobile units on the selected frequency.

§ 80.1129 Locating and homing signals.

(a) Locating signals are radio transmissions intended to facilitate the finding of a mobile unit in distress or the location of survivors. These signals include those transmitted by searching units and those transmitted by the mobile unit in distress, by survival craft, by float-free EPIRBS, by satellite EPRIBs, and by search and rescue radar transponders to assist the searching units.

(b) Homing singnals are those locating signals which are transmitted by mobile units in distress, or by survival craft, for the purpose of providing searching units with a signal that can be used to determine the bearing to the transmitting stations.

(c) Locating signals may be transmitted in the following frequency bands: 117.975–136 MHz, 121.5 MHz, 156–174 MHz, 406–406.1 MHz, and 9200–9500 MHz.

(d) The 9 GHz locating signals must be in accordance with CCIR Recommendation 628 as specified in § 80.1101.

§ 80.1131 Transmissions of urgency communications.

(a) In a terrestrial system the announcement of the urgency message must be made on one or more of the distress and safety calling frequencies specified in § 80.1077 using digital selective calling and the urgency call format. A separate announcement need not be made if the urgency message is to be transmitted through the maritime mobile-satellite service.

(b) The urgency signal and message must be transmitted on one or more of the distress and safety traffic frequencies specified in § 80.1077, or via the maritime mobile-satellite service or on other frequencies used for this purpose.

(c) The urgency signal consists of the words PAN PAN. In radiotelephony each word of the group must be pronounced as the French word "panne".

(d) The urgency call format and the urgency signal indicate that the calling station has a very urgent message to transmit concerning the safety of a mobile unit or a person.

(e) In radiotelephony, the urgency message must be preceded by the urgency signal, repeated three times, and the identification of the transmitting station.

(f) In narrow-band direct-printing, the urgency message must be preceded by the urgency signal and the identification of the transmitting station.

(g) The urgency call format or urgency signal must be sent only on the authority of the master or the person responsible for the mobile unit carrying the mobile station or mobile earth station.

(h) The urgency call format or the urgency signal may be transmitted by a land station or a coast earth station with the approval of the responsible authority.

(i) When an urgency message which calls for action by the stations receiving the message has been transmitted, the station responsible for its transmission must cancel it as soon as it knows that action is no longer necessary.

(j) Error correction techniques, in accordance with CCIR Recommendation 625 as specified in § 80.1101, must be used for urgency messages by direct-printing telegraphy. All messages must be preceded by at least one carriage return, a line feed signal, a letter shift signal and the urgency signal PAN PAN.

(k) Urgency communications by direct-printing telegraphy should be in the ARQ mode when communicating directly to the Coast Guard or other coast stations on channels which they normally guard. Other distress communications, including those on simplex channels provided for that purpose, should be in the broadcast forward error correction mode. The ARQ mode may subsequently be used when it is advantageous to do so.

§ 80.1133 Transmission of safety communications.

(a) In a terrestrial system the announcement of the safety message must be made on one or more of the distress and safety calling frequencies specified in § 80.1077 using digital selective calling techniques. A separate announcement need not be made if the message is to be transmitted through the maritime mobile-satellite service.

(b) The safety signal and message must normally be transmitted on one or more of the distress and safety traffic frequencies specified in § 80.1077, or via the maritime mobile satellite service or on other frequencies used for this purpose.

(c) The safety signal consists of the word SECURITE. In radiotelephony, it is pronounced as in French.

(d) The safety call format or the safety signal indicates that the calling station has an important navigational or meteorological warning to transmit.

(e) In radiotelephony, the safety message must be preceded by the safety signal, repeated three times, and the identification of the transmitting station.

(f) In narrow-band direct-printing, the safety message must be preceded by the safety signal and the identification of the transmitting station.

(g) Error correction techniques, in accordance with CCIR Recommendation 625 as specified in § 80.1101, must be used for safety messages by direct-printing telegraphy. All messages must be preceded by at least one carriage return, a line feed signal, a letter shift signal and the safetysignal SECURITE.

(h) Safety communications by direct-printing telegraphy should be in the ARQ mode when communicating directly to the Coast Guard or other coast stations on channels which they normally guard. Other distress communications, including those on simplex channels provided for that purpose, should be in the broadcast forward error correction mode. The ARQ mode may subsequently be used when it is advantageous to do so.

§ 80.1135 Transmission of maritime safety information.

(a) The operational details of the stations transmitting maritime safety information in accordance with this section are indicated in the ITU List of Radiodetermination and Special Service Stations and the IMO Master Plan of Shore-Based Facilities.

(b) The mode and format of the transmissions mentioned in this section is in accordance with the CCIR Recommendation 540 as specified in § 80.1101.

(c) Maritime safety information is transmitted by means of narrow-band direct-printing telegraphy with forward error correction using the frequency 518 kHz in accordance with the international NAVTEX system (see § 80.1077).

(d) The frequency 490 kHz may be used, after full implementation of the GMDSS, for the transmission of maritime safety information by means of narrow-band direct-printing telegraphy with forward error correction (see § 80.1077).

(e) Internationally, the frequency 4209.5 kHz is used for NAVTEX-type transmissions by means of narrow-band direct-printing telegraphy with forward error correction (see § 80.1077).

(f) Maritime safety information is transmitted by means of narrow-band direct-printing telegraphy with forward error correction using the frequencies 4210 kHz, 6314 kHz, 8416.5 kHz, 12579 kHz, 16806.5 kHz, 19680.5, 22376 kHz, and 26100.5 kHz (see § 80.1077).

(g) Maritime safety information is transmitted via satellite in the maritime mobile-satellite service using the band 1530–1545 MHz (see § 80.1077).

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 620

[Docket No. 920239–2039]

General Provisions for Domestic Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Emergency interim rule; correction.

SUMMARY: NMFS is correcting errors in the preamble and implementing regulations for an emergency interim rule that appeared in the **Federal Register** on February 12, 1992 (57 FR 5078). The rule closed an area in the Mid-Atlantic to all fishing due to the potential adverse environmental conditions caused by the loss of drums containing arsenic trioxide from a cargo vessel.

EFFECTIVE DATE: February 6, 1992, through May 12, 1992.

FOR FURTHER INFORMATION CONTACT: Myles Raizin at (508) 281–9104, or One Blackburn Drive, Gloucester, MA 01930–2298.

SUPPLEMENTARY INFORMATION: NMFS has promulgated emergency regulations to address potential adverse environmental conditions due to the loss of arsenic trioxide drums in an area of the Mid-Atlantic Bight. The regulations define an area closed to all fishing activities. Errors were made in both the ordering of the coordinates defining the closed area and the calculation of total square miles affected by the closure.

In FR Doc. 92–3226 beginning on page 5078, in the issue of Wednesday, February 12, 1992, make the following corrections:

1. On page 5078, in the second column, in lines 11 through 14 of the first paragraph Under **SUPPLEMENTARY INFORMATION,** the listing of coordinates that reads, "(c) 38°50.0'N. latitude, 74°16.0'W. longitude; (d) 38°51.5'N. latitude, 74°18.5'W. longitude" is corrected to read:

"(c) 38°51.5'N. latitude, 74°18.5'W. longitude; (d) 38°50.0'N. latitude, 74°16.0'W. longitude".

2. On page 5078, in the second column, in lines 15 and 16 of the first paragraph under **SUPPLEMENTARY INFORMATION,** "4 square miles" is corrected to read "16 square miles".

§ 620.7 [Corrected]

3. On page 5079, in column 3, in section 620.7, paragraph (i) is corrected to read:

(i) Fish in the area of the Mid-Atlantic defined as a rectangle bounded by four straight lines connecting the following coordinates in the order stated:

Point	Latitude	Longitude
a	38°54.0'N.,	74°12.0'W.
b	38°55.5'N.,	74°14.5'W.
c	38°51.5'N.,	74°18.5'W.
d	38°50.0'N.,	74°16.0'W.
e	38°54.0'N.,	74°12.0'W.

Dated: March 10, 1992.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 57, No. 51
Monday, March 16, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–32–AD]

Airworthiness Directives; Boeing of Canada, Ltd., de Havilland Division, Model DHC–7 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the supersedure of an existing airworthiness directive (AD), applicable to certain de Havilland Division Model DHC–7 series airplanes, that currently requires repetitive functional checks of the ground spoiler control system to detect incorrect indications. This action would require modification of the ground spoiler control system. This proposal is prompted by an FAA determination that long-term continued operational safety should be assured by actual modification of the airplane rather than repetitive inspections. The actions specified by the proposed AD are intended to prevent inadvertent deployment of the ground spoilers and loss of lift.

DATES: Comments must be received by May 4, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–32–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing of Canada, Ltd., de Havilland Division, Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the FAA, New England Region, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Mr. Sol Maroof, Aerospace Engineer, Airframe Branch, ANE–172, FAA, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516) 791–6220; fax (516) 791–9024.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–32–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–32–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

Discussion

On October 13, 1983, the FAA issued AD 83–07–25, Amendment 39–4753 (48 FR 48803, October 21, 1983), to require repetitive functional checks of the ground spoiler control system to detect incorrect indications. That action was prompted by an in-service incident in which the ground spoilers were extended prior to takeoff. This condition was caused by both ground spoiler selector solenoid valves failing in the open position, holding the spoilers in the extended position. Investigation revealed that the "O" ring debris from the No. 1 hydraulic system pressure manifold had jammed the spool of each valve in mid-stroke, blocking off the return port. Illumination of the caution light occurs only when a difference in position exists between the valves. Due to both spools jamming in the same condition, the caution light did not illuminate. The requirements of that AD are intended to prevent inadvertent deployment of the ground spoilers and loss of lift.

Since the issuance of the AD, the FAA has determined that long-term continued operational safety should be assured by actual modification of the airplane rather than repetitive inspections. Modification of the ground spoiler control system will effectively prevent inadvertent deployment of the ground spoilers.

Boeing of Canada, Ltd., de Havilland Division, has issued Service Bulletin 7–27–46, Revision B, dated December 17, 1982, that describes procedures to modify the ground spoiler control system by removing the existing hydraulic pressure port reducer fittings and installing new reducer fittings which incorporate an integral filter. Transport Canada Aviation, which is the airworthiness authority of Canada, classified this service bulletin as mandatory.

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, Transport Canada Aviation has kept the FAA informed of the situation described above. The FAA has examined the findings of Transport Canada Aviation, reviewed all available

information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would supersede AD 83-07-25 to require modification of the ground spoiler system. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 42 airplanes of U.S. registry would be affected by this proposed AD. The FAA has been advised that the 42 affected airplanes have accomplished the modification proposed by this AD. However, should an unmodified airplane be imported and placed on the U.S. Register in the future, it would take approximately 2 work hours per airplane to accomplish the proposed actions, at an average labor rate of $55 per work hour. Required parts would be supplied by the manufacturer to the operators at no cost. Based on these figures, the total estimated cost impact of this AD would be $110 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-4753 (48 FR 48803, October 21, 1983), and by adding a new airworthiness directive (AD), to read as follows:

Boeing of Canada, Ltd., De Havilland Division: Docket 92-NM-32-AD. Supersedes AD 83-07-25, Amendment 39-4753.

Applicability: Model DHC-7 series airplanes; as listed in de Havilland Service Bulletin 7-27-46, Revision B, dated December 17, 1982, certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent inadvertent deployment of the ground spoilers and loss of lift, accomplish the following:

(a) Within 15 hours time-in-service or 7 days after November 2, 1983 (the effective date of AD 83-07-25, Amendment 39-4753), whichever occurs first, perform a functional check of the ground spoiler control system, in accordance with the Accomplishment Instructions of de Havilland Alert Service Bulletin A7-27-46, Revision A, dated November 19, 1982, or Revision B, dated December 17, 1982.

(b) If the check required by paragraph (a) of this AD shows incorrect indications, operate the airplane in accordance with the Airplane Flight Manual Minimum Equipment List Supplement No. 4 until the requirements of paragraph (d) of this AD are accomplished.

(c) Repeat the functional checks required by paragraph (a) of this AD at intervals not to exceed 15 hours time-in-service, or 7 days, whichever occurs first.

(d) Within 6 months after the effective date of this AD, accomplish paragraph (d)(1) or (d)(2) of this AD in accordance with de Havilland Service Bulletin 7-27-46, Revision B, dated December 17, 1982:

(1) For airplane serial numbers 1 through 73 that have been retrofitted with Modification No. 7/1732; and airplane serial numbers 74 through 83, 85, 86, and 89: Incorporate Modification No. 7/2296, in accordance with the service bulletin.

(2) For airplane serial numbers 1 through 73 that have not been retrofitted with Modification No. 7/1732; and airplane serial numbers 84, 87, 88, and 90 through 93: Incorporate Modification No. 7/2294, in accordance with the service bulletin.

(e) Incorporation of Modification No. 7/2296 or 7/2294, as required by paragraph (d)(1) or (d)(2) of this AD, constitutes terminating action for the repetitive functional checks required by paragraph (c) of this AD.

(f) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, New York Aircraft Certification Office (ACO), ANE-170, FAA, Engine and Propeller Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, New York ACO.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 4, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6084 Filed 3-13-92; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORATION

14 CFR Part 39

[Docket No. 92-NM-33-AD]

Airworthiness Directives; Canadair, Ltd., Model CL-600-1A11 (CL-600), CL-600-2A12 (CL-601), and CL-600-2B16 (CL-601-3A) Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Canadair Model CL-600, CL-601, and CL-601-3A series airplanes, that currently requires inspections for potential crossed wiring in the engine fire extinguishing system and the engine fire detection and warning system, and correction of any discrepancies. This action would require modification of the engine fire extinguishing system. This proposal is prompted by a report indicating that any disconnection and subsequent reconnection of the wiring or warning system wiring harnesses may lead to inadvertent crossed wiring. The actions specified by the proposed AD are intended to prevent severe damage to an airplane in the event of an engine fire.

DATES: Comments must be received by May 4, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-33-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Bombardier, Inc., Canadair, Aerospace Group, P.O. Box 6087, Station A, Montreal, Quebec, Canada H3C 3G9. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond O'Neill, Aerospace Engineer, Propulsion Branch, ANE-174, FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581-1145; telephone (516) 791-7421; fax (516) 791-9024.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications recieved on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Coments to Docket Number 92-NM-33-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of the NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-33-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

On January 9, 1992, the FAA issued AD 92-03-06, Amendment 39-8161 (57 FR 3006, January 27, 1992), to require inspections for potential crossed wiring in the engine fire extinguishing system and the engine fire detection and warning system, and correction of any discrepancies. That action was prompted by a report indicating that any disconnection and subsequent reconnection of the wiring or warning system wiring harnesses may lead to inadvertent crossed wiring. The requirements of that AD are intended to prevent severe damage to an airplane in the event of an engine fire.

Canadair, Ltd., has issued Alert Service Bulletins A600-0581 (for Model CL-600-1A11 series airplanes) and A601-0309 (for Model CL-600-2A12 and CL-600-2B16 series airplanes), both dated September 8, 1989, that describe procedures for installation of a modification to eliminate the possibility of future wiring harness cross connections in the engine fire extinguishing system. This modification consists of trimming the affected wiring harnesses to minimum required length and installing clamping. Transport Canada Aviation classified these service bulletins as mandatory and issued Canadian AD CF-91-24 in order to assure the continued airworthiness of these airplanes in Canada.

In the preamble to AD-92-03-06, the FAA advised that the actions required by the AD are considered interim. Therefore, in this action, the FAA proposes modification of the engine fire extinguishing system. The FAA has determined that this modification of the engine fire extinguishing system fully addresses the unsafe condition.

This action reflects the FAA's decision that long term continued operational safety should be assured by actual modification of the airframe rather than repetitive inspections.

This airplane model is manufactured in Canada and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, Transport Canada Aviation has kept the FAA informed of the situation described above. The FAA has examined the findings of Transport Canada Aviation, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would supersede AS 92-03-06 to require modification of the engine fire extinguishing system. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA estimates that 100 airplanes of U.S. registry would be affected by this proposed AD. The actions previously required by AD 92-03-06 necessitated 2 work hours to accomplish, at an average labor charge of $55 per work hour; the total cost to affected U.S. operators was approximately $11,000, or $110 per airplane. The modification that would be required by this AD would require an additional 6 work hours to accomplish, at an average labor charge of $55 per work hour; required parts would be supplied by the manufacturer at no cost to the operators. Therefore, the additional cost to U.S. operators with regards to the proposed modification action is estimated to be $33,000, or $330 per airplane. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be $44,000, or $440 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" undet the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) If promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8161 (57 FR 3006, January 27, 1992), and by adding a new airworthiness directive (AD), to read as follows:

Canadair, LTD: Docket 92-NM-33-AD. Supersedes AD 92-03-06, Amendment 39-8161.

Applicability: Model CL-600-1A11 series airplanes, serial numbers 1004 to 1085, except serial number 1057; Model CL-600-2A12 series airplanes, serial numbers 3001 to 3066; and Model CL-600-2B16 series airplanes, serial numbers 5001 to 5049; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent severe damage to an airplane in the event of an engine fire, accomplish the following:

(a) Within 30 days after February 11, 1991 (the effective date of AD 92-03-06, Amendment 39-8161), accomplish the following:

(1) For Model CL-600-1A11 series airplanes: Perform an inspection for potential crossed wiring in the engine fire extinguishing system, and inspect the electrical connectors for unlocked or inoperative pins, in accordance with Canadair Alert Service Bulletin A600-0581, dated September 8, 1989.

(2) For Model CL-6—2A12 and CL-600-2B16 series airplanes: Perform an inspection for potential crossed wiring in both the engine fire detection and warning system and the engine fire extinguishing system, and inspect the electrical connectors for unlocked or inoperative pins, in accordance with Canadair Alert Service Bulletin A601-0309, dated September 8, 1989.

(b) If any wiring discrepancies are detected as a result of the inspections required by paragraph (a) of this AD, prior to further flight, correct the discrepancies and replace any discrepant electrical connectors found, in accordance with Canadair Alert Service Bulletin A600-0581 (for Model CL-600-1A11 series airplanes), or A601-0309 (for Model CL-60-2A12 and CL-600-2B16 series airplanes), both dated September 8, 1989, as applicable.

(c) Within 120 days after the effective date of this AD, or the next time the fire bottles are removed from the airplane, whichever occurs first, modify the engine fire extinguishing warning harnesses and perform a functional test, in accordance with Canadair Service Bulletin A600-0581, dated September 8, 1989 (for Model CL-600-1A11 series airplanes); of Canadair Service Bulletin A601-0309, dated September 8, 1989 (for Model CL-600-2A12 and CL-600-2B16), as applicable.

(d) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, New York Aircraft Certification Office (ACO), ANE-170, FAA, Engine and Propeller Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, New York ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 4, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances; Temporary Placement of Methcathinone Into Schedule I

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Notice of intent.

SUMMARY: The Administrator of the Drug Enforcement Administration (DEA) is issuing this notice of intent to temporarily place methcathinone into Schedule I of the Controlled Substances Act (CSA) pursuant to the emergency scheduling provisions of the CSA (21 U.S.C. 811(h)). This intended action is based on a finding by the DEA Administrator, that the placement of methcathinone into Schedule I of the CSA is necessary to avoid an imminent hazard into the public safety. Finalization of this action will impose the criminal sanctions and regulatory controls of Schedule I on the manufacture, distribution and possession of methcathinone.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug and Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 307-7183.

SUPPLEMENTARY INFORMATION: The Comprehensive Crime Control Act of 1984 (Pub. L. 98-473), which was signed into law on October 12, 1984, amended section 201 of the Controlled Substances Act (CSA) (21 U.S.C. 811) to give the Attorney General the authority to temporarily place a substance into Schedule I of the CSA if he finds that such action is necessary to avoid an imminent hazard to the public safety. A substance may be temporarily scheduled under the emergency provision of the CSA if that substance is not listed in any other schedule under section 202 of the CSA (21 U.S.C. 812) or if there is no approval or exemption in effect under 21 U.S.C. 355 for the substance. The Attorney General has delegated his authority under 21 U.S.C. 811 to the Administrator of DEA by regulation (28 CFR 0.100). In making a finding that placing a substance temporarily into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator is required to consider three of the eight factors set forth in section 201(c) of the CSA (21 U.S.C. 811(c)). These factors are as follows:

(4) History and current pattern of abuse;

(5) The scope, duration and significance of abuse; and

(6) What, if any, risk there is to the public health. House Report 98-835 which accompanied Public Law 98-473 states that "This new procedure (emergency scheduling) is intended by the committee to apply to what has been called 'designer drugs', new chemical analogs or variations of existing controlled substances, which have a psychedelic, stimulant or depressant effect and have a high potential for abuse." Methcathinone is an analogue of methamphetamine, which is a Schedule II stimulant with a high potential for abuse, and as such is the type of substance which Congress intended to be considered for emergency scheduling.

Methcathinone, also called ephedrone or 2-methylamino-1-phenylpropan-1-one, is an N-methylated phenylisopropylamine that has a chemical structure substantially similar to that of methamphetamine. Available pharmacological data indicate that methcathinone produces amphetamine-like, psychomotor stimulant effects in laboratory animals.

Five clandestine laboratories concerned with methcathinone production have been encountered in the state of Michigan. Methcathinone is sold as a "legal" stimulant under the street name "cat." It is distributed as a powdered material and is administered via nasal inhalation.

There have been no reports of deaths or injuries specifically attributed to the abuse of methcathinone in the United States. However, in the scientific literature there is at least one report attributing overdose to ephedrone (methcathinone) in the former Soviet Union where this drug is supposedly abused under the street name "Jeff." Methcathinone's structural similarity to methamphetamine and its central nervous system stimulant activity strongly suggest that abuse of this substance will lead to health and safety risks similar to those produced by amphetamine and methamphetamine. Since methcathinone is only manufactured in clandestine laboratories, there are additional risks associated with its abuse. The health and safety hazards associated with the abuse of amphetamine and methamphetamine are well established. According to national estimates of emergency room mentions from the Drug Abuse Warning Network (DAWN), there were over 8500 and 5200 emergency room episodes associated with the use of methamphetamine and speed during 1989 and 1990, respectively. Abuse of methcathinone is likely to cause emergency episodes qualitatively similar to the types of emergency room episodes produced by methamphetamine.

The above data show that the continued, uncontrolled clandestine production, distribution and abuse of methcathinone will pose an imminent hazard to the public safety. DEA is not aware of any commercial manufacturer or supplier of methcathinone in the United States. DEA is also not aware of any recognized therapeutic use of this substance in the United States.

In accordance with the provisions of section 201(h) of the CSA (21 U.S.C. 811(h)) and 28 CFR 0.100, the Administrator of DEA has considered the following factors relative to making a determination of whether temporarily scheduling methcathinone under the CSA is necessary to avoid an imminent hazard to the public safety:

(1) Its history and current pattern of abuse;

(2) The scope, duration and significance of abuse; and

(3) What, if any, risk there is to the public safety.

Based on a consideration of these factors and other relevant information, the Administrator, pursuant to section 201(h) of the CSA (21 U.S.C. 811(h)) and 28 CFR 0.100, finds that placement of methcathinone into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety.

As required by section 201(h)(4) of the CSA (21 U.S.C. 811(h)(4)), the Administrator has notified the Assistant Secretary for Health, delegate of the Secretary of the Department of Health and Human Services, of his intention to temporarily place methcathinone into Schedule I of the CSA. Comments submitted by the Assistant Secretary for Health in response to this notification, including whether there is an exemption or approval in effect for methcathinone under the Federal Food, Drug and Cosmetic Act, shall be taken into consideration before a final order is published. Because the Administrator finds that it is necessary to temporarily place methcathinone into Schedule I to avoid an imminent hazard to the public safety, the final order, if issued, will be effective on the date of publication in the Federal Register. Further, it is the intention of the Administrator to issue such a final order as soon as possible after the expiration of thirty days from the date of publication of this notice and the date that a notification has been transmitted to the Assistant Secretary for Health.

The Administrator of the Drug Enforcement Administration hereby certifies that this notice of intent to temporarily place methcathinone into Schedule I of the CSA will have no significant impact upon entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 801 *et seq.*

The Temporary scheduling of methcathinone is not a major rule for the purposes of Executive Order (E.O.) 12291 of February 17, 1981. It has been determined that drug scheduling matters are not subject to review by the Office of Management and Budget (OMB) pursuant to the provisions of E.O. 12291. Accordingly, this proposed emergency scheduling action is not subject to the provisions of E.O. 12778 which are contingent upon review by OMB. This regulation both responds to an emergency situation posing an imminent danger to the public health and safety, and is essential to a criminal law enforcement function of the United States. Accordingly, it is not subject to the 90-day moratorium on regulations ordered by the President of the United States in his memorandum of January 28, 1992.

The action has been analyzed in accordance with the principles and criteria in E.O. 12291, and it has been determined that the temporary placement of methcathinone into Schedule I of the CSA does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

Under the authority vested in the Attorney General by section 201(h) of the CSA (21 U.S.C. 811(h)), and delegated to the Administrator of DEA by Department of Justice regulations (28 CFR 0.100), the Administrator hereby intends to order that 21 CFR part 1308 be amended as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

1. The authority citation for 21 CFR part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871b, unless otherwise noted.

2. Paragraph (g)(3) is added to 1308.11 to read as follows:

§ 1308.11 Schedule I.

* * * * *

(g) * * *

(3) Methcathinone (Some other names: 2-Methylamino-1-phenylpropan-1-one; Ephedrone; Monomethylpropion), its salts, optical isomers, and salts of optical isomers.....1237

Dated: March 9, 1992.

BILLING CODE 4410-09-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 21

RIN 2900-AE84

Veterans Education; Nonduplication of Benefits

AGENCY: Department of Veterans Affairs.

ACTION: Proposed regulations.

SUMMARY: The law prohibits the payment of educational assistance to a person who would otherwise be eligible for benefits under the Montgomery GI Bill—Active Duty when he or she is on active duty with the Armed Forces and the Armed Forces are paying for the course in which he or she is enrolled. Since this provision occurs in the law, but not in the regulations, users of the regulations have occasionally been confused. In order to eliminate that confusion, this proposal would include that prohibition in the regulations. In addition, some minor amendments to the wording of a similar prohibition

concerning Dependents' Educational Assistance and the Government Employees' Training Act is also included in this proposal.

DATES: Comments must be received on or before April 15, 1992. Comments will be available for public inspection until April 27, 1992.

ADDRESSES: Send written comments to: Secretary of Veterans Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, room 170 of the above address between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until April 27, 1992.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer, Assistant Director for Policy and Program Administration, Education Service, Veterans Benefits Administration, (202) 233–2092.

SUPPLEMENTARY INFORMATION: 38 CFR 21.4025 is amended to show that a duplication of benefits exists with respect to Dependents' Educational Assistance and the Government Employees' Training Act only when the eligible person is being paid a full salary; the course is being paid for under the Act; and the eligible person is pursuing the course during normal duty hours.

38 CFR 21.7134 is amended to clarify that the prohibition against duplication of benefits also applies to a potential duplication between benefits paid under the Montgomery GI Bill—Active Duty and the Government Employees' Training Act.

The Department of Veterans Affairs has determined that these amended regulations do not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulations will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Secretary of Veterans Affairs has certified that these amended regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the amended regulations, therefore, are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the amended regulations directly affect only individuals. They will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance numbers for the programs affected by this proposal are 64.117 and 64.124.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs-education, Loan programs-education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: January 28, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

Subpart D—Administration of Educational Benefits; 38 U.S.C. Chapters 34, 35, and 36

For the reasons set out in the preamble, 38 CFR part 21, subparts D and K are amended as set forth below.

(1) The authority citation for part 21, subpart D is revised to read as follows:

Authority: 72 Stat. 1114; 38 U.S.C. 501(a).

2. Section 21.4025(a)(2) is revised and an authority citation is added to read as follows:

§ 21.4025 Nonduplication: Federal programs.

(a) *Chapter 35.* * * *

(2) For a unit course or courses which—

(i) Are being paid for entirely or partly by the United States under the Government Employees' Training Act during any period that full salary is being paid to him or her as an employee of the United States, and

(ii) Are pursued during the individual's normal duty hours in lieu of regular work duties, including hours of authorized personal leave; or

(Authority: 38 U.S.C. 3681)

* * * * *

Subpart K—All Volunteer Force Educational Assistance Program (New GI Bill)

3. The authority citation for part 21, subpart K is revised to read as follows:

Authority: 38 U.S.C. chapter 30, Pub. L. 98–525; 38 U.S.C. 501(a).

4. In §21.7142 paragraph (c) and its authority citation are added to read as follows:

§ 21.7142 Nonduplication of educational assistance.

* * * * *

(c) *Nonduplication—Federal program.* Payment of educational assistance is prohibited to an otherwise eligible veteran or servicemember—

(1) For a unit course or courses which are being paid for entirely or partly by the Armed Forces during any period he or she is on active duty;

(2) For a unit course or courses which are being paid for entirely or partly by the Department of Health and Human Services during any period that he or she is on active duty with the Public Health Service; or

(3) For a unit course or courses which—

(i) Are being paid for entirely or partly by the United States under the Government Employees' Training Act during any period that full salary is being paid to him or hear as an employee of the United States, and

(ii) Are pursued during the individual's normal duty hours in lieu of regular work duties, including hours of authorized personal leave.

(Authority: 38 U.S.C. 3034, 3681)

BILLING CODE 8320-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-7040]

Federal Insurance Administration; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed base flood elevation modifications listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in the community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2754.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the floodplain management measures required by section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not prohibit development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

PART 67—[AMENDED]

1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et. seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

2. The proposed base (100-year) flood elevations for selected locations are:

Send comments to The Honorable William Steerman, Mayor of the Borough of Mendham, Morris County, 2 West Main Street, Mendham, New Jersey 07945.	
TEXAS	
Buda, City (Hays County)	
Onion Creek:	
Approximately 350 feet downstream of State Route 967	*588
Approximately 0.50 mile upstream of State Route 967	*605
Maps available for inspection at the Buda City Hall, Main Street, Buda, Texas.	
Send comments to The Honorable James Hollis, Mayor of the City of Buda, Hays County, P.O. Box 1218, Buda, Texas 78610.	
Manor (city), Travis County	
Gilleland Creek:	
At upstream face of Parsons Street	*508
At downstream face of eastbound U.S. Route 290	*513
Maps available for inspection at the Manor City Hall, 201 E. Parsons, Manor, Texas.	
Send comments to The Honorable Gilbert Weiss, Mayor of the City of Manor, Travis County, 201 E. Parsons, Manor, Texas 78653.	
Hays County (unincorporated areas)	
San Marcos River:	
Approximately 0.4 mile downstream of confluence of Bypass Creek	*552
Approximately 1.8 miles upstream of confluence of Blanco River	*574
Plum Creek:	
At the old State Route 21	*542
Approximately 0.9 mile upstream of Union Pacific Railroad	*731
Stream Plum-1:	
At confluence with Plum Creek	*632
Approximately 0.7 mile upstream of Union Pacific Railroad	*727
Brushy Creek:	
At State Route 21	*543
Approximately 0.8 mile upstream of dam	*583
Stream Brushy-1:	

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
At confluence with Brushy Creek	*557
Approximately 640 feet upstream of County Route 131	*645
Stream Brushy-1A:	
At confluence with Stream Brushy-1	*587
Approximately 0.5 mile upstream of County Route 157	*651
Cottonwood Creek:	
Approximately 200 feet downstream of County Route 266	*568
Approximately 1,580 feet upstream of confluence of Stream CC-3	*648
Stream CC-1:	
At confluence with Cottonwood Creek	*602
At upstream corporate limits	*606
Stream CC-2:	
At confluence with Cottonwood Creek	*644
Approximately 0.3 mile upstream of County Route 2439	*711
Stream CC-2D:	
At confluence with Cottonwood Creek	*637
At upstream corporate limits	*641
Blanco River:	
At confluence with San Marcos River	*572
Approximately 6.2 miles upstream of County Route 181	*1,029
Lone Man Creek:	
At confluence with Blanco River	*767
Approximately 3.2 miles upstream of Deer Lake Road	*1,044
Smith Creek:	
At confluence with Lone Man Creek	*877
Approximately 1.0 mile upstream of Deer Lake Road	*1,015
Cypress Creek:	
At confluence with Blanco River	*841
Approximately 1.5 miles upstream of confluence of Stream Cypress-1	*1,004
Stream Cypress-1:	
At confluence with Cypress Creek	*971
Approximately 0.7 miles upstream of dam	*1,035
Wilson Creek:	
At confluence with Blanco River	*846
Approximately 0.9 mile upstream of dam	*1,006
Willow Springs Creek:	
At downstream corporate limits	*638
Approximately 0.5 mile upstream of McCarty Lane	*716
Stream Tributary WS-1:	
At confluence with Willow Springs Creek	*672
Approximately 600 feet upstream of McCarty Lane	*708
Purgatory Creek:	
At downstream corporate limits	*607
Approximately 3.8 miles upstream of SCS Dam No. 4	*910
Stream Tributary PC-1:	
At confluence with Purgatory Creek	*656
Approximately 1.2 miles upstream of McCarty Lane	*793
Sink Creek:	
At Limekiln Road	*588
Approximately 4.4 miles upstream of SCS Dam No. 1	*602
Onion Creek:	
Approximately 660 feet downstream of County boundary	*648
Approximately 6.1 miles upstream of U.S. Route 12	*1,148
Bear Creek:	
Approximately 100 feet downstream of County boundary	*605
Approximately 1.9 miles upstream of FM 1826	*903
Little Bear Creek:	
At most downstream County boundary	*655
Approximately 3.6 miles upstream of confluence of Stream LB-1	*815
Stream LB-1:	
At confluence with Little Bear Creek	*743
Approximately 1.4 miles upstream of confluence with Little Bear Creek	*791
Stream Bear-1:	
At confluence with Bear Creek	*646

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
Approximately 140 feet upstream of County boundary	*924
Stream Bear-1A:	
At confluence with Stream Bear-1	*951
Approximately 1.9 miles upstream of FM 1826	*1,036
Stream Bear-2:	
At confluence with Bear Creek	*850
Approximately 0.9 mile upstream of confluence with Bear Creek	*920
Barton Creek:	
At County boundary	*951
Approximately 850 feet upstream of confluence of Schoolhouse Hollow	*1,135
Long Branch:	
At County boundary	*1,038
Approximately 125 feet upstream of dam	*1,160
Stream BC-1	
At confluence with Barton Creek	*955
Approximately 0.6 mile upstream of confluence of BC-1A	*1,151
Stream BC-1A	
At confluence with Stream BC-1	*1,086
Approximately 1,870 feet upstream of confluence with Stream BC-1	*1,124

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
Roy Branch:	
At confluence with Barton Creek	*962
Approximately .4 mile upstream of Oakwood Lane	*1,105
Cottonwood Branch:	
At confluence with Roy Branch	*993
Approximately 1,820 feet upstream of Right Bank Dam	*1,096
Little Barton Creek:	
At confluence with Barton Creek	*996
Approximately 1.7 miles upstream of State Route 12	*1,246
Stream BC-2:	
At confluence with Barton Creek	*1,100
Approximately .9 mile upstream of confluence of Stream BC-2A	*1,227
Stream BC-2A	
At confluence with Stream BC-2	*1,154
Approximately 1.0 mile upstream of confluence with Stream BC-2	*1,236
Schoolhouse Hollow:	
At confluence with Barton Creek	*1,123
Approximately 275 feet upstream of confluence of Stream SH-1	*1,192

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
Stream SH-1:	
At confluence with Schoolhouse Hollow	*1,186
Approximately 0.7 mile upstream of confluence with Schoolhouse Hollow	*1,262
Bypass Creek:	
Approximately .9 mile downstream of confluence of Bypass Creek Tributary-2	*567
Approximately 1 mile upstream of Uhland Road	*607
Bypass Creek Tributary-2:	
At downstream corporate limits	*580
Approximately 680 feet upstream of Uhland Road	*597

Maps available for inspection at the County Courthouse, Broadway, San Marcos, Texas.

Send comments to The Honorable Eddy Etheridge, Hays County Judge, Hays County Courthouse, San Marcos, Texas 78666.

3. The proposed modified base (100-year) flood elevations for selected locations are:

PROPOSED MODIFIED BASE (100-YEAR) FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)	
				Existing	Modified
Arizona	City of Tucson Pima County.	Santa Cruz River	Approximately 5,750 feet downstream of El Camino Del Cerro.	*2,219	*2,218
			Approximately 50 feet upstream of El Camino Del Cerro.	*2,236	*2,234
			At Sweetwater Drive	*2,255	*2,256
			Approximately 100 feet downstream of the confluence with Silvercroft Wash.	*2,281	*2,279
			Approximately 200 feet upstream of West Grant Road.	*2,303	*2,305
			Approximately 100 feet upstream of West Speedway Boulevard.	*2,322	*2,323
			Approximately 50 feet downstream of West Congress Street.	*2,341	*2,343
			Approximately 100 feet upstream of Silverlake Road.	*2,367	*2,370
			Approximately 20 feet downstream of Ajo Way	*2,396	*2,397
			Approximately 100 feet upstream of Irvington Road.	*2,415	*2,415
			At Valencia Road	*2,456	*2,459
			Approximately 6,300 feet upstream of Valencia Road (at Tucson Corporate Limits).	*2,471	*2,475
		Rillito Creek	Approximately 2,000 feet downstream of North Oracle Road (U.S. Highways 80 and 89).	*2,294	*2,290
			Just upstream of North First Avenue	*2,322	*2,316
			Approximately 50 feet downstream of North Campbell Avenue.	*2,341	*2,337
			Approximately 3,400 feet downstream of Dodge Boulevard.	None	*2,374
			Just upstream of Dodge Boulevard	*2,383	*2,382
			Just downstream of Swan Road	*2,406	*2,406
		Sabino Creek	At the confluence of Tanque Verde Creek	*2,498	*2,492
			Approximately 1,200 feet upstream of the confluence with Tanque Verde Creek.	*2,501	*2,497
			Approximately 3,775 feet upstream of the confluence with Tanque Verde Creek.	*2,505	*2,506
			Approximately 4,800 feet upstream of the confluence with Tanque Verde Creek.	*2,508	*2,511
		Hidden Hills Wash	Approximately 100 feet downstream of Rosewood Street.	*2,629	*2,629
			Approximately 20 feet upstream of Fifth Street	*2,658	*2,656
			Approximately 80 feet downstream of Golden West Street.	*2,696	*2,684

PROPOSED MODIFIED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)	
				Existing	Modified
			Approximately 175 feet downstream of East Broadway Boulevard.	*2,702	*2,702
		Enchanted Hills Wash	Approximately 120 feet upstream of the confluence with West Branch Santa Cruz.	*2,394	*2,396
			Approximately 80 feet upstream of Mission Road.	*2,415	*2,417
			Approximately 880 feet upstream of Mission Road.	*2,430	*2,426
			Approximately 1,320 feet upstream of Mission Road.	*2,435	*2,435
		Alamo Wash	Approximately 200 feet downstream of East Grant Road.	*2,485	*2,477
			Approximately 120 feet downstream of East Pima Street.	*2,510	*2,507
			Approximately 60 feet upstream of Speedway Boulevard.	*2,532	*2,534
			Approximately 20 feet upstream of East Broadway.	*2,571	*2,572
			Approximately 80 feet downstream of southbound Wilmot Road.	*2,584	*2,583
			Approximately 60 feet upstream of East 22nd Street.	*2,630	*2,631
			At Golf Links Road	*2,673	*2,670
			Approximately 60 feet upstream of Golf Links Road.	None	*2,672
		Robb Wash	Approximately 1,000 feet downstream of Pima Street.	*2,540	*2,540
			Approximately 550 feet downstream of Pima Street.	*2,547	*2,545
			Just upstream of Pima Street	*2,549	*2,549
		Arcadia Wash	Approximately 400 feet upstream of Glenn Street.	*2,448	*2,444
			Approximately 100 feet downstream of East Grant Road.	*2,463	*2,455
			Approximately 75 feet downstream of Seneca Street.	*2,475	*2,467
			Approximately 100 feet upstream of East Pima Street.	*2,483	*2,483
		Railroad Wash	At the confluence with Tucson Arroyo	*2,430	*2,430
			Just upstream of 18th Street	None	*2,434
			Just downstream of Aviation Avenue	None	*2,442
			Just downstream of 36th Street	None	*2,491
		Rodeo Wash	At Elizabeth Drive	None	*2,422
			At South 12th Avenue	None	*2,441
			At South Sixth Avenue	None	*2,473
			Just upstream of South Park Avenue	None	*2,506

Maps are available for review at the Tucson City Engineer's Office, County-City Public Works Building, 201 North Stone Avenue, Third floor, Tucson, Arizona.
Send comments to The Honorable George Miller, Mayor, City of Tucson, P.O. Box 27210, Tucson, Arizona 85726-7210.

California	City of Folsom Sacramento County	Humbug Creek	At East Bidwell Street	*265	*265
			One hundred feet upstream of Oak Avenue Parkway.	*343	*345
			Approximately 1,800 feet upstream of Oak Avenue Parkway.	None	*351

Maps are available for review at the Public Works Department, Engineering Division, 300 Persifer Street, Folsom, California.
Send comments to The Honorable John E. Kipp, Mayor, City of Folsom, 50 Natoma Street, Folsom, California 95630.

California	Lake County	Cache Creek	At the confluence with Copsey Creek	*1,330	*1,331
			Approximately 3,000 feet downstream of Lake Street.	*1,329	*1,331
			Approximately 1,000 feet downstream of Lake Street.	*1,328	*1,331
			At Lake Street	*1,329	*1,331
			At State Highway 53	*1,330	*1,331
		Seigler Canyon Creek	At the confluence with Cache Creek	*1,330	*1,331

Maps are available for review at the Lake County Flood Control and Water Conservation District, 255 North Forbes Street, Lakeport, California.
Send comments to The Honorable Gary Lambert, Chairperson, Lake County Board of Supervisors, 255 North Forbes Street, Lakeport, California 95453.

California	Town of Mammoth Lakes Mono County.	Mammoth Creek	Approximately 650 feet downstream of Old Mammoth Road.	None	*7,823
			Just upstream of Minaret Road	None	*7,878
			At Waterford Street	None	*7,928
			Just upstream of Sherwin Street	None	*7,976
			Approximately 350 feet upstream of Western Street.	None	*8,006

PROPOSED MODIFIED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)	
				Existing	Modified
		Mammoth Creek Tributary	At convergence with Mammoth Creek	None	*7,887
			At Waterford Street	None	*7,929
			At divergence from Mammoth Creek	None	*7,950
		Sherwin Street Tributary	At convergence with Mammoth Creek	None	*7,942
			Just upstream of Sherwin Street		
			At divergence from Mammoth Creek	None	*7,992

Maps are available for review at City Hall, 437 Old Mammoth Road, Suite R, Mammoth Lakes, California.
Send comments to The Honorable Duffy Wright, Mayor, Town of Mammoth Lakes, P.O. Box 1609, Mammoth Lakes, California 93546.

California	Riverside County Unincorporated Areas	Perris Valley Storm Drain	At Orange Avenue	*1,432	*1,430
			Approximately 2,600 feet upstream of Orange Avenue.	*1,435	*1,434

Maps are available for review at the Riverside County Flood Control and Water Conservation District, 1995 Market Street, Riverside, California.
Send comments to the Honorable Norton Youngblove, Chairman, Riverside County Board of Supervisors, 4080 Lemon Street, 14th Floor, Riverside, California 92501.

Colorado	City of Aurora	Unnamed Creek	At the confluence with West Toll Gate Creek	*5,566	*5,561
			Approximately 3,000 feet upstream of the confluence with West Toll Gate Creek.	*5,580	*5,577
			Approximately 600 feet downstream of South Flanders Way.	*5,613	*5,614
			Approximately 1,300 feet upstream of South Flanders Way (at upstream limit of detailed study).	*5,626	*5,628
		East Toll Gate Creek	Approximately 1,900 feet upstream of First Avenue.	*5,433	*5,433
			Approximately 3,500 feet upstream of First Avenue.	*5,445	*5,446
			Approximately 1,250 feet downstream of Buckley Road.	*5,458	*5,451
			At Buckley Road	*5,464	*5,464
		Westerly Creek	Approximately 7,000 feet upstream of mouth	*5,306	*5,306
			At Montview Boulevard	*5,314	*5,314
			At Beeler Street	*5,321	*5,319
			At Sixth Avenue	*5,325	*5,324
			At 14th Avenue	*5,335	*5,331

Maps are available for review at the Engineering Department, 1470 South Havana Street, Aurora, Colorado.
Send comments to The Honorable Paul Tauer, Mayor, City of Aurora, 1470 South Havana Street, Aurora, Colorado 80012.

Colorado	City of Colorado Springs, El Paso County.	South Shooks Run	At the confluence with Fountain Creek	*5,899	*5,898
			Just downstream of Costilla Street	*5,955	*5,950
			Approximately 150 feet upstream of Willamette Avenue.	*6,009	*6,008
			Approximately 1,650 feet upstream of East San Miguel Street.	*6,063	*6,060
		Templeton Gap Floodway	Just downstream of Hopeful Drive	None	*6,460
			Just downstream of Barnes Road	None	*6,505
		Templeton Gap South Overflow.	At the confluence with Templeton Gap Floodway.	*6,358	*6,368
			At Academy Boulevard	None	*6,407
			Approximately 1,450 feet upstream of Half Turn Road.	None	*6,422
		Cheyenne Run	At the confluence with Cheyenne Creek	None	*5,930
			At Lorraine Street	None	*5,981
			Approximately 550 feet downstream of the intersection of Skyway Boulevard and Saturn Drive.	None	*6,045
			At the intersection of Skyway Boulevard and Mars Drive.	None	#1
		Templeton Gap South Tributary.	Just downstream of Hopeful Drive	None	*6,455
			Approximately 100 feet downstream of Picturesque Drive.	None	*6,472
		Spring Run	At the confluence with Fountain Creek	None	*5,856
			Just downstream of Southgate Road	None	*5,935
			Approximately 200 feet downstream of South Nevada Avenue.	None	*5,978
			Approximately 250 feet downstream of Springmeadow Drive.	None	*6,058
		Spring Run Overflow	At the confluence with Spring Run	None	*5,896
			Approximately 400 feet upstream of South El Paso Avenue.	None	*5,911
			Approximately 500 feet upstream of South El Paso Avenue.	None	#1
		Sand Creek West Fork	At the confluence with Sand Creek	None	*6,125

PROPOSED MODIFIED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground *Elevation in feet (NGVD)	
				Existing	Modified
			At Murray Boulevard	None	*6,208
			Just downstream of Colorado and Eastern Railroad.	None	*6,255
			Just downstream of Maizeland Road	None	*6,305
			Just downstream of Oro Blanco Drive	None	*6,436
			Approximately 2,350 feet upstream of Oro Blanco Drive.	None	*6,529
			At the intersection of Murray Boulevard and Galley Road.	None	#2

Maps are available for review at the Regional Building Department, 101 West Costilla Street, Colorado Springs, Colorado.
Send comments to The Honorable Robert M. Isaac, Mayor, City of Colorado Springs, 30 South Nevada Street, Colorado Springs, Colorado 80903.

Colorado	El Paso County Unincorporated Area.	Templeton Gap Floodway	Approximately 450 feet upstream of the Academy Boulevard bridge.	*6,423	6,422
			Approximately 50 feet downstream of the Hopeful Drive Bridge.	*6,459	*6,460
			Approximately 150 feet west of the intersection of Hopeful Drive and Blissful Circle North.	*6,459	#1
		Templeton Gap, South Tributary.	At the confluence with Templeton Gap Floodway.	*6,455	*6,460
			At the intersection of Hopeful Drive and Blissful Circle South.	None	*6,457
			Approximately 150 feet north of the intersection of Hopeful Drive and Blissful Circle North.	*6,459	#1
		Sand Creek Center, Tributary	Approximately 1,075 feet downstream of Galley Road.	*6,229	*6,229
			Just downstream of Omaha Boulevard	*6,297	*6,304
			Approximately 1,900 feet upstream of Omaha Boulevard.	None	*6,345

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Part 383

[FHWA Docket No. MC-92-21]

Commercial Driver's License; Waiver for Farm-Related Service Industries; Request for Comments

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of petitions; request for comment.

SUMMARY: The FHWA is requesting comments from interested parties on petitions submitted by representatives of various farm-related service industries (custom harvesters, farm retail outlets and suppliers, agri-chemical businesses, and livestock feeders), requesting relief from the requirements of the commercial driver's license regulations (49 CFR part 383). The FHWA is proposing to authorize the States to waive, at their option, seasonal employees of farm-related service industries from the CDL knowledge and skill testing requirements, and issue these employees restricted CDL's. The FHWA requests public comments on whether, if granted, the proposed grant of waiver authority would be contrary to the public interest or diminish the safe operation of commercial motor vehicles. No extension of the public comment period specified below is anticipated due to the necessity to reach a final determination in this matter before the effective date of the CDL requirements (April 1, 1992).

DATES: Comments must be received on or before March 26, 1992.

ADDRESSES: All signed, written comments should refer to the docket number that appears at the top of this document and should be submitted to the Federal Highway Administration, room 4232, Office of Chief Counsel, HCC-10, 400 Seventh Street SW., Washington, DC 20590-0001. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal holidays. Commenters who want to be notified that the FHWA received their comments should include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Ms. Jill L. Hochman, Office of Motor Carrier Standards, (202) 366-4001, or Mr. Raymond W. Cuprill or Mr. Eric Kuwana, Office of the Chief Counsel, HCC-20, (202) 366-0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590-0001. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

The Commercial Driver's License (CDL) regulations, issued pursuant to the Commercial Motor Vehicle Safety Act of 1986 (title XII, Pub. L. 99-570, 100 Stat. 3207, 3207-170) (49 U.S.C. app. 2701 *et seq.*)), are found at 49 CFR part 383 (1991). Section 383.23 of the regulations sets forth the general rule that, effective April 1, 1992, no person shall operate a commercial motor vehicle unless such person: (1) Has taken and passed a knowledge test and, if applicable, a driving test, which meets Federal standards, and (2) possesses a CDL which is evidence of having passed the required tests. These Federal standards ensure that drivers of a commercial motor vehicle: (1) Have a single driver's license and a single driving record, (2) are tested for the knowledge and skills needed to drive a vehicle representative of the vehicle that they will be licensed to drive, and (3) are disqualified from driving a commercial vehicle when convicted of certain criminal or traffic violations. Drivers who will be operating commercial vehicles that haul hazardous materials are also required to take and pass specialized tests to obtain specific endorsements to their licenses.

Accordingly, drivers of commercial motor vehicles must have a CDL after April 1, 1992. The term commercial motor vehicle is defined to include, a motor vehicle:

(1) With a gross combination weight rating of 26,001 or more pounds inclusive of a towed unit with a gross vehicle weight rating of more than 10,000 pounds; or

(2) With a gross vehicle weight rating of 26,001 or more pounds; or

(3) Designed to transport 16 or more passengers, including the drive; or

(4) Used in the transportation of quantities of hazardous materials which require the vehicle to be placarded under the Hazardous Materials Transportation Regulations (49 CFR part 172, subpart F). 49 CFR 383.5 (1991).

CDL Waivers

Section 12013 of the Commercial Motor Vehicle Safety Act of 1986 (the Act) authorizes the Secretary of Transportation to waive any class of drivers or vehicles from any or all of the provisions of the Act or the implementing regulations if the Secretary determines that the waiver is not contrary to the public interest and does not diminish the safe operation of commercial vehicles. The regulatory procedures governing the issuance of waivers are found at 49 CFR 383.7 (1991).

The Federal Highway Administration (FHWA) has granted a CDL waiver to military personnel operating military vehicles and has authorized the States to exclude certain farmers and firefighters in implementing the CDL regulations. See 53 FR 37313, September 26, 1988. With respect to farmers, the States were authorized to exempt drivers of farms vehicles which are:

(1) Controlled and operated by a farmer;

(2) Used to transport either agricultural products, farm machinery, or farm supplies to or from a farm;

(3) Not used in the operations of a common or contract motor carriers; and

(4) Used within 150 miles of the person's farm. In this notice we will refer to this grant of waiver authority to the States as the "farm waiver."

The FHWA also received numerous petitions for waivers from farm-related service industries including custom harvesters, farm retailers and outlest, and agri-chemical businesses. These groups desired to be included in the farm waiver or be granted a similar waiver from the CDL regulations. The FHWA denied these petitions for waivers because the assertions made did not provide an adequate basis for making the required public interest and safety determinations.

Some of these industries sought relief through legislation, but the resulting statutory provision was very limited in scope. Section 4010 of the Intermodal Surface Transportation Efficiency Act of 1991 (Pub. L. 102-240, 105 Stat 1914) simply excluded custom harvesting farm machinery, such as combines and farm tractors, from the requirements of statutes and regulations dealing with CDL requirements. This legislative enactment did not provide the relief desired by custom harvesters and, as a result, administrative relief is still being sought.

Petitions

The FHWA has been requested to reconsider its previous determinations concerning the petitions for CDL waivers filed by custom harvesters, farm retail outlets and suppliers, and agri-chemical businesses. Livestock feeders have also requested similar waivers. In addition, we have received many comments requesting relief from the CDL requirements for these farm-related service industries in response to the regulatory review notice published by the Department. See 57 FR 4744, February 7, 1992 (OST Notice 92-1; FHWA Docket 92-12). This notice requested public comment on unnecessary or burdensome regulations that impede economic growth or impose needless cost on consumers. Copies of these petitions are being included in the docket established in this notice and may be examined by the public.

These farm-related service industries contend that the granting of a CDL waiver for their employees would not diminish highway safety because these employees are involved in transportation activities to no greater extent than farmers, which seasonal and mostly limited to secondary, rural roads, within close proximity of farms. Evidence was presented that the agricultural sector has an outstanding safety record when compared to the transportation industry as a whole. These industries also claim that the costs imposed by the CDL regulations will clearly outweigh the expected safety benefits. They state that imposition of the CDL requirements on their industries will create significant operational and financial burdens due to the seasonal nature of the agricultural business, where only a small pool of workers is available to assist during the periods of high transportation demand. Drivers are hired to transport agricultural products solely during "peak seasons," such as the very short planting and harvest seasons, and consequently, many of these employees are high school/college students and retired farm workers. These industries cannot afford the expensive overhead of maintaining an exclusive work force of full-time commercial drivers. They assert that imposition of the CDL requirements will increase agricultural transportation costs and would result in higher farm production costs and consumer prices.

Proposed Waiver for Farm-Related Service Industries

In order to provide relief to the above described farm-related service industries, the FHWA is proposing to authorize the States, at their option to waive seasonal employees of farm-related industries from the CDL knowledge and skill testing requirements, and issue these employees restricted CDL's. Only seasonal drivers hired by these industries that operate certain commercial motor vehicles would be eligible for this waiver. Each State will determine the drivers' eligibility to receive a restricted CDL as seasonal employees of farm-related service industries. The FHWA believes that a seasonal driver is a person employed in farming or agriculture, or performing farming or agricultural labor, whose employment is of the kind exclusively performed at certain seasons or periods of the year, or who moves from one seasonal activity to another while employed in farming or agricultural activities.

CDL requirements other than knowledge and skill testing would be applicable, such as the disqualification requirements and the requirement that the State conduct a complete check of the applicant's driving record. This limited waiver authority would ensure that issuance by the State of restricted CDL's would have no adverse effect on highway safety and would prevent full-time employees of these farm-related service industries from avoiding the CDL testing requirements.

Accordingly, the States would be authorized to waive drivers of farm-related service industries from the CDL knowledge and skill testing requirements, subject to the following conditions:

(1) Restricted CDL's—If a State adopts the waiver authority, the State would issue restricted CDL's to eligible drivers pursuant to existing State CDL licensing procedures. The restriction would be coded on the CDL and easily recognized by enforcement officials. Compliance with all CDL requirements (49 CFR part 383), except those related to knowledge and skill testing, would be required. Any restricted CDL issued by a State would be considered as a valid CDL and would be given full reciprocity by other States pursuant to 49 CFR 383.73(h).

(2) Drivers Covered—Only drivers possessing a valid operator's license issued by a State, who are seasonal employees of a farm-related service industry (custom harvesters, farm retail outlets and suppliers, agrichemical businesses, and livestock feeders), would be eligible for a restricted CDL. A restricted CDL issued to a seasonal driver would be valid only during such employment and while performing farm service activities related to such employment. The use of a restricted CDL to drive a commercial motor vehicle, in the performance of activities not related to such employment, would be grounds for revocation. Exemptions from the driver qualification requirements for drivers engaged in certain farm-related operations, found in 49 CFR 391.2, would remain unchanged.

(3) Vehicles Covered—The restricted CDL would authorize the transportation of the products listed below in motor vehicles included in CDL Vehicle Groups B or C (49 CFR 383.91).

(4) Products Covered—The restricted CDL would authorize the transportation of agricultural products, farm machinery, or farm supplies to and from a farm. The restricted CDL would not authorize the transportation of placarded quantities of hazardous materials, except for diesel fuel or fertilizers transported to and from a farm.

Request for Public Comment

The FHWA is requesting specific views, information, and data that it should consider when determining whether or not the proposed waiver would be contrary to the public interest or would diminish the safe operation of commercial motor vehicles. Commenters are strongly encouraged to provide any

additional facts or views pertaining to the proposed waiver.

(Title XII of Pub. L. 99-570, 100 Stat. 3207-170; 49 U.S.C. 3102; 49 U.S.C. app. 2505; 49 CFR 1.48.; 49 CFR 383.7.; 23 U.S.C. 315)

Issued on: March 12, 1992.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 553]

Expansion of Foreign-Trade Zone 152 Burns Harbor, Indiana, Area

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), and the Foreign-Trade Zones Board Regulations (15 CFR part 400), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

Whereas, the Indiana Port Commission, Grantee of Foreign-Trade Zone No. 152, has applied to the Board for authority to expand its general-purpose zone to include a site in Gary, Indiana, adjacent to the Chicago Customs port of entry;

Whereas, the application was accepted for filing on September 5, 1991, and notice inviting public comment was given in the **Federal Register** on September 12, 1991 (Docket 51-91, 56 FR 46410);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve and expand zone services in the Burns Harbor area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now, Therefore, the Board *Hereby Orders*:

That the Grantee is authorized to expand its zone in accordance with the application filed on September 5, 1991, subject to the Act and the Board's regulations (as revised, 56 FR 50790-50808, 10/8/91), including Section 400.28.

Signed at Washington, DC, this 9th day of March, 1992.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

[Order No. 561]

Resolution and Order Approving the Application of the Bi-State Authority (Lawrence County, Illinois) for Special-Purpose Subzone Status at the Fedders North America, Inc., Plant (Room Air Conditioners); Effingham, IL

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Bi-State Authority, grantee of Foreign-Trade Zone 146, filed with the Foreign-Trade Zones Board (the Board) on January 9, 1991, requesting special-purpose subzone status for the room air conditioner manufacturing plant of Fedders North America, Inc., in Effingham, Illinois, adjacent to the Evansville-Owensboro Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The approval is subject to the FTZ Act and the FTZ Board's regulations (as revised, 56 FR 50790-50808, 10-8-91), including § 400.28. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority for Subzone Status, Fedders North America, Inc., Plant; Effingham, IL

Whereas, By an Act of Congress approved June 18, 1934, an Act "To provide for the establishment * * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a-81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, The Board's regulations (15 CFR part 400) provide for the establishment of subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, The Bi-State Authority (Lawrence County, Illinois), Grantee of Foreign-Trade Zone No. 146, has made application (filed 1-9-91, FTZ Docket 1-91, 56 FR 1791, 1-17-91) to the Board for authority to establish a subzone at the room air conditioner manufacturing plant of Fedders North America, Inc., in Effingham, Illinois;

Whereas, Notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, The Board has that found the requirements of the Act and the Board's regulations are satisfied and that the proposal is in the public interest;

Now, Therefore, In accordance with the application filed January 9, 1991, the Board hereby authorizes the establishment of a subzone at the Fedders North America,. Inc., plant in Effingham, Illinois, designated on the records of the Board as Foreign-Trade Subzone 146C, at the location described in the application, subject to the FTZ Act and the Board's regulations (as revised, 56 FR 50790-50808, 10-8-91), including § 400.28.

Signed at Washington, DC, this 9th day of March, 1992, pursuant to Order of the Board.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Initiation of antidumping and countervailing duty administrative reviews.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings and suspension agreements with February anniversary dates. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Roland L. MacDonald, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone (202) 377-2104.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce ("the Department") has received timely requests, in accordance with § 353.22(a)(1) of the Department's regulations, for administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements, with February anniversary dates.

Initiation of Reviews

In accordance with §§ 353.22(c) and 355.22(c) of the Department's regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders, findings, and suspension agreements. We intend to issue the final results of these reviews not later than February 28, 1993.

Antidumping duty proceedings and firms	Periods to be reviewed
Canada:	
Racing Plates (Aluminum Horseshoes) A-122-050	
Equine Forgings	2/1/91-1/31/92
Japan:	
Mechanical Transfer Presses A-588-810	
Aida Engineering Ltd., Hitachi Zosen Corporation, Ishikawajima-Harima Heavy Industries, Komatsu Ltd	2/1/91-1/31/92
Korea:	
Small Business Telephones & Subassemblies Thereof A-580-803	
Goldstar Telecommunications Co., Ltd., Samsung Electronics Co., Ltd	2/1/91-1/31/92
Peoples Republic of China:	
Sodium Thiosulfate A-570-805	
China National Chemicals Import and Export Corporation, Shanghai Chemical Import and Export Corporation, Henan Provincial Chemical Plant, Eeyer Hat Oil Chemical Plant	2/1/91-1/31/92
Countervailing Duty Proceedings	
Saudi Arabia:	
Carbon Steel Wire Rod C-517-501	1/1/91-12/31/91

Interested parties must submit applications for administrative protective orders in accordance with § 353.34(b) and § 355.34(b) of the Department's regulations.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and 19 CFR 353.22(c) and 355.22(c) (1989).

Dated: March 9, 1992.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

Tapered Roller Bearings, and Parts Thereof, Finished and Unfinished, From Japan; Amendment to Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of amendment to final results of antidumping duty administrative review.

SUMMARY: On February 11, 1992, the Department of Commerce published the final results of its 1989-90 administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished and unfinished, from Japan. The review covered four manufacturers/exporters of this merchandise to the United States during the period October 1, 1989, through September 30, 1990. Based on the correction of clerical errors, we have changed the margin for NSK from 4.09 percent to 1.52 percent and the margin for NTN from 45.95 percent to 21.49 percent.

EFFECTIVE DATE: March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Sheila Baker or Laurel LaCivita, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-4733.

SUPPLEMENTARY INFORMATION:

Background

On February 11, 1992, the Department of Commerce (the Department) published in the **Federal Register** (57 FR 4960), the final results of its administrative review of the antidumping duty order (52 FR 37352; October 6, 1987) on tapered roller bearings, and parts thereof, finished and unfinished, from Japan. After publication of our final results, two clerical errors were identified in the margin calculations used for NSK Ltd. (NSK), and three clerical errors were identified in the margin calculation used for NTN Toyo Bearing Co. (NTN). The two clerical errors affecting NSK consisted of some incorrect model matches and the incorrect rate for best information available on those models where appropriate information to calculate foreign market value was not provided. The three clerical errors affecting NTN's margin were the result of an error in the use of physical criteria data, an error in the creation of a level of trade variable for U.S. sales, and an error in computing foreign market value using both actual sales and split sales.

Amended Final Results of Review

As a result of our corrections of the clerical errors, we have determined weighted-average margins of 1.52 percent for NSK and 21.49 percent for NTN.

The Department shall determine and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between U.S. price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of this notice of amended final results of administrative review for all shipments of the subject merchandise from Japan entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the companies affected by this amendment will be as outlined above; (2) the cash deposit rate for Nachi, as stated in the February 11, 1992, final results of this administrative review, will remain in effect; (3) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (4) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (5) the cash deposit rate for all other manufacturers or exporters will be 21.49 percent. This rate represents the highest rate for any firm with shipments in the administrative review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice is published pursuant to 19 CFR 353.28.

Dated: March 11, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-588-054]

Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Components Thereof, From Japan; Amended Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of amendment to final results of antidumping duty administrative review.

SUMMARY: On February 11, 1992, the Department of Commerce published the final results of its 1989-90 administrative review of the antidumping finding on tapered roller bearing (TRBs), four inches or less in outside diameter, and certain components thereof, from Japan. The review covered three manufacturers/exporters of the subject merchandise to the United States during the period August 1, 1989, through July 31, 1990. Based on the correction of clerical errors, we have changed the margin for NSK from 4.92 percent to 2.72 percent.

EFFECTIVE DATE: March 16, 1992.

Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-4733.

SUPPLEMENTARY INFORMATION:

Background

On February 11, 1992, the Department of Commerce (the Department) published in the **Federal Register** (57 FR 4975), the final results of its administrative review of the antidumping finding (41 FR 34974; August 18, 1976) on tapered roller bearings, four inches or less in outside diameter, and certain components thereof, from Japan. After publication of our final results, NSK Ltd. alleged that clerical errors had been made regarding the adjustment for pre-sale freight and the exclusion of a home market model for model match purposes. We agree and have corrected these errors.

Amended Final Results of Review

As a result of our correction of the clerical errors, we have determined a weighted-average margin of 2.72 percent for NSK.

The Department shall determine and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between U.S. price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of this notice of amended final results of administrative review for all shipments of the subject merchandise from Japan entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the companies affected by this amendment will be as outlined above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specified rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will be 16.35 percent. This rate represents the highest rate for any firm with shipments in the administrative review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice is published pursuant to 19 CFR 353.28.

Dated: March 11, 1992.

Marjorie A. Chorlins,

Acting Assistance Secretary for Import Administration.

[FR Doc. 92-6089 Filed 3-13-92; 8:45 am]

BILLING CODE 3510-DS-M

[C-549-804]

Carbon Steel Butt-Weld Pipe Fittings From Thailand Termination of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of termination of countervailing duty administrative review.

SUMMARY: On February 24, 1992, the Department of Commerce (the Department) initiated an administrative review of the countervailing duty order on carbon steel butt-weld pipe fittings from Thailand. The Department is now terminating that review.

EFFECTIVE DATE: March 16, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377–2786.

Background

On January 28, 1992, the Department received a request for an administrative review of this countervailing duty order from Awaji Sangyo (Thailand) Co., Ltd. (AST), for the period January 1, 1991 through December 31, 1991. On February 24, 1992, we initiated the administrative review (57 FR 6314), and, on February 26, 1992, AST withdrew its request.

Since no other interested parties have requested an administrative review for this period, and since the letter of withdrawal was timely filed, the Department is now terminating this administrative review in accordance with 19 CFR 355.22(a)(3).

This notice is published pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)(1)), and 19 CFR 355.22.

Dated: March 9, 1992.

President's Export Council: Meeting of the President's Export Council

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of an open meeting.

SUMMARY: The President's Export Council (PEC) is holding a meeting to review the work of each of the subcommittees and to discuss future projects. Issues relating to foreign market development, U.S. trade competitiveness, export promotion, export financing, and export controls will also be discussed. A report on the President's Asia Trip and the PEC's recent trade mission to Taiwan will be presented. The President's Export Council was established on December 20, 1973 and reconstituted May 4, 1979, to advise the President on matters relating to U.S. export trade.

DATES: March 31, 1992, from 9:15 a.m. to 12:30 p.m.

ADDRESSES: The Madison Hotel, Executive Chambers, 15th and M Street, NW., Washington, DC 20005.

Seating is limited and will be on a first come, first serve basis.

FOR FURTHER INFORMATION CONTACT: Ms. Annette Richard, President's Export Council, room 3215, Washington, DC 20230.

Dated: March 11, 1992.

Wendy H. Smith,

Staff Director and Executive Secretary, President's Export Council.

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC.

Docket Number: 92–015. *Applicant:* Washington University School of Medicine, Department of Cell Biology and Physiology, 660 South Euclid Avenue, Box 8228, St. Louis, MO 63110. *Instrument:* Two (2) Micromanipulators and Mounting Accessories, Models WR–89–L and MM–3–R. *Manufacturer:* Narishige Scientific Instruments, Japan. *Intended Use:* The instruments will be used to study ion channels in nerve cell membranes. Using the patch clamp technique experiments will involve recording the flow of ionic current through ion channels gated by the neurotransmitter glutamate in order to understand how the channels work—how glutamate causes them to open and how they conduct the ions through the membrane. *Application Received by Commissioner of Customs:* February 6, 1992.

Docket Number: 92–016. *Applicant:* Department of Veterans Affairs Medical Center, University and Woodland Avenues, Philadelphia, PA 19104. *Instrument:* Electron Microscope, Model H–7000. *Manufacturer:* Nissei Sangyo, Japan. *Intended Use:* The instrument will be used for ultrastructural examination of biological material, including human and animal tissues. This ultrastructural study provides more accurate, specific classification of tumors or other medical diseases and thereby enables a more specific and up-to-date treatment with obvious advantage to the patient. Various experiments are planned to study the etiology, pathogenesis and biological course of different diseases. In addition, the instrument will be used for training in electron microscopy. *Application Received by Commissioner of Customs:* February 11, 1992.

Docket Number: 92–017. *Applicant:* Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, MA 02139. *Instrument:* Stopped-Flow Spectrophotometer Fluorimeter, System, Model SF–61AFX. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* The instrument will be used to study the cleavage of DNA mediated by the end-diyne class of antibiotics, which include the clinically important anti-cancer drugs bleomycin and neocarzinostatin. In addition, the instrument will be used to study fast chemical reactions catalyzed by several enzymes involved in nucleotide metabolism. *Application Received by Commissioner of Customs:* February 12, 1992.

Docket Number: 92–018. *Applicant:* Yale University School of Medicine, Department of Pathology, 310 Cedar Street, New Haven, CT 06510. *Instrument:* Electron Microscope, Model EM 910. *Manufacturer:* Carl Zeiss, Germany. *Intended Use:* The instrument will be used to conduct basic biomedical research. Some of the research projects include:

1. Morphometric and stereologic assessment of plasma membrane changes and immunocytochemical localization and quantitation of specific membrane, cytoskeletal and matrix proteins and quantitative in situ hybridization for localization of messenger RNA's of these proteins,
2. Examination of the cellular mechanisms of adaptation in principal cells and intercalated cells of the renal collecting duct,
3. Characterization of the determinants of mesangial cell proliferation and matrix accumulation using primary cultures of mesangial cells,
4. Studies of the mechanisms which are involved in development and maintenance of cell polarity of renal epithelial cells, and
5. Studies directed at examining the cellular processes involved in the restoration of cellular integrity of renal epithelial cells ischemic or toxic injury.

Application Received by Commissioner of Customs: February 12, 1992.

Docket Number: 92–019. *Applicant:* Yale University, 155 Whitney Avenue, New Haven, CT 06520. *Instrument:* Electron Microscope, Model EM 902. *Manufacturer:* Carl Zeiss, Germany. *Intended Use:* The instrument will be used in ongoing scientific investigations examining the basic biology and pathophysiology of axons and glial cells in the central and peripheral nervous systems. The objectives of these studies are to fully understand the physiology and pathobiology of axons, and their related glial cells, in the function of the nervous system, including brain, spinal cord and peripheral nerves. *Application Received by Commissioner of Customs:* February 14, 1992.

Docket Number: 92–020. *Applicant:* The University of Vermont, Burlington, VT 05405. *Instrument:* Xenon Flashlamp System, Model XF–10. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* The instrument will be used in biomedical research to excite single muscle cells in tissue culture in order to release intracellular chemicals. The experiments are designed to test the function of muscle cells in culture. In addition, the instrument will be used for educational purposes in the course "Techniques in Neurobiology." *Application Received by Commissioner of Customs:* February 14, 1992.

Docket Number: 92–021. *Applicant:* Western Washington University, Division of Purchases, Old Main, room 320, Bellingham, WA 98225–9012. *Instrument:* Stopped-Flow Rapid Kinetics Accessory. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* The instrument will be used for studies of fast (100–1000 ms) chemical reactions of inorganic-metal complexes in solution during concentration and temperatures dependent kinetics experiments. In addition, the instrument will be used to provide students with hands-on experience in measuring reaction rates for fast chemical reactions in the course, Chemistry 464, 465: Physical/ Inorganic Chemistry Laboratory. *Application Received by Commissioner of Customs:* February 14, 1992.

Docket Number: 92–022. *Applicant:* All Children's Hospital, 810 6th Street, South, St. Petersburg, FL 33701. *Instrument:* Electorn Microscope, Model JEM–1210EX. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instrument will be used for researching the ultrastructure of pediatric pathologies. Specimens studied will be from children with pathological disorders. Some specimens will be from normal children and some specimens will be from experimental animals. The experimentation and research will include but is not limited to the following:

1. Characterization of neoplastic tissues,
2. Identification of viruses associated with intestinal pathologies,
3. Cyto-skeletal structure of intestinal cilia,
4. Characterization of cell fractions obtained from kidney tissue,
5. Characterization of renal glomerus,
6. Morphology and characterization of resting and activated lymphocytes, and
7. Dynamics of deoxyribonucleic acid (DNA) specific stain models.

Application Received by Commissioner of Customs: February 14, 1992.

Docket Number: 92–023. *Applicant:* Wayne State University, Department of Chemistry, 5101 Cass Avenue, Detroit, MI 48202. *Instrument:* Kinetic Spectrometer, Model LKS.50. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* The instrument will be used for studies of free radical intermediates produced by a laser flash. The studies are aimed to etablish kinetic scales for a number of radical reations. *Application Received by Commissioner of Customs:* February 19, 1992.

Docket Number: 92–024. *Applicant:* U.S. Geological Survey, 12201 Sunrise Valley Drive, Reston, VA 22092. *Instrument:* (3) Electron Microprobes, Model JXA–8900. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instruments will be used for the study of the chemical composition, elemental distribution and compositional zoning behavior of geologic materials. The experiments to be conducted consist of focussing a high voltage electron beam on a solid sample (usually a polished grain mount or thin section), generating characteristic x-rays, and measuring these x-rays quantitatively with wavelength and energy dispersive spectrometers. In addition, the instrument will be used for training USGS staff in the operation and maintenance of the instruments.

Application Received by Commissioner of Customs: February 19, 1992.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

Minority Business Development Agency

[Project I.D. No. 06–10–92007–01]

Business Development Center Applications: Lubbock/Midland-Odessa MBDC

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) program to operate an MBDC for approximately a 3-year period, subject to Agency priorities, recipient's performance and the availability of funds. The cost of performance for the first budget period (12 months) is estimated as $223,250 in Federal funds, and a minimum of $39,397 in non-Federal (cost sharing) contributions from August 1, 1992 to July 31, 1993. An amount of $8,250 has been allocated for the audit fee and should be listed in the contractual line item under the Federal amount. Cost-sharing contributions may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof.

The MBDC will operate in the Lubbock, Texas MSA geographic service area with a field office in Midland-Odessa. The geographic area will extend throughout the Central and Northwestern portion of the state of Texas. The funding breakdown is as follows: $173,250 Federal and $30,573 non-Federal for Lubbock and $50,000 Federal and $8,824 non-Federal for Midland-Odessa and other major cities in the Central and Northwest portion of the state.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, state and local governments, American Indian tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can identify and coordinate public and

private sector resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated initially by regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purpose of the MBDC Program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000.

MBDCs performing satisfactorily may continue to operate after the initial competitive year for up to 2 additional budget period. MBDCs with year-to-date "commendable" and "excellent" performance ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and Agency priorities.

Awards under this program shall be subject to all Federal and Departmental regulations, policies, and procedures applicable to Federal assistance awards.

In accordance, with OMB Circular A-129, "Managing Federal Credit Programs," applicants who have an outstanding account receivable with the Federal Government may not be considered for funding until these debts have been paid or arrangements satisfactory to the Department of Commerce are made to pay the debt.

Applicants are subject to Governmentwide Debarment and Suspension (Nonprocurement) requirements as stated in 15 CFR part 26. 15 CFR part 28 is applicable and prohibits recipients of Federal contracts, grants, and cooperative agreements from using appropriated funds for influencing or attempting to influence an officer or employee of any agency, A Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a specific contract, grant, or cooperative agreement. The Departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the MBDC has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of MBDC work requirements; and reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

On November 18, 1988, Congress enacted the Drug-Free Workplace Act of 1988 Pub. L. 100-690, title V, subtitle D). The statute requires contractors and grantees of Federal agencies to certify that they will provide a drug-free workplace. Pursuant to these requirements, the applicable certification form must be completed by each applicant as a precondition for receiving Federal grant or cooperative agreement awards.

"Certification for Contracts, Grants, Loans, and Cooperative Agreement" and SF-LLL, the "Disclosure of Lobbying Activities" (if applicable) is required in accordance with Section 319 of Public Law 101-121, which generally prohibits recipients of Federal contracts, grants, and loans from using Legislative Branches of the Federal Government in connection with a specific contract, grant or loan. Form CD-511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matter; Drug-Free Workplace Requirements and Lobbying" and, when applicable, the SF-LLL, are required.

Closing Date: The closing date for applications is April 25, 1992. Applications must be postmarked on or before April 25, 1992.

Note: Please mail completed application to the following address: Chicago Regional Office, 55 E. Monroe Street, suite 1440, Chicago, Illinois 60603.

For Application Kit or Other Information Contact: Dallas Regional Office, 1100 Commerce Street, room 7B23, Dallas, Texas 75242, Attn: Yvonne Guevara, (214) 767-8001.

A pre-bid conference will be held on April 3, 1992 in the U.S. Federal Building, room 424, on 1205 Texas Ave., Lubbock, Texas at 10 a.m.

SUPPLEMENTARY INFORMATION:
Anticipated processing time of this award is 120 days. Executive Order 12372, "Intergovernmental Review of Federal Programs," is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

11.800 Minority Business Development
(Catalog of Federal Domestic Assistance)

Dated: March 10, 1992.

Melda Cabrera,
Regional Director, Dallas Regional Office.

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

[Docket No. 920255-2055]

Inspection and Certification Fees and Charges

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of 1992 inspection fees.

SUMMARY: NOAA announces a change in the established rates for voluntary Department of Commerce fishery product grading and cerification services consistent with its intent to provide inspection services at the lowest appropriate cost. The change represents an increase of 4.2 percent in the basic hourly rates and results from a pay raise of 4.2 percent for Federal employees effective January 1, 1992.

EFFECTIVE DATE: January 2, 1992.

FOR FURTHER INFORMATION CONTACT:
Richard V. Cano, Division Chief, Inspection Services Division, National Marine Fisheries Service, Silver Spring, MD 20910, Phone 301/713-2355.

SUPPLEMENTARY INFORMATION:
Regulations at 50 CFR 260.70 authorize the Secretary of Commerce to review and revise annually the rates for voluntary fishery products inspection, grading, and certification services by publishing a notice of fee changes in the Federal Register. The revised hourly rates reflect a 4.2 percent salary raise for Federal employees. Below is the schedule of fees effective January 1, 1992. The procedure to calculate the Type II hourly fee has been changed by adding 40 percent, rather than 50 percent, to the Type I fee. This change will be reflected in an amendment to the regulations. The fees outlined for the State of Alaska are for services provided by cross-licensed State of Alaska inspectors. Charges for services provided in Alaska by NMFS inspectors will be at the rates as specified, plus cost of living allowances. The rates outlined below for the State of Minnesota are for services provided by cross-licensed State of Minnesota inspectors. Charges for services provided in Minnesota by NMFS inspectors will be at the rates specified previously. The rates charged in the State of Minnesota are subject to change based on information supplied by the Minnesota Department of Agriculture.

(a) Type I—Official establishment and product inspection—contract basis:

	Per hour
Regular (except Alaska and Minnesota)	$32.45
Overtime (except Alaska and Minnesota)	48.70
Sunday and legal holidays (2 hrs. minimum) (except Alaska and Minnesota)	64.90

(1) The contracting party will be charged at an hourly rate of $32.45 per hour for regular time; (2) $48.70 per hour for overtime in excess of 8 hours per shift per day; and (3) $64.90 per hour for Sunday and national legal holidays for services performed by inspectors at official establishment(s) operating under Federal inspection. In addition to any hourly service charge, a night differential fee equal to 10 percent of the employee's hourly salary will be charged for each hour of service provided after 6 p.m. and before 6 a.m. The contracting party will be billed monthly for services rendered in accordance with contractual provisions at the rates prescribed in this section. Products designated in a contract will be inspected during processing at the hourly rate for regular time, plus overtime, when appropriate.

(b) Type II—Lot inspection—Official and unofficially drawn samples:

	Per hour
Regular (except Alaska and Minnesota)	$45.45
Overtime (except Alaska and Minnesota)	68.15
Sunday and legal holidays (2 hrs. minimum) (except Alaska and Minnesota)	90.90
Minimum fee (except Alaska and Minnesota)	34.10

(1) For lot inspection services performed between the hours of 7 a.m. and 5 p.m., Monday through Friday—$45.45 per hour.

(2) For lot inspection services performed at times Monday through Friday other than between 7 a.m. and 5 p.m., and on Saturdays (2 hrs. minimum)—$68.15 per hour. (3) Sunday and national legal holidays (2 hrs. minimum)—$90.90 per hour. (4) The minimum service fee to be charged and collected for inspection of any lot or lots of products requiring less than 1 hour will be $34.10.

(c) Type III—Miscellaneous inspection and consultative services.

When any inspection or related services such as, but not limited to, initial and final establishment surveys, appeal inspections, contract lot inspections, sanitation evaluations, Sanitary Inspected Fish Establishment (SIFE) inspections, sampling, product evaluations, and label and product specification reviews, requires charges to which the foregoing sections are clearly inapplicable, charges will be based on the rates set forth below:

	Per hour
Regular (except Alaska and Minnesota)	$40.55
Overtime (except Alaska and Minnesota)	60.85
Sunday and legal holidays (2 hrs. minimum) (except Alaska and Minnesota)	81.15
Minimum fee (except Alaska and Minnesota)	30.45

In keeping with the intent of the authorizing legislation and the policies of the Inspection Program to charge fees to recover, as nearly as possible, the costs of providing inspection services, the hourly rates charged to contract lot inspection users who provide complete and acceptable facilities which are used by U.S. Department of Commerce (USDC) inspectors to conduct the necessary official contract functions will be those delineated under Type I. In all other cases, contract lot inspection users will be charged Type III rates.

(1) For miscellaneous inspection and consultative services performed between the hours 7 a.m. and 5 p.m., Monday through Friday—$40.55 per hour. (2) For miscellaneous inspection and consultative services performed Monday through Friday, other than between 7 a.m. and 5 p.m., and on Saturdays (2 hrs. minimum)—$60.85 per hour. (3) For miscellaneous inspection and consultative services performed on Sunday and national legal holidays (2 hrs. minimum)—$81.15 per hour. (4) The minimum service fee to be charged and collected for miscellaneous inspection and consultative services requiring less than 1 hour will be $30.45.

(d) The hourly rates for the State of Alaska as performed by cross-licensed State of Alaska inspectors are as follows: Charges for services provided in Alaska by NMFS inspectors will be at the rate stated previously, plus cost of living allowances. For Type I inspection, in addition to any hourly service charge, a night differential fee equal to 10 percent of the employee's hourly salary will be charged for each hour of service provided after 6 p.m. and before 6 a.m.

STATE OF ALASKA—AREA

	Aleutian Chain Bristol Bay Dillingham	South East & South Central Anchorage, Kenai, Juneau, Ketchikan	Remainder of Alaska, Kodiak
Type I:	(Per hour)	(Per hour)	(Per hour)
Regular time	$45.55	$37.55	$40.25
Overtime	62.90	51.90	55.55
Sunday and legal holidays	78.40	64.65	69.25
Type II:			
Regular time	57.90	46.50	51.15
Overtime	79.90	66.90	72.65
Sunday and legal holidays	104.75	86.75	94.05
Minimum fee	47.50	39.60	41.95
Type III:			
Regular time	50.55	42.05	44.70
Overtime	67.25	56.40	60.40
Sunday and legal holidays	86.50	72.40	78.25
Minimum fee	45.00	37.45	40.25

(e) The hourly rates for the State of Minnesota as performed by cross-licensed State of Minnesota inspectors are as follows:

The rates outlined below for the State of Minnesota are for services provided by cross-licensed State of Minnesota inspectors. Charges for services provided in Minnesota by NMFS inspectors will be at the rates specified previously. The rates charged in the State of Minnesota are subject to change based on information supplied by the Minnesota Department of Agriculture.

State of Minnesota

Type I—Official establishment and product inspection services:	
Regular time	$33.15
Overtime	49.75
Sunday and legal holidays	66.30
Type II—Lot inspection—officially and unofficially drawn samples:	
Regular time	46.40
Overtime	69.65
Sunday and legal holidays	92.85
Minimum fee	34.80
Type III—Miscellaneous inspection and consultative services:	
Regular time	41.45
Overtime	62.15
Sunday and legal holidays	82.90
Minimum fee	31.10

(f) Analytical services: Applicants requesting specific analyses to be performed in a NMFS laboratory will be charged at the rates identified below.

Analyses performed in a private laboratory will be charged at the current rate of that laboratory. Charges based on these fees will be in addition to any hourly rates charged for lot, miscellaneous, and consultative inspection service, as well as to any hourly rates charged for inspection services provided under a contract at official establishments.

Microbiology:	
Total aerobic plate count	$11.96
Total coliform	11.96
Fecal coliform	11.96
E. coli	11.96
Staph. aureus	17.97
Salmonella BAM Method Step 1	17.97
Step 2	[1] 11.96
Step 3	[1] 17.97
Chemistry:	
Histamine	71.90
Indole	71.90
Ammonia	53.93
Sodium bisulfite	[2] 71.90
Isoelectric focusing (species identification)	[2] 71.90
Bioassay:	
Paralytic shellfish poison (minimum of 3 samples)	[2] 51.05

[1] Additional.
[2] Per sample.

Notes: The above costs are for analyses only. Sampling and travel time will be assessed using the Type II rates. Mileage costs will be assessed at the current rate. For other analyses not shown or not frequently requested, the charge will be assessed at the Type III hourly rate of $40.55.

All charges are per sample for sample sizes of six samples or less. These rates, except for asterisked items, should be discounted 30 percent per sample for sample sizes of seven or more run in a single day's analysis.

A surcharge of 20 percent of the total charge will be charged for administrative purposes.

Classification

This action is taken under the authority of 50 CFR 260.70 and complies with Executive Order 12291. It is not subject to the requirements of the Regulatory Flexibility Act. It does not contain a collection-of-information requirement for purposes of the Paperwork Reduction Act. (16 U.S.C. 742e and 7 U.S.C. 1622, 1624).

Dated: March 9, 1992.

Samuel W. McKeen,

Program Management Officer.

BILLING CODE 3510-22-M

Caribbean Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Caribbean Fishery Management Council (Council) and the Council's Administrative Committee will hold public meetings on March 24–27, 1992, in the Conference Room at the Pierre Hotel, San Juan, Puerto Rico. Fishermen and other interested persons are invited to attend the meetings, which will be conducted in English. Simultaneous interpretation (English/Spanish) will be provided at the Council meeting. The public may submit oral or written statements regarding the agenda items.

Council—The Council will hold its 75th regular public meeting on March 25 and 26 beginning at 9 a.m., with recess at 5 p.m. on each day. The Council will reconvene the meeting on March 27 at 9 a.m., and adjourn at noon. Among other topics, the Council will discuss wthe Second Amendment to the Shallow-Water Reef Fish Coral and Conch Fishery Management Plans.

Administrative Committee—The Committee will begin its public meeting on March 24 at 2 p.m., to discuss matters pertaining to the Council's administrative operations, and adjourn at 5 p.m.

For more information contact Miguel A. Rolon, Executive Director, Caribbean Fishery Management Council, Banco de Ponce Building, suite 1108, Hato Rey, Puerto Rico 00918-2577; telephone: (809) 766-5926.

Dated: March 10, 1992.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 92-6019 Filed 3-13-92; 8:45 am]

BILLING CODE 3510-22-M

Mid-Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Mid-Atlantic Fishery Management Council will hold a meeting of its Surf Clam Ocean Quahog Committee with industry advisors on March 31, 1992, beginning at 9 a.m., at the Sheraton Inn, 1570 N. DuPont Highway, Dover, DE., (telephone: 302-678-8500). This meeting will be followed by a meeting of the Executive Committee at 2 p.m., and a meeting of the Habitat Committee at 3 p.m.

The Council will begin its regular meeting on April 1, 1992, at 9 a.m. and adjourn at approximately 1 p.m., on April 2. In addition to reviewing committee reports, the Council may amend the Statement of Operating Practices and Procedures and other fishery management matters as deemed necessary. The meeting may be lengthened or shortened depending on the progress of the agenda. The Council may go into closed session (not open to the public) to discuss personnel and/or national security matters.

For more information, contact John Bryson, Executive Director, Mid-Atlantic Fishery Management Council, room 2115, Federal Building, 300 South New Street, Dover, DE 19901; telephone: (320) 674-2331.

Dated: March 10, 1992.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 92-6020 Filed 3-13-92; 8:45 am]

BILLING CODE 3510-22-M

COMMISSION OF FINE ARTS

Cancellation of Meeting

The Commission of Fine Arts' meeting scheduled for Thursday, 19 March 1992, has been cancelled. The next Commission meeting is scheduled for 16 April 1992 at 10 a.m. in the Commission's offices in the Pension Building, suite 312, Judiciary Square, 441 F Street, NW., Washington, DC 20001 to discuss various projects affecting the appearance of Washington, DC, including buildings, memorials, parks, etc.; also matters of design referred by other agencies of the government. Handicapped persons should call the Commission offices (202-504-2200) for details concerning access to meetings.

Inquiries regarding the agenda and requests to submit written or oral statements should be addressed to Charles H. Atherton, Secretary, Commission of Fine Arts, at the above address or call the above number.

Dated in Washington, DC 6 March 1992.

Charles H. Atherton,

Secretary.

BILLING CODE 6330-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Request for Public Comments on Bilateral Textile Consultations with Guatemala on Certain Wool Textile Products

March 10, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Nicole Bivens Collinson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on categories for which consultations have been requested, call (202) 377-3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On February 28, 1992, under the terms of section 204 of the Agricultural Act of 1956, as amended, the Government of the United States requested consultations with the Government of Guatemala with respect to wool textile products in Category 448 (trousers, breeches and shorts), produced or manufactured in Guatemala.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with the Government of Guatemala, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of wool textile products in Category 448, produced or manufactured in Guatemala and exported during the twelve-month period which began on February 28, 1992 and extends through February 27, 1993, at a level of not less than 37,689 dozen.

A summary market statement concerning Category 448 follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 448, or to comment on domestic production or availability of products included in Category 448, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230; ATTN: Helen L. LeGrande.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Category 448. Should such a solution be reached in consultations with the Government of Guatemala, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—Guatemala

Category 448—Women's and Girls' Wool Trousers, Slacks and Shorts

February 1992

Import Situation and Conclusion

U.S. imports of women's and girls' wool trousers, slacks and shorts, Category 448, from Guatemala reached 37,150 dozen in 1991, almost seven and one-half times the 5,026 dozen imported in 1990. In 1991, Guatemala became the second largest supplier of women's and girls' wool trousers, slacks and shorts to the U.S. accounting for 11 percent of total imports. In 1990, Guatemala ranked 17th among the major suppliers accounting for 1.5 percent of total Category 448 imports.

The sharp and substantial increase in Category 448 imports from Guatemala is disrupting the U.S. market for women's and girls' wool trousers, slacks and shorts.

U.S. Production and Market Share

U.S. production of women's and girls' wool trousers, slacks and shorts, Category 448, increased to 574,000 dozen in 1988, then declined in 1989, 1990, and 1991. Production fell to an estimated 218,000 dozen in 1991, eight percent below the 1990 level and 45 percent below the 1987 level. The domestic manufacturers' share of this market fell from 57 percent in 1987 to 39 percent in 1991, a decline of 18 percentage points.

U.S. Imports and Import Penetration

U.S. imports of women's and girls' wool trousers, slacks and shorts, Category 448, increased from 299,000 dozen in 1987 to 345,000 dozen in 1991, a 15 percent increase. The ratio of imports to domestic production reached 158 percent in 1991, double the 76 percent recorded in 1987.

Duty-Paid Value and U.S. Producers' Price

Approximately 84 percent of Category 448 imports from Guatemala in 1991 entered under the HTSUSA number 6204.61.0010—women's wool trousers and breeches. These trousers and breeches entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable trousers and breeches.

[FR Doc. 92-6028 Filed 3-13-92; 8:45 am]

BILLING CODE 3510-DR-F

Request for Public Comments on Bilateral Textile Consultations with the Government of the United Arab Emirates on Certain Cotton and Man-Made Fiber Textile Products

March 10, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Notice.

FOR FURTHER INFORMATION CONTACT: Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on categories for which consultations have been requested, call (202) 377-3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

On February 29, 1992, under the terms of section 204 of the Agricultural Act of 1956, as amended, the Government of

the United States requested consultations with the Government of the United Arab Emirates regarding Categories 313 (cotton sheeting) and 350/650 (cotton and man-made fiber robes and dressing gowns), produced or manufactured in the United Arab Emirates.

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations with the Government of the United Arab Emirates, the Committee for the Implementation of Textile Agreements may later establish limits for the entry and withdrawal from warehouse for consumption of textile products in Categories 313 and 350/650, produced or manufactured in the United Arab Emirates and exported during the twelve-month period which began on February 29, 1992 and extends through February 28, 1993 at levels of not less than 2,395,898 square meters (Category 313) and 29,655 dozen (Categories 350/650).

Summary market statements concerning Categories 313 and 350/650 follow this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Categories 313 and 350/650, or to comment on domestic production or availability of products included in Categories 313 and 350/650, is invited to submit 10 copies of such comments or information to Auggie D. Tantillo, Chairman, Committee for the Implementation of Textile Agreements, U.S. Department of Commerce, Washington, DC 20230; ATTN: Helen L. LeGrande.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Further comments may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning Categories 313 and 350/650. Should such a solution be reached in consultations with the Government of the United Arab Emirates, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991).

Auggie D. Tantillo,

Chairman, Committee for the Implementation of Textile Agreements.

Market Statement—United Arab Emirates

Category 313—Cotton Sheeting Fabric

February 1992

Import Situation and Conclusion

U.S. imports of cotton sheeting fabric, Category 313, from the United Arab Emirates began in June 1991 and reached 2,766,230 square meters during June-December 1991. The United Arab Emirates is a new supplier of cotton sheeting fabric to the U.S. market. In the last seven months of 1991, the United Arab Emirates shipped an average of 395,200 square meters of cotton sheeting fabric per month, accounting for one percent of total Category 313 imports in 1991.

The sharp and substantial increase in Category 313 imports from the United Arab Emirates is disrupting the U.S. market for cotton sheeting fabric.

Import Penetration and Market Share

U.S. production of cotton sheeting fell to 523,388,000 square meters in 1990, 4 percent below the 1989 level and 11 percent below the 1988 level. Production continued downward in 1991, falling to 375,118,000 square meters during January-September 1991, 7 percent below the January-September 1990 level. In contrast, U.S. imports of Category 313 from all sources reached 391,316,118 square meters in 1991, an increase of 35 percent over the 1988 level.

The U.S. producers' share of the cotton sheeting market dropped 7 percentage points, falling from 67 percent in 1988 to 60 percent in 1990. The drop in the U.S. producers' market share continued in 1991, falling to 56 percent during January-September 1991. The ratio of imports to domestic production increased from 50 percent in 1988 to 67 percent in 1990, and reached 79 percent during January-September 1991.

Duty-Paid Value and U.S. Producers' Price

Approximately 92 percent of Category 313 imports from the United Arab Emirates during the year ending December 1991 entered the U.S. under HTSUSA number 5208.12.4040—Plain weave cotton sheeting fabric of yarn numbers 42 or lower, weighing more than 100 grams per square meter. These fabrics entered the U.S. at duty-paid landed values below U.S. producers' prices for comparable fabrics.

Market Statement—United Arab Emirates

Category 350/650—Cotton and Man-Made Fiber Robes and Dressing Gowns

February 1992

Import Situation and Conclusion

U.S. imports of cotton and man-made fiber robes and dressing gowns, Category 350/650, from the United Arab Emirates reached 25,433 dozen in 1991, almost three times the 8,526 dozen imported in 1990 and the 9,075 dozen imported in 1989, the United Arab Emirates shipped 480 dozen to the U.S. in 1988.

The sharp and substantial increase in Category 350/650 imports from United Arab Emirates is causing disruption in the U.S. market for cotton and man-made fiber robes and dressing gowns.

U.S. Production, Import Penetration and Market Share

U.S. production of cotton and man-made fiber robes and dressing gowns, Category 350/650, declined from 3,385,000 dozen in 1987 to 2,274,000 dozen in 1990, a 33 percent decline. This decline continued in 1991, with production falling to 1,166,000 dozen during the January-September 1991 period, 29 percent below the 1,631,000 dozen produced a year earlier. In contrast, U.S. imports of cotton and man-made fiber robes and dressing gowns Category 350/650, increased from 1,342,000 dozen in 1987 to 1,983,000 dozen in 1991, an increase of 48 percent.

The ratio of imports to domestic production doubled, increasing from 40 percent in 1987 to 84 percent in 1990. This increase continued in 1991, with the ratio of imports to domestic production reaching 123 percent for January-September 1991 period. The domestic manufacturers' share of this market fell from 72 percent in 1987 to 54 percent in 1990, a drop of 18 percentage points. This decline in market share continued in 1991, with the domestic manufacturers' share falling to 45 percent for the January-September 1991 period.

Duty-Paid Value and U.S. Producers' Price

Approximately 81 percent of Category 350/650 imports from the United Arab Emirates in 1991 entered the U.S. under HTSUSA number 6208.91.1010—womens' cotton bathrobes and dressing gowns. These bathrobes and dressing gowns entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable bathrobes and dressing gowns.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: DOD FAR Supplement part 251 and related clauses at part 252.251; OMB Clearance Number 0704-0252.

Type of Request: Extension.

Average Burden Hours/Minutes per Response: 30 minutes.

Responses per Respondent: 3.

Number of Respondents: 3,500.

Annual Burden Hours: 5,250.

Annual Responses: 10,500.

Needs and Uses: This information collection requirement concerns the use of government supply sources by contractors.

Affected Public: Businesses or other for-profit, non profit institutions and Small Businesses or Organizations.

Frequency: On Occasion.

Respondents Obligation: Required to obtain or retain a benefit.

Desk Officer: Mr. Peter Weiss.

Written comments and recommendations on the proposed information collection should be sent to Mr. Weiss at the Office of Management and Budget, Desk Officer for DOD, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce.

Written requests for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Davis Highway, suite 1204, Arlington, Virginia 22202-4302.

Dated: March 9, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of The Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates/Time of Meeting: 30-31 March 1992.

Time: 0830-1630 hours daily.

Place: Ft Leavenworth, KS.

Agenda: The Land Warfare Combat Identification 1992 Summer Study Panel of the Army Science Board will meet for discussions of actions underway as part of the Combat ID Task Force Action Plan. Briefings will also be presented addressing fratricide experience assessments. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C. appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695-0781/0782.

BILLING CODE 3710-8-M

Office of the Secretary

Contract Administration Working Group of the DOD Advisory Panel on Streamlining and Codifying Acquisition Laws

AGENCY: Defense Systems Management College, Office of the Secretary, DoD.

ACTION: Request for public comment.

SUMMARY: The Contract Administration Working Group of the DOD Advisory Panel is reviewing the following laws relating to contract audit and access to records:

5 U.S.C. Appendix 3, Inspector General Act of 1978 Pub. L. 95-452, as amended by PL 97-252 and PL 100-504), specifically section 8 and section 9(a)(1)(C) pertaining to DoD

10 U.S.C. 2276 Inspection and audit of plant and books of contractor (The Advisory Panel has tentatively decided to recommend repeal of this section because it duplicates other provisions of law.)

10 U.S.C. 2313 Examination of books and records of contractor

10 U.S.C. 2408 Availability of cost and pricing records

18 U.S.C. 1516 Obstruction of Federal audit

Request responses to the following questions on each law:

—Is the law serving its intended purpose?
—Has the law created inefficiencies?
—Has it unduly burdened the buyer/seller relationship?
—Is it required for the continuing financial and ethical integrity of defense procurement programs?
—Is it required to protect the best interests of DOD?
—Is the law still relevant?
—Does it overlap, duplicate, or conflict with other laws?
—Does it contain ambiguous terms or provisions which have led to problems in interpretation?
—Should the law apply to commerical products?
—Should it apply to first tier subcontracts, or all subcontracts?

The panel also solicits suggestions of other laws relating to audit and access to records that should be considered.

Individuals and organizations wishing to provide information to the Working Group may provide the information to Ms. Diane Sidebottom, Acquisition Law Task Force, at Defense Systems Management College, 8580 Cinderbed, suite 800, Newington, VA 22122 (703-355-2066).

Dated: March 9, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison officer, Department of Defense.

Office of the Inspector General

Privacy Act of 1974; Addition of a Record System

AGENCY: Office of the Inspector General, DOD.

ACTION: Addition of Record System.

SUMMARY: The Office of the Inspector General is proposing to add a new exempt system of records to its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C 552a), as amended.

DATES: The proposed action will be effective on April 15, 1992, unless comments are received that would result in a contrary determination.

ADDRESSES: Send any comments to the Assistant Director, FOIA/PA Division, Assistant Inspector General for Investigations, 400 Army Navy Drive, Arlington, VA 22202-2884.

FOR FURTHER INFORMATION CONTACT: Ms. Nadine R. Dulacki at (703) 695-9568.

SUPPLEMENTARY INFORMATION: The Office of Inspector General record system notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, were published in the **FEDERAL REGISTER** as follows:

50 FR 22279 May 29, 1985 (DOD compilation, changes follow)
52 FR 26547 Jul 15, 1987
52 FR 35754 Sep 23, 1987
54 FR 24377 Jun 7, 1989
54 FR 33956 Aug 17, 1989
55 FR 18152 May 1, 1990
55 FR 48661 Nov 21, 1990
56 FR 40678 Aug 16, 1991
56 FR 46171 Sep 10, 1991
56 FR 52016 Oct 17, 1991

A new system report, as required by 5 U.S.C. 552a(r) of the Privacy Act of 1974, was submitted on March 3, 1992, to the Committee on Government Operations of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget (OMB) pursuant to paragraph 4b of Appendix I to OMB Circular No. A-130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985 (50 FR 52738, December 24, 1985).

Dated: March 9, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

CIG-16

SYSTEM NAME:

DOD Hotline Program Case Files.

SYSTEM LOCATION:

DOD Hotline Directorate, Office of the Assistant Inspector General for Departmental Inquiries, Office of the Inspector General, Department of Defense, 400 Army Navy Drive, Room 1016, Arlington, VA 22202-2884.

CATEGORIES OF INDIVIDUALS COVERED IN THE SYSTEM:

Individuals filing hotline complaints; individuals alleged to have been involved in criminal or administrative misconduct, including, but not limited to, fraud, waste, or mismanagement; or individuals identified as having been adversely affected by matters being investigated by the DOD Inspector General.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records resulting from the referral of, and inquiry into, hotline complaints, such as the date of the complaint; the hotline control number; the name of the complainant; the actual allegations; referral documents to DOD components requesting investigation into DOD Hotline complaints; referral documents from DOD components transmitting the DOD Hotline Completion Report, which normally contains the name of the examining official(s) assigned to the case; background information regarding the investigation itself, such as the scope of the investigation, relevant facts discovered, information received from witnesses, and specific source documents reviewed; the investigator's findings, conclusions, and recommendations; and the disposition of the case; and internal DOD Hotline forms documenting review and analysis of DOD Hotline Completion Reports received from DOD components.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Inspector General Act of 1978 (Pub. L. 95-452), as amended; DOD Directive 5106.1 (32 CFR part 373); DOD Directive 7050.1 (32 CFR part 98).

PURPOSE(S):

To record information related to official hotline investigations. To compile statistical information to disseminate to other components within the Department of Defense engaged in the Hotline Program. To provide prompt, responsive, and accurate information regarding the status of ongoing cases. To provide a record of complaint disposition. Hotline complaints appearing to involve criminal wrongdoing will be referred to the Defense Criminal Investigative Service or other criminal investigative units of DOD components.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS, AND PURPOSES OF SUCH USES:

The "Blanket Routine Uses" set forth at the beginning of the Office of the Inspector General compilation of record system notices apply to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Automated and paper records pertaining to DOD Hotline investigations are stored in file folders and computerized data base.

RETRIEVABILITY:

By Hotline case number, by subject matter, by the names of complainant(s), by subject(s) of the complaint, and by individual(s) alleged to have been adversely affected by matters being investigated by the DOD Inspector General.

SAFEGUARDS:

Access is limited to DOD Hotline staff. Paper and automated records are stored in rooms protected by cipher lock. The automated system is password protected, and regular back-ups of data are performed.

RETENTION AND DISPOSAL:

Automated and paper records are retained within the DOD Hotline Program office for a period of five years following completion of final action. Thereafter, physical files are stored with the Federal Records Center, and automated data are archived within the DOD Hotline automated system for statistical purposes. Physical files and automated data are destroyed 15 years after the physical files are retired to the Federal Records Center.

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries, either notarized or containing an unsworn declaration, to the Assistant Director, FOIA/PA Division, Office of the Assistant Inspector General for Investigations, 400 Army Navy Drive, Arlington, VA 22202-2884.

The request should contain the individual's full name, address, and Social Security Number. Requests submitted on behalf of other persons must include their written, notarized authorization. Provision of the Social Security Number is voluntary and it will be used solely for identification purposes. Failure to provide the Social Security Number will not affect the individual's rights.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system should address written inquiries to the Assistant Director, FOIA/PA Division, Office of the Assistant Inspector General for Investigations, 400 Army Navy Drive, Arlington, VA 22202-2884.

The request should contain the individual's full name, address, and Social Security Number. Requests submitted on behalf of other persons must include their written, notarized authorization. Provision of the Social Security Number is voluntary and it will be used solely for identification purposes. Failure to provide the Social Security Number will not affect the individual's rights.

CONTESTING RECORD PROCEDURES:

The rules for access to records and for contesting and appealing initial determinations by the individual concerned are published at 32 CFR part 312 or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Sources, subjects, witnesses, all levels of Government, private businesses, and nonprofit organizations.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Portions of this record system may be exempt pursuant to 5 U.S.C. 552a(k)(2) and (k)(5) as applicable.

An exemption rule for this record system has been promulgated in accordance with the requirements of 5 U.S.C. 553(b)(1), (2), and (3), (c) and (e) and published in 32 CFR part 312. For additional information contact the system manager.

BILLING CODE 3810-01-F

DEPARTMENT OF ENERGY

Bonneville Power Administration

Extending the Scoping Period for the Joint Whatcom County/Bonneville Power Administration Environmental Impact Statement for the Joint BPA/Puget Sound Power & Light Northwest Washington Transmission Project

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice to extend the scoping period for BPA/Puget Sound Power & Light (Puget Power) Northwest Washington Transmission Project.

SUMMARY: To meet BPA reliability criteria, to maintain reliable service to the Northwest (NW) Washington area, and to improve transfer capability on the existing Canada-United States Intertie, BPA and Puget Power are proposing a joint project to upgrade transmission service in the area.

Whatcom County and BPA have agreed to undertake preparation of a joint environmental impact statement (EIS) on the project. They hereby extend the scoping period close of comment date to March 31, 1992.

DATES: BPA and Whatcom County will continue to solicit comments from affected landowners, special interests, local governmental and civic organizations, and concerned citizens during the extended scoping period with the aim of identifying environmental resources and issues to be addressed in the EIS. Written comments should be submitted by March 31, 1992, to the Public Involvement Manager, at the address below. Comments and suggestions received after the closing date will be considered to the extent practicable. The DEIS is scheduled to be circulated for public review and comment in the spring of 1993. Public meetings will be held after the release of the DEIS.

ADDRESSES: To have your name placed on the mailing list for this project, submit comment letters, or receive a copy of the DEIS, write to the Public Involvement Manager, Bonneville Power Administration—ALP, P.O. Box 12999, Portland, Oregon 97212.

FOR FURTHER INFORMATION CONTACT: John Taves, Environmental Coordinator for Engineering—EFBG, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208–3621, 503–230–4995, or Jerry Mixon, Deputy SEPA Official Whatcom County, 284–D Kellogg Road, Bellingham, WA 98286, 206–676–6907, or you may write the Assistant Area Manager for Engineering, Puget Sound Area, Bonneville Power Administration, 210 Queen Anne Avenue North, suite 400, Seattle, Washington 98109–1030, or telephone (206) 553–0951.

Additional information is available from BPA's Public Involvement office at (503) 230–3478 in Portland; 800–622–4519 for Oregon outside Portland nationwide.

SUPPLEMENTARY INFORMATION: The Notice of Intent to prepare an EIS was published in the **Federal Register** November 15, 1991 (56 FR 58083). That Notice stated that the time for scoping meeting(s) and the end of scoping period would be defined by separate notices. BPA and Whatcom County held scoping meetings on February 5 (Sedro Wolley) and February 6 (Bellingham) as part of the environmental process. The end of the scoping period was defined as February 29, 1992. A letter to interested parties was prepared, notices were sent to local news media, and the meetings were held as scheduled.

At the Bellingham meeting citizens requested additional time to consider the proposal and to contribute to the scoping process. Accordingly, the scoping period will now close on March 31, 1992. All comments and ideas submitted during the extended period will be considered in defining the scope of the EIS.

Issued in Portland, OR, on March 5, 1992.

Jack Robertson,

Acting Administrator, Bonneville Power Administration.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket Nos. ER92–294–000, et al.]

Electric Rate, Small Power Production, and Interlocking Directorate Filing; The Montana Power Company, et. al.

March 6, 1992.

Take notice that the following filings have been made with the Commission:

1. The Montana Power Co.

[Docket No. ER92–294–000]

Take notice that on March 2, 1992, The Montana Power Company (Montana) tendered for filing with the Federal Energy Regulatory Commission an Amendment 1 to its original filing of a revised Index of Purchasers under FERC Electric Tariff, 2nd Revised Volume No. 1 (M–1 Tariff). This Amendment 1 provides additional information requested by Commission staff.

A copy of the filing was served upon Turlock Irrigation District, Western Area Power Administration (Loveland, Western Area Power Administration (Salt Lake City—for Montrose), and Deseret Generation & Transmission Co-operative.

Comment date: March 20, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. The Cincinnati Gas & Electric Company

[Docket No. ER92–174–000]

Take notice that on February 21, 1992, The Cincinnati Gas & Electric Company (CG&E) tendered for filing with the Commission supplemental information concerning the contracts submitted in this docket.

Copies of this filing were served upon Cleveland Public Power, The City of Piqua, Ohio, The Dayton Power & Light Company, American Electric Power Service Corporation and the Ohio Public Utilities Commission.

Comment date: March 18, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Central Louisiana Electric Company, Inc.

[Docket No. ES92–32–000]

Take notice that on March 3, 1992, Central Louisiana Electric Company, Inc. filed an application with the Federal Energy Regulatory Commission under § 204 of the Federal Power Act requesting authorization for a two-for-one split of its common stock.

Comment date: April 2, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Kimmon Quartz, Ltd.

[Docket No. QF92–68–000]

On March 4, 1992, Kimmon Quartz, Ltd. tendered for filing an admendment to its filing in this docket. No determination has been made that the submittal constitutes a complete filing.

The amendment provides additional information pertaining to technical data and the ownership structure of the cogeneration facility.

Comment date: March 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Public Service Company of New Hampshire

[Docket No. ER92–338–000]

Take notice that Public Service Company of New Hampshire, (PSNH) on March 2, 1992, tendered for filing as an initial rate scheduled an agreement between it and Central Vermont Public Service Corporation (Central Vermont) a Letter Agreement, dated as of January 30, 1992, for the sale of Seabrook Unit 1 capacity and related energy.

PSNH asks the Commission to waive its customary notice period and allow the agreement to become effective February 1, 1992. The agreement has been executed by PSNH and Central Vermont ad copies have been delivered to the customer and the public service commissions in New Hampshire and Vermont.

Comment date: March 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. Central Vermont Public Service Corporation

[Docket No. ER91–113–000]

Take notice that Central Vermont Public Service Corporation (CVPS) on March 2, 1992 tendered for filing supplemental financial information in the above-referenced docket.

CVPS requests the Commission to waive its notice of filing requirements to permit the rate schedule to become effective according to its terms.

Comment date: March 23, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Consumers Power Company

[Docket No. ER92–332–000]

Take notice that on Febraury 27, 1992, Consumers Power Company (Consumers) tendered for filing a rate schedule change consisting of an unexecuted Coordinated Operating Agreement between Consumers and the Michigan Public Power Agency (MPPA) Wolverine Power Supply Cooperative, Inc. (Wolverine). The Agreement provides for various services, including: emergency service, short-term capacity and energy, interchange power, coordinated transmission service and kilovar supply. Consumers also tendered for filing Amendments No. 1 to its Service Agreement for Wholesale for Resale Electric Service with the Cities of Charlevoix, Harbor Springs, Lowell and Petoskey. Copies of the filing were served upon MPPA, Wolverine, the Michigan Public Service Commission and the Michigan cities of Charlevoix, Harbor Springs, Lowell and Petoskey.

Comment date: March 20, 1992, in accordance with Standard Paragraph E end of this notice.

8. Public Service Company of New Hampshire

[Docket No. ER92–329–000]

Take notice that on February 24, 1992, Public Service Company of New Hampshire (PSNH) tendered for filing a Notice of Cancellation of Rate Schedule FERC No. 137, a unit power agreement with Central Vermont Public Service Corporation.

PSNH proposes an effective date of February 29, 1992.

Comment date: March 20, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. PacifiCorp Electric Operations

[Docket No. ER92–271–000]

Take notice that PacifiCorp Electric Operations (PacifiCorp), on March 2, 1992, tendered for filing in accordance with 18 CFR 35.13 of the Commission's Rules and Regulations, an amendment to its filing under the above referenced docket.

Copies of this filing were supplied to Public Service Company of Colorado, Tri-State Generation and Transmission Association, the Public Utilities Commission of the State of Colorado, the Public Utility Commission of Oregon, the Utah Public Service Commission, Public Utilities Commission of the State of California, the Washington Utilities and Transportation Commission, the Montana Public Service Commission, the Public Service Commission of Wyoming and the Idaho Public Utilities Commission.

Comment date: March 23, 1992, in accordance with Standard Paragraph E end of this notice.

10. Southwestern Electric Power Company

[Docket No. ER92–340–000]

Take notice that on February 28, 1992, Southwestern Electric Company (SWEPCO) tendered for filing the final return on common equity (Final ROE) to be used in redetermining or "truing-up" cost-of-service formula rates for wholesale service in 1991 to Northeast Texas Electric Cooperative, Inc., the City of Bentonville, Arkansas, the City of Hope, Arkansas, the Oklahoma Municipal Power Authority, Rayburn Country Electric Cooperative, Inc., Cajun Electric Power Cooperative, Inc. and TEX–LA Electric Cooperative of Texas, Inc. SWEPCO provides service to these customers under contracts which provide for periodic changes in rates and charges determined in accordance with cost-of-service formulas, including a formulaic determination of the return on common equity.

Copies of the filing were served upon the affected wholesale customers, the Public Utility Commission of Texas, the Oklahoma Corporation Commission, the Louisiana Public Service Commission and the Arkansas Public Service Commission.

Comment date: March 20, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Public Service Company of New Hampshire

[Docket No. ER92–345–000]

Take notice that on March 2, 1992, Public Service Company of New Hampshire (PSNH) filed an Amendment to its Service Agreement No. 11 under FERC Electric Tariff, First Revised Volume No. 1 for non-firm transmission service to New England Power Company (NEP). PSNH states that the purpose of the Amendment is to establish NEP as an Eligible Entry under the Settlement Agreement in Docket Nos. ER89–207–004 and EL91–45–000, which the Commission approved on March 2, 1992. The Amendment is proposed to become effective on January 2, 1992, which is the effective date of the settlement rate under the Settlement Agreement.

Comment date: March 20, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Carolina Power & Light Company

[Docket No. ER92–342–000]

Take notice that Carolina Power & Light Company (Company) on March 2, 1992, tendered for filing the "General Terms and Conditions Applicable to North Carolina Eastern Municipal Power Agency's Use of the Santee Cooper New Resource" (Santee Cooper Terms and Conditions), and the "General Terms and Conditions Applicable to North Carolina Eastern Municipal Power Agency's Use of the Peaking Project New Resource" (Peaking Project Terms and Conditions). This filing supplements the Power Coordination Agreement dated July 30, 1981 (1981) (PCA) between the Company and the North Carolina Eastern Municipal Power Agency (Power Agency) designated Rate Schedule FERC No. 121.

The Santee Cooper Terms and Conditions set forth provisions related to Power Agency's use of certain firm power purchased from the South Carolina Public Service Authority (Santee Cooper) as a New Resource, as defined in, § 6.1(C)(1) of the 1981 PCA. The firm power purchases are provided by the Interutility Exchange Contract between Santee Cooper and Power Agency and Schedule D to the contract, both of which were executed on May 17, 1990. Under the Santee Cooper Terms and Conditions, the Company has agreed to dispatch the power from the Santee Cooper New Resource. Power agency has sole responsibility for arranging for the delivery of power from the Santee Cooper New Resource to the Company at the Company's interconnections with Santee Cooper. The effective date of the Santee Cooper Terms and conditions is May 4, 1992, and the termination date is December 31, 1991.

The Peaking Project Terms and Conditions set forth the provisions for the Power Agency's use of an unspecified number of peaking units that Power Agency has commited to construct and operate as a New Resource, as defined in Section 6.1(C)(1) of the 1981 PCA. The Company is informed and believes that the peaking units will be located at two sites (one near Rocky Mount, North Carolina and one near Battleboro, North Carolina), and the aggregate Maximum Net Dependable capacity of the peaking units will be between 142 megawatts and 190 megawatts. The Company has agreed to dispatch these peaking units. Power Agency has sole responsibility for all other aspects of these peaking units, including interconnection of the peaking units to electric systems,

providing for timely, accurate and reliable metering and operating and maintaining the peaking units. The effective date of the Peaking Project Terms and Conditions is May 4, 1992, and the termination date is December 31, 2015.

Copies of the filing were served upon Power Agency, the North Carolina Utilities Commission and the South Carolina Public Service Commission.

Comment date: March 20, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-6006 Filed 3-13-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP92-383-000, et al.]

Northwest Pipeline Corporation, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Northwest Pipeline Corporation

[Docket No. CP92-383-000]

March 6, 1992.

Take notice that on March 2, 1992, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah, 84158, filed in Docket No. CP92-383-000, an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon its deferred exchange service with Westcoast Energy Inc. (Westcoast), the successor-in-interest to Westcoast Transmission Company Limited; all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northwest states that it and Westcoast entered into a Deferred Exchange Agreement (Agreement) dated February 14, 1983, as amended February 16, 1984, in order to facilitate access by BC Gas Inc. (BC Gas) to the Jackson Prairie Storage Field in Washington. The Agreement currently is set forth in Northwest's FERC Gas Tariff, Original Volume No. 2, as Rate Schedule X-83, it is stated.

Northwest states that it has not engaged in deferred exchanges under the Agreement since late 1988 and that BC Gas has implemented alternative arrangements to import and export its storage gas. Accordingly, by a letter agreement dated March 1, 1991, Northwest and Westcoast mutually agreed to terminate the Agreement effective March 1, 1991.

Northwest further states that it does not proposes to abandon any facilities in conjunction with this proposed service abandonment.

Comment date: March 27, 1992, in accordance with Standard Paragraph F at the end of this notice.

2. Texas Eastern Transmission Corporation

[Docket No. CP92-390-000]

March 6, 1992.

Take notice that on March 4, 1992, Texas Eastern Transmission Corporation (Texas Eastern), 5400 Westheimer Court, P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP92-390-000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to add two additional, existing delivery points to service agreements with Consolidated Edison Company of New York (Con Ed) under Texas Eastern's blanket certificate issued in Docket No. CP82-535-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Texas Eastern proposes to add two additional, existing delivery points to service agreements with Con Ed under Rate Schedules FT-1, CD-1, SS-1, SS-2 and FTS of Texas Eastern's FERC Gas Tariff, Fifth Revised Volume No. 1. Texas Eastern states that the delivery points to be added are (1) Transco-Linden Point, which is located in Union County, New Jersey and is designated as Texas Eastern's Meter Station 0244, and (2) Transco-Belle Meade Point, which is located in Somerset County, New Jersey, and designated as Texas Eastern's Meter Station 0919. It is indicated that gas would be delivered at the proposed delivery points to Transcontinental Gas Pipe Corporation (Transco) on a best-efforts basis and subject to Transco's agreement to receive the gas for the account of Con Ed.

Texas Eastern states that the additional sales, transportation and storage service made possible by the addition of the new delivery points would have no effect on Texas Eastern's peak day or annual deliveries. Texas Eastern explains that to the extent deliveries are made at the two delivery points, deliveries may be reduced at the other points of delivery to Con Ed on a day-to-day operational basis. Texas Eastern concludes that deliveries of volumes of gas as proposed would not result in any change in the total contract quantities deliverable under the individual service agreements providing for service to Con Ed pursuant to Texas Eastern's Rate Schedule FT-1, CD-1, SS-1, SS-2 and FTS.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. ANR Pipeline Company

[Docket No. CP92-385-000]

March 6, 1992.

Take notice that on February 25, 1992, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP92-385-000 a request pursuant to §§ 157.205 and 157.208 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.208) for authorization to operate as jurisdictional facilities under section 7 of the Natural Gas Act, certain transmission facilities which have been constructed or modified pursuant to section 311 of the Natural Gas Policy Act under the blanket certificate issued in Docket No. CP82-480-000, all as more fully detailed in the request which is on file with the Commission and open to public inspection.

Specifically, ANR proposes to operate as a jurisdictional facility and to provide jurisdictional services through, including transportation services under subpart G of part 284 of the Commission's Regulations, its one-half interest in approximately 31 miles of 30-inch pipeline extending from an interconnection with ANR's Line FT-18 in Ouachita Parish, Louisiana, to and including an interconnection with the facilities of ANR in Richland Parish, Louisiana [1] as well as an

[1] The remaining one-half interest in the pipeline is owned by Arkla Energy Resources, a division of Arkla, Inc. (Arkla). Arkla has contemporaneously filed a prior notice application under §§ 157.205 and 157.208 in Docket No. CP92-386-000 to operate its interest as a jurisdictional facility

interconnection between ANR's and Arkla's facilities in Custer County, Oklahoma (the Custer Interconnect) which is used to deliver gas from ANR's Southwest Leg to Arkla's Line AD. It is stated that the pipeline, known as Line FM-56, was initially constructed and completed in June 1987 solely to provide services authorized under section 311 of the Natural Gas Policy Act and subpart B of the Commission's Regulations. ANR further states that the Custer Interconnect was constructed and certificated in Docket No. CP76-25 to enable ANR to receive gas from Arkla. ANR indicates that certain of the Custer facilities were subsequently modified and operated pursuant to NGPA section 311 to enable ANR to deliver gas to Arkla at the interconnect.

ANR explains that it originally sought section 7(c) certificate authority for Line FM-56 and the Custer Interconnect in an application filed on September 28, 1989, in Docket No. CP89-2195-000 and the Arkla filed a companion application for its one-half interest in Line FM-56 in Docket No. CP89-2174-000. ANR further explains that although the Commission issued an order in Docket No. CP89-2174-000 on January 17, 1991, the order deferred consideration of Line FM-56 and the Custer Interconnect, thereby limiting service through those facilities to subpart B transactions. ANR states that since Line FM-56 and the Custer Interconnect now fall within the cost thresholds prescribed by § 157.208(d), it has elected to file for prior notice authorization. ANR indicates that upon approval of the authorization requested in this docket, it will file with the Commission to withdraw Line FM-56 and the Custer Interconnect from the authorizations sought in Docket No. CP89-2174-000.

It is explained that the depreciated original cost of the Line FM-56 and Custer Interconnect facilities are $7,300,386 and $397,015, respectively.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

4. Arkla Energy Resources, a Division of Arkla, Inc

[Docket No. CP92-386-000]

March 6, 1992.

Take notice that on February 25, 1992, Arkla Energy Resources, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP92-386-000 a request pursuant to §§ 157.205 and 157.208 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.208) for authorization to operate as a jurisdictional facility and existing pipeline in Louisiana in which it holds a one-half ownership interest, under the blanket certificate issued in Docket Nos. CP82-384-000 and CP82-384-001, pursuant to section 7 of the Natural Gas Act, all as more fully detailed in the request which is on file with the Commission and open to public inspection.

Specifically, Arkla proposes to operate as a juriadictiona facility and to provide jurisdictional services through, including transportation services under subpart G of part 284 of the Commission's Regulations, its one-half interst in approximately 31 miles of 30-inch pipeline extending from an interconnection with Arkla's Line FT-18 in Ouachita Parish, Louisiana, to and including an interconnection with the facilities of ANR Pipeline Company (ANR) in Richland Parish, Louisiana.[2] It is stated that the pipeline, known as Line FM-56, was initially constructed and completed in June 1987 solely to provide services authorized under section 311 of the Natural Gas Policy Act and subpart B of the Commission's Regulations.

Arkla explains that it originally sought section 7(c) certificate authority for Line FM-56 (and certain other minor facilities in the vicinity) in an application filed on September 27, 1989, in Docket No. CP89-2174-000. Arkla further explains that although the Commission issued an order in that docket on January 17, 1991, the order deferred consideration of Line FM-56 and certain other facilities, thereby limiting service through those facilities to subpart B transactions. Arkla states that since Line FM-56 now falls within the cost threshold prescribed by § 157.208(d), it has elected to file for prior notice authorization.[3] Arkla indicates that upon approval of the authorization requested in this docket, it will file with the Commission to withdraw Line FM-56 from the authorizations sought in Docket No. CP89-2174-000.

It is explained that the depreciated original cost of the Line FM-56 facilities is $7,278,742.

[2] The remaining one-half interest in the pipeline is owned by ANR. ANR has contemporaneously filed a prior notice application under §§ 157.205 and 157.208 in Docket No. CP92-385-000 to operate its interest as a jurisdictional facility.

[3] The other minor facilities for which Arkla sought certificate authority in Docket No. CP89-2174-000, with the exception of Line FM-57, have since been certificated under Arkla's blanket certificate pursuant to the automatic authorization in § 157.208(a). Arkla states that these facilities will be reported in Arkla's 1991 Annual Report filed pursuant to § 157.207 of the Regulations. Arkla further states that Line FM-57 will be authorized for subpart G transportation services pursuant to § 157.208(a) upon certification of Line FM-56.

Comment date: April 20, 1992, in Accordance with Standard Paragraph G at the end of this notice.

5. Natural Gas Pipeline Company of America

[Docket No. CP92-388-000]

March 6, 1992.

Take notice that on March 3, 1992, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP92-388-000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to construct and operate a new delivery point for the purpose of providing jurisdictional services involving the deliver of natural gas to Entex, a Division of Arkla, Inc. (Entex), a local distribution company, under Natural's blanket certificate issued in Docket No. CP82-402-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the requests that is on file with the Commission and open to public inspection.

Natural proposes to install a two-inch tap on its 30-inch Gulf Coast mainline in Montgomery County, Texas, and estimates that the total cost of the facilities would be $18,000. Natural states that the facilities would be constructed to be able to deliver up to 3,000 Mcf per day of natural gas to Entex. Natural also states that initially gas would be transported and delivered pursuant to transportation contracts subject to subpart G of part 284 of the Commission's regulations and covered by its blanket transportation certificate issued in Docket No. CP86-582-000.

Natural further states that Entex would use the gas as part of its system supply.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

6. Northern Natural Gas Company

[Docket No. CP92-373-000]

March 6, 1992.

Take notice that on February 27, 1992, Northern Natural Gas Company (Northern), 1111 South 103rd Street, Omaha, Nebraska 68124-1000 filed in Docket No. CP92-373-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to operate and maintain ten existing delivery points and appurtenant facilities for jurisdictional service under Northern's CD-1 Service Agreement and to add one existing

jurisdictional delivery point to Northern's CD-1 Service Agreement with Peoples Natural Gas Company, Division of Utilicorp United Inc. (Peoples) under Northern's blanket certificate issued in Docket No. CP82-401-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that the existing delivery points were constructed and operated pursuant to section 311 of the Natural Gas Policy Act. Northern further states that on July 10, 1991, in Docket No. CP91-2085-000, Northern was authorized to operate and maintain the Enron Gas Liquids/Plattsmouth delivery point for jurisdictional service. No increase in capacity at these stations is required.

Northern asserts that the volumes to be delivered to Peoples at the various delivery points would be within the currently authorized level of firm entitlements for Peoples as set forth in Northern's currently effective CD-1 Service Agreement.

The facilities are located in Iowa, Minnesota and Iowa, it is stated.

Northern asserts that the proposed activity is not prohibited by its existing tariff and that it has sufficient capacity to accommodate the proposed changes without detriment to Northern's other customers.

Comment date: April 20, 1992, in accordance with Standard Paragraph G at the end of this notice.

7. Tennessee Gas Pipeline Company

[Docket No. CP92-369-000]

March 9, 1992.

Take notice that on February 26, 1991, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92-369-000 an application pursuant to section 7(b) of the Natural Gas Act for an order granting permission and approval for the abandonment of the transportation service provided to Natural Gas Pipeline Company of American (NGPL) to be effective February 1, 1992, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee states that it is authorized to provide a firm transportation of up to 21,000 Mcf of natural gas to NGPL under Tennessee's Rates Schedule T-175. Tennessee also states that NGPL no longer uses or needs the transportation service provided under Rate Schedule T-175, and has requested the abandonment with an effective date of February 1, 1992. It is also stated the the abandonment would allow Tennessee to cancel its rate schedule and allow Tennessee's FERC tariff to accurately relect the services actually performed by Tennessee. Tennessee also states that no facilities are proposed to be abandoned.

Comment date: March 30, 1992, in accordance with Standard Paragraph F at the end of this notice.

8. Natural Gas Pipeline Company of America

[Docket No. CP92-367-000]

March 9, 1992.

Take notice that on February 26, 1992, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP92-367-000 and application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a total maximum daily withdrawal quantity (DWQ) of 10,945 Mcf of firm storage services, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Natural states that through a survey of its Rate Schedule MS-2 storage customers, sixteen of its twenty-six customers no longer require the storage service. Therefore, Natural requests authority in the instant application to abandon a total of 10,945 Mcf of firm storage services authorized in Docket Nos. CP70-119, CP72-33 and CP72-43 for the sixteen storage customers under its MS-2 rate schedule. Natural also requests that the abandonment of its Rate Schedule MS-2 storage services be made effective on February 28, 1990 and March 1, 1992, dates which correspond with ther termination of Applicant's Rate Schedule MS-2 service agreements with these customers.

Comment date: March 30, 1992, in accordance with Standard Paragraph F at the end of this notice.

9. Eastern Shore Natural Gas Company

[Docket No. CP89-1024-002]

March 9, 1992.

Take notice that on February 28, 1992, Eastern Shore Natural Gas Company (Eastern Shore), P.O. Box 615, Dover, Delaware 19903-0615, Filed in Docket No. CP89-1024-002 a petition to amend the order issued May 4, 1990, in Docket Nos. CP89-1024-000 and CP89-1024-001 pursuant to section 7(c) of the Natural Gas Act so as to eliminate the variances in its customers' original requests for service as authorized in Docket Nos. CP89-1024-000 and CP89-1024-001 and those levels the customers actually contracted for with Easter Shore, to provide six existing customers with additional contract demand, CWS and CFSS storage service to enable them to meet their firm requirements through the 1993-1994 winter season, and to allow four existing customers to abandon previously certificated contract demand and T-1 transportation service, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By order issued May 4, 1990, Eastern Shore states that it was authorized to increase firm contract demand and firm storage service to several existing customers, provide a new 30-day firm storage service, provide firm storage service to Elkton Gas Service and construct and operate pipeline and compressor facilities required to provide the additional firm sales and storage service. In addition, it is stated that the May 4, 1990, order also authorized Eastern Shore to abandon firm storage service to Formosa Plastics Corporation.

Eastern Shore states that during the period subsequent to its amended application filed in Docket No. CP89-1024-001 and prior to initiating construction of the facilities authorized in the May 4, 1990 order, it became evident that a number of Eastern Shore's customers, for a variety of reasons, did not need service at the levels the customers had originally request from Eastern Shore. Therefore, Eastern Shore requests authorization to amend the order issued May 4, 1990, in Docket Nos. CP89-1024-000 and CP89-1024-001 in the following manner:

(1) Increase/(abandon) firm sales service (Mcf/day) to

Delaware Division	1,752
Citizens Division	674
Delmarva Power and Light	465
Cambridge Division	235
Akzo Chemie America	(2,800)
General Foods	(1,000)
James Thompson	(50)
Easton Utilities	(49)
Pet. Inc	(45)
Reichhold	(6)

for a net increase of 176 Mcfd over the present level of certificated firm sales demand;

(2) Increase/(abandon) CWS storage service (Mcf/day) to

Easton Utilities	841
American Mirrex	109
Delaware Division	(349)
Cambridge Division	(306)
Citizens Division	(155)

for a net change of 0 Mcfd from present overall CWS certificated levels;

(3) Increase/(abandon) CFSS storage service (Mcf/day) to

Easton Utilities	192
Delaware Division	108
Cambridge Division	3
Citizens Division	(110)

for a net increase of 193 Mcfd over the current authorized level

In addition, Eastern Shore requests authorization to provide General Foods with up to 10,000 Mcfd of interruptible sales service and permission and approval to abandon 1,599 Mcfd of T-1 transportation service authorized for Delmarva Power and Light.

Eastern Shore requests that the above changes in authorized service become effective November 1, 1992.

Comment date: March 30, 1992, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

10. Southern Natural Gas Company

[Docket No. CP92-370-000]

March 9, 1992.

Take notice that on February 26, 1992, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP92-370-000 an application under section 7(b) of the Natural Gas Act wherein it requests permission and approval to abandon an interruptible transportation service provided for Transcontinental Gas Pipe Line Corporation (Transco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern states that by Commission order issued March 22, 1979, in Docket No. CP78-241 (6 FERC ¶61,258) it was authorized to transport on a best efforts basis up to 12,000 Mcf of natural gas per day for the account Transco and Transco as agent for others pursuant to a transportation Agreement (Agreement) dated March 10, 1978, which is designated as Rate Schedule X-41 in Southern's FERC Gas Tariff, Original Volume No. 2. Southern further states that in accordance with this Agreement gas was received by Southern from the Bolivar Point Area, Plaquemines Parish, Louisiana and redelivered to Transco at the interconnection of Southern's and Transco's pipelines near Jonesboro, Georgia.

Southern states that Transco has notified Southern that production dedicated to Transco in the Bolivar Point Area ceased in 1987 and therefore has requested that the transportation service be terminated effective June 1, 1992.

Southern further states that no abandonment of facilities by Southern is proposed in conjunction with the abandonment of this transportation service for Transco, and upon receipt of a Commission's order authorizing this abandonment, Southern will file revised tariff sheets to cancel its Rate Schedule X-41.

Comment date: March 30, 1992, in accordance with Standard Paragraph F at the end of this notice.

11. Columbia Gas Transmission

[Docket No. CP92-384-000]

March 9, 1992.

Take notice that on March 2, 1992, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, filed in Docket No. CP92-384-000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon facilities, and for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Columbia proposes two separate mainline construction projects. Columbia proposes for the first project that approximately 1.6 miles of deteriorating 18-inch diameter pipeline in two segments in Madison County, Ohio be replaced with a like amount of 20-inch diameter pipeline. Columbia estimates the cost of this construction to be $605,000.

Columbia proposes the following for the second project:

(a) Increase the Maximum Allowable Operating Pressure (MAOP) of its Z-50 pipeline system from Howell Station in Green County, Ohio to the Rome-Hilliard point of delivery in Franklin County, Ohio;

(b) Construct and operate approximately 1.2 miles of 4- and 20-inch diameter pipeline to replace a like amount of 2-, 3- and 18-inch diameter pipeline in Clark, Madison and Franklin Counties, Ohio;

(c) Construct and operate approximately 0.4 mile of 4-inch diameter pipeline in Clark County, Ohio; and

(d) Construct two additional points of delivery to Columbia Gas of Ohio, Inc. (COH) for mainline tap customers, and abandon four existing points of delivery for mainline tap customers in Madison and Franklin Counties, Ohio.

Columbia states that the second project provides for an increase in deliveries at the Rome-Hilliard point of delivery to one of Columbia's existing wholesale customers, COH. Columbia indicates further that such additional deliveries will be within COH's currently certificated entitlements from Columbia. Columbia indicates the estimated cost of the second project to be $2,085,300, and that COH will provide a contribution in aid of construction of this project.

Columbia indicates that it does not request authorization for any new or additional service in either the first or second proposed project.

Comment date: March 30, 1992, in accordance with Standard Paragraph F at the end of the notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 625 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be repreaented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to

§§ 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ92-2-1-001]

Alabama-Tennessee Natural Gas Co.; Proposed PGA Rate Adjustment

March 10, 1992.

Take notice that on March 5, 1992, Alabama-Tennessee Natural Gas Company ("Alabama-Tennessee"), Post Office Box 918, Florence, Alabama 35631, tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheet:

Sub. Twenty-Ninth Revised Sheet No. 4

This tariff sheet is proposed to become effective April 1, 1992. Alabama-Tennessee states that the purpose of this filing is to substitute corrected information to its quarterly PGA filing which it originally tendered on February 28, 1992 in this docket.

Alabama-Tennessee has also requested a limited waiver on a continuing basis of § 154.22 of the Commission's Regulations with regard to the filing of its quarterly PGA. Alabama-Tennessee proposes that it be permitted to file revisions to its quarterly PGA filing three days after the filing on the revised quarterly PGA of its upstream gas supplier, Tennessee Gas Pipeline Company ("Tennessee"), and that its filing become effective on less than thrity days' notice, on the same effective date as that of Tennessee's revised PGA.

Alabama-Tennessee has requested any necessary waivers of the Commission's Regulations in order to permit the tariff sheets to become effective as proposed.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 17, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TM92-15-20-000]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

March 10, 1992

Take notice that Algonquin Gas Transmission Company ("Algonquin") on March 5, 1992, tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1, as set forth in the following revised tariff sheets:

Proposed to be effective March 1, 1992

9 Rev Sheet No. 41
9 Rev Sheet No. 42

Algonquin states that the revised tariff sheets are being filed to flow through changes in Texas Eastern Transmission Corporation's Rate Schedules SS-2 and SS-3, which underlie Algonquin's Rate Schedules STB and SS-III. Pursuant to Section 10 of Rate Schedule STB and Section 9 of Rate Schedule SS-III in Algonquin's FERC GAs Tariff, Third Revised Volume No. 1, Algonquin is hereby filing the above sheets to track the latest changes filed by Texas Eastern on February 27, 1992 in Docket No. TF92-4-17-000 to be effective March 1, 1992.

Algonquin further states that the effect of the filed tariff sheets is to decrease the STB and SS/III demand charges by 0.14¢ per MMBtu.

Algonquin notes that copies of this filing were served upon each affected party and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before March 17, 1992. Protests will be considered by the Commission in Determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. PR92-10-000]

Cranberry Pipeline Corp.; Petition for Rate Approval

March 10, 1992.

Take notice that on February 24, 1992, Cranberry Pipeline Corporation (Cranberry) filed pursuant to § 284.123(b)(2) of the Commission's regulations, a petition for rate approval requesting that the Commission approve as fair and equitable a maximum rate of 61.1 cents per MMBtu for transportation of natural gas on its West Virginia system under section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA).

Cranberry states that it is an intrastate pipeline within the definition of section 2(16) of the NGPA and it owns and operates discrete facilities in the States of West Virginia, New York and Pennsylvania. Cranberry's West Virginia system is the subject of this petition. Cranberry states in its petition that its last approved rate for transportation on this system was 72 cents per MMBtu which was approved by the Commission in Docket No. ST98-2352-000.

Pursuant to § 284.123(b)(2)(ii), if the Commission does not act within 150 days of the filing date, the rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transporation service. The Commission may, prior to the expiration of the 150 day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedures. All motions must be filed with the Secretary of the Commission on or before March 30, 1992. The petition for rate approval is on file with the Commission and is available for public inspection.

BILLING CODE 6717-01-M

[Docket No. OR92-6-000]

Interstate Oil Pipeline Industry; Modification of time Schedule for Technical Conference on Oil Pipeline Matters

March 10, 1992.

By notice issued February 26, 1992 and amended on February 27, 1992, the Federal Energy Regulatory Commission scheduled a Technical Conference to consider matters pertinent to the regulation of the interstate oil pipeline industry.

A number of parties including the Association of Oil Pipe Lines, ARCO Transportation Alaska, Inc., ARCO Pipe Line Company, Four Corners Pipe Line Company, National Council of Farmer Cooperatives, Farmland Industries, Inc., Phillips Pipe Line Company, TE Products Pipeline Company, L.P., and Buckeye Pipe Line Company, L.P. have filed Motions requesting an extension of the proposed schedule. In their Motions, the parties state that the issues to be addressed at the Technical Conference are of great importance and as such, they need more time to fully and completely explore the issues in order to develop considered responses. The parties have requested various date extensions for the submission of information and for convening the Technical Conference.

In order to allow for full and considered participation and response by the oil pipeline industry, but not unduly delay moving this process forward, the dates for the Technical Conference are hereby modified.

The conference will be held Thursday, April 30, 1992, at 10 a.m. at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC 20426, in a Hearing Room to be announced. Any interested person can submit information prior to the meeting for consideration at the conference by addressing such information to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Any such information should reference Docket No. OR92-6-000 and be filed no later than April 17, 1992. Persons wishing to participate should also file with the Secretary of the Commission a separate written notification of their intention to participate no later than April 17, 1992.

All interested persons and Staff are permitted to attend.

Lois D. Cashell,

Secretary.

[Docket No. PR92-12-000]

The Tekas Corp.; Petition for Rate Approval

March 10, 1992.

Take notice that on February 28, 1992, The Tekas Corporation (Tekas) filed pursuant to § 284.123(b)(2) of the Commission's regulations, a petition for rate approval requesting that the Commission approve as fair and equitable a maximum rate of 25 cents per Mcf plus an allowance for fuel used and lost and unaccounted for volumes for transportation of natural gas under section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA).

Tekas' petition states that it is an intrastate pipeline operating in the State of Kansas. Tekas further states that it is requesting approval of its existing maximum rate of 25 cents per Mcf which was approved by the Commission in Docket No. ST88-3008-000, *et al.* (54 FERC ¶ 61,045).

Pursuant to § 284.123(b)(2)(ii), if the Commission does not act within 150 days of the filing date, the rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transportation service. The Commission may, prior to the expiration of the 150 day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedures. All motions must be filed with the Secretary of the Commission on or before March 30, 1992. The petition for rate approval is on file with the

Commission and is available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP91-210-006]

Tennessee Gas Pipeline Co.; Filing

March 10, 1992.

Take notice on March 5, 1992, Tennessee Gas Pipeline Company (Tennessee) tendered for filing the following revised tariff sheet in Third Revised Volume No. 1 of its FERC Gas Tariff to be effective on April 1, 1992:

Third Substitute First Revised Sheet No. 228

Tennessee states that this filing is being made to comply with the letter order of the Commission dated February 19, 1992. Tennessee states that the tariff sheet has been amended (1) to further clarify the relative priority of mid-day nomination changes and (2) to correct a typographical error.

Tennessee states that copies of its filing are available for inspection at its principal place of business in the Tenneco Building, Houston, Texas, and have been mailed to all affected customers.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure 18 CFR 385.211. All such protests should be filed on or before March 17, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. PR92-11-000]

Utah Gas Service Co.; Petition for Rate Approval

March 10, 1992.

Take notice that on February 24, 1992, Utah Gas Service Company (Utah Gas) filed pursuant to § 284.123(b)(2) of the Commission's regulations, a petition for rate approval requesting that the Commission approve as fair and equitable a maximum rate of 18 cents per MMBtu for transportation of natural gas under section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA).

Utah Gas states that it is a natural gas distribution company with its rates and tariffs regulated by the Utah Public Service Commission. Utah Gas states that it received a § 284.224 blanket transportation certification in Docket No. CP86-188-000. Utah Gas is requesting approval of its existing maximum rate for transportation under its blanket which was established in Docket No. ST89-2401-000.

Pursuant to § 284.123(b)(2)(ii), if the Commission does not act within 150 days of the filing date, the rate will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transportation service. The Commission may, prior to the expiration of the 150 day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data and arguments.

Any person desiring to participate in this rate proceeding must file a motion to intervene in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedures. All motions must be filed with the Secretary of the Commission on or before March 30, 1992. The petition for rate approval is on file with the Commission and is available for public inspection.

Western Area Power Administration

Modification To Program Opportunity for Biomass Energy Projects Proposed for Development Within the Western Regional Biomass Energy Program Region

AGENCY: Western Area Power Administration, DOE.

ACTION: Program Opportunity Notice—modification.

SUMMARY: A Notice on the above subject appeared in the **Federal Register** 57 FR 1261 dated January 13, 1992. This notice described the intent of the Western Area Power Administration to issue a Program Opportunity Notice (PON) on behalf of the Western Regional Biomass Energy Program, to solicit cost-shared proposals for the development, demonstration, and/or commercialization of biomass energy projects that utilize low- or negative-value feedstocks.

The purpose of this notice is to extend the deadline for requesting a copy of the PON from February 12, 1992 to May 15, 1992.

Parties who would like to receive a copy of the PON should submit a written request to the contact listed below. All requests for a PON should be submitted by May 15, 1992, and should reference solicitation number DE-PN65-92WA09522.

FOR FURTHER INFORMATION CONTACT: Ms. Ruth Adams, Contract Specialist, Western Area Power Administration, P.O. Box 3402, Mail Code A1521, Golden, CO 80401, (303) 231-7709.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4115-2]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATE: Comments must be submitted on or before April 15, 1992.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

OFFICE OF AIR AND RADIATION

Title: National Emissions Standards for Hazardous Air Pollutants: Radionuclide (EPA ICR #1100.04; OMB #2060-0191). This ICR requests an amendment to an existing clearance.

Abstract: Owners and operators of phosphogypsum stacks desiring to sell the material will be required to measure the concentration of radium-226 in the phosphogypsum and provide certification records to the purchasers of that material. These owners and operators must maintain records of these concentration measurements and certification documents for 5 years. Phosphogypsum distributors must maintain copies of certification documents and provide copies of such documents to those who purchase or receive phosphogypsum from them. All end users, except agricultural end-users, must maintain documentation describing their use of material. EPA will use this data to ensure that public health continues to be protected from the hazards of radon emitted by phosphogypsum.

Burden Statement: The public annual recordkeeping burden for this collection of information is estimated to average 304 hours per response for phosphogypsum stack owners/operators, 461 hours per response for distributors and 25 hours per response for end users, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Owners and operators of phosphogypsum stacks, phosphogypsum distributors and phosphogypsum end-users.

Estimated Number of Respondents: 41 owners/operators, 25 distributors and 100 end-users.

Estimated Total Annual Burden on Respondents: 24,184 hours.

Frequency of collection: On occasion.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y) 401 M Street, SW., Washington, DC 20460

and

Troy Hillier, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th Street, NW., Washington, DC 20503.

FEDERAL RESERVE SYSTEM

Credit Suisse; Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 10, 1992.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. Credit Suisse, Zurich, Switzerland, and CS Holding, Zurich, Switzerland; to engage *de novo* through one or more subsidiaries, including BEA Associates, in foreign exchange advisory and transactional services pursuant to § 225.25(b)(17); and providing investment advice on financial futures and options on futures pursuant to § 225.25(b)(19) of the Board's Regulation Y and thereby

provide investment advice, including counsel, publications, written analyses and reprots, as a commodity trading advisor registered with the Commodity Futures Trading Commission, with respect to the purchase and sale of futures contracts and options on futures contracts for the commodities and instruments referred to in § 225.25(b)(18) of the Board's Regulation Y on a worldwide basis.

Board of Governors of the Federal Reserve System, March 10, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

First Pinellas Financial Group, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 10, 1992.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. First Pinellas Financial Group, Inc., St. Petersburg, Florida; to become a bank holding company by acquiring 60.09 percent of the voting shares of Rutland's Florida Gulf Bank, Seminole, Florida.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. NoDak Bancorporation, Mandan, North Dakota; to acquire 91 percent of the voting shares of First Southwest Bank-Bismarck, Bismarck, North Dakota, a *de novo* bank.

Board of Governors of the Federal Reserve System, March 10, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 92M-0078]

Advanced Interventional Systems, Inc.; Premarket Approval of the AIS Excimer Laser Angioplasty System

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Advanced Interventional Systems, Inc., Irvine, CA, for premarket approval, under section 515 of the Federal Food, Drug, and Cosmetic Act (the act), of the AIS Excimer Laser Angioplasty System. After reviewing the recommendation of the Circulatory System Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of January 31, 1992, of the approval of the application.

DATES: Petitions for administrative review by April 15, 1992.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Brad C. Astor, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 220850, 301-427-1044.

SUPPLEMENTARY INFORMATION: On May 2, 1990, Advanced Interventional Systems, Inc., 9 Parker, Irvine, CA 92718, submitted to CDRH an application for premarket approval of the AIS Excimer Laser Angioplasty System. The system is indicated for the percutaneous treatment of clinically significant obstructive coronary artery disease in patients who can be treated by the Model PC4020 laser catheter alone or followed by balloon angioplasty. Patients must meet all of the following conditions:

1. Acceptable candidates for coronary artery bypass graft surgery;

2. Atherosclerotic lesions in coronary arteries which are crossable by a guidewire; and

3. Coronary artery segments greater than 20 millimeters in length.

On October 29, 1990, the Circulatory System Devices Panel of the Medical Devices Advisory Committee, an FDA advisory committee, reviewed and recommended approval of the application. On January 31, 1992, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of the FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at time on or before April 15, 1992, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device

and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: March 6, 1992.

Elizabeth D. Jacobson,

Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

Health Care Financing Administration

[OIS-016-N]

Medicare Program; Quarterly Listing of Program Issuances and Coverage Decisions

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice lists HCFA manual instructions, substantive and interpretative regulations and other **Federal Register** notices, and statements of policy that were published during October, November, and December 1991 that relate to the Medicare program. Section 1871(c) of the Social Security Act requires that we publish a list of our Medicare issuances in the **Federal Register** at least every three months.

We also are providing the content of the revisions to the Medicare Coverage Issues Manual published during this quarter. On August 21, 1989 (54 FR 34555), we published the content of the Manual and indicated that we will publish quarterly any updates. Adding the Medicare Coverage Issues Manual changes to this listing allows us to fulfill this requirement in a manner that facilitates identification of coverage and other changes in our manuals.

FOR FURTHER INFORMATION CONTACT:

Allen Savadkin, (410) 966-5265 (For Instruction Information)

Sam Shekar, (410) 966-5316 (For Coverage Information)

Margaret Teeters, (410) 966-4678 (For All Other Information).

SUPPLEMENTARY INFORMATION:

I. Program Issuances

The Health Care Financing Administration (HCFA) is responsible for administering the Medicare program, a program that pays for health care and related services for 34 million Medicare beneficiaries. Administration of the program involves (1) providing information to beneficiaries, health care providers, and the public; and (2) effective communications with regional offices, State governments, various providers of health care, fiscal intermediaries and carriers who process claims and pay bills, and others. To implement the various statutes on which the program is based, we issue regulations under authority granted the Secretary under sections 1102 and 1871 and related provisions of the Social Security Act (the Act) and also issue various manuals, memoranda, and statements necessary to administer the program efficiently.

Section 1871(c)(1) of the Act requires that we publish in the **Federal Register** no less frequently than every three months a list of all Medicare manual instructions, interpretative rules, statements of policy, and guidelines of general applicability not issued as regulations. We published our first notice June 9, 1988 (53 FR 21730). As in prior notices, although both substantive and interpretative regulations published in the **Federal Register** in accordance with section 1871(a) of the Act are not subject to the publication requirement of section 1871(c), for the sake of completeness of the listing of operational and policy statements, we are including those regulations (proposed and final) published.

II. Coverage Issues

We receive numerous inquiries from the general public about whether specific items or services are covered under Medicare. Providers, carriers, and intermediaries have copies of the Medicare Coverage Issues Manual, which identifies those medical items, services, technologies, or treatment procedures that can be paid for under Medicare. On August 21, 1989, we published a notice in the **Federal Register** (54 FR 34555) that contained all the Medicare coverage decisions issued in that manual.

In that notice, we indicated that revisions to the Coverage Issues Manual will be published at least quarterly in the **Federal Register**. We also sometimes issue proposed or final national coverage decision changes in separate **Federal Register** notices. Table IV of this notice contains the text of revisions to the Coverage Issues Manual published between October 1 and December 31, 1991. Readers should find this an easy way to identify both issuance changes to all our manuals and the text of changes to the Coverage Issues Manual.

Revisions to the Coverage Issues Manual are not published on a regular basis but on an as needed basis. We publish revisions as a result of technological changes, medical practice changes, responses to inquiries we receive seeking clarifications, or the resolution of coverage issues under Medicare. If no Coverage Issues Manual revisions were published during a particular quarter, our listing will reflect that fact.

Not all revisions to the Coverage Issues Manual contain major changes. As with any instruction, sometimes minor clarifications or revisions are made within the text. We have reprinted manual revisions as transmitted to manual holders. The new text is shown in italics. We will not reprint the table of contents, since the table of contents serves primarily as a finding aid for the user of the manual and does not identify items as covered or not.

We issued or first update that included the text of changes to the Coverage Issues Manual on March 20, 1990 (55 FR 10290), our second on February 6, 1991 (56 FR 4830), our third on July 5, 1991 (FR 30752), our fourth on November 22, 1991 (56 FR 58913), and our fifth on January 22, 1992 (57 FR 2558). The issuance update found in Table IV of this notice, when added to material from the manual published on August 21, 1989, and the updates published on March 20, 1990, February 6, 1991, July 5, 1991, November 22, 1991, and January 22, 1992 constitute a complete manual as of December 31, 1991. Parties interested in obtaining a copy of the manual and revisions should follow the instructions in section IV of this notice.

III. How to Use the Listing

This notice is organized so that a reader may review the subjects of all manual issuances, memoranda, substantive and interpretative regulations, or coverage decisions published during this timeframe to determine whether any are of particular interest. We expect it to be used in concert with previously published notices. Most notably, those unfamiliar with a description of our manuals may wish to review Table I of our first three notices (53 FR 21730), 53 FR 36891, and 53 FR 50577); those desiring information on the Medicare Coverage Issues Manual may wish to review the August 21, 1989 publication; and those seeking information on the location of regional depository libraries may wish to review Table IV of our first notice. We have divided this current listing into four tables.

Table I describes where interested individuals can get a description of all previously published HCFA manuals and memoranda.

Table II of this notice lists, for each of our manuals or Program Memoranda, a transmittal number unique to that instruction and its subject matter. A transmittal may consist of a single instruction or many. Often it is necessary to use information in a transmittal in conjunction with information currently in the manuals.

Table III lists all substantive and interpretative Medicare regulations and general notices published in the **Federal Register** during this period. For each item, we list the date published, the title of the regulation, and the parts of the Code of Federal Regulations (CFR) which have changed.

Table IV sets forth the revisions to the Medicare Coverage Issues Manual that were published during this quarter. For each revision, we give a brief synopsis of the revision as it appears on the transmittal sheet, the manual section number, and the title of the section. We present a complete copy of the revised material, no matter how minor the revision, and identify the revision by printing in italics the text that was changed. If the transmittal includes material unrelated to the revised sections, for example, when the addition of revised material causes other sections to be repaginated, we do not reprint the unrelated material.

IV. How To Obtain Listed Material

A. Manuals

An individual or organization interested in routinely receiving any manual and revisions to it may purchase a subscription to that manual. Those wishing to subscribe should contact either the Government Printing Office (GPO) or the National Technical Information Service (NTIS) at the following addresses: Superintendent of Documents, Government Printing Office, ATTN: New Order, P.O. Box 371954, Pittsburgh, PA 15250–7954, Telephone (202) 783–3238, or fax your credit card order using (202) 512–2250; National Technical Information Service, Department of Commerce, 5825 Port Royal Road, Springfield, VA 22161, Telephone (703) 487–4630.

In addition, individual manual transmittals and Program Memoranda listed in this notice can be purchased from NTIS. Interested parties should identify the transmittal(s) they want. GPO or NTIS will give complete details on how to obtain the publications they sell.

B. Regulations and Notices

Regulations and notices are published in the daily **Federal Register**. Interested individuals may purchase individual copies or subscribe to the **Federal Register** by contacting the Government Printing Office at the same address indicated above for manual issuances. When ordering individual copies, it is necessary to cite either the date of publication or the volume number and page number.

C. Rulings

Rulings are published on an infrequent basis by HCFA. Interested individuals can obtain copies from the nearest HCFA Regional Office or review them at the nearest regional depository library. We also sometimes publish Rulings in the **Federal Register**.

V. How To Review Listed Material

Transmittals or Program Memoranda can be reviewed at a local Federal Depository Library (FDL). Under the Federal Depository Library Program, government publications are sent to approximately 1400 designated libraries throughout the United States. Interested parties may examine the documents at any one of the FDLs. Some may have arrangements to transfer material to a local library not designated as an FDL. To locate the nearest FDL, individuals should contact any library.

In addition, individuals may contact regional depository libraries, which receive and retain at least one copy of nearly every Federal Government publication, either in printed or microfilm form, for use by the general public. These libraries provide reference services and interlibrary loans; however, they are not sales outlets. Individuals may obtain information about the location of the nearest regional depository library from any library.

Superintendent of Documents numbers for each HCFA publication are shown in Table II, along with the HCFA publication and transmittal numbers. To help FDLs locate the instruction, use the Superintendent of Documents number, plus the HCFA transmittal number. For example, to find the Intermediary Manual, Part 3—Claims Process (HCFA–Pub. 13–3) transmittal entitled "Ambulatory Surgical Center PRICER Program," use the Superintendent of Documents No. HE 22.8/6 and the HCFA transmittal number 1543.

VI. General Information

It is possible that an interested party may have a specific information need and not be able to determine from the listed information whether the issuance or regulation would fulfill that need. Consequently, we are providing information contact persons to answer general questions concerning these items. Copies are not available through the contact persons. Individuals are expected to purchase copies or arrange to review them as noted above.

Questions concerning items in Tables I or II may be addressed to Allen Savadkin, Office of Issuances, Health Care Financing Administration, room 688 East High Rise, 6325 Security Blvd., Baltimore, MD 21207, Telephone (410) 966–5265.

Questions concerning items in Table IV may be addressed to Sam Shekar, Office of Coverage and Eligibility Policy, Health Care Financing Administration, room 445 East High Rise, 6325 Security Blvd., Baltimore, MD 21207, Telephone (410) 966–5316.

Questions concerning all other information may be addressed to Margaret Teeters, Regulations Staff, Health Care Financing Administration, room 132 East High Rise, 6325 Security Blvd., Baltimore, MD 21207, Telephone (410) 966–4678.

Table I.—Description of Manuals, Memoranda and HCFA Rulings

An extensive descriptive listing of manuals and memoranda was previously published at 53 FR 21730 and supplemented at 53 FR 36891 and 53 FR 50577. Also, for a complete description of the Medicare Coverage Issues Manual, please review 54 FR 34555.

Table IV.—Medicare Coverage Issues Manual

(For the reader's convenience, new material and changes to previously published material are in italics. If any part of a sentence in the manual instruction has changed, the entire line is shown in italics. The transmittal includes material unrelated to revised sections. We are not reprinting the unrelated material.)

[Transmittal No. 53; section 50–17, Laboratory Tests—CRD Patients.

New Implementing Instruction—Effective Date: 11/12/91.

Section 50–17, Laboratory Tests—CRD Patients.

This section is revised to include hemoglobin as a routinely covered test for a CRD patient.]

50–17 Laboratory Tests—CRD patients

A. Laboratory tests are essential to monitor the progress of CRD patients. The following list and frequencies of tests constitute the level and types of routine laboratory tests that are covered. Bills for other types of tests are considered nonroutine. Routine tests at greater frequencies must include medical justification. Nonroutine tests generally are justified by the diagnosis. The routinely covered regimen includes the following tests: Per Dialysis

All hematocrit or hemoglobin and clotting time tests furnished incident to dialysis treatments.

[Transmittal No. 54, section 35–91, Laparoscopic Cholecystectomy.

New Implementing Instruction—Effective Date: Services performed on or after 11/18/91.

Section 35–91, Laparoscopic Cholecystectomy.—This section has been added to provide for coverage of laparoscopic cholecystectomy for the removal of the gall bladder.]

35–91 Laparoscopic Cholecystectomy (Effective for Services Performed on and After 11/18/91

Laparoscopic cholecystectomy is a covered surgical procedure in which a diseased gall bladder is removed through the use of instruments introduced via cannulae, with vision of the operative field maintained by use of a high-resolution television camera-monitor system (video laparoscope). Until a permanent national code is issued, use the following Q codes (temporary codes):

- *Q0059 Laparoscopy, surgical; cholecystectomy (any method), and*
- *Q0062 Laparoscopy, surgical; cholecystectomy (any method) with cholangiography. These codes will facilitate data-keeping in order to help evaluate this new technology.*

BILLING CODE 4120–01–M

Health Resources and Services Administration

Pediatric Acquired Immune Deficiency Syndrome (AIDS); Health Care Demonstration Projects

AGENCY: Health Resources and Services Administration (HRSA), PHS, HHS.

ACTION: Notice of availability of funds.

SUMMARY: The Maternal and Child Health Bureau (MCHB), HRSA, announces that fiscal year (FY) 1992 funds are available for grants for Pediatric AIDS Health Care Demonstration Projects. Projects will be funded to demonstrate strategies and innovative models for medical intervention in pediatric AIDS and coordinated medical and social services for children, youth, women of childbearing age, and families affected by the Human Immunodeficiency Virus (HIV) infection, AIDS or other related conditions, or those at risk for developing infection. Funds were appropriated for this purpose by Public Law 102–170.

The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS national activity for setting priority areas. The pediatric AIDS Health Care Demonstration grant program directly addresses the Healthy People 2000 objectives related to the priority area of HIV infection. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock Number 017–001–0474–0) or Healthy People 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (telephone 202–783–3238).

DATES: The deadline for receipt of applications is April 27, 1992. Applications shall be considered as meeting the deadline if they are either: (1) Received by the Grants Management Branch at the address below on or before the deadline date; or (2) postmarked on or before the deadline date, and received in time for submission to the review group. Applicants must obtain a legibly dated U.S. Postal Service postmark or a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing. Grant applications received after the deadline date are subject to being returned to the applicant.

Applicants will be notified of grant awards in July 1992. Project periods of grantees begin August 1, 1992.

FOR FURTHER INFORMATION CONTACT: Additional information relating to technical and program issues may be obtained from: Beth Roy, Division of Services for Children with Special Health Needs, Maternal and Child Health Bureau, Health Resources and Services Administration, room 18A–19, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone (301) 443–9051.

Grant applications and additional information regarding business, administrative or fiscal issues related to the awarding of grants under this notice may be requested from: Chief, Grants Management Branch, Maternal and Child Health Bureau, Health Resources and Services Administration, room 18–12, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–1440. The completed application must be submitted to the Grants Management Officer.

SUPPLEMENTARY INFORMATION:

Program Background and Objectives

Through September 1991, the Centers for Disease Control (CDC) have received reports of 195,718 cases of AIDS. Of these, 3,312 have been infants and children 0–12 years of age and 751 have been adolescents 13–19 years of age, and the number of new cases of AIDS among children is up 48 percent since 1989. Approximately one-half of the known cases in this pediatric population have died. Minority children comprise the vast majority of pediatric AIDS cases: 50 percent of cases are black and 24 percent are Hispanic. In addition, more than half of the hemophilia population has been exposed to HIV because of their reliance on blood products which were not tested for HIV antibody prior to May 1985, with the result that children with hemophilia ages 13–19 comprise 30 percent of all AIDS cases in that age group.

The cost of providing a full range of services in the pediatric population with AIDS is high, largely reflecting the long periods of high-cost hospitalization these children may experience. It has been MCHB's experience with other populations of children with complex health care needs that comprehensive, coordinated approaches to care in ambulatory community-based settings result in shorter hospital stays, thus tending to reduce medical costs. The Pediatric AIDS Demonstration Projects will address the incidence and cost of HIV/AIDS infection in children, youth, women, and families within the context of family-centered, community-based, coordinated systems of care that include outreach and support services.

The escalation in the number of women of childbearing age who have HIV infection has, through perinatal transmission, increased pediatric AIDS to epidemic proportions. The CDC has reported that from an estimated 18 cases in 1980, the number of AIDS cases in women between the ages 20–40 has increased to 14,427 cases as of September 1991. Acquired Immunodeficiency Syndrome is now one of the five leading causes of death among this age group. Faced with their own illness, many women must also be caregivers to HIV/AIDS-infected infants and mates. As more women become incapacitated or die, more children are orphaned, compounding the devastation of families. The Pediatric AIDS Demonstration Projects should develop family-centered, community-based, coordinated systems of care which will address problems confronting women with HIV/AIDS infection, such as access to comprehensive drug abuse treatment, access to needed health and supportive services, and access to clinical research trials that show therapeutic promise. The number of persons with HIV infection involved in clinical trials versus the number of people eligible for clinical trials is small. Women and children, especially minorities, are underrepresented in federally financed trials, although efforts are being made to involve them in such research. This limits access to experimental therapies as well as the basic health care services that many receive only through participation in trials. The projects must collaborate with federally-financed clinical trials located in their geographical areas in order to make such research accessible to more women and children.

Pediatric AIDS Demonstration Projects, initiated in 1988, are designed to further the coordination of services for children, youth, women, and families affected by the HIV infection, AIDS or related conditions, or those at risk for developing the HIV infection. This coordination includes those activites supporte by Title V of the Social Security Act, the existing Pediatric AIDS Health Care Demonstration Projects previously funded by MCHB, the established network of hemophilia treatment centers, and other departmental AIDS activities, particularly those funded under Title XXVI of the Public Health Service Act, known as the Ryan White C.A.R.E. Act. The comprehensive system of services for children, youth, women, and families affected by the HIV should be interwoven with the existing service and financing programs, including Medicaid, that generally serve children and families with special health care needs.

Purpose

The purpose of the funding is to improve and expand the system of comprehensive care services for children, youth, women, and families who are affected by the HIV and AIDS or are at risk. With funds authorized and appropriated under Public Law 102–170, the program will support innovative strategies and modes of service delivery to respond to the multiple problems arising from the epidemic of HIV infection and AIDS affecting children, youth, women, and families. Activities under the demonstration grants should address the following goals:

—Foster the development of comprehensive care systems that provide family-centered, community-based, coordinated care.
—Emphasize prevention within the comprehensive care system in order to reduce the spread of the HIV infection to vulnerable populations, especially minorities and adolescents.
—Increase the access of HIV-infected children, youth, women, and their families to comprehensive care services.
—Ensure the delivery of high quality care with an emphasis on ambulatory care services that may reduce unnecessary hospital stays.
—Sustain comprehensive care systems for HIV-infected children through appropriate financing mechanisms.

Funding Categories

Two categories of projects will be funded in FY 1992. Applications which do not fall within these program categories will not be considered. The first category of projects, the Pediatric AIDS Health Care Demonstration Projects, initiated in 1988, must (1) develope, organize, deliver, and arrange for culturally-relevant, community-based, family-centered, coordinated services to children, youth, women, and families affected by HIV; and (2) develop prevention programs to reduce perinatal transmission and the spread of

the infection to vulnerable populations, especially, minorities and adolescents. The projects should serve as models for other communities and should identify and coordinate the range of resources needed to provide appropriate and effective care to the target population of children, youth, women, and families affected by the HIV infection. These projects will focus on local capacity-building, making maximum use of all available public and private resources for reaching and providing health care and supportive services to the target population. These include other appropriate Federal, State, and local programs serving children with special health care needs (e.g., Medicaid, developmental disabilities, special education) and providers, payers, organizations, and support groups in the private sector with a similar focus.

Preference for funding under the Pediatric AIDS Health Care Demonostration Projects will be given to competing renewal projects that demonstrate an established model of family-centered, community-based, coordinated system of care that serve children, youth, women, and families affected by the HIV infection. This means that these projects will be funded ahead of other groups of applications in this category. Special consideration will be given to all applicants that provide HIV/AIDS services to the unserved or underserved target population. This means that merit reviewers will assign scores based on the extent to which applicants address this area of program interest.

A second category of projects is an initiative that should expand the capability of the Network of Hemophilia Treatment Centers to provide pediatric and family HIV/AIDS services to unserved or underserved HIV/AIDS affected populations. The devastating impact of HIV/AIDS on children and families with hemophilia has required the hemophilia treatment centers to expand their capacity to provide HIV medical services in addition to the ongoing provision of hemophilia comprehensive care services. As a result, hemophilia treatment centers have become a valuable resource within States and communities to provide care for children and youth with hemophilia who are HIV infected and have the potential to serve as a resource for the broader population of HIV affected children and families.

Funding to expand the efforts of the hemophilia treatment center network must be directed to expanding capacity to provide family-centered, community-based, coordinated services to unserved or underserved children and youth with hemophilia and other children and families affected with HIV/AIDS, especially minority populations. The funding must provide support to hemophilia center networks in geographic areas where the impact on HIV/AIDS-infected children with hemophilia has resulted in needs for an unserved or underserved population. In addition, funds should be used to expand the capability of hemophilia treatment centers to serve HIV-infected children and youth without hemophilia in geographic areas where no current services exist, such as in rural areas, or in areas where children and youth are currently underserved. This initiative should include efforts to increase the level of coordination and integration between the hemophilia treatment network and other programs serving children and families in the service area.

Special consideration under the second category will be given to those hemophilia treatment centers that provide pediatric and family HIV/AIDS services to the unserved or underserved population affected by the epidemic.

Availability of Funds

Approximately $19.4 million is available for Pediatric AIDS Health Care Demonstration Projects, of which approximately $3 million will be available for competing renewals and new competitive grants applications. We estimate that approximately $2.6 millions is available for applications in category (1), and it is anticipated that up to five grants will be awarded in this category. For category (2), approximately $400,000 is available, and it is anticipated that up to four grants will be awarded.

Special Concerns

Pediatric AIDS Health Care Demonstration Programs grantees supported by HRSA should coordinate their projects with the Federal, State and local governments concerned with AIDS, including but not limited to: (1) Title V programs: Maternal and Child Health Services Block Grants, including Hemophilia Services Projects, and other relevant Special Projects of Regional and National Significance grants under Title V; (2) HRSA activities and programs funded under authority of the Ryan White C.A.R.E. Act; (3) Healthy Start projects to reduce infant mortality in the communities where such projects are in operation (Aberdeen Area Indian Reservation communities, Baltimore, Maryland; Birmingham, Alabama; Boston, Massachusetts; Chicago, Illinois; Cleveland, Ohio; Detroit, Michigan; Lake County, Indiana; New Orleans, Louisiana; New York, New York; Oakland, California; Philadelphia, Pennsylvania; Pittsburgh, Pennsylvania; Pee Dee Regions, South Carolina; and Washington, DC); (4) Community Health Centers and Migrant Health Centers; (5) CDC HIV/AIDS prevention activities; (6) Medicaid; (7) the education, outreach, treatment, and prevention programs of the Alcohol, Drug Abuse, and Mental Health Administration, including the Office for Treatment Improvement, Office of Substance Abuse Prevention, and the National Insitute of Drug Abuse, especially those concerned with injecting drug users, their sexual partners and prostitutes; (8) HRSA Education Training Centers Grants; (9) grants concerned with mothers and children funded by the National Institute of Child Health and Human Development, National Institutes of Health (NIH); (10) the clinical drug trails or other relevant research conducted by other institutes of the NIH, such as the NIAID Clinical Trails Groups, NIAID Community Programs for Clinical Research on AIDS, and the General Clinical Research Centers; and (11) descretionary grants by the Administration for Children and Families to demonstrate innovative approaches to providing child welfare services for infants with AIDS.

To the maximum extent possible HRSA's Pediatric AIDS Health Care Demonstration Program grantees also should work closely with community-based AIDS service organizations, local AIDS service activities supported by the Robert Wood Johnson Foundation, or other foundations and organizations with AIDS activities. All grantees located in the 18 high priority metropolitan areas that presently meet the eligibility standard of 2601(a) of the PHS Act, as identified in the Ryan White C.A.R.E. Act should seek representation on the C.A.R.E. Planning Councils, either as individual grantees or through agency representation.

The NIH supports a number of studies involving women and children with HIV infection. It is especially important that the Pediatric AIDS Health Care Demonstration and the Hemophilia Treatment Center Network Projects located in the same geographic areas as the research studies facilitate appropriate access to the studies for the women and children they serve.

The MCHB places special emphasis on improving service delivery to women and children from culturally identifiable populations who have been disproportionately affected by barriers to accessible care. This means that Pediatric Health Care Demonstration projects are expected to serve and appropriately involve in project activities members of ethno-culturally distinct groups, unless there are compelling programmatic or other justification for not including either women or persons from culturally disinct populations. The Bureau's intent is to insure the project interventions and outcomes are of benefit to culturally distinct populations and to insure that the broadest possible representation of culturally distinct and historically under-represented groups is supported through programs and projects sponsored by the MCHB.

Consistent with the statutory purpose and with particular attention to inclusion of women and persons from culturally distinct populations, the Department will review applications for funds under the above mentioned categories as competing applications and will fund those which, in the Department's view, best meet the purposes of the Pediatric Health Care Demonstration program and address achievement of the Healthy People 2000 objectives related to HIV infection.

Eligible Applicants

Public and nonprofit and for-profit private entities are eligible to apply for these grant awards. Eligible entities include public or private hospitals, university medical centers, State or local health departments including drug abuse treatment agencies, health care and community organizations. Eligible applicants for the second funding category, the hemophilia demonstration initiative, will be limited to established hemophilia treatment centers.

Review Criteria

Grant applications will be reviewed and rated by objective review panels using the following review criteria.

—Severity of need—documentation of the impact of HIV/AIDS on children, youth, women, and families in the service area including: identification of HIV risk factors, description of trends in the HIV epidemic, and determination and documentation of unmet service needs.

—Applicant's ability to demonstrate an organized comprehensive system of family-centered, community-based, coordinated care. Documentation of collaboration/coordination with appropriate community agencies and providers, particularly Title V, Ryan White, and Healthy Start agencies.

—1992 Goals, Objectives, and Activities—clear delineation of goals and objectives with a timeline for proposed activities. The 1992 plan must be consistent with the Hemophilia and Pediatric AIDS Program goals and address the needs identified in the needs assessment.

—Reporting and evaluation requirements—adequacy of the strategy and proposed steps to implement a data and evaluation system and to use the information collected for program planning and management.

—Organizational structure and setting necessary to implement the proposed goals and objectives.

—Budget justification based on project methodology and required resources.

—For competing renewal applications, adequate documentation of progress related to meeting goals and objectives of the current project period.

Allowable Costs

The basis for determining if costs charged to PHS grants are allowable or allocable is set forth in 45 CFR part 74, subpart Q and 45 CFR part 92 for State and local governments. These regulations implement the five separate sets of cost principles prescribed for grant recipients, which are: OMB circular A–87 for State and local governments; OMB circular A–21 for insititutions of higher education; 45 CFR part 74, appendix E for hospitals; OMB circular A–122 for nonprofit organizations; and 48 CFR chapater 1, subpart 31.2 for for-profit (commercial) organizations. All sources of funding to support this project must be accurately reflected in the applicant's budget.

Reporting Requirements

A successful applicant under this notice will submit reports in accordance with the provisions of the general regulations which apply under 45 CFR part 74, subpart J, Monitoring and Reporting of Program Performance, with the exception of State and local governments to which 45 CFR part 92, subpart C reporting requirements will apply. Financial reporting will be required in accordance with 45 CFR part 74, subpart H, with the exception of State and local governments, to which 45 CFR 92.20 will apply.

Executive Order 12372

The Pediatric AIDS Health Care Demonstration Program has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs by appropriate health planning agencies, as implemented by 45 CFR part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available under this notice (Form PHS 5161–1 with revised face sheet HHS Form 424 and with Program Narrative and Checklist approved under OMB 0937–0189) will contain a listing of States which have chosen to set up such a review system and will provide a single point of contact (SPOC) in the States for review. Applicants (other than federally-recognized Indian tribal governments) should contact their State SPOCs as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the application deadline for new and competing awards. The granting agency does not guarantee to "accommodate or explain" for State process recommendations it receives after that date. (See part 148, Intergovernmental Review of PHS Programs under Executive Order 12372 and 45 CFR part 100 for a description of the review process and requirements.)

(The OMB Catalog of Federal Domestic Assistance number for the Pediatric AIDS Health Care Demonstration Program is 93.153.)

Dated: January 9, 1992.

Public Health Service

Reestablishment of Advisory Committee on Scientific Integrity, Public Health Service; Correction

The Notice published on page 6730 in the **Federal Register** issue of February 27, 1992, concerning the reestablishment of the Advisory Committee on Scientific Integrity, inadvertently indicated that this Committee would, unless appropriately renewed, terminate on February 20, 1995. This date was inaccurate. The Advisory Committee on Scientific Integrity will terminate on December 2, 1993, unless appropriately renewed.

Dated: March 10, 1992.

John Gilliver,

PHS Regulations Officer.

[FR Doc. 92–6062 Filed 3–13–92; 8:45 am]

BILLING CODE 4160–17–M

Health Resources and Services Administration; Statement of Organizations, Functions and Delegations of Authority

Part H, Chapter HB (Health Resources and Services Administration) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (47 FR 38409–24, August 31, 1982, as amended most recently at 56 FR 65739, December 18, 1991), is amended to reflect the redescription of the Office of Health Professions Analysis and Research (formerly the Office of Data Analysis and Management), Bureau of Health Professions and the Office of Program Support, Bureau of Health Professions.

Under Section HB–10, Organization and Functions, amend the following:

(1) Delete the Office of Data Analysis and Management (HBP15) in its entirety.

(2) Add the following statement in its place:

Office of Health Professions Analysis and Research (HBP15). Serves as the Bureau focal point for health professions data analytical studies, policy analysis, modeling, education research, technical assistance, and information resource management. Specifically: (1) Provides policy guidance and technical support and advice to the Office of the Director in the establishment and conduct of a cohesive and comprehensive Bureau analytical program involving both intramural and contract activities; (2) provides technical expertise to all Bureau components on methodologies for data collection, data development, forecasting, data analysis, and interpretation; (3) develops and conducts research on data collection and analytic methodologies, economic forecasting, and health personnel systems modeling, both intramurally and through contracts; (4) coordinates and provides leadership in the development of a health professions educational research program; (5) serves as the Bureau focal point for information resource management, including the planning and implementation of all ADP, word processing and telecommunication equipment and systems; (6) provides technical and other assistance and expertise to other Bureau components for the purpose of modifying, refining, updating, and developing health professions forecasting models employed in the preparation of forecasts and reports; (7) plans, coordinates, and reviews the development of health professions reports and studies which involve cross-discipline analysis or multiple Bureau components in their preparation; (8) develops, plans for, assembles, coordinates and directs ad hoc task forces consisting of various Bureau components for planning and completing multi-discipline and cross-cutting studies, surveys, fact books and black books, and major reports on health professions for the Bureau, Agency, Department, and others; (9) prepares technical reviews and data policy impact analyses of health professions studies, reports, and activities performed by other Bureau and non-Bureau components; (10) maintains the Bureau computerized health professions analytic data bases and data base systems and maintains and develops associated software systems for managing and accessing the data base, through use of intramural and contract mechanisms. Compiles, integrates, coordinates and provides to non-Bureau organizations data collected and compiled by the Office, other Bureau components and sources outside the Bureau into the Bureau analytic and information data bases, and provides technical assistance to other Bureau components to aid them in accessing and utilizing the data base in their program activities; (11) maintains and updates the bureau's computerized program information system, and maintains and develops associated software systems for managing and accessing the system, through both intramural and contract activities. Prepares program management reports and provides technical consultation and assistance to Bureau and Agency staff as well as congressional, academic, research, and other private and public organizations concerning Bureau program data; and (12) maintains liaison with governmental, professional, voluntary, and other public and private organizations, institutions and groups for the purpose of providing information exchange and assessing health professions data availability and needs related to cross-cutting Bureau activities.

(3) Amend the Office of Program Support (HBP12) by adding an "and" after item number (11), changing the semicolon to a period after item number (12), and deleting item number (13) in its entirety.

These organizational and functional changes are effective upon date of signature.

Dated: February 26, 1992.

Robert G. Harmon,

Administrator, HRSA.

Fish and Wildlife Service

Availability of the Draft Environmental Assessment and Land Protection Plan; Proposed Establishment of Mandalay National Wildlife Refuge; Terrebonne Parish, LA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of withdrawal for the Draft Environmental Assessment and Land Protection Plan for the proposed establishment of Mandalay National Wildlife Refuge.

SUMMARY: The above notice was prematurely published on February 28, 1992, at 57 FR 6847, and is hereby withdrawn. A new notice will be published at an appropriate date in the future.

DATES: The withdrawal of the notice is effective March 16, 1992.

ADDRESSES: For further information please contact Mr. Charles R. Danner, Chief, Project Development Branch, U.S. Fish and Wildlife Service, 75 Spring Street SW., Atlanta, Georgia 30303, commerical 404/331–3543 or FTS 841–3543.

Dated: March 9, 1992.

Harold W. Benson,

Acting Regional Director

BILLING CODE 4310–55–M

National Park Service

Willow Beach Development Concept Plan, Lake Mead National Recreation Area, Arizona and Nevada; Intent To Prepare an Environmental Impact Statement

SUMMARY: The National Park Service will prepare a Supplemental Environmental Impact Statement (EIS) to the General Management Plan/Final Environmental Impact Statement (GMP/FEIS) for the Lake Mead National Recreation Area, in conjunction with an amended Development Concept Plan (DCP) for Willow Beach on the Arizona side of Lake Mohave. This notice is in accordance with 40 CFR 1501.7 and 40 CFR 1508.22, of the regulations of the President's Council on Environmental Quality for the National Environmental Policy Act of 1969, Public Law 91–150. The DCP/Supplemental EIS will describe and analyze a proposal and alternative for the future development of this portion of the national recreation area.

Background

A DCP for Willow Beach was contained in the 1986 GMP/FEIS for the national recreation area. The DCP addressed conceptually the location and extent of facilities and services. Since that time, additional flood plain mitigation analysis, hydrology and geological information require that the configuration and location of facilities be adjusted for safety and sanitation as well as service to visitors. As amended DCP and supplemental environmental impact statement is being prepared to address potential impacts from relocation and modification of facilities.

Any persons or organizations wishing to provide comments concerning the planning for Willow Beach, should do so in writing to: Superintendent, Lake Mead National Recreation Area, 601 Nevada Highway, Boulder City, NV 89005, telephone (702) 293–8947. Comments concerning the scope of the DCP/Supplemental EIS should be received by April 30, 1992.

The responsible official is Stanley T Albright, Regional Director, Western Region, National Park Service. The draft DCP/Supplemental EIS is expected to be available for public review in fall, 1992, and the final DCP/Supplemental EIS and Record of Decision completed approximately one year

Dated: March 9, 1992.

Louis S. Albert,

Deputy Regional Director, Western Region.

INTERSTATE COMMERCE COMMISION

[Finance Docket No. 32027]

Duluth, Missabe and Iron Range Railway Co.—Trackage Rights Exemption—Burlington Northern Railroad Co.

Burlington Northern Railroad Company (BN) has agreed to grant overhead trackage rights to Duluth, Missabe and Iron Range Railway Company (DM&IR) over approximately 7,861 feet of rail line at Duluth, MN, between Union Depot (5th Avenue West) and Missabe Junction (28th Avenue West). The exemption became effective on March 3, 1992.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: K.J. Gallagher, Duluth, Missabe and Iron Range Railway Company, P.O. Box 68, 135 Jamison Lane, Monroeville, PA 15146.

As a condition to the use of this exemption, any employees adversely affected by the trackage rights will be protected under *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: March 10, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–359]

Fore River Railroad Corp., Discontinuance of Service Exemption, Norfolk County, MA; Findings

The Commission has issued a certificate authorizing Fore River Railroad Corporation to discontinue the lease of a 3.76-mile rail line between Quincy, MA, and an interchange with Consolidated Rail Corporation (Conrail) at East Braintree, MA, in Norfolk Country, MA. The certificate will become effective 14 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered fianancial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation shall be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB–OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Decided: March 10, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

JUDICIAL CONFERENCE OF THE UNITED STATES

Advisory Committee on Appellate Rules; Open Hearing

AGENCY: Judicial Conference of the United States.

SUBAGENCY: Advisory Committee on Rules of Appellate Procedure.

ACTION: Notice of open hearing.

SUMMARY: The Judicial Conference Advisory Committee on the Appellate Rules has proposed amendments to Rules 3(c) and 15 (a) and (e) of the Federal Rules of Appellate Procedure.

The Judicial Conference Standing Committee on Rules of Practice and Procedure has not approved these proposals but submits them herewith for expedited public comment. We request that all comments and suggestions with respect to them be placed in the hands of the Secretary as soon as convenient and, in any event, no later than May 11, 1992.

In order that persons and organizations wishing to do so may comment orally on the proposed amendments, a hearing will be held by the Advisory Committee on Appellate

Rules at the United States Court of Appeals in Chicago, Illinois, on April 8, 1992. Those wishing to testify should contact the Secretary of the Committee at the above address at least 10 days before the hearing.

All communications with respect to the proposals should be addressed to the Secretary of the Committee on Rules of Practice and Procedure, Administrative Office of the United States Courts, Washington, DC 20544.

DATE OF HEARING: April 8, 1992.

ADDRESS: United States Court of Appeals, 219 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Joseph F. Spaniol, Jr., Secretary, Committee on Rules of Practice and Procedure, Washington, DC 20544, telephone (202) 633–6021.

Dated: March 6, 1992.

Joseph F. Spaniol, Jr.,

Secretary, Committee on Rules of Practice and Procedure.

BILLING CODE 2210–01–M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy at 28 CFR 50.7, notice is hereby given that on March 5, 1992, a proposed consent decree in *United States* v. *CPS Chemical Company, Inc.*, Civil Action No. J–C–90–43, was lodged with the United States District Court for the Eastern District of Arkansas. The complaint filed by the United States sought injunctive relief and civil penalties for violations by defendant CPS Chemical Company, Inc. (CPS) of sections 301 and 402 of the Clean Water Act and the terms and conditions of its National Pollutant Discharge Elimination System (NPDES) permit issued by the U.S. Environmental Protection Agency (EPA) in 1984, and the terms of five administrative orders issued by EPA during the life of the 1984 permit. The proposed consent decree imposes a $1 million penalty for these violations.

For a period of thirty (30) days from the date of this publication, the Department of Justice will receive written comments relating to the proposed consent decree from persons who are not parties to the action. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources # 90–5–1–1–3270.

The proposed consent decree may be examined at the offices of the United States Attorney for the Eastern District of Arkansas, 327 Post Office and Courthouse Building, 600 West Capitol, Little Rock, Arkansas 72203, and at the office of the United States Environmental Protection Agency, Region VI, 1445 Ross Avenue, Dallas, Texas 75202 (Attention: Ralph Corley, Assistant Regional Counsel). A copy of the consent decree may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Washington, DC 20004. Copies of the decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center. Such requests should be accompanied by a check in the amount of $2.00 (25 cents per page reproduction charge) payable to "Consent Decree Library". When requesting copies, please refer to *United States* v. *CPS Chemical Company, Inc.*, DOJ # 90–5–1–1–3270.

Roger Clegg,

Acting Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 92–6035 Filed 3–13–92; 8:45 am]

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Comprehensive Environmental Respose, Compensation, and Liability Act of 1980

In accordance with Departmental policy, 28 CFR 50.7, and 42 U.S.C. 9622(i), notice is hereby given that on March 2, 1992, a proposed consent decree in *United States of America* v *City of Portsmouth, et al.*, Civil Action No. 92–123–D, has been lodged with the United States District Court for the District of New Hampshire. The United States' complaint, filed at the same time as the consent decree, sought recovery of response costs and injunctive relief relating to source control at the Coakley Landfill Site in the Town of North Hampton, New Hampshire under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9606 and 9607, against the City of Portsmouth, New Hampshire, and 30 other entities responsible for hazardous substances found at that site, which is a National Priorities List facility.

The consent decree provides that the settling Defendants will perform the remedial actions selected in the first operable unit Record of Decision dated June 28, 1990, as revised by the Explanation of Significant Differences dated March 22, 1991, issued by the U.S. Environmental Protection Agency (EPA), and reimburse EPA up to $450,000 for costs to be incurred by the United States in connection with oversight of the implementation of the remedial actions. The remedial work will include installing a multi-layer cap over the landfill, installing and operating a groundwater extraction system, constructing and operating a groundwater treatment system to remove metals and volatile organic compounds from extracted contaminated groundwater, and monitoring.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Portsmouth, et al.*, D.J. Ref. 90–11–2–678.

The proposed consent decree may be examined at the office of the United States Attorney, Federal Building, 55 Pleasant St. Concord, New Hampshire 03301 and at the Region I office of the Environmental Protection Agency, One Congress St., Boston, Massachusetts 02203. The proposed consent decree may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Washington, DC 20004 (202–347–7829). A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section Document Center, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $26.00 (25 cents per page reproduction cost, exclusive of the costs of copying the appendices and signature pages) payable to the "Consent Decree Library."

Barry M. Hartman,

Acting Assistant Attorney General, Environment & Natural Resources Division.

[FR Doc. 92–6037 Filed 3–13–92; 8:45 am]

BILLING CODE 4410–01–M

Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on February 28, 1992 a proposed consent decree in *United States* v *Shenango, Inc.*, Civil Action No. 85–933, was lodged with the United States District Court for the Western District of Pennsylvania. The action was brought under sections 301(a), 309 (b) and (d), and 402 of the Clean Water Act, 33 U.S.C. 1311(a), 1319 (b) and (d), and 1342, for unpermitted discharges of wastewater effluent from defendant's Neville Island steel production facility, located near Pittsburgh, Pennsylvania.

The proposed consent decree requires the defendant to pay civil penalties in the amount of $550,000.00. In addition, the consent decree requires the defendant to undertake remedial measures at the facility to control unpermitted wastewater discharges in order to achieve and maintain full compliance with the Clean Water Act and applicable regulations.

The Department of Justice will receive comments relating to the proposed consent decree for the period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Shenango, Inc.*, DOJ Ref. No. 90–5–1–1–2327.

Copies of the proposed consent decree may be examined at the Office of the United States Attorney, Western District of Pennsylvania, 633 U.S. Post Office and Courthouse, Pittsburgh, Pennsylvania 15222. The proposed Consent Decreee may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave., NW., Box 1097 Washington, DC 20004, (202) 347–7829. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $14.25 (25 cents per page reproduction costs) payable to Consent Decree Library.

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–26,500]

Ansdrill/Schlumberger, Scott, LA; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) as amended by the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100–418), the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on December 20, 1991, applicable to all workers of Anadrill/Schlumberger in Scott, Louisiana. The certification notice was published in the **Federal Register** on January 9, 1992 (57 FR 932).

At the request of the State Agency the Department reviewed the subject certification. New information from the company shows that the claimants' wages are being reported under an employer account number which bears the name of the Analysts, Inc., a name the subject firm had over 5 years ago which has never been changed with the State Agency.

The amended notice applicable to TA–W–26,500 is hereby issued as follows:

All workers of Anadrill/Schlumberger, a/k/a The Analysts, Inc., Scott, Louisiana who became totally or partially separated from employment on or after January 1, 1991 are eligible to apply for adjustment

assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this March 6, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 92-6039 Filed 3-13-92; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-26,075, et al.]

Oryx Energy Co., Dallas, TX, et al.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In the matter of TA-W-26,076—Oryx Energy Co., Gulf Coast Production Region, Huston, Texas, and Operating at Various Locations in the Following States:
TA-W-26,076A—Texas
TA-W-26,076B—Mississippi
TA-W-26,076C—Louisiana
TA-W-26,077—Oryx Energy Co., Southwestern Production Region, Midland, Texas, TA-W-26,077A—Operating at Various Locations in Texas.
TA-W-26,078—Oryx Energy Co., Mid-Continent Production Region, Oklahoma City, Oklahoma, and Operating at Various Locations in the Following States:
TA-W-26,078A—Oklahoma
TA-W-26,078B—Colorado
TA-W-26,078C—New Mexico
TA-W-26,078D—California
TA-W-26,078E—Wyoming
TA-W-26,078F—Michigan
TA-W-26,078G—North Dakota
TA-W-26,078H—Kansas
TA-W-26,078I—Texas

In accordance with section 233 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on September 12, 1991, applicable to all workers of Oryx Energy Company, Dallas, Texas (TA-W-25,075); the Gulf Coast Production Region, Houston, Texas (TA-W-26,076) and operating at various locations in Texas, Louisiana and Mississippi (TA-W-26,076A-C); the Southwestern Production Region in Midland (TA-W-26,077) and the Mid-Continent Production Region, Oklahoma City, Oklahoma (TA-W-26,078) and operating at various other locations in Oklahoma, Colorado, New Mexico, California, Wyoming, Michigan, North Dakota and Kansas (TA-W-26,078A-H). The Notice was published in the **Federal Register** on October 2, 1991 (56 FR 49909).

At the request of the Texas Employment Commission, the Department reviewed the subject certification. New information from the company shows that worker separations occurred in other locations of Texas in the Southwestern Production Region of Oryx Energy Company and the layoffs are anticipated in other locations of Texas in the Mid-Continent Production Region of Oryx Energy Company.

The intent of the Department's certification is to include all workers of Oryx Energy Company who were adversely affected by increased imports of crude oil and natural gas.

The amended notice applicable to TA-W-26,075 through TA-W-26,078 is hereby issued as follows:

All workers of Oryx Energy Company, Dallas, Texas (TA-W-26,075); The Gulf Coast Production Region in Houston, Texas (TA-W-26,076) and operating at various locations in the following States: Texas, Mississippi, and Louisiana; the Southwestern Production Region in Midland, Texas (TA-W-26,077) and operating at various other locations in Texas; and the Mid-Continent Production Region in Oklahoma City, Oklahoma (TA-W-26,078) and operating at various other locations in Oklahoma, Colorado, New Mexico, California, Wyoming, Michigan, North Dakota, Kansas and Texas who become totally or partially separated from employment on or after July 31, 1991 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, DC this March 6, 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Media Arts Advisory Panel (Film/Video Production Section) to the National Council on the Arts will be held on April 1, 1992 rom 9 a.m.-6 p.m. and April 2 from 9 a.m.-5:30 p.m. in room 716 at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public on April 2 from 4:30 p.m.-5:30 p.m. The topic will be policy discussion.

The remaining portions of this meeting on April 1 from 9 a.m.-6 p.m. and April 2 from 9 a.m.-4:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman of November 20, 1991, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Any person may observe meetings, or portions thereof, of advisory panels which are open to the public, and may be permitted to participate in the panel's discussions at the discretion of the panel chairman with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682-5532, TTY 202/682-5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

Martha Jones,

Acting Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

1. *Type of submission, new, revision, or extension:* Revision.

2. *The title of the information collection:* 10 CFR part 72—Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste.

3. *The form number if applicable:* Not applicable.

4. *How often the collection is required:* Required reports are collected and evaluated on a continuing basis as events occur. Applications for new licenses or amendments may be submitted at any time. Applications for renewal of licenses would be required every 20 years for an Independent Spent Fuel Storage Installation (ISFSI) and every 40 years for a Monitored Retrievable Storage (MRS) facility.

5. *Who will be required or asked to report:* Vendors of casks for the storage of spent fuel, licensees and applicants for a license to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage in an ISFSI, and the Department of Energy for licenses to receive, transfer, package and possess power reactor spent fuel, high-level waste, and other radioactive materials associated with spent fuel and high-level waste storage in an MRS.

6. *An estimate of the number of responses:* 93.

7. *An estimate of the total number of hours needed to complete the requirement or request:* 165 hours annually per response and 756 hours annually for eight recordkeepers. The estimated annual industry burden is 21,431 hours.

8. *An indication of whether Section 3504(h), Pub. L. 96-511 applies:* Not applicable.

9. *Abstract:* 10 CFR part 72 establishes requirements, procedures, and criteria for the issuance of licenses to possess power reactor spent fuel and other radioactive materials associated with spent fuel storage, in an independent spent fuel storage installation, and requirements for the issuance of licenses to the Department of Energy to receive, transfer, package, and possess power reactor spent fuel and high-level radioactive waste, and other associated radioactive materials, in a monitored retrievable storage facility.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

Comments and questions may be directed by mail to the OMB reviewer: Ronald Minsk, Paperwork Reduction Project (3150-0132), Office of Information and Regulatory Affairs, NEOB-3019, Office of Management and Budget, Washington, DC 20503.

Comments may also be communicated by telephone at (202) 395-3084.

The NRC Clearance officer is Brenda Jo. Shelton, (301) 492-8132.

Dated at Bethesda, Maryland, this 4th day of March 1992.

For the Nuclear Regulatory Commission.

BILLING CODE 6325-01-M

RESOLUTION TRUST CORPORATION

Office of the Secretary

Privacy Act of 1974; System of Records

AGENCY: Resolution Trust Corporation.

ACTION: Notification of system of records.

SUMMARY: The Corporation is giving notice of a system of records it intends to maintain which is subject to the Privacy Act of 1974.

EFFECTIVE DATE: This proposal shall become effective without further notice on April 15, 1992, unless comments are received during or before that date which would result in a contrary determination.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Secretary of the Resolution Trust Corporation (RTC or Corporation), 801 175h Street, NW., Washington, DC 20435-0001. Comments should refer to the above title. A copy of each comment received will be available for public inspection and copying between the hours of 9 am and 5 pm on regular business days at the RTC's Public Reading Room, room 100, 801 17th Street, NW., Washington, DC 20434-0001.

FOR FURTHER INFORMATION CONTACT: Richard White, Privacy Act Attorney, RTC, Office of the Secretary, International Place, 1735 North Lynn Street, Rosslyn, VA 22209. Telephone (703) 908-6137. (This is not a toll-free number)

SUPPLEMENTARY INFORMATION: The system is the FDIC/RTC Employee Financial Disclosure Statements System, RTC-2. It will contain information on current and former employees of the Federal Deposit Insurance Corporation (FDIC) who work for or who have worked for the RTC. The information in the system is collected pursuant to section 502 of Executive Order 12674 as amended by Executive Order 12731, the Federal Home Loan Bank Act of 1932, 12 U.S.C. 1441A(b), as amended and the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, 12 U.S.C. 1441p.

The information in the system will be used to determine if applicants for employment with the RTC or present employees of the FDIC who work for the RTC (FDIC/RTC employees) may have a conflict of interest with respect to the duties and responsibilities of their employment with the RTC and their or any of their family members' financial holdings, business interests, real estate

interests or outside employment or affiliations.

The system will also contain information on FDIC/RTC employees and their family members concerning extensions of credit, for secured or unsecured loans, from insured and non-insured depository institutions, and documentation relating to requests for approval of certain loans extended by insured depository institutions or affiliates thereof. Such information will be used to evaluate any possible conflict of interest the employee or any family member may have concerning a credit transaction and his/her employment with the FDIC/RTC.

The system will contain information on FDIC/RTC employees or their family members' ownership or control of any securities of insured depository institutions or affiliates thereof and any requests to purchase or retain present ownership of such securities. Such information is used to evaluate any possible conflict of interest resulting from the ownership and/or potential ownership of such securities and employment with the FDIC/RTC.

The system will contain information concerning an FDIC/RTC employee's prospective employment, the nature of the business of the prospective employer, the position the employee will occupy, the dates of negotiation for employment, and the employee's official involvement, if any, with the prospective employer. This information will be used to evaluate any possible conflict of interest between an employee's duties and responsibilities with FDIC/RTC and his/her prospective employment.

Finally, the system will contain an employee's acknowledgement of receiving FDIC/RTC standards of conduct training, including an affirmative acknowledgement of individual responsibility to adhere to the provisions of the standards of conduct.

Accordingly, the Corporation is establishing the following System of Records: FDIC/RTC Employee Financial Disclosure Statements System. RTC–2

RTC–2

SYSTEM NAME:

FDIC/RTC Employee Financial Disclosure Statements System. RTC–2.

SYSTEM LOCATION:

Confidential Statements of Employment and Finanical Interests, Reports of Interest in Bank Securities, Confidential Reports of Employment Upon Resignation, Employee Certification and Acknowledgement of FDIC/RTC Standards of Conduct Regulation, and any financial disclosure/conflict of interest or similar form required to be completed by the Office of Government Ethics, and related records are located in designated divisional, regional, or consolidated offices to which individuals covered by the system are assigned. Duplicate copies of the above records are maintained in the Office of Ethics and Protests, RTC, 801 17th Street, NW., Washington, DC 20434–0001, for the purpose of certification of review and resolution of conflicts of interest disclosed therein. Confidential Reports of Indebtedness and related records are located in the Office of Ethics. A list of the RTC's divisional, regional and consolidated offices is available from the RTC Reading Room, 801 17th Street, NW., Washington, DC 20434–0001. (202) 416–6940.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former Federal Deposit Insurance Corporation officers and employees who are working for or who have worked for the RTC, and special government employees required to file any of the following forms: (1) Confidential Statement of Employment and Financial Interests; (2) Confidential Report of Indebtedness; (3) Report of Interest in Bank Securities and Interest in RTC Decision; (4) Confidential Report of Employment Upon Resignation; and (5) Employee Certification and Acknowledgement of FDIC/RTC Standards of Conduct Regulation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information in this system includes data directly furnished by the individual on the following five forms or related records that may be generated in the course of the RTC's administration of Executive Orders 12674 and 12731 as amended or as superseded, and/or 12 CFR part 1605:

(1) Confidential Statement of Employment and Financial Interests—Contains statements of personal and family holdings, interests in business enterprises and real property, creditors, and outside employment.

(2) Confidential Report of Indebtedness—Contains information on extensions of credit (loans and credit cards) by insured and non-insured depository institutions and their affiliates; and may also contain memoranda and correspondence relating to requests for approval of certain loans extended by insured depository institutions or affiliates thereof.

(3) Report of Interest in Bank Securities and Interest in RTC Decision—Contains information on whether or not an employee owns or controls, directly or indirectly, any securities of insured depository institutions or affiliates thereof, and if so, lists specific securities, the nature and extent of such interests and the manner of acquisition, contains information on other outside interests which may have an impact on an employee's official duties, and may contain memoranda and correspondence relating to requests for approval of retention of securities of insured depository institutions by employees.

(4) Confidential Report of Employment Upon Resignation—Contains information as to the employee's prospective employer, the nature of the business or organization activities of the prospective employer, the position the employee will occupy, dates of negotiation for such employment, and the employee's official involvement, if any, with the prospective employer.

(5) Employee Certification and Acknowledgement of FDIC/RTC Standards of Conduct Regulation—Contains employee's certification and acknowledgement that he or she has received a copy of the standards of conduct, has viewed the FDIC/RTC Orientation Ethics Video, and has a positive responsibility to comply with the standards of conduct.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 502 of E.O. 12674, 3 CFR 215 (1989), as amended by E.O. 12731, 3 CFR 306 (1990); section 21A of the Federal Home Loan Bank Act of 1932 (12 U.S.C. 1441a(b)), as amended. The Financial Institutions Reform, Recovery, and Enforcement Act of 1989, 12 U.S.C. 1441(p).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in this system may be disclosed where the Director of the U.S. Office of Government Ethics or the RTC's Chief Executive Officer, or designee, determines that good cause has been shown for such use:

(1) To the appropriate federal, state, or local agency or authority responsible for investigating or procesuting a violation of or for enforcing or implementing a statute, rule, regulation, or order when the information indicates a violation or potential violation of law whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute or by regulation, rule, or order issued pursuant thereto.

(2) To a congressional office in response to an inquiry made at the request of the individual to whom the information pertains.

(3) To any source where necessary to obtain information relevant to a conflict-of-interest investigation or determination.

(4) To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to counsel or witnesses in the course of civil discovery, litigation or settlement negotiations, or in connection with the criminal proceedings.

(5) To the United States Office of Personnel Managment, Office of Government Ethics, the Merit Systems Protection Board, the Office of the Special Counsel, the Federal Labor Relations Authority, an aribtrator, and the Equal Employment Opportunity Commission, to the extent disclosure is necessary to carry out the government-wide personnel management, investigatory, adjudicatory and appellate functions with their respective jurisdiction.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders in Office of Ethics and Protests and designated divisional, regional, or consolidated offices to which individuals covered by the system are located, and on an automated tracking system.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in lockable metal file cabinets in lockable offices and, on a password-protected automated index system.

RETENTION AND DISPOSAL:

Retained for six years and then destroyed by shredding except when the documents are relevant and/or needed in an ongoing investigation they will be retained until no longer needed.

SYSTEM MANAGER(S) AND ADDRESS:

Ethics Program Manager (Employees), RTC, 801 17th Street, NW., Washington, DC 20434–0001.

NOTIFICATION PROCEDURE:

Requests must be in writing and addressed to the Office of the Secretary, RTC, International Place, 1735 North Lynn Street, Rosslyn, VA 22209. The request must contain the name and office of the individual covered by the system, and a notarized statement attesting to the individual's indentity may be required.

RECORD ACCESS PROCEDURE:

Same as "Notification" above.

CONTESTING RECORD PROCEDURES:

Same as "Notification" above.

RECORD SOURCE CATEGORIES:

The information is obtained from the individual on whom the record is maintained or a person designated by him or her and from the RTC's Ethics Program Manager (Employees) and support personnel. Information may also be obtained from the other parties to whom the RTC has supplied information in connection with evaluating the records maintained in the Employee Financial Disclosure Statements system.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Dated at Washington, DC this 10th day of March 1992.

Resolution Trust Corporation.

John M. Buckley, Jr.,

Secretary.

BILLING CODE 6714–01–M

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Boston Stock Exchange, Incorporated

March 10, 1992.

The above named national securities exchange has filed applications with the Securities and Exchange Commission ("Commission") pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and rule 12f–1 thereunder for unlisted trading privileges in the following securities.

Coleman & Co., Inc.
Common Stock, $.01 Par Value (File No. 7–8183)

Callaway Golf Co.
Common Stock, $.01 Par Value (File No. 7–8184)

Musicland Stores Corp.
Common Stock, $.01 Par Value (File No. 7–8185)

Value Merchants, Inc.
Common Stock, $.01 Par Value (File No. 7–8186)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 31, 1992, written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[Release No. 34–30452; File No. SR–CBOE–92–07

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to March 1992 Expiration Series for Capped OEX Options

March 6, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 21, 1992, The Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Exchange Rule 24.9, Commentary .03(b), provides that the CBOE may list one at-the-money call and one at-the-money put capped-style option on the Standard & Poor's 100 Index ("OEX") with expirations of up to four months into the future. Commentary .03(b) also provides that additional at-the-money series with expirations of up to four months may be listed every two months. Accordingly, pursuant to Exchange Rule

24.9, the CBOE currently lists capped-style OEX options with April 1992 and June 1992 expirations. The CBOE proposes, on a limited basis, to modify Exchange Rule 24.9 to provide for an additional expiration month in OEX capped options so that there will be series with March, April and June 1992 expirations outstanding.

The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it recieved on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

Exchange Rule 24.9, Commentary .03(b), provides that the CBOE may list one at-the-money call and one at-the-money put capped-style option on the Standard & Poor's 100 Index ("OEX") with expiration of up to four months into the future. Commentary .03(b) also provides that additional at-the-money series with expirations of up to four months may be listed every two months. Accordingly, pursuant to Exchange Rule 24.9, the CBOE currently lists capped OEX options with April 1992 and June 1992 expirations. Due to investor interest in capped OEX options, the CBOE proposes, on a limited basis, to modify Exchange Rule 24.9 to provide for an additional expiration month in OEX capped options so that there will be series with March, April and June 1992 expirations outstanding. With its filing, the CBOE has submitted a memorandum from the Options Price Reporting Authority ("OPRA") indicating that the addition of capped OEX options expiring in March 1992 will have a negligible impact on the capacity of OPRA and its vendors. [1]

(2) Basis

The CBOE believes that the proposal is consistent with section 6(b) of the Act, in general, and furthers the objectives of Section 6(b)(5), in particular, in that it is designed to protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change constitutes a state policy, practice or interpretation with respect to the administration of an existing CBOE rule. The Commission notes that the CBOE's rules provide the Exchange with some discretion to add additional expiration months. The CBOE proposes to add the March 1992 series as an additional expiration month. Accordingly, the proposal has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b–4.[2] At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organiztion. All submissions should refer to the file number in the caption above and should be submitted by April 6, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[3]

Margaret H. McFarland,

Deputy Secretary

BILLING CODE 8010-01-M

[Release No. 35-25487]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

March 6, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by March 30, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Central and South West Corporation (70-7940); Proposal To Issue and Sell Common Stock in Connection With the Adoption of a Long-Term Incentive Plan and Directors Restricted Stock Plan; Order Authorizing Proxy Solicitation

Central and South West Corporation ("CSW"), 1616 Woodall Rodgers Freeway, P.O. Box 660164, Dallas, Texas 75266, a registered holding company, has filed a declaration pursuant to sections 6(a), 7 and 12(e) of the Act and rules 50(a) (5), 62 and 65 thereunder.

CSW proposes to adopt, subject to shareholder approval at the 1992 annual meeting of shareholders to be held on April 16, 1992 ("1992 Annual Meeting"), (1) the Central and South West Corporation 1992 Long-Term Incentive Plan ("Incentive Plan") and (2) the Central and South West Corporation Directors Restricted Stock Plan ("Directors Plan"). In accordance with the requirements of rule 16b-3 under the Securities Exchange Act of 1934, the two plans will be submitted to the shareholders of CSW for approval at the 1992 Annual Meeting.

CSW states that the purpose of the Incentive Plan is to enable CSW to attract, retain and motivate key employees, and to align their interests with those of CSW shareholders. Pursuant to the Incentive Plan, employees selected by the Executive Compensation Committee ("Committee") of CSW's Board of Directors ("Board") will be eligible from time-to-time through December 31, 2001 for certain performance- and equity-based awards, including stock options and stock appreciation rights, performance units, phantom stock and restricted shares of CSW common stock. The terms, amounts and timing of such awards will be determined by the Committee in accordance with the terms of the Incentive Plan. No more than 4 million shares of CSW common stock, par value $3.50 per share ("Common Stock"), will be subject to awards under the Incentive Plan (after giving effect to the Common Stock split to be effected on March 6, 1992), subject to certain adjustments to reflect combinations, reclassifications or subdivisions of such shares.

CSW states that the purpose of the Directors Plan is to attract highly qualified individuals to serve as non-employee directors on the Board and to further align each non-employee director's interests with those of CSW's shareholders by increasing the amount of Common Stock of CSW owned by each non-employee director. The restricted stock will be provided as part of their annual retainer fee (currently $24,000). Each non-employee director will automatically participate in the Directors Plan if such director has not been an employee of CSW during the one year period immediately prior to and including the date of the grant of such restricted stock. Under the Directors Plan, CSW proposes to issue, from time-to-time through December 31, 2002, up to 100,000 shares of Common Stock (after giving effect to the Common Stock split to be effected on March 6, 1992), subject to certain adjustment to reflect combinations, reclassifications or subdivisions of such shares. Common Stock which may be issued under the two plans may be either authorized and unissued shares or issued shares which have been reacquired by CSW and which are being held as treasury shares.

CSW thus requests authority (1) to grant various awards pursuant to the two plans and, in connection therewith, to issue and sell up to 4 million shares of Common Stock under the Incentive Plan through December 31, 2001 and up to 100,000 shares of Common Stock under the Directors Plan through December 31, 2002, and (2) to solicit proxies from its shareholders for approval of the two plans at its 1992 Annual Meeting. CSW requests an exception from the competitive bidding requirements of Rule 50 under the Act pursuant to subsection (a)(5) in connection with any issuance or sale of Common Stock under the two plans.

CSW has filed with the Commission its proxy solicitation material and requests that the effectiveness of its declaration with respect to the solicitation of proxies for voting by its shareholders on the two plans be permitted to become effective as provided in rule 62(d).

It appearing to the Commission that CSW's declaration regarding the proposed solicitation of proxies should be permitted to become effective forthwith, pursuant to Rule 62:

It Is Ordered, That the declaration regarding the proposed solicitation of proxies, be, and it hereby is, permitted to become effective forthwith, under Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25488]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

March 6, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by March 30, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

American Electric Power Company, Inc. (70-7778)

American Electric Power Company, Inc. ("AEP"), 1 Riverside Plaza, Columbus, Ohio 43215, a registered holding company, has filed a post-effective amendment under section 12(b) of the Act and Rule 45 thereunder to its application-declaration originally filed under sections 6(a), 6(b), 7 and 12(b) of the Act and Rules 45 and 50(a)(5) thereunder.

By Commission order dated December 7, 1990 (HCAR No. 25201), the Commission authorized AEP, among other things, to make cash capital contributions to Columbus Southern Power Company ("Columbus"), an electric public-utility subsidiary company of AEP, from January 1, 1991 through December 31, 1993, of up to $40 million. AEP now requests authorization to increase the total authorized capital contributions to Columbus from $40 million to $70 million. In addition, AEP requests authorization to make capital contributions to Indiana Michigan Power Company, an electric public-utility subsidiary company of AEP, of up to $30 million through December 31, 1993.

The Southern Company, et al. (70-7937)

The Southern Company ("Southern"), a registered holding company, 64 Perimeter Center East, Atlanta, Georgia 30346, and its public utility subsidiaries, Alabama Power Company ("Alabama"), 600 North 18th Street, Birmingham, Alabama 35291, Georgia Power Company ("Georgia"), 333 Piedmont Avenue, NE., Atlanta, Georgia 30308, Gulf Power Company ("Gulf"), 500 Bayfront Parkway, Pensacola, Florida 32520, Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, Savannah Electric and Power Company ("Savannah"), 600 Bay Street East, Savannah, Georgia 31401, and Southern Electric Generating Company ("SEGCO"), 600 North 18th Street, Birmingham, Alabama 35291, a subsidiary of Alabama and Georgia (collectively, "Applicants"), have filed an application-declaration under section 6(a), 6(b) and 7 of the Act and Rule 50(a)(5) thereunder.

By Commission orders dated April 28, 1990 and April 25, 1991 (HCAR Nos. 25077 and 25302, respectively), the Applicants (other than Georgia) were authorized, among other things, to issue and sell, from time-to-time through March 31, 1992, up to the aggregate principal amounts of $500 million for Southern, $450 million for Alabama, $50 million for Gulf, $120 million for Mississippi, $40 million for Savannah, and $100 million for SEGCO: (1) Short-term and/or term loan notes to banks; (2) commercial paper to dealers; and/or (3) short-term non-negotiable promissory notes to public entities in connection with the financing of certian pollution control facilities through the issuance by such public entities of their revenue bond anticipation notes.

By Commission order dated November 30, 1990 (HCAR No. 25197), Georgia was authorized, among other things, to issue and sell, through September 1, 1992, up to $1 billion aggregate principal amount of: (1) Short-term notes; (2) term-loan notes; and/or (3) commercial paper in any combination.

The Applicants now propose to issue and sell, from time-to-time through March 31, 1994, up to the aggregate principal amounts of $500 million for Southern, $450 million for Alabama, $800 million for Georgia, $100 million for Gulf, $140 million for Mississippi, $80 million for Savannah and $100 million for SEGCO: (1) Short-term notes to banks ("Short-Term Notes"); (2) short-term or term notes to banks under revolving credit arrangements; (3) commercial paper ("Commercial Paper") to dealers; and/or (4) short-term non-negotiable promissory notes ("Pollution Control Notes") to public entities in connection with the financing of certain pollution control facilities through the issuance by such public entities of their revenue bond anticipation notes.

The Short-Term Notes to be issued by Alabama, Georgia, Gulf and Mississippi will have maturities of not more than nine months and will bear interest at: (1) The lending bank's prevailing rate offered to corporate borrowers of similar quality; (2) a margin over the London Interbank Offered Rate ("LIBOR"); (3) a margin over certificate of deposit rates ("CD Rate"); or (4) a rate not to exceed the prime rate. The Short-Term Notes to be issued by Savannah will have a maturity of not more than one year and will bear interest at rates in all cases less than the prime rate at the time of issuance and will not be prepayable without premium or penalty.

Compensation for the credit facilities is provided by: (1) For Alabama, the maintenance of balances of up to 5% of the lines or comparable fees in lieu of balances; (2) for Gulf and Mississippi, the maintenance of balances of up to 5% of the available facilities or by fees up to ⅛% per annum of the amount of the facilities; (3) for Georgia, fees of up to ½% of the unused amount of the unused portion of the respective line; and (4) for Savannah, fees equal to ¼% of the unused amount of the respective lines.

The revolving credit arrangement borrowings of Southern, Alabama, Georgia, and Mississippi will be evidenced by promissory notes to mature not more than two hundred seventy (270) days after the date of borrowing. Such short-term borrowings will be renewable at maturity and may be converted to term loans at the borrower's option. Under the term loan option, borrowings will be repaid in twelve (12) equal quarterly installments, beginning after the termination date in effect at the time of the borrowing, or at an earlier date at the borrower's option. The interest rate options available will be: (1) The lender's floating prime rate ("Base Borrowing"); (2) the lender's CD Rate adjusted for Federal Reserve Board reserve requirements imposed upon the lender ("Adjusted CD Rate") plus up to ¾% ("CD Borrowing"); and (3) LIBOR adjusted for Federal Reserve Board reserve requirements imposed upon the lender ("Adjusted LIBOR") plus up to

⅛% ("Eurodollar Borrowing"). Base Borrowings will be prepayable at any time without premium or penalty, whereas advances in connection with CD Borrowings and Eurodollar Borrowings will be prepayable only at the end of each interest period with respect thereto. Compensation for the revolving credit facilities will be provided by fees up to ½% of the unused portion of the bank's commitment or by comparable balances in lieu of such fees. It is proposed that Gulf and Savannah may be parties to and effect borrowings under certain of such agreements.

SEGCO's revolving credit borrowings will be evidenced by notes ("SEGCO Revolving Notes") to mature in not more than five (5) years after the date of issue. SEGCO has obtained specific commitments with group of seven (7) banks in the aggregate amount of $75 million. The SEGCO Revolving Notes will bear interest at one of the three rates, as selected by SEGCO at the time of each borrowing, based on: (1) The lender's floating prime rate, (2) the lender's Adjusted CD Rate plus ⅝% per annum at one of the banks and ½% at the other banks; or (3) Adjusted LIBOR plus ½% per annum at one of the banks and ⅜% at the other banks. SEGCO will pay the following fees for the lines of credit: (1) ½% per annum times an amount equal to 5% of average borrowings outstanding at one bank (or, at the option of SEGCO, by maintaining comparable balances); and (2) at the other banks, ⅜% per annum on the daily unused portion of such commitment to be payable quarterly in arrears. Borrowings which bear interest at the lender's prime rates are prepayable at any time without premium or penalty, whereas borrowings which bear interest at the other rates are prepayble only if amounts prepaid are accompanied by an amount equal to any loss or expense incurred by the lender due to such prepayment. Any future commitments other than the foregoing will be at an interest rate not in excess of the prime rate plus two percent per annum.

The Commercial Paper will be sold directly to or through dealers at a discount rate, including any commissions, not in excess discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and of the particular maturity. The Commercial Paper will not be prepayable and will have varying maturities, none in excess of nine months.

The Applicants, except Southern, propose to enter into agreements with public entities whereby such public entities will issue revenue bond anticipation notes, having a maturity of not more than one year, and will loan to the respective Applicant the proceeds thereof, and the Applicant will issue the Pollution Control Notes therefor. The payments on the Pollution Control Notes will be made at times and in amounts which will correspond to the payments with respect to the revenue bond anticipation notes.

The Applicants propose to issue and sell the Commercial Paper and issue the Pollution Control Notes under an exception from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5).

The Applicants will use the proceeds of the proposed borrowings for working capital purposes, including the financing in part of their construction programs of the operating subsidiaries.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

Bureau of Diplomatic Security

[Public Notice 1582]

Public Information Collection Requirement Submitted to OMB for Review

AGENCY: Department of State.

ACTION: The Department of State has submitted the following public information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. chapter 35.

SUMMARY: The American Embassy in Nicaragua has been holding discussions with the Government of Nicaragua concerning claims made by U.S. citizens whose property is alleged to have been confiscated by the Sandinista government. The proposed information collection will enable the Embassy to assist U.S. citizens more efficiently in attempting to pursue their claims.

The following summarizes the information collection proposal submitted to OMB:

Type of request—New

Originating office—United States Embassy, Managua, Nicaragua

Title of information collection—U.S. Citizens with Confiscation Claims against Nicaragua

Confiscation Cases:

Frequency—One-time filing.

Form No. DSP-116.

Respondents—U.S. citizens who claim to have properties that were confiscated by the Sandinista government.

Estimated number of respondents—125.

Average hours per response—30 minutes.

Section 3504(h) of P.L. 96.511 does not apply.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook, (202) 647-3538. Comments and questions should be directed to OMB, Lin Liu, (202) 395-7340.

Dated: March 2, 1992.

Sheldon J. Krys,

Assistant Secretary for Diplomatic Security.

BILLING CODE 4710-43-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 92-017]

Navigation Safety Advisory Council; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. 2), notice is hereby given of a meeting of the Navigation Safety Advisory Council to be held in the Stevenson Room at the Best Western Old Colony Inn, 625 First Street, Alexandria, VA on Saturday through Tuesday, April 25-28, 1992. The Council will convene for a preliminary plenary session at 5 p.m. on Saturday, April 25, 1992.

Committees will meet on Saturday, April 25 from 5:30 to 8:30 p.m. and on Sunday, April 26 from 8:30 to 11:30 a.m. and 1 p.m. to 4 p.m. Committee discussions will include the following topics:

a. *Navigation Rules:*

1. Review of International Rule 5 and provisions of the STCW on lookout duties.

2. Review of lighting required for vessels moored to a buoy.

3. Consistency review of Navigation Rules.

b. *Routing Measures and Vessel Traffic Service (VTS) issues:*

1. National VTS regulations.

2. Oil Pollution Act of 1990 mandated tanker movement study.

c. *Human Factors in Navigation Safety:*

1. Bridge procedures and bridge management.

2. Fatigue.

d. *Marine Information and Communications:*

1. NTSB recommendation that 33 CFR 164.11(k) be amended to require that masters and pilots discuss and agree beforehand to the essential features and relevant checkpoints of maneuvers they expect to undertake.

The Council will convene in plenary session on Monday, April 27 at 8 a.m. to 3 p.m. and reconvene on Tuesday, April 28 at 8 a.m. to 12 noon to hear Committee status reports and any matters properly brought before the Council.

The meeting is open to the public. Persons wishing to make oral statements should notify the Executive Director at the address below no later than Friday, April 24, 1992. Any person may present a written statement to the Council at any time without advance notice.

FOR FURTHER INFORMATION CONTACT: Margie G. Hegy, Executive Director, Navigation Safety Advisory Council, U.S. Coast Guard (G-NSR-3), Washington, DC 20593-0001, Telephone (202) 267-0415.

Dated: March 9, 1992.

W. J. Ecker,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

Internal Revenue Service Project; Town Meeting

Forms Standardization (IRS)

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of Town Meeting.

SUMMARY: In reference to the previous announcement of the Forms Standardization Project's intent to have a multi-functional work group, we are holding an open town meeting on Thursday, April 9, 1992. The meeting will be held in room 3000 of the Ariel Rios Building. The building is located at 1200 Pennsylvania Avenue, NW, Washington, DC. The meeting will begin at 9 a.m., and should last no more than three hours. At this meeting, the Forms Standardization staff will share IRS form design standards as they relate to Tax System Modernization (TSM).

Note: Last minute changes to the date or time of meeting are possible and could prevent advance notice.

DATE: The Meeting, which will be open to the public, will be in a room that accommodates approximately 75 people, including members of Forms Standardization Project Office and IRS officials. Due to the limited conference space, notification of intent to attend the meeting must be made no later than April 3, 1992.

FOR FURTHER INFORMATION CONTACT: Please contact Faye Bruce at 202-786-8524 (not toll free), to confirm attendance or for additional information. If you wish to communicate by FAX, the number is 202-566-4964.

Dated: March 6, 1992.

BILLING CODE 4830-01-M

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

[Docket No. 92-3]

Stock Appraisals

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Notice of policy statement on stock appraisals.

SUMMARY: The Office of the Comptroller of the Currency (OCC) has issued Banking Circular 259 to describe methods used by the OCC to estimate the value of a bank's share when a shareholder dissents to a conversion, consolidation, or merger involving a national bank, and to summarize the results of appraisals performed by the OCC between January 1, 1985, and September 30, 1991. This notice, which provides the full text of BC 259, is for the benefit of persons who do not normally receive banking circulars.

DATE: BC 259 was dated March 5, 1992.

SUPPLEMENTARY INFORMATION: On March 5, 1992, the OCC issued BC 259 describing methods used to estimate the value of a bank's shares and the results of appraisals performed by the OCC between January 1, 1985, and September 30, 1991. The full text of B 259 is set out below.

To: Chief Executive Officers of National Banks, Deputy Comptrollers (District), Departmenat and Division Heads, and Examining Personnel.

Purpose

This Banking Circular informs all national banks of the valuation methods used by the Office of the Comptroller of the Currency (OCC) to estimate the value of a bank's shares when requested to do so by a shareholder dissenting to the conversion, merger, or consolidation of its bank. The results of appraisals performed by the OCC between January 1, 1985, and September 30, 1991 are summarized.

References: 12 U.S.C. 214a, 215 and 215a; 12 CFR 11.590 (item 2)

Background

Under 12 U.S.C. 214a, a shareholder dissenting from a conversion, consolidation, or merger involving a national bank is entitled to receive the value of his or her shares from the resulting bank. A valuation of the shares shall be made by a committee of three appraisers (a representative of the dissenting shareholder, a representative of the resulting bank, and a third appraiser selected by the other two). If the committee is formed and renders an appraisal that is acceptable to the dissenting shareholder, the process is complete and the appraised value of the shares is paid to the dissenting shareholder by the resulting bank. If, for any reason, the committee is not formed or if it renders an appraisal that is not acceptable to the dissenting shareholder, an interested party may request an appraisal by the OCC. 12 U.S.C. 215 provides these appraisal rights to any shareholder dissenting to a consolidation. Any dissenting shareholder of a target bank in a merger is also entitled to these appraisal rights pursuant to 12 U.S.C. 215a.

The above provides only a general overview of the appraisal process. The specific requirements of the process are set forth in the statutes themselves.

Methods of Valuation Used

Through its appraisal process, the OCC attempts to arrive at a fair estimate of the value of a bank's shares. After reviewing the particular facts in each case and the available information on a bank's shares, the OCC selects an appropriate valuation method, or combination of methods, to determine a reasonable estimate of the shares' value.

Market Value

The OCC uses various methods to estimate the market value of shares being appraised. If sufficient trading in the shares exists and the prices are available from direct quotes from the Wall Street Journal or a market-maker, those quotes are considered in determining the market value. If no market value is readily available, or if the market value available is not well established, the OCC may use other methods of estimating market value, such as the investment value and adjusted book value methods.

Investment Value

Investment value requires an assessment of the value to investors of a share in the future earnings of the target bank. Investment value is estimated by applying an average price/earnings ratio of banks with similar earnings potential to the earnings capacity of the target bank.

The peer group selection is based on location, size, and earnings patterns. If the state in which the subject bank is located provides a sufficient number of comparable banks using location, size and earnings patterns as the criteria for selection, the price/earnings ratios assigned to the banks are applied to the earnings per share estimated for the subject bank. In order to select a reasonable peer group when there are too few comparable independent banks in a location that is comparable to that of the subject bank, the pool of banks from which a peer group is selected is broadened by including one-bank holding company banks in a comparable location, and/or by selecting banks in less comparable locations, including adjacent states, that have earnings patterns similar to the subject bank.

Adjusted Book Value

The OCC also uses an "adjusted book value" method for estimating value. Historically, the OCC has not placed any weight on the bank's "unadjusted book value", since that value is based on historical acquisition costs of the bank's assets, and does not reflect investors' perceptions of the value of the bank as an ongoing concern. Adjusted book value is calculated by multiplying the book value of the target bank's assets per share times the average market price to book value ratio of comparable banking organizations. The average market price to book value ratio measures the premium or discount to book value, which investors attribute to shares of similarly situated banking organizations.

Both the investment value method and the adjusted book value method present appraised values, which are based on the target bank's value as a going concern. These techniques provide estimates of the market value of the shares of the subject bank.

Overall Valuation

The OCC may use more than one of the above-described methods in deriving the value of shares of stock. If more than one method is used, varying weights may be applied in reaching an overall valuation. The weight given to the value by a particular valuation method is based on how accurately the given method is believed to represent market value. For example, the OCC may give more wieght to a market value representing infrequent trading by shareholders than to the value derived from the investment value method when the subject bank's earnings trend is so irregular that it is considered to be a poor predictor of future earnings.

Purchase Premiums

For mergers and consolidations, the OCC recognizes that purchase premiums do exist and may, in some instances, be paid in the purchase of small blocks of shares. However, the payment of purchase premiums depends entirely on the acquisition or control plans of the purchasers, and such payments are not regular or predictable elements of market value. Consequently, the OCC's valuation methods do not include consideration of purchase premiums in arriving at the value of shares.

Statistical Data

The chart below lists the results of appraisals the OCC performed between January 1, 1985, and September 30, 1991. The OCC provides statistical data on book value and price/earnings ratios for comparative purposes, but does not necessarily rely on such data in determining the value of the banks' shares. Dissenting shareholders should not view these statistics as determinative for future appraisals.

In connection with disclosures given to shareholders under 12 CFR 11.590 (Item 2), banks may provide shareholders a copy of this Banking Circular or disclose the information contained in the Banking Circular, including the results of OCC appraisals. If the bank discloses the past results of the OCC appraisals, it should advise shareholders that: (1) The OCC did not rely on all the information set forth in the chart in performing each appraisal; and, (2) the OCC's past appraisals are not necessarily determinative of its future appraisals of a particular bank's shares.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 51
Monday, March 16, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m., Wednesday, March 18, 1992.

LOCATION: Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED:

1. *Pride in Public Service Award.*

The Commission will present the Pride in Public Service Award to March's recipient.

2. *Choking Hazards Options.*

The Commission will consider options to address choking hazards associated with : (1) Toys and other articles with small parts intended for children aged three years to approximately six years, (2) balloons, (3) marbles, and (4) small balls.

For a Recorded Message Containing the Latest Agenda Information, Call (301) 504-0709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207 (301) 504-0800.

Dated: March 12, 1992.
Sheldon D. Butts,
Deputy Secretary.

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: Thursday, March 19, 1992.

LOCATION: Room 556, Westwood Towers, 5401 Westbard Avenue, Bethesda, Maryland.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Actions to Gather Information About Risks Associated With Lead In Paint.*

The staff will brief the Commission concerning options for obtaining additional information concerning the appropriate regulatory level for lead in paint.

Closed to the Public

2. *Enforcement Matter OS 3146.*

The staff will brief the Commission on enforcement matter OS# 3146.

For a Recorded Message Containing the Latest Agenda Information, Call (301) 504-0709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207 (301) 504-0800.

Dated: March 12, 1992.

SECURITIES AND EXCHANGE COMMISSION

Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meeting during the week of March 16, 1992.

A closed meeting will be held on Tuesday, March 17, 1992, at 2:30 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Schapiro, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, March 17, 1992, at 2:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the

scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Jonathan Gottlieb at (202) 272-2200.

Dated: March 12, 1992.

Jonathan G. Katz,

Secretary.

Office of Management and Budget

Rescissions and Deferrals; Cumulative Report; Notice

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

March 1, 1992

This report is submitted in fulfillment of the requirement of section 1014(e) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344). Section 1014(e) requires a monthly report listing all budget authority for this fiscal year for which, as of the first day of the month, a special message has been transmitted to Congress.

This report gives the status, as of March 1, 1992, of one rescission proposal and 11 deferrals contained in the three special messages for FY 1992. These messages were transmitted to Congress on September 30, and December 19, 1991, and on February 19, 1992.

Rescissions (Table A and Attachment A)

As of March 1, 1992, one rescission proposal totaling $16.7 million was pending before Congress. However, 32 rescission proposals for the Departments of Commerce, Defense, Health and Human Services, Housing and Urban Development, the Interior, and Transportation, which were included in the February 18th Supplement to the FY 1993 Budget, will be transmitted later this month in the Fourth and Fifth Special Messages.

Deferrals (Table B and Attachment B)

As of March 1, 1992, $2,621.5 million in budget authority was being deferred from obligation. Attachment B shows the history and status of each deferral reported during FY 1992.

Information from Special Messages

The special messages containing information on the rescission proposal and deferrals that are covered by this cumulative report are printed in the **Federal Registers** cited below:

56 FR 50620, Monday, October 7, 1991.
56 FR 67402, Monday, December 30, 1991.
57 FR 6644, Wednesday, February 26, 1992.

Richard Darman,

Director.

The President

Executive Order 12792—National Commission on America's Urban Families

Federal Register
Vol. 57, No. 51
Monday, March 16, 1992

Presidential Documents

Title 3—

The President

Executive Order 12792 of March 12, 1992

National Commission on America's Urban Families

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to establish, in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App. 2), a commission on America's urban families, it is hereby ordered as follows:

Section 1. *Establishment.* (a) There is established the National Commission on America's Urban Families ("Commission"). The Commission shall be composed of up to eight members appointed by the President.

(b) The President shall appoint a Chairman and Co-chairman from among the members of the Commission. The Chairman shall appoint an Executive Director.

Sec. 2. *Functions.* (a) The Commission shall:

- examine the current condition of urban families;
- consider how existing government policies and programs support or weaken the urban family structure;
- evaluate the potential for integrating the delivery of government services in ways to strengthen urban families;
- identify State, local, and Federal programs that have been successful in preserving and strengthening urban families;
- analyze ways to improve private/nonprofit efforts to preserve and strengthen urban families; and
- provide appropriate recommendations for government policies and programs and for actions by other institutions to strengthen families living in urban areas.

(b) The Commission shall make its report to the President on or before December 31, 1992.

Sec. 3. *Administration.* (a) The heads of executive agencies shall, to the extent permitted by law, provide the Commission such information as it may require for the purpose of carrying out its functions.

(b) Members of the Commission shall serve without any compensation for their work on the Commission. However, they shall be entitled to travel expenses, including per diem in lieu of subsistence, as authorized for persons serving intermittently in the Government service (5 U.S.C. 5701–5707 and 5 U.S.C. App. 2, 7(d)). The Executive Director shall be compensated at a rate of pay not to exceed the maximum allowable under section 7(d)(1)(A) of the Federal Advisory Committee Act, as amended.

(c) The Department of Health and Human Services shall provide the Commission with administrative services, facilities, staff, and other support services necessary for the performance of its functions. Funds for the operation of the Commission shall be provided by the Department of Health and Human Services.

(d) Notwithstanding any other Executive order, the functions of the President under the Federal Advisory Committee Act, as amended, which are applicable to the Commission, except that of reporting to the Congress, shall be performed by the Secretary of Health and Human Services in accordance with guidelines issued by the Administrator of General Services.

(e) The Commission shall terminate 30 days after submitting its report.

George Bush

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.J. Res. 350/P.L. 102–253
Designating March 1992 as "Irish-American Heritage Month". (Mar. 10, 1992; 105 Stat. 70; 1 page) Price: $1.00

H.J. Res. 343/P.L. 102–254
To designate March 12, 1992, as "Girl Scouts of the United States of America 80th Anniversary Day". (Mar. 11, 1992; 106 Stat. 71; 1 page) Price: $1.00

Last List March 13, 1992

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 783–3238 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512–2233.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1-189 contains a note only for Parts 1-39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1-39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1-100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1990. The CFR volume issued January 1, 1987, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1991. The CFR volume issued April 1, 1990, should be retained.

[6] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1991. The CFR volume issued July 1, 1989, should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1990 to June 30, 1991. The CFR volume issued July 1, 1990, should be retained.

The United States Government Manual 1991/92

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

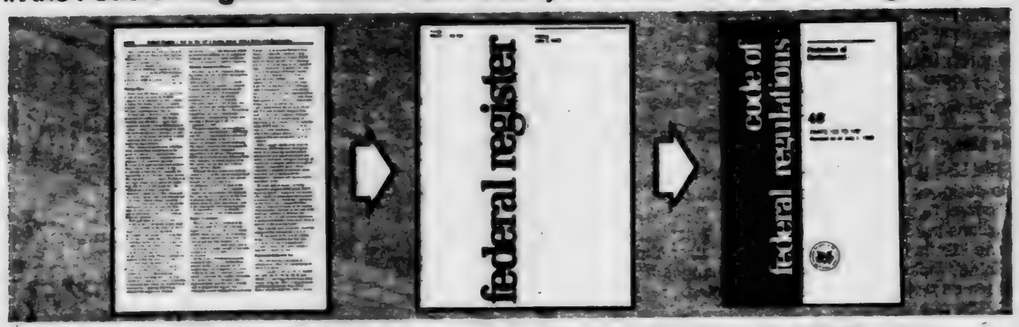
The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations** (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

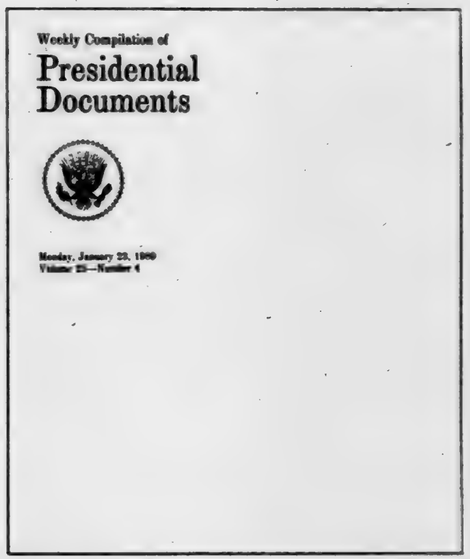
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

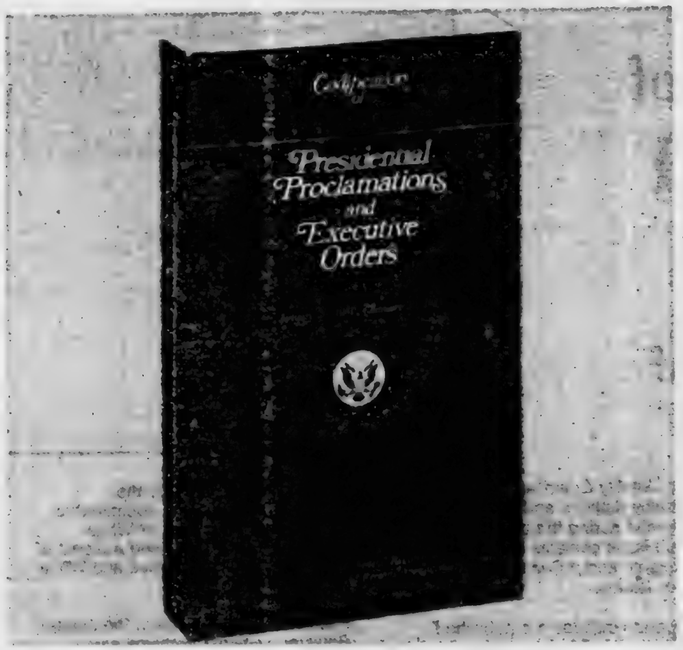
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Briefing on How To Use the Federal Register
For information on a briefing in Washington, DC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

Rules and Regulations

Federal Register
Vol. 57, No. 52
Tuesday, March 17, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 29

[Docket No. 91-ASW-4; Special Condition 29-ASW-4]

Special Conditions; Aerospatiale Model AS-365N2 "Dauphin" Helicopter, Electronic Flight Instrument System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special condition.

SUMMARY: This special condition is issued for the Aerospatiale Model AS-365N2 "Dauphin" helicopter. This helicopter will have a novel or unusual design feature associated with the Electronic Flight Instrument System. This special condition contains additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that provided by the applicable airworthiness standards.

EFFECTIVE DATES: April 16, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Carroll Wright, FAA, Rotorcraft Standards Staff, Regulations Group, Fort Worth, Texas 76193-0111, telephone 817-624-5121.

SUPPLEMENTARY INFORMATION:

Background

On September 27, 1991, Keystone Helicopter Corporation, West Chester, Pennsylvania, submitted an application for a Supplemental Type Certificate (STC) for installation of an Electronic Flight Instrument System in an Aerospatiale AS-365N2 "Dauphin" helicopter. This aircraft is a 13-passenger, two-engine, 9,370-pound transport category helicopter. The Aerospatiale Model AS-365N2, as modified, will incorporate electrical/electronic systems that will be performing functions critical to the continued safe flight and landing of the helicopter. The Electronic Flight Instrument System performs the function of display of attitude. The display of attitude to the pilot is critical to the continued safe flight and landing of the helicopter for instrument flight rules (IFR) operations in instrument meteorological conditions.

Type Certification Basis

The certification basis of the Model AS-365N2 includes: FAR 21.29 and FAR 29 effective February 1, 1965, Amendments 29-1 through 29-11; Airworthiness Criteria for Helicopter Instrument Flight, dated December 15, 1978, for IFR certification; and Longitudinal Static Stability FAR 29.173. Aerospatiale has elected to comply with FAR 29, Amendments 29-12 through 29-16, except for FAR 29.397 as concerns rotorbrake.

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(b)(2) do not contain adequate or appropriate safety standards because of novel or unusual design features of an aircraft or installation.

Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become a part of the type certification basis, as provided by § 21.101(b)(2).

Discussion

Notice of Proposed Special Condition No. SC-91-4-SW was published in the **Federal Register** on December 26, 1991, (56 FR 66810). No comments were received. Therefore, the special condition is adopted as proposed.

The Aerospatiale Model AS-365N2 helicopter will incorporate one and possibly more electrical/electronic systems and equipment that will be performing functions critical to the continued safe flight and landing of the helicopter. The Electronic Flight Instrument System performs the function of display of attitude. The display of attitude to the pilot is critical to the continued safe flight and landing of the helicopter for IFR operation in instrument meteorological conditions. When the design is finalized, Keystone Helicopter Corporation will provide the FAA with a preliminary hazard analysis that will identify any other critical functions performed by electrical/electronic systems and equipment.

If it is determined that this helicopter incorporates other electrical/electronic systems performing critical functions, it will be necessary to show that those systems meet the requirements of this special condition.

Conclusion

This action would effect only certain unusual or novel design features on one series of rotorcraft. This rule is not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these features on the rotorcraft identified in this special condition.

List of Subjects in 14 CFR Parts 21 and 29.

Aircraft, Air transportation, Aviation safety, Rotorcraft, Safety.

The Authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2); 42 U.S.C. 1857f-10, 4321 et seq.; E.O. 11541; 49 U.S.C. 106(g) (Rev. Pub. L. 97-449, January 12, 1983).

The Special Condition

Accordingly, pursuant to the authority delegated to me by the Administrator of the Federal Aviation Administration, the following special condition is issued as part of the type certification basis for the Aerospatiale Model AS-365N2 "Dauphin" helicopter.

Protection for Electrical/Electronic Systems From High Intensity Radiated Fields

Each system that performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these critical functions are not adversely affected when the helicopter is exposed to high intensity radiated fields external to the helicopter.

Issued in Fort Worth, Texas, on February 28, 1992.

Henry A. Armstrong,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

[FR Doc. 92-6086 Filed 3-16-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-210-AD; Amendment 39-8187; AD 92-06-07]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, that requires a one-time inspection, test, and repair or replacement, if necessary, of the guide arm assembly and associated hardware for the main entry doors, numbers 1 through 5, left and right sides. This amendment is prompted by a report of migrating guide arm assembly bearings which may have resulted from insufficient bearing retention during production rework. The actions specified by this AD are intended to prevent an inoperable emergency door power assist system and/or the inability to operate the door, which is required for emergency evacuation.

DATES: Effective April 21, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 21, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Pliny C. Brestel, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S, FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2783; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 747 series airplanes was published in the **Federal Register** on November 18, 1991 (56 FR 58193). That action proposed to require a one-time inspection, test, and repair or replacement, if necessary, of the guide arm assembly and associated hardware for the main entry doors, numbers 1 through 5, left and right sides.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters support the proposed rule.

One commenter, the manufacturer, requests that the proposed rule be withdrawn, based on the results of a recent test conducted on a Boeing Model 747 series airplane entry door in which the two guide arm bearings common to the bellcrank link joint were deliberately removed. The results of that test indicated that, although smooth opening of the door was impaired, the door did not fail to open. The commenter concludes that airplane safety is not compromised since any damage to and/or loss of the subject bearings in the guide arm would be detectable by the operator during normal door operation, or certainly during a "747 Main Entry Door Minicheck," and, as indicated by the test, the operator would still be able to open the door. The FAA does not concur with the commenter's suggestion to withdraw the proposal. The FAA considers that the single test to which the commenter refers does not adequately represent the probability of occurrence of a failure, and that, in order to substantiate the commenter's claim, additional testing would be required to obtain more conclusive results. Specifically, of the four bearings in the guide arm assembly, the test described by the commenter involved only the removal of the two guide arm bearings that are common to the bellcrank link joint. However, other data have indicated that, if the additional two bearings, those common to the guide arm roller pin, are missing, the roller pin can become unrestrained and subsequently prevent proper operation of the door. A power-assisted, fully-opened door is required for emergency evacuation. Further, although door anomalies may be detected during a "747 Main Entry Door Minicheck," as the commenter suggests, the FAA notes that these checks are performed at intervals of 30 months. If adequate retention were not present, the bearings potentially could migrate out of the guide arm assembly well within that 30-month interval and, consequently, the door could fail to operate properly long before a Minicheck were scheduled.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 83 Model 747 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 9 airplanes of U.S. registry will be affected by this AD, that it will take approximately 5 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $2,475.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-07. Boeing: Amendment 39-8187. Docket 91-NM-210-AD.

Applicability: Model 747 series airplanes, listed in Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To ensure operation of the emergency door power assist system and door opening when required for emergency evacuation, accomplish the following:

(a) Within the next 60 days after the effective date of this AD, perform a visual inspection and test of the guide arm assembly and associated hardware for the main entry doors, numbers 1 through 5, left and right sides, in accordance with section III. of Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991.

(1) If all the conditions specified in subparagraphs a. through g., paragraph 4., Section III., of Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991, are found to exist, no further action is required.

(2) If any of the conditions specified in subparagraphs a. through f., paragraph 4., Section III., of Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991, do not exist, repair or replace before further flight, in accordance with Section III. of the service bulletin.

(3) If the condition specified in subparagraph g., paragraph 4., Section III., of Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991, does not exist, repair in a manner approved by the Manager, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate.

(b) Within 7 days after the completion of the inspection required by paragraph (a) of this AD, submit to the FAA a report specifying the number of bearings in the guide arm assemblies of each airplane on which any of the condition specified in subparagraphs a., b., or c., paragraph 4., section III., of Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991, were not found to exist. The report must be submitted to the Manager, Seattle Manufacturing Inspection District Office, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056. (Facsimile messages may be sent via telephone: (206) 227-1181.) A copy of the report should also be submitted to the FAA Principal Maintenance Inspector (PMI). A report is not necessary for those airplanes on which all of the specified conditions are found to exist. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120-0056.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspection, test, repair, and replacement shall be done in accordance with Boeing Alert Service Bulletin 747-52A2237, dated July 11, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC.

(f) This amendment becomes effective on April 21, 1992.

Issued in Renton, Washington, on February 24, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6114 Filed 3-16-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-49-AD; Amendment 39-8183; AD 92-05-03]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, which requires inspection and modification of the emergency escape system packboard assemblies. This amendment is prompted by reports of emerging escape systems not releasing from the door. This condition, if not corrected, could result in the emergency escape system not being available for emergency evacuation or the exit not being usable.

DATES: Effective April 21, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 21, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Jayson Claar, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S; telephone (206) 227-2784. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to Boeing Model 747 series airplanes, was published in the **Federal Register** on November 15, 1991 (56 FR 57997). That action proposed to require inspection and modification of the emergency escape system packboard and hook connector assemblies.

Interested person have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed.

The other commenter requests that the proposed compliance time be extended to allow necessary modification of the packboard and cover assembly within 15 months after the effective date of the rule. This will allow the modification to be accomplished during the time of a regularly scheduled "C" check. The commenter considers that the adoption of the proposed compliance time of 12 months would require operators to schedule special times for the accomplishment of this modification, at additional expense. The FAA concurs with the commenter's request to extend the compliance time for the modification requirements. Extending the compliance time by 3 additional months will not adversely affect safety, and will allow the modification to be performed at a base during regularly scheduled maintenance where special equipment and trained maintenance personnel will be available. Paragraph (a)(2) of the final rule has been revised to specify a compliance time of 15 months.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 74 Model 747 series airplanes of the affected design in the worldwide fleet. The following table lists the approximate number of U.S.-registered airplanes that will be affected by this AD, and gives an estimate of the work hours that it will take to accomplish each of the required actions. The required modification parts are available at no charge.

Required action	Number of airplanes	Work hours per airplane
Inspection (Boeing Alert Service Bulletin 747-25A2889)	16	10
Modification (Boeing Alert Service Bulletin 747-25A2889)	16	200
Modification (Boeing Service Bulletin 747-25-2807, Revision 2)	10	50

The average labor cost will be $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $229,900.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-03. **Boeing:** Amendment 39-8183. Docket 91-NM-49-AD.

Applicability: Model 747 series airplanes, line number 696 and subsequent; equipped with evacuation system packboards and cover assemblies identified in the Boeing Service Bulletin 747-25-2807, Revision 2, dated August 22, 1991, and Boeing Alert Service Bulletin 747-25A2889, dated November 1, 1990; certificated in any category.

Compliance: Required as indicated, unless previously accomplished

To provide satisfactory reliability of the evacuation system, accomplish the following:

(a) For evacuation system packboard and cover assemblies identified in either Boeing Service Bulletin 747-25-2807, Revision 2, dated August 22, 1991, or Boeing Alert Service Bulletin 747-25A2889, dated November 1, 1990: Within the next 120 days after the effective date of this AD, inspect the evacuation system packboard and cover assemblies in accordance with part III, "Accomplishment Instructions," Paragraph B., of Boeing Alert Service Bulletin 747-25A2889, dated November 1, 1990.

(1) If the inspection reveals that the angle measured is 155 degrees or greater, prior to further flight, modify the packboard and cover assemblies in accordance with Boeing Alert Service Bulletin 747-25A2889, dated November 1, 1990, and Boeing Service Bulletin 747-25-2807, Revision 2, dated August 22, 1991, as applicable.

(2) If the inspection reveals that the angle measured is less than 155 degrees, within the next 15 months after the effective date of this AD, modify the packboard and cover assemblies in accordance with Boeing Alert Service Bulletin 747-25A2889, dated November 1, 1990, and Boeing Service Bulletin 747-25-2807, Revision 2, dated August 22, 1991, as applicable.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(d) The inspection and modification shall be done in accordance with Boeing Alert Service Bulletin 747-25A2889, dated November 1, 1990; and Boeing Service Bulletin 747-25-2807, Revision 2, dated August 22, 1991, which contains the following list of effective pages:

Page No.	Revision level	Date
1, 3-4	2	Aug. 22, 1991.
2, 5, 7, 8, and 17-18.	1	July 25, 1991.
6, 9-16	(original)	Dec 7, 1989.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment becomes effective on April 21, 1992

Issued in Renton, Washington, on February 20, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6113 Filed 3-16-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-206-AD; Amendment 39-8184; AD 92-06-04]

Airworthiness Directives; British Aerospace Model BAe 125-800A Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain British Aerospace Model BAe 125-800A series airplanes, that requires installation of improved dimmer units and testing of the instrument integral lighting dimmer system. This amendment is prompted by a recent report of electrical shorting in a dimmer unit installed in the instrument integral lighting system. The actions specified by this AD are intended to prevent internal arcing in the dimmer unit and smoke emission into the cockpit.

DATES: April 21, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 21, 1992

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain British Aerospace Model 125-800A series airplanes, was published in the **Federal Register** on November 29, 1991 (56 FR 60944). That action proposed to require installation of improved dimmer units and testing of the instrument integral lighting dimmer system.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 108 airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Required parts will be supplied by the vendor at no cost to the operators. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $17,820.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **"ADDRESSES."**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-04. **British Aerospace:** Amendment 39-8184. Docket 91-NM-206-AD.

Applicability: Model BAe 125-800A series airplanes, Post-Modification 253191A and Pre-Modification 253247A, certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent internal arcing in the dimmer units and smoke emission into the cockpit, accomplish the following:

(a) Within 60 days after the effective date of this AD, modify the instrument integral lighting system by installing dimmer units having Page Modification AR1477 incorporated, and perform functional tests of the pilot's and co-pilot's instrument integral lighting dimmer system, in accordance with British Aerospace Service Bulletin 33-44-7670A, Revision 1, dated April 4, 1991.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with British Aerospace Service Bulletin 33-44-7670A, Revision 1, dated April 4, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment becomes effective on April 21, 1992.

Issued in Renton, Washington, on February 20, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6115 Filed 3-16-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-209-AD; Amendment 39-8185; AD 92-06-05]

Airworthiness Directives; British Aerospace Model DH/BH/HS/BAe 125 Series Airplanes.

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to British Aerospace Model DH/BH/HS/BAe 125 series airplanes, that requires inspections of the nose landing gear (NLG) bay sidewalls to detect damage and cracks, and repair, if necessary. This amendment is prompted by reports of fatigue cracks found in an NLG sidewall. The actions specified by this AD are intended to prevent reduced structural integrity of the fuselage and subsequent decompression of the airplane.

DATES: Effective April 21, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 21, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of

the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to British Aerospace Model DH/BH/HS/BAe 125 series airplanes, was published in the **Federal Register** on November 29, 1991 (56 FR 60945). That action proposed to require inspections of the nose landing gear (NLG) bay sidewalls to detect damage and cracks, and repair, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 420 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 work hours per airplane to accomplish the required actions, an that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $46,200.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures [44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-05. **British Aerospace:** Amendment 39-8185. Docket 91-NM-209-AD.

Applicability: Model DH/BH/HS/BAe 125 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced structural integrity of the fuselage and subsequent decompression of the airplane, accomplish the following:

(a) Prior to the accumulation of 4,000 landings, or within 60 days after the effective date of this AD, whichever occurs later, accomplish the following in accordance with British Aerospace Service Bulletin 53-73, Revision 2, dated May 18, 1991:

(1) Perform a visual inspection of the nose landing gear (NLG) bay left and right sidewalls to detect the presence of washers or spotface under nuts.

(i) If no spotface is found, perform a visual inspection to detect damage to the web caused by nuts or washers.

(ii) Blend out any damage found, excluding cracking, prior to further flight.

(2) Perform either a dye penetrant or eddy current inspection to detect cracks on the NLG bay left and right sidewalls. If cracks are found, repair prior to further flight, in a manner approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspections shall be done in accordance with British Aerospace Service Bulletin 53-73, Revision 2, dated May 18, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment becomes effective on April 21, 1992.

Issued in Renton, Washington, on February 21, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[TD 8400]

RIN 1545-AN26

Taxation of Gain or Loss from Certain Nonfunctional Currency Transactions (Section 988 Transactions)

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final Income Tax Regulations relating to the taxation of gain or loss from certain foreign currency transactions and applies to taxpayers engaging in such transactions. This action is necessary because of changes to the applicable tax law made by the Tax Reform Act of 1986.

DATES: These regulations are effective for taxable years after December 31, 1986 with the following exceptions:

Section 1.267(f)-1, which is effective for transactions entered into after September 21, 1989;

The removal of §§ 1.988-0T through 1.988-5T are effective March 17, 1992.

Section 1.988-1 (a)(2)(iii), (a)(7)(ii), and (a)(8), which is effective for certain transactions entered into after October 21, 1988;

Section 1.988-1(a)(7)(iii), which is effective with respect to certain tiered partnerships for taxable years after March 17, 1992.

Section 1.988-2(a)(2)(v), which is effective for taxable years beginning after March 17, 1992.

Section 1.988-2(b)(2)(iii)(B), which is effective for taxable years beginning after March 17, 1992.

Section 1.988-2(b)(13), which is effective for exchanges of debt for stock effected after September 21, 1989;

Section 1.988-2(d)(2)(ii)(B), which is effective for transactions creating an offset after September 21, 1989;

Section 1.988-2(e)(3), which is effective for transactions entered into after September 21, 1989;

Section 1.988-3(b), which is effective for taxable years beginning on or after September 21, 1989, except for § 1.988-3(b)(5), which is effective for transactions entered into after March 17, 1992.

Section 1.988-3(c)(2) which is effective with respect to debt instruments acquired on or after June 24, 1987.

Section 1.988-5 is effective for transactions entered into on or after September 21, 1989, with the following exceptions:

Section 1.988-5(a)(3)(i) which, in the case of a contingent payment debt instrument, is effective for transactions entered into after March 17, 1992.

Section 1.988-5(a)(3)(ii), which is effective for transactions entered into after March 17, 1992.

Section 1.988-5(a)(6)(i) which is effective for transactions that leg into integrated treatment after March 17, 1992.

The second sentence of § 1.988-5(b)(2)(ii)(A) (which provides that a contract to buy or sell stock is considered an executory contract) is effective for contracts to buy or sell stock entered into on or after March 17, 1992.

The amendments to part 602 are effective March 17, 1992.

Taxpayers may rely on the temporary section 988 regulations for the period during which they were effective.

FOR FURTHER INFORMATION CONTACT: Jeffrey L. Dorfman of the Office of Associate Chief Counsel (International), within the Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:CORP:T:R (INTL-0485-89) (202-377-9059), not a toll-free call).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)) under control number 1545-1131. The estimated average annual burden per respondent is 40 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attention: IRS Reports Clearance Officer T:FP, Washington, DC 20224, and to the Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

On September 21, 1989, the **Federal Register** published proposed amendments (54 FR 38874) to the Income Tax Regulations (26 CFR parts 1 and 602) under sections 267 and 988 of the Internal Revenue Code. Pursuant to section 7805 (f) of the Internal Revenue Code, the Small Business Administration was given an opportunity to comment on the proposed amendments. Comments from the public are discussed below. No public hearing was requested or held. Accordingly, the proposed amendments are adopted as modified by this Treasury Decision.

Explanation of Provisions

Section 1.988-1 Certain Definitions and Special Rules

Section 1.988-(1)(a)(2) Description of Transactions

Section 1.988-1T(a)(2)(ii) of the temporary regulations provides that the accrual of a foreign tax liability is a section 988 transaction. The final regulations retain this rule except in the case of a dollar functional currency QBU branch of a domestic person that credits foreign taxes under section 901. A payable relating to accrued foreign taxes of that QBU branch is not treated as a section 988 transaction. This rule is necessary to insure that the taxpayer ultimately has a similar income inclusion and credit as a U.S. shareholder of a foreign corporation and a domestic person with a QBU branch that computes income under section 987. See, section 78 and Notice 89-74, 1989-1 C.B. 739.

Section 1.988-1(a)(2)(iii)(A) provides that a forward contract, futures contract, option, warrant, or similar financial instrument is a section 988 transaction only if the underlying property to which the instrument ultimately relates is a nonfunctional currency or is otherwise described in paragraph (a)(1)(ii) of this section. Commentators suggest bifurcation of financial instruments that contain both currency and noncurrency elements. For example, contracts to buy wheat or a machine for deferred delivery in a nonfunctional currency would be bifurcated into a currency component (the movement of the exchange rates between the contract date and the payment date) and a noncurrency component (the movement in the market price of wheat or the machine). Bifurcation of transactions described in section 988(c)(1)(B)(iii) is prohibited by section 988(b)(3) which provides that any gain or loss from a transaction described in section 988(c)(1)(B)(iii) is treated as foreign currency gain or loss. Accordingly, this suggestion is rejected.

The treatment under section 988 regarding certain nonfunctional currency denominated contingent payment bonds under § 1.1275-4(g) of the proposed regulations, dual currency bonds, and multi-currency bonds is reserved. However, see section 1.988-1 (a)(3), (4), and (5) of the proposed regulations.

Section 1.988-1(a)(10) Intra-Taxpayer Transactions

Section 1.988-1(a)(10) has been amended to provide that in the case of a gain or loss incurred in a transaction described in that section which does not have a significant business purpose, the Commissioner, in his or her discretion, may defer such gain or loss. This provision was added, in part, to prevent taxpayers from engaging in intrataxpayer transfers of section 988 transactions for the purpose of recognizing gains or losses on such transactions.

Section 1.988-1(d)(3) Spot Rate Convention

In response to comments, § 1.988-1(d)(3) has been amended to allow the use of spot rate conventions computed on a quarterly basis and to clarify that use of a prior month's end convention is allowable.

Section 1.988-1(e) Exchange Gain or Loss

Section 1.988-1(e) has been amended to clarify that generally the amount of exchange gain or loss from a section 988 transaction is separately computed for each section 988 transaction, and such amount is not integrated with gain or loss recognized on another transaction.

Section 1.988–1(g) Fair Market Value

Section 1.988–1(g) provides that the fair market value of an item shall, where relevant, reflect an appropriate premium or discount for the time value of money. In response to comments, this section has been amended to provide that if consistent with the taxpayer's method of financial accounting (and consistently applied from year to year), the rule described in the preceding sentence shall not apply to a financial instrument that matures within one year from the date of issuance or acquisition.

Section 1.988–2 Recognition and Computation of Exchange Gain or Loss.

Section 1.988 2(a)(1) Disposition of Nonfunctional Currency

Commentators have recommended adoption of a rule that would exempt a *de minimis* amount of exchange gain or loss realized by individuals during a taxable year. The Service does not have authority to adopt such a rule in light of section 988(e).

Section 1.988–2(a)(2) Computation of Exchange Gain or Loss

Commentators have suggested that the rule of § 1.988–2(a)(2)(iv) regarding the purchase and sale of stock or securities traded on an established securities market by a cash basis taxpayer be extended to accrual basis taxpayers. This rule has been adopted on an elective basis in § 1.988–2(a)(2)(v).

Section 1.988–2 (b) Translation of Nonfunctional Currency Interest Income or Expense

A commentator has suggested treating all exchange gain or loss on debt instruments as interest. This approach is being considered under § 1.861–9T for source of income and expense purposes. However, in order to simplify the translation of accrued interest income or expense with respect to a debt instrument subject to section 988, § 1.988–2(b)(2) (ii) and (iii)(B) allows a taxpayer on the accrual method of accounting for interest income or expense (including cash method taxpayers that accrue original issue discount) to elect to translate interest income and expense at the spot rate on the last day of the interest accrual period (and in the case of a partial accrual period, the spot rate on the last day of the taxable year). If the last day of the interest accrual period is within five business days of the date of receipt or payment, the taxpayer may translate interest income or expense at the spot rate on the date of receipt or payment. This elective spot rate convention eliminates the complexity of determining an average exchange rate and simplifies the computation of exchange gain or loss with respect to accrued interest.

A commentator recommends using the historic exchange rate (the date the debt instrument was issued) to accrue interest income or expense rather than the average rate for the accrual period currently in the regulations. The rationale is to provide similar treatment between a discount bond and a synthetically-created discount bond (composed of a par bond with the purchase of an annuity to defease the interest payments on the par bond). This approach has been rejected because excessive exchange gain or loss would result with respect to long term instruments. Further, compared to the elective spot rate convention, this approach would create greater computational complexity with respect to par bonds. Finally, a synthetically created discount bond is subject to the substance over form provision of § 1.988–2(f) which requires similar treatment of actual and synthetic discount bonds.

Commentators have pointed out a technical problem with definition or "principal amount" in § 1.988–2T(b) (5) and (6) that results in double counting of a portion of the principal for purposes of computing exchange gain or loss in certain cases (*e.g.*, in the case of a discount bond acquired at a market discount). Accordingly, the definition of principal amount has been amended.

Rules regarding nonfunctional currency debt for debt exchanges have been proposed under § 1.988–2(b)(14) of the proposed regulations.

Rules regarding exchange gain or loss with respect to debt instruments issued in hyperinflationary currencies have been proposed under § 1.988–2(b)(15) of the proposed regulations.

Section 1.988–2(c) Item of Expense or Gross Income or Receipts Which is To Be Paid or Received after the Date Accrued.

Certain commentators suggest that the current separate computation of exchange gain or loss on short term (60 days or less) payables and receivables be disregarded and treated as an adjustment to expense or income with respect to which the payables or receivables relate. In contrast, other commentators suggest allowing taxpayers to elect to mark to market such payables and receivables consistent with their method of financial accounting. It has been proposed to adopt the latter suggestion because it more clearly reflects gain or loss with respect to such transactions. See § 1.988–5(f) of the proposed regulations regarding election of a mark to market method of accounting for exchange gain or loss for nondealers.

Section 1.988–2(d) Exchange Gain or Loss With Respect to Forward Contracts, Futures Contracts and Option Contracts

A commentator suggests that the realization by offset rule of § 1.988–2(d)(2)(ii) be modified to allow realization of exchange gain or loss if a contract is offset by another contract with the same counterparty. This suggestion has been rejected because it results in a potential whipsaw to the government (*i.e.*, taxpayers can lock in a gain without realization by entering into an offsetting contract with a different counterparty, but lock in and realize a loss by entering into an offsetting contract with the same counterparty even though they are not out of pocket any cash). A commentator suggests that taxpayers be allowed to make an election whereby all offsetting positions are treated as terminated. This suggestion has been rejected as unnecessary in most cases in light of section 1256 and in contravention of section 1092.

A commentator suggests that the rule that recognizes the interest component in a historic rate rollover be limited to long term rollovers. This suggestion has been adopted in § 1.988–2(d)(2)(v), which provides that the amount attributable to the time value of any gain or loss recognized shall be treated as exchange gain or loss if the period beginning on the first date the contract is rolled over and ending on the date payment is ultimately made or received with respect to such contract does not exceed 183 days.

Section 1.988–2(e) Currency Swaps and Notional Principal Contracts

A commentator suggests clarification that all income and expense attributable to notional principal contracts described in § 1.988–2(e) is exchange gain or loss. With respect to currency swaps, it was clear under the temporary regulations that any income or loss is exchange gain or loss (except as provided in § 1.988–2(f) and § 1.988–5). With respect to notional principal contracts denominated in a single nonfunctional currency, a sentence has been added to § 1.988–2(e)(1) to clarify that such income or loss is exchange gain or loss (with certain exceptions). It should be noted, however, that § 1.861–9T may allocate and apportion exchange gain or loss like interest notwithstanding its character as exchange gain or loss.

Section 1.988–2(e)(1) has been amended to better coordinate with section 446.

Commentators pointed out a flaw in the definition of a currency swap, which required that the periodic interim payments be exchanged at the swap exchange rate. This requirement unintentionally prevented cross currency interest rate swaps from qualifying as a currency swap. Accordingly the definition of a currency swap in § 1.988–2(e)(2)(ii) has been amended to delete this requirement.

Commentators also suggest recognition of gain or loss on receipt or payment of swap principal, regardless of when such principal amounts are paid. Section 1.988–2(e)(2)(ii) requires that all of the swap principal amount be exchanged at maturity of the contract. If principal is prepaid on one side of the swap without a matching payment on the other side, taxpayers can generate gains and losses without economic substance. Accordingly, this suggestion was rejected. The definition of currency swap covers the overwhelming number of contracts marketed as currency swaps. Contracts that do not conform to the definition of currency swap but may nevertheless be notional principal contracts (such as a self-amortizing currency swap) are subject to rules under section 446.

Section 1.988–3 Character of Exchange Gain or Loss

A commentator suggests that the identification and verification requirements for electing capital gain or loss characterization are unduly burdensome for traders in foreign currency contracts. In response to this comment, § 1.988–3(b)(5) has been added to allow taxpayers to make the capital gain or loss election with respect to contracts in certain designated accounts.

Section 1.988–4 Source of Exchange Gain or Loss Realized on a Section 988 Transaction

The Service is studying and solicits comments on the proper method of attributing liabilities and hedges to a U.S. branch of a foreign corporation. For example, the issue may arise where under § 1.882–5 the amount of U.S. connected liabilities is less than the amount of liabilities shown on the books of a U.S. trade or business.

Section 1.988–5 Section 988(d) Hedging Transactions

(a) Integration of a Nonfunctional Currency Debt Instrument and a § 1.988–5(a) Hedge

A commentator suggests that the integration rules be extended to partial hedges of debt instruments. The commentator proposes that with respect to any payment made under a nonfunctional currency denominated debt instrument that is hedged into functional currency, the functional currency amount be substituted for the nonfunctional currency amount. In other words, the yield to maturity of a nonfunctional currency denominated debt instrument will be determined in units of nonfunctional currency, notwithstanding that a majority of the payments may be hedged into functional currency effectively altering the yield. This suggestion is rejected because the yield of such an instrument cannot be determined under this approach. However, § 1.988–5(a)(3)(ii) has been added to allow proportional hedging of debt instruments where the integrated yield with respect to such proportion is determinable.

In response to comments, the definition of qualifying debt instrument in § 1.988–5(a)(3)(i) has been amended retroactively to allow taxpayers to synthesize a functional currency borrowing into a nonfunctional currency borrowing consistent with Notice 87–11, 1987–1 C.B. 423. The prior exclusion was unintentional.

The definition of qualifying debt instrument in § 1.988–5(a)(3)(i) has been amended prospectively to include contingent payment debt instruments. If all payments of a contingent payment obligation are hedged such that a yield to maturity can be determined in another currency, then assuming the requirements of § 1.988–2(a) are satisfied, the transaction can be integrated. The term contingent payment debt obligation does not include dual currency or multi-currency debt instruments which were within the definition of qualifying debt instrument in § 1.988–5T(a)(3) and hence eligible for integration under the Temporary Regulations. The term contingent payment debt obligation does include reverse principal exchange rate linked securities such as the one described in Example 6 of § 1.988–5(a)(9)(iv) because the amount of principal paid upon maturity of the instrument is not determinable in any currency on the issue date (assuming, of course, that the instrument is unhedged).

In response to comments, an option is included in the definition of section 1.988–5(a) hedge if, when integrated with the qualifying debt instrument, it permits the calculation of a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated.

Commentators suggest liberalization of the rule in § 1.988–5(a)(5)(iii) that prohibits hedges with related persons. This suggestion was rejected because the integration rules are intended for transactions that in fact result in a hedged position. A hedge with a related person merely shifts the location for currency risk to that related person—there is no guarantee that the related person will hedge the risk it has assumed with an unrelated person.

A commentator asks for clarification that a self-amortizing currency swap may be used as a hedge. While not within the definition of currency swap set forth in § 1.988–2(e)(2)(ii), a self-amortizing currency swap may qualify as a hedge if, when integrated with the qualifying debt instrument, it permits the calculation of a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated. This was true under the Temporary Regulations and needs no clarification.

A commentator suggests that taxpayers should be able to integrate a debt instrument (or executory contract) incurred by a taxpayer with a hedge entered into by a foreign affiliate. This suggestion is rejected because of the administrative difficulty of auditing such transactions and of determining the corporation on whose books the integrated transaction should be reflected.

A commentator suggests deletion of the requirement that the hedge and the underlying transaction be recorded on the books of the same QBU. The rationale of the rule is to facilitate auditing integrated transactions by having the hedge and the underlying transaction recorded in one place. For administrative convenience, the rule is retained.

Section 1.988–5(a)(6)(i) has been amended to eliminate the need to obtain valuations of debt instruments that are part of a qualified hedging transaction when the taxpayer is legging into integrated treatment. If a taxpayer legs into integrated treatment by entering into a hedge after the qualifying debt instrument is issued or acquired, § 1.988–5(a)(6)(i) provides that only gain or loss from movements in exchange rates up to the leg in date is realized (and deferred).

Section 1.988–5(a)(6)(ii) contains an expanded definition of "legging out" to

clarify ambiguities in the temporary regulations. "Legging out" of integrated treatment means that the taxpayer disposes of or otherwise terminates all or a part of the qualifying debt instrument or hedge prior to maturity of the qualified hedging transaction, or the taxpayer changes a material term of the qualifying debt instrument (*e.g.*, exercises an option to change the interest rate or index, or the maturity date) or hedge (*e.g.*, changes the interest or exchange rates underlying the hedge, or the expiration date) prior to maturity of the qualified hedging transaction. A taxpayer that disposes of or terminates a qualified hedging transaction (*i.e.*, disposes of or terminates both the qualifying transaction and the hedge on the same day) shall be considered to have disposed of or otherwise terminated the synthetic debt instrument rather than as legging out.

Section 1.988–5(a)(6)(ii) (D) and (E) provide antiabuse rules for taxpayers that leg out of a qualified hedging transaction.

A commentator requests that the identification requirements be expanded to allow the sponsor of a trust issuing synthetic instruments to satisfy the identification requirements on behalf of the investors. This rule has been adopted in § 1.988–5(a)(8)(ii).

A commentator suggests that taxpayers be allowed to identify a hedged transaction in an electronic ledger, rather than a paper ledger. This suggestion has been adopted in § 1.988–5 (a)(8)(i) and (b)(3)(i) which merely requires that a taxpayer establish a record with the pertinent information.

The Service is considering whether to permit the rules of § 1.988–5 to be applied by treating consolidated group members as a single corporation. For example, if a domestic finance company enters into a transaction with an unrelated party that is intended to hedge a debt instrument issued by a domestic operating company that is a member of the same consolidated group, section 1.988–5 might be applied to treat the hedge as entered into by the domestic operating company.

The Service therefore seeks comments and information on the following issues:

(1) Which member(s) make the decision to hedge (or to leg out);

(2) How and when the hedge is identified and documented;

(3) Which member bears the cost of the hedge, *i.e.*, whether, how and when the cost of the hedge is charged to the hedged member;

(4) How payments made or received under the hedge are accounted for within the group;

(5) How the intercompany transaction rules of § 1.1502–13 should apply to such a hedged transaction; and

(6) What type of transactions should be permitted to be hedged on a consolidated basis.

(b) Hedged Executory Contracts

In response to comments that taxpayers frequently adjust hedges as contracts to purchase or sell goods and services change, the rule in § 1.988–5T(b)(2)(i)(C) which provided that the amount of an executory contract that is hedged cannot be decreased has been deleted.

Commentators have suggested that allowing integration treatment with respect to assets used in the ordinary course of a taxpayer's trade or business but not for stock purchases discriminates unfairly between two acquisition techniques. In response to this comment, § 1.988–5(b)(2)(ii) prospectively provides that a contract to buy or sell stock is an executory contract eligible for integration treatment.

A commentator suggests that options be included in the definition of hedge as defined in § 1.988–5(b)(2)(iii). We have responded to this comment by providing that the term hedge also includes an option contract described in § 1.988–1(a)(1)(ii) and (2)(iii), but only if the option contract's expiration date is on or before the accrual date. The premium paid for an option that lapses shall be integrated with the executory contract.

Commentators suggest that the requirement in § 1.988–5T(b)(2)(iii) of keeping a separate bank account for each hedge involving cash is overly restrictive. They suggest the use of a single account for all hedging transactions, combined with a convention for determining the basis of cash withdrawn. This suggestion has been adopted in § 1.988–5(b)(2)(iii)(D).

To address concerns of the Service regarding disposition of a hedge or an executory contract prior to the accrual date in a transaction between related persons (as defined in sections 267(b) and 707(b)), new § 1.988–5(b)(4)(iii)(C) has been added. This section provides that the Commissioner may redetermine the timing, source, and character of gain or loss from the hedge or the executory contract if he determines that a significant purpose for disposing of the hedge or terminating the executory contract prior to the accrual date was to affect the timing, source, or character of income, gain, expense, or loss for Federal income tax purposes.

(c) Hedges of Period Between Trade Date and Settlement Date on Purchase or Sale of Publicly Traded Stock or Security in the Case of Cash Basis Taxpayers

A commentator suggests that the provisions of § 1.988–5T(c) be extended to accrual basis taxpayers. This suggestion has been adopted in § 1.988–2(c). See § 1.6045–1(d)(6)(iii) of the proposed regulations for changes to the broker reporting rules in certain cases.

(d) Hedges of Certain Nonfunctional Currency Payments

This section is reserved in the final regulations. See § 1.988–5(d) of the proposed regulations for integration rules regarding certain dividend, rent and royalty payments.

Commentators have suggested that special timing rules be provided for hedges of the net investment of a U.S. corporation in a foreign corporation (hereafter referred to as "Hoover hedges"—see *Hoover Co.*, 72 T.C. 206 (1979)). Prior to the adoption of section 988, gains and losses realized with respect to Hoover hedges were characterized as capital gains and losses and the general timing rule of the Code applied. See *Hoover Co.*, supra; *Barnes Group, Inc.* v. *U.S.*, 697 F. Supp. 591 (D. Conn., 1988). Problems resulting from characterizing gains or losses realized on Hoover hedges as capital gains or losses are resolved under section 988(a)(1)(A) which characterizes such gains and losses as ordinary gains and losses (with a taxpayer election for capital gain or loss characterization). Some commentators have suggested, however, that special timing rules which parallel the financial accounting rules for Hoover hedges be adopted. See paragraphs 13 and 20(a) of the Statement of Financial Accounting Standards No. 52 which generally provide for deferral of gain or loss on a Hoover hedge until sale or liquidation of the foreign corporation. Other commentators have suggested complicated regimes for deferring gains and losses on Hoover hedges until dividends are paid to the U.S. corporation. Since the general timing rules of the Code as applied to Hoover hedges provide a reasonable timing result, complicated deferral regimes have been rejected.

(e) Advance Rulings Regarding Net Hedging and Anticipatory Hedging Systems

Several commentators have suggested adoption of special hedging rules applicable to hedges of net nonfunctional currency exposure (other than Hoover hedges) and anticipatory hedges of items of income or expense. Because corporations employ different systems for engaging in such hedging, adoption of specific rules is not practicable. However, § 1.988–5(e) provides that the Commissioner may issue an advance ruling addressing the income tax consequences of a taxpayer's system of hedging net nonfunctional currency exposure and anticipated nonfunctional currency exposure. The ruling may address the character, source, and timing of both the section 988 transaction(s) making up the hedge and the underlying transactions being hedged. The Commissioner will not issue a ruling regarding Hoover hedges. The Service anticipates publishing a revenue procedure addressing the procedural requirements for obtaining an advanced ruling.

(f) Mark to Market Method of Accounting for Taxpayers That Are Not Acting in the Capacity of a Dealer

Provisions regarding a mark to market method of accounting for exchange gain or loss with respect to taxpayers that are not acting in the capacity of a dealer are reserved. See § 1.988–5(f) of the proposed regulations.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for the regulations was submitted without response to the Administrator of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these regulations are Jeffrey Dorfman and Charles T Plambeck. Messrs. Dorfman and Plambeck are of the Office of Chief Counsel, Internal Revenue Service. Other personnel from the Internal Revenue Service and Treasury Department participated in developing the regulations

List of Subjects

26 CFR 1.261–1 Through 1.280H–1T

Income Taxes, Reporting and recordkeeping requirements.

26 CFR 1.985–0 Through 1.989(c)–1T

Income Taxes, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and Recordkeeping Requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 602 are amended to read as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 is amended by adding a new citation to read as follows:

Authority: Sec. 7805, 68A Stat. 917; (26 U.S.C. 7805 * * * Sections 1.988–0 through 1.988–5 also issued under 26 U.S.C. 988. * * *

Par. 2. New § 1.267(f)–1 is added and § 1.267(f)–1T(h) is redesignated as § 1.267(f)–1(h) and newly designated paragraphs (h)(2) and (h)(3) are revised to read as follows:

§ 1.267(f)–1 Deferral of certain losses of controlled groups.

(2) The loan is described in § 1.988–1(a)(2)(i);

(3) The loan is not in a hyperinflationary currency as defined in § 1.988–1(f); and

* * * * *

Par. 3. Sections 1.988–0T, 1.988–1T, 1.988–2T, 1.988–3T, 1.988–4T, and 1.988–5T are removed as of March 17, 1992.

Par. 4. New §§ 1.988–0 through 1.988–5 are added to read as follows:

§ 1.988–0 Taxation of gain or loss from a section 988 transaction; Table of Contents.

This section lists captioned paragraphs contained in §§ 1.988–1 through 1.988–5.

§ 1.988–1 Certain Definitions and Special Rules.

(a) Section 988 transaction
(1) In general.
(2) Description of transactions
(3)–(5) [Reserved]
(6) Examples.
(7) Special rules for regulated futures contracts and non-equity options.
(8) Special rules for qualified funds.
(9) Exception for certain transactions entered into by an individual.
(10) Intra-taxpayer transactions.
(11) Authority of Commissioner to include or exclude transactions from section 988.
(b) Spot contract.
(c) Nonfunctional currency.
(d) Spot rate.
(1) In general.
(2) Consistency required in valuing transactions subject to section 988.
(3) Use of certain spot rate conventions for payables and receivables denominated in nonfunctional currency.
(4) Currency where an official government established rate differs from a free market rate.
(e) Exchange gain or loss.
(f) Hyperinflationary currency.
(g) Fair market value.
(h) Interaction with sections 1092 and 1256 in examples.
(i) Effective date.

§ 1.988–2 Recognition and Computation of Exchange Gain or Loss.

(a) Disposition of nonfunctional currency.
(1) Recognition of exchange gain or loss.
(2) Computation of exchange gain or loss.
(b) Translation of interest income or expense and determination of exchange gain or loss with respect to debt instruments.
(1) Translation of interest income received with respect to a nonfunctional currency demand account.
(2) Translation of nonfunctional currency interest income or expense received or paid with respect to a debt instrument described in § 1.988–1(a)(1)(ii) and (2)(i).
(3) Exchange gain or loss recognized by the holder with respect to accrued interest income.
(4) Exchange gain or loss recognized by the obligor with respect to accrued interest expense.
(5) Exchange gain or loss recognized by the holder of a debt instrument with respect to principal.
(6) Exchange gain or loss recognized by the obligor of a debt instrument with respect to principal.
(7) Payment ordering rules.
(8) Limitation of exchange gain or loss on payment or disposition of a debt instrument.
(9) Examples.
(10) Treatment of bond premium.
(11) Market discount.
(12) Tax exempt bonds.
(13) Nonfunctional currency debt exchanged for stock of obligor.
(14)–(15) [Reserved]
(16) Coordination with section 267 regarding debt instruments.
(17) Coordination with installment method under section 453.
(c) Item of expense or gross income or receipts which is to be paid or received after the date accrued.
(1) In general.
(2) Determination of exchange gain or loss with respect to an item of gross income or receipts.
(3) Determination of exchange gain or loss with respect to an item of expense
(4) Examples.
(d) Exchange gain or loss with respect to forward contracts, futures contracts and option contracts
(1) Scope.
(2) Realization of exchange gain or loss.
(3) Recognition of exchange gain or loss.
(4) Determination of exchange gain or loss.
(5) [Reserved]

(e) Currency swaps and notional principal contracts.
(1) Notional principal contract denominated in a single nonfunctional currency.
(2) Special rules for currency swaps.
(3) Amortization of swap premium or discount in the case of off market swaps.
(4) Treatment of taxpayer disposing of a currency swap.
(5) Examples.
(6) Special effective date for rules regarding currency swaps.
(7) [Reserved]
(f) Substance over form.
(1) In general.
(2) Example.
(g) Effective date.

§ 1.988–3 Character of Exchange Gain or Loss

(a) In general.
(b) Election to characterize exchange gain or loss on certain identified forward contracts, futures contracts and option contracts as capital gain or loss.
(1) In general.
(2) Special rule for contracts that become part of a straddle after the election is made.
(3) Requirements for making the election.
(4) Verification.
(5) Independent verification.
(6) Effective date.
(c) Exchange gain or loss treated as interest.
(1) In general.
(2) Exchange loss realized by the holder on nonfunctional currency tax exempt bonds.
(d) Effective date.

§ 1.988–4 Source of Gain or Loss Realized on a Section 988 Transaction

(a) In general.
(b) Qualified business unit.
(1) In general.
(2) Proper reflection on the books of the taxpayer or qualified business unit.
(c) Effectively connected exchange gain or loss.
(d) Residence.
(1) In general.
(2) Exception.
(3) Partner in a partnership not engaged in a U.S. trade or business under section 864(b)(2).
(e) Special rule for certain related party loans.
(1) In general.
(2) United States person.
(3) Loans by related person.
(4) 10 percent owned foreign corporation.
(f) Exchange gain or loss treated as interest under § 1.988–3.
(g) Exchange gain or loss allocated in the same manner as interest under § 1.861–9T.
(h) Effective date.

§ 1.988–5 Section 988(d) Hedging Transactions

(a) Integration of a nonfunctional currency debt instrument and a § 1.988–5(a) hedge.
(1) In general.
(2) Exception.
(3) Qualifying debt instrument.
(4) Section 1.988–5(a) hedge.
(5) Definition of integrated economic transaction.
(6) Special rules for legging in and legging out of integrated treatment.
(7) Transactions part of a straddle.
(8) Identification requirements.
(9) Taxation of qualified hedging transactions.
(10) Transition rules and effective dates.
(b) Hedged executory contracts.
(1) In general.
(2) Definitions.
(3) Identification rules.
(4) Effect of hedged executory contract.
(5) References to this paragraph (b).
(c) Hedges of period between trade date and settlement date on purchase or sale of publicly traded stock or security.
(d) [Reserved]
(e) Advance rulings regarding net hedging and anticipatory hedging systems.
(f) [Reserved]
(g) General effective date.

§ 1.988–1 Certain definitions and special rules.

(a) *Section 988 transaction*—(1) *In general.* The term "section 988 transaction" means any of the following transactions—

(i) A disposition of nonfunctional currency as defined in paragraph (c) of this section;

(ii) Any transaction described in paragraph (a)(2) of this section if any amount which the taxpayer is entitled to receive or is required to pay by reason of such transaction is denominated in terms of a nonfunctional currency or is determined by reference to the value of one or more nonfunctional currencies.

A transaction described in this paragraph (a) need not require or permit payment with a nonfunctional currency as long as any amount paid or received is determined by reference to the value of one or more nonfunctional currencies. The acquisition of nonfunctional currency is treated as a section 988 transaction for purposes of establishing the taxpayer's basis in such currency and determining exchange gain or loss thereon.

(2) *Description of transactions.* The following transactions are described in this paragraph (a)(2).

(i) *Debt instruments.* Acquiring a debt instrument or becoming an obligor under a debt instrument. The term "debt instrument" means a bond, debenture, note, certificate or other evidence of indebtedness.

(ii) *Payables, receivables, etc.* Accruing, or otherwise taking into account, for purposes of subtitle A of the Internal Revenue Code, any item of expense or gross income or receipts which is to be paid or received after the date on which so accrued or taken into account. A payable relating to cost of goods sold, or a payable or receivable relating to a capital expenditure or receipt, is within the meaning of this paragraph (a)(2)(ii). Generally, a payable relating to foreign taxes (whether or not claimed as a credit under section 901) is within the meaning of this paragraph (a)(2)(ii). However, a payable of a domestic person relating to accrued foreign taxes of its qualified business unit (QBU branch) is not within the meaning of this paragraph (a)(2)(ii) if the QBU branch's functional currency is the U.S. dollar and the foreign taxes are claimed as a credit under section 901.

(iii) *Forward contract, futures contract, option contract, or similar financial instrument.* Except as otherwise provided in this paragraph (a)(2)(iii) and paragraph (a)(4)(i) of this section, entering into or acquiring any forward contract, futures contract, option, warrant, or similar financial instrument.

(A) *Limitation for certain derivative instruments.* A forward contract, futures contract, option, warrant, or similar financial instrument is within this paragraph (a)(2)(iii) only if the underlying property to which the instrument ultimately relates is a nonfunctional currency or is otherwise described in paragraph (a)(1)(ii) of this section. Thus, if the underlying property of an instrument is another financial instrument (*e.g.*, an option on a futures contract), then the underlying property to which such other instrument (*e.g.*, the futures contract) ultimately relates must be a nonfunctional currency. For example, a forward contract to purchase wheat denominated in a nonfunctional currency, an option to enter into a forward contract to purchase wheat denominated in a nonfunctional currency, or a warrant to purchase stock denominated in a nonfunctional currency is not described in this paragraph (a)(2)(iii). On the other hand, a forward contract to purchase a nonfunctional currency, an option to enter into a forward contract to purchase a nonfunctional currency, an option to purchase a bond denominated in or the payments of which are determined by reference to the value of a nonfunctional currency, or a warrant to purchase nonfunctional currency is described in this paragraph (a)(2)(iii).

(B) *Nonfunctional currency notional principal contracts*—(*1*) *In general.* The term "similar financial instrument" includes a notional principal contract only if the payments required to be made or received under the contract are determined with reference to a nonfunctional currency.

(*2*) *Definition of notional principal contract.* The term "notional principal contract" means a contract (*e.g.*, a swap, cap, floor or collar) that provides for the payment of amounts by one party to another at specified intervals calculated by reference to a specified index upon a notional principal amount in exchange for specified consideration or a promise to pay similar amounts. For this purpose, a "notional principal contract" shall only include an instrument where the underlying property to which the instrument ultimately relates is money (*e.g.*, functional currency), nonfunctional currency, or property the value of which is determined by reference to an interest rate. Thus, the term "notional principal contract" includes a currency swap as defined in § 1.988–2(e)(2)(ii), but does not include a swap referenced to a commodity or equity index.

(C) *Effective date with respect to certain contracts.* This paragraph (a)(2)(iii) does not apply to any forward contract, futures contract, option warrant, or similar financial instrument entered into or acquired on or before October 21, 1988, if such instrument would have been marked to market under section 1256 if held on the last day of the taxable year.

(3)–(5) [Reserved]

(6) *Examples.* The following examples illustrate the application of paragraph (a) of this section. The examples assume that X is a U.S. corporation on an accrual method with the calendar year as its taxable year. Because X is a U.S. corporation the U.S dollar is its functional currency under section 985. The examples also assume that section 988(d) does not apply.

Example 1. On January 1, 1989, X acquires 10,000 Canadian dollars. On January 15, 1989, X uses the 10,000 Canadian dollars to purchase inventory. The acquisition of the 10,000 Canadian dollars is a section 988 transaction for purposes of establishing X's basis in such Canadian dollars. The disposition of the 10,000 Canadian dollars is a section 988 transaction pursuant to paragraph (a)(1) of this section.

Example 2. On January 1, 1989, X acquires 10,000 Canadian dollars. On January 15, 1989, X converts the 10,000 Canadian dollars to U.S. dollars. The acquisition of the 10,000 Canadian dollars is a section 988 transaction for purposes of establishing X's basis in such Canadian dollars. The conversion of the 10,000 Canadian dollars to U.S. dollars is a section 988 transaction pursuant to paragraph (a)(1) of this section.

Example 3. On January 1, 1989, X borrows 100,000 British pounds (£) for a period of 10 years and issues a note to the lender with a face amount of £100,000. The note provides for payments of interest at an annual rate of 10% paid quarterly in pounds and has a stated redemption price at maturity of £100,000. X's becoming the obligor under the note is a section 988 transaction pursuant to paragraphs (a) (1)(ii) and (2)(i) of this section. Because X is an accrual basis taxpayer, the accrual of interest expense under X's note is a section 988 transaction pursuant to paragraphs (a) (1)(ii) and (2)(ii) of this section. In addition, the acquisition of the British pounds to make payments under the note is a section 988 transaction for purposes of establishing X's basis in such pounds, and the disposition of such pounds is a section 988 transaction under paragraph (a)(1)(i) of this section. See § 1.988–2(b) with respect to the translation of accrued interest expense and the determination of exchange gain or loss upon payment of accrued interest expense.

Example 4. On January 1, 1989, X purchases an original issue for 74,621.54 British pounds (£) a 3-year bond maturing on December 31, 1991, at a stated redemption price of £100,000. The bond provides for no stated interest. The bond has a yield to maturity of 10% compounded semiannually and has £25,378.46 of original issue discount. The acquisition of the bond is a section 988 transaction as provided in paragraphs (a) (1)(ii) and (2)(i) of this section. The accrual of original issue discount with respect to the bond is a section 988 transaction under paragraphs (a) (1)(ii) and (2)(ii) of this section. See § 1.988–2(b) with respect to the translation of original issue discount and the determination of exchange gain or loss upon receipt of such amounts.

Example 5. On January 1, 1989, X sells and delivers inventory to Y for 10,000,000 Italian lira for payment on April 1, 1989. Under X's method of accounting, January 1, 1989 is the accrual date. Because X is an accrual basis taxpayer, the accrual of a nonfunctional currency denominated item of gross receipts on January 1, 1989, for payment after the date of accrual is a section 988 transaction under paragraphs (a) (1)(ii) and (2)(ii) of this section.

Example 6. On January 1, 1989, X agrees to purchase a machine from Y for delivery on March 1, 1990 for 1,000,000 yen. The agreement calls for X to pay Y for the machine on June 1, 1990. Under X's method of accounting, the expenditure for the machine does not accrue until delivery on March 1, 1990. The agreement to purchase the machine is not a section 988 transaction. In particular, the agreement to purchase the machine is not described in paragraph (a)(2)(ii) of this section because the agreement is not an item of expense taken into account under subtitle A (but rather is an agreement to purchase a capital asset in the future). However, the payable that will arise on the delivery date is a section 988 transaction under paragraphs (a) (1)(ii) and (2)(ii) of this section even though the payable relates to a capital expenditure. In addition, the disposition of yen to satisfy the payable on June 1, 1990, is a section 988 transaction under paragraph (a)(1)(i) of this section.

Example 7. On January 1, 1989, X purchases and takes delivery of inventory for 10,000 French francs with payment to be made on April 1, 1989. Under X's method of accounting, the expense accrues on January 1, 1989. On January 1, 1989, X also enters into a forward contract with a bank to purchase 10,000 French francs for $2,000 on April 1, 1989. Because X is an accrual basis taxpayer, the accrual of a nonfunctional currency denominated item of expense on January 1, 1989, for payment after the date of accrual is a section 988 transaction under paragraphs (a) (1)(ii) and (2)(ii) of this section. Entering into the forward contract to purchase the 10,000 French francs is a section 988 transaction under paragraphs (a) (1)(ii) and (2)(iii) of this section.

Example 8. On January 1, 1989, X acquires 100,000 Norwegian krone. On January 15, 1989, X purchases and takes delivery of 1,000 shares of common stock with the 100,000 krone acquired on January 1, 1989. On August 1, 1989, X sells the 1,000 shares of common stock and receives 120,000 krone in payment. On August 30, 1989, X converts the 120,000 krone to U.S. dollars. The acquisition of the 100,000 krone on January 1, 1989, and the acquisition of the 120,000 krone on August 1, 1989, are section 988 transactions for purposes of establishing the basis of such krone. The disposition of the 100,000 krone on January 15, 1989, and the 120,000 krone on August 30, 1989, are section 988 transactions as provided in paragraph (a)(1)(i) of this section. Neither the acquisition on January 15, 1989, nor the disposition on August 1, 1989, of the stock is a section 988 transaction.

Example 9. On May 11, 1989, X purchases a one year note at original issue for its issue price of $1,000. The note pays interest in dollars at the rate of 4 percent compounded semiannually. The amount of principal received by X upon maturity is equal to $1,000 plus the equivalent of the excess, if any, of (a) the Financial Times One Hundred Stock Index (an index of stocks traded on the London Stock Exchange hereafter referred to as the FT100) determined and translated into dollars on the last business day prior to the maturity date, over (b) £2.150, the "stated value" of the FT100, which is equal to 110% of the average value of the index for the six months prior to the issue date, translated at the exchange rate of £1=$1.50. The purchase by X of the instrument described above is not a section 988 transaction because the index used to compute the principal amount received upon maturity is determined with reference to the value of stock and not nonfunctional currency.

Example 10. On April 9, 1989, X enters into an interest rate swap that provides for the payment of amounts by X to its counterparty based on 4% of a 10,000 yen principal amount in exchange for amounts based on yen LIBOR rates. Pursuant to paragraphs (a) (1)(ii) and (2)(iii) of this section, this yen for yen interest rate swap is a section 988 transaction.

Example 11. On August 11, 1989, X enters into an option contract for sale of a group of stocks traded on the Japanese Nikkei exchange. The contract is not a section 988 transaction within the meaning of § 1.988–1(a)(2)(iii) because the underlying property to which the option relates is a group of stocks and not nonfunctional currency.

(7) *Special rules for regulated futures contracts and non-equity options*—(i) *In general.* Except as provided in paragraph (a)(7)(ii) of this section, paragraph (a)(2)(iii) of this section shall not apply to any regulated futures contract or non-equity option which would be marked to market under

section 1256 if held on the last day of the taxable year.

(ii) *Election to have paragraph (a)(2)(iii) of this section apply.* Notwithstanding paragraph (a)(7)(i) of this section, a taxpayer may elect to have paragraph (a)(2)(iii) of this section apply to regulated futures contracts and non-equity options as provided in paragraph (a)(7) (iii) and (iv) of this section.

(iii) *Procedure for making the election.* A taxpayer shall make the election provided in paragraph (a)(7)(ii) of this section by sending to the Internal Revenue Service Center, Examination Branch, Stop Number 92, Kansas City, MO 64999 a statement titled "Election to Treat Regulated Futures Contracts and Non-Equity Options as Section 988 Transactions Under Section 988 (c)(1)(D)(ii)" that contains the following:

(A) The taxpayer's name, address, and taxpayer identification number;

(B) The date the notice is mailed or otherwise delivered to the Internal Revenue Service Center;

(C) A statement that the taxpayer (including all members of such person's affiliated group as defined in section 1504 or in the case of an individual all persons filing a joint return with such individual) elects to have section 988(c)(1)(D)(i) and § 1.988–1(a)(7)(i) not apply;

(D) The date of the beginning of the taxable year for which the election is being made;

(E) If the election is filed after the first day of the taxable year, a statement regarding whether the taxpayer has previously held a contract described in section 988(c)(1)(D)(i) or § 1.988–1(a)(7)(i) during such taxable year, and if so, the first date during the taxable year on which such contract was held; and

(F) The signature of the person making the election (in the case of individuals filing a joint return, the signature of all persons filing such return).

The election shall be made by the following persons: in the case of an individual, by such individual; in the case of a partnership, by each partner separately; effective for taxable years beginning after March 17, 1992, in the case of tiered partnerships, each ultimate partner; in the case of an S corporation, by each shareholder separately; in the case of a trust (other than a grantor trust) or estate, by the fiduciary of such trust or estate; in the case of any corporation other than an S corporation, by such corporation (in the case of a corporation that is a member of an affiliated group that files a consolidated return, such election shall be valid and binding only if made by the common parent, as that term is used in § 1.1502–77(a)); in the case of a controlled foreign corporation, by its controlling United States shareholders under § 1.964–1(c)(3). With respect to a corporation (other than an S corporation), the election, when made by the common parent, shall be binding on all members of such corporation's affiliated group as defined in section 1504 that file a consolidated return. The election shall be binding on any income or loss derived from the partner's share (determined under the principles of section 702(a)) of all contracts described in section 988(c)(1)(D)(i) or paragraph (a)(7)(i) of this section in which the taxpayer holds a direct interest or indirect interest through a partnership or S corporation; however, the election shall not apply to any income or loss of a partnership for any taxable year if such partnership made an election under section 988(c)(1)(E)(iii)(V) for such year or any preceding year. Generally, a copy of the election must be attached to the taxpayer's income tax return for the first year it is effective. It is not required to be attached to subsequent returns. However, in the case of a partner, a copy of the election must be attached to the taxpayer's income tax return for every year during which the taxpayer is a partner in a partnership that engages in a transaction that is subject to the election.

(iv) *Time for making the election*—(A) *In general.* Unless the requirements for making a late election described in paragraph (a)(7)(iv)(B) of this section are satisfied, an election under section 988 (c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section for any taxable year shall be made on or before the first day of the taxable year or, if later, on or before the first day during such taxable year on which the taxpayer holds a contract described in section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section. The election under section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section shall apply to contracts entered into or acquired after October 21, 1988, and held on or after the effective date of the election. The election shall be effective as of the beginning of the taxable year and shall be binding with respect to all succeeding taxable years unless revoked with the prior consent of the Commissioner. In determining whether to grant revocation of the election, recapture of the tax benefit derived from the election in previous taxable years will be considered.

(B) *Late elections.* A taxpayer may make an election under section 988(c)(1)(D)(ii) and paragraph (a)(7)(ii) of this section within 30 days after the time prescribed in the first sentence of paragraph (a)(7)(iv)(A) of this section. Such a late election shall be effective as of the beginning of the taxable year; however, any losses recognized during the taxable year with respect to contracts described in section 988(c)(1)(D)(ii) or paragraph (a)(7)(ii) of this section which were entered into or acquired after October 21, 1988, and held on or before the date on which the late election is mailed or otherwise delivered to the Internal Revenue Service Center shall not be treated as derived from a section 988 transaction. A late election must comply with the procedures set forth in paragraph (a)(7)(iii) of this section.

(v) *Transition rule.* An election made prior to September 21, 1989 which satisfied the requirements of Notice 88–124, 1988–51 I.R.B. 6, shall be deemed to satisfy the requirements of paragraphs (a)(7) (iii) and (iv) of this section.

(vi) *General effective date provision.* This paragraph (a)(7) shall apply with respect to futures contracts and options entered into or acquired after October 21, 1988.

(8) *Special rules for qualified funds*—(i) *Definition of qualified fund.* The term "qualified fund" means any partnership if—

(A) At all times during the taxable year (and during each preceding taxable year to which an election under section 988(c)(1)(E)(iii)(V) applied) such partnership has at least 20 partners and no single partner owns more than 20 percent of the interests in the capital or profits of the partnership;

(B) The principal activity of such partnership for such taxable year (and each such preceding taxable year) consists of buying and selling options, futures, or forwards with respect to commodities;

(C) At least 90 percent of the gross income of the partnership for the taxable year (and each such preceding year) consists of income or gains described in subparagraph (A), (B), or (G) of section 7704(d)(1) or gain from the sale or disposition of capital assets held for the production of interest or dividends;

(D) No more than a de minimis amount of the gross income of the partnership for the taxable year (and each such preceding taxable year) was derived from buying and selling commodities; and

(E) An election under section 988 (c)(1)(E)(iii)(V) as provided in paragraph (a)(8)(iv) of this section applies to the taxable year.

(ii) *Special rules relating to paragraph (a)(8)(i)(A) of this section*—(A) *Certain general partners.* The interest of a general partner in the partnership shall not be treated as failing to meet the 20 percent ownership requirement of paragraph (a)(8)(i)(A) of this section for any taxable year of the partnership if, for the taxable year of the partner in which such partnership's taxable year ends, such partner (and each corporation filing a consolidated return with such partner) had no ordinary income or loss from a section 988 transaction (other than income from the partnership) which is exchange gain or loss (as the case may be).

(B) *Treatment of incentive compensation.* For purposes of paragraph (a)(8)(i)(A) of this section, any income allocable to a general partner as incentive compensation based on profits rather than capital shall not be taken into account in determining such partner's interest in the profits of the partnership.

(C) *Treatment of tax exempt partners.* The interest of a partner in the partnership shall not be treated as failing to meet the 20 percent ownership requirements of paragraph (a)(5)(8)(A) of this section if none of the income of such partner from such partnership is subject to tax under chapter 1 of subtitle A of the Internal Revenue Code (whether directly or through one or more pass-through entities).

(D) *Look-through rule.* In determining whether the 20 percent ownership requirement of paragraph (a)(8)(i)(A) of this section is met with respect to any partnership, any interest in such partnership held by another partnership shall be treated as held proportionately by the partners in such other partnership.

(iii) *Other special rules*—(A) *Related persons.* Interests in the partnership held by persons related to each other (within the meaning of section 267(b) or 707(b)) shall be treated as held by one person.

(B) *Predecessors.* Reference to any partnership shall include a reference to any predecessor thereof.

(C) *Treatment of certain debt instruments.* Solely for purposes of paragraph (a)(8)(i)(D) of this section, any debt instrument which is described in both paragraph (a) (1)(ii) and (2)(i) of this section shall be treated as a commodity.

(iv) *Procedure for making the election provided in section 988(c)(1)(E)(iii)(V).* A partnership shall make the election provided in section 988(c)(1)(E)(iii)(V) by sending to the Internal Revenue Service Center, Examination Branch, Stop Number 92, Kansas City, MO 64999 a statement titled "QUALIFIED FUND ELECTION UNDER SECTION 988(c)(1)(E)(iii)(V)" that contains the following:

(A) The partnership's name, address, and taxpayer identification number;

(B) The name, address and taxpayer identification number of the general partner making the election on behalf of the partnership;

(C) The date the notice is mailed or otherwise delivered to the Internal Revenue Service Center;

(D) A brief description of the activity of the partnership;

(E) A statement that the partnership is making the election provided in section 988(c)(1)(E)(iii)(V);

(F) The date of the beginning of the taxable year for which the election is being made;

(G) If the election is filed after the first day of the taxable year, then a statement regarding whether the partnership previously held an instrument referred to in section 988(c)(1)(E)(i) during such taxable year and, if so, the first date during the taxable year on which such contract was held; and

(H) The signature of the general partner making the election.

The election shall be made by a general partner with management responsibility of the partnership's activities and a copy of such election shall be attached to the partnership's income tax return (Form 1065) for the first taxable year it is effective. It is not required to be attached to subsequent returns.

(v) *Time for making the election.* The election under section 988(c)(1)(E)(iii)(V) for any taxable year shall be made on or before the first day of the taxable year or, if later, on or before the first day during such year on which the partnership holds an instrument described in section 988(c)(1)(E)(i). The election under section 988(c)(1)(E)(iii)(V) shall apply to the taxable year for which made and all succeeding taxable years. Such election may only be revoked with the consent of the Commissioner. In determining whether to grant revocation of the election, recapture by the partners of the tax benefit derived from the election in previous taxable years will be considered.

(vi) *Operative rules applicable to qualified funds*—(A) *In general.* In the case of a qualified fund, any bank forward contract or any foreign currency futures contract traded on a foreign exchange which is not otherwise a section 1256 contract shall be treated as a section 1256 contract for purposes of section 1256.

(B) *Gains and losses treated as short-term.* In the case of any instrument treated as a section 1256 contract under paragraph (a)(8)(vi)(A) of this section, subparagraph (A) of section 1256(a)(3) shall be applied by substituting "100 percent" for "40 percent" (and subparagraph (B) of such section shall not apply).

(vii) *Transition rule.* An election made prior to September 21, 1989, which satisfied the requirements of Notice 88–124, 1988–51 I.R.B. 6, shall be deemed to satisfy the requirements of § 1.988–1(a)(8) (iv) and (v).

(viii) *General effective date rules*—(A) The requirements of subclause (IV) of section 988(c)(1)(E)(iii) shall not apply to contracts entered into or acquired on or before October 21, 1988.

(B) In the case of any partner in an existing partnership, the 20 percent ownership requirements of subclause (I) of section 988(c)(1)(E)(iii) shall be treated as met during any period during which such partner does not own a percentage interest in the capital or profits of such partnership greater than 33⅓ percent (or, if lower, the lowest such percentage interest of such partner during any period after October 21, 1988, during which such partnership is in existence). For purposes of the preceding sentence, the term "existing partnership" means any partnership if—

(*1*) Such partnership was in existence on October 21, 1988, and principally engaged on such date in buying and selling options, futures, or forwards with respect to commodities; or

(*2*) A registration statement was filed with respect to such partnership with the Securities and Exchange Commission on or before such date and such registration statement indicated that the principal activity of such partnership will consist of buying and selling instruments referred to in paragraph (a)(8)(viii)(B)(*1*) of this section.

(9) *Exception for certain transactions entered into by an individual*—(i) *In general.* A transaction entered into by an individual which otherwise qualifies as a section 988 transaction shall be considered a section 988 transaction only to the extent expenses properly allocable to such transaction meet the requirements of section 162 or 212 (other than the part of section 212 dealing with expenses incurred in connection with taxes).

(ii) *Examples.* The following examples illustrate the application of paragraph (a)(9) of this section.

Example 1. X is a U.S. citizen who therefore has the U.S. dollar as his functional currency. On January 1, 1990, X enters into a spot contract to purchase 10,000 British pounds (£) for $15,000 for delivery on January 3, 1990. Immediately upon delivery, X

acquires at original issue a pound denominated bond with an issue price of £10,000. The bond matures on January 3, 1993, pays interest in pounds at a rate of 10% compounded semiannually, and has no original issue discount. Assume that all expenses properly allocable to these transactions would meet the requirements of section 212. Under § 1.988–2(d)(1)(ii), entering into the spot contract on January 1, 1990, is not a section 988 transaction. The acquisition of the pounds on January 3, 1990, under the spot contract is a section 988 transaction for purposes of establishing X's basis in the pounds. The disposition of the pounds and the acquisition of the bond by X are section 988 transactions. These transactions are not excluded from the definition of a section 988 transaction under paragraph (a)(9) of this section because expenses properly allocable to such transactions meet the requirements of section 212.

Example 2. X is a U.S. citizen who therefore has the dollar as his functional currency. In preparation for X's vacation, X purchases 1,000 British pounds (£) from a bank on June 1, 1989. During the period of X's vacation in the United Kingdom beginning June 10, 1989, and ending June 20, 1989, X spends £500 for hotel rooms, £300 for food and £200 for miscellaneous vacation expenses. The expenses properly allocable to such dispositions do not meet the requirements of section 162 or 212. Thus, the disposition of the pounds by X on his vacation are not section 988 transactions.

(10) *Intra-taxpayer transactions*—(i) *In general.* Except as provided in paragraph (a)(10)(ii) of this section, transactions between or among the taxpayer and/or qualified business units of that taxpayer ("intra-taxpayer transactions") are not section 988 transactions. See section 987 and the regulations thereunder.

(ii) *Certain transfers.* Exchange gain or loss with respect to nonfunctional currency or any item described in paragraph (a)(2) of this section entered into with another taxpayer shall be realized upon an intra-taxpayer transfer of such currency or item where as the result of the transfer the currency or other such item—

(A) Loses its character as nonfunctional currency or an item described in paragraph (a)(2) of this section; or

(B) Where the source of the exchange gain or loss could be altered absent the application of this paragraph (a)(10)(ii). Such exchange gain or loss shall be computed in accordance with § 1.988–2 (without regard to § 1.988–2(b)(8)) as if the nonfunctional currency or item described in paragraph (a)(2) of this section had been sold or otherwise transferred at fair market value between unrelated taxpayers. For purposes of the preceding sentence, a taxpayer must use the translation rate that it uses for purposes of computing section 987 gain or loss with respect to the QBU branch that makes the transfer. In the case of a gain or loss incurred in a transaction described in this paragraph (a)(10)(ii) that does not have a significant business purpose, the Commissioner, may defer such gain or loss.

(iii) *Example.* The following example illustrates the provisions of this paragraph (a)(10).

Example. (A) X, a corporation with the U.S. dollar as its functional currency, operates through foreign branches Y and Z. Y and Z are qualified business units as defined in section 989(a) with the LC as their functional currency. X computes Y's and Z's income under section 987 (relating to branch transactions). On November 12, 1988, Y transfers $25 to the home office of X when the fair market value of such amount equals LC120. Y has a basis of LC100 in the $25. Under paragraph (a)(10)(ii) of this section, Y realizes foreign source exchange gain of LC20 (LC120—LC100) as the result of the $25 transfer. For purposes of determining whether the transfer is a remittance resulting in additional gain or loss, see section 987 and the regulations thereunder.

(B) If instead Y transfers the $25 to Z, exchange gain is not realized because the $25 is nonfunctional currency with respect to Z and if Z were to immediately convert the $25 into LCs, the gain would be foreign source. For purposes of determining whether the transfer is a remittance resulting in additional gain or loss, see section 987 and the regulations thereunder.

(11) *Authority to include or exclude transactions from section 988*—(i) *In general.* The Commissioner may recharacterize a transaction (or series of transactions) in whole or in part as a section 988 transaction if the effect of such transaction (or series of transactions) is to avoid section 988. In addition, the Commissioner may exclude a transaction (or series of transactions) which in form is a section 988 transaction from the provisions of section 988 if the substance of the transaction (or series of transactions) indicates that it is not properly considered a section 988 transaction.

(ii) *Example.* The following example illustrates the provisions of this paragraph (a)(11).

Example. B is an individual with the U.S. dollar as its functional currency. B holds 500,000 Swiss francs which have a basis of $100,000 and a fair market value of $400,000 as of October 15, 1989. On October 16, 1989, B transfers the 500,000 Swiss francs to a newly formed U.S. corporation, X, with the dollar as its functional currency. On October 16, 1989, B sells the stock of X for $400,000. Assume the transfer to X qualified for nonrecognition under section 351. Because the sale of the stock of X is a substitute for the disposition of an asset subject to section 988, the Commissioner may recharacterize the sale of the stock as a section 988 transaction. The same result would obtain if B transferred the Swiss francs to a partnership and then sold the partnership interest.

(b) *Spot contract.* A spot contract is a contract to buy or sell nonfunctional currency on or before two business days following the date of the execution of the contract. See § 1.988–2 (d)(1)(ii) for operative rules regarding spot contracts.

(c) *Nonfunctional currency.* The term "nonfunctional currency" means with respect to a taxpayer or a qualified business unit (as defined in section 989 (a)) a currency (including the European Currency Unit) other than the taxpayer's or the qualified business unit's functional currency as defined in section 985 and the regulations thereunder. For rules relating to nonrecognition of exchange gain or loss with respect to certain dispositions of nonfunctional currency, see § 1.988–2 (a)(1)(iii).

(d) *Spot rate*—(1) *In general.* Except as otherwise provided in this paragraph, the term "spot rate" means a rate demonstrated to the satisfaction of the District Director or the Assistant Commissioner (International) to reflect a fair market rate of exchange available to the public for currency under a spot contract in a free market and involving representative amounts. In the absence of such a demonstration, the District Director or the Assistant Commissioner (International), in his or her sole discretion, shall determine the spot rate from a source of exchange rate information reflecting actual transactions conducted in a free market. For example, the taxpayer or the District Director or the Assistant Commissioner (International) may determine the spot rate by reference to exchange rates published in the pertinent monthly issue of "International Financial Statistics" or a successor publication of the International Monetary Fund; exchange rates published by the Board of Governors of the Federal Reserve System pursuant to 31 U.S.C. section 5151; exchange rates published in newspapers, financial journals or other daily financial news sources; or exchange rates quoted by electronic financial news services.

(2) *Consistency required in valuing transactions subject to section 988.* If the use of inconsistent sources of spot rate quotations results in the distortion of income, the District Director or the Assistant Commissioner (International) may determine the appropriate spot rate.

(3) *Use of certain spot rate conventions for payables and receivables denominated in nonfunctional currency.* If consistent with the taxpayer's financial accounting, a taxpayer may utilize a spot rate convention determined at intervals of one quarter year or less for purposes of computing exchange gain or loss with respect to payables and receivables denominated in a nonfunctional currency that are incurred in the ordinary course of business with respect to the acquisition or sale of goods or the obtaining or performance of services. For example, if consistent with the taxpayer's financial accounting, a taxpayer may accrue all payables and receivables incurred during the month of January at the spot rate on December 31 or January 31 (or at an average of any spot rates occurring between these two dates) and record the payment or receipt of amounts in satisfaction of such payables and receivables consistent with such convention. The use of a spot rate convention cannot be changed without the consent of the Commissioner.

(4) *Currency where an official government established rate differs from a free market rate*—(i) *In general.* If a currency has an official government established rate that differs from a free market rate, the spot rate shall be the rate which most clearly reflects the taxpayer's income. Generally, this shall be the free market rate.

(ii) *Examples.* The following examples illustrate the application of this paragraph (d)(4).

Example 1. X is an accrual method U.S. corporation with the dollar as its functional currency. X owns all the stock of a Country L subsidiary, CFC. CFC has the currency of Country L, the LC, as its functional currency. Country L imposes restrictions on the remittance of dividends. On April 1, 1990, CFC pays a dividend to X in the amount of LC100. Assume that the official government established rate is $1=LC1 and the free market rate, which takes into account the remittance restrictions and which is the rate that most clearly reflects income, is $1=LC4. On April 1, 1990, X donates the LC100 in a transaction that otherwise qualifies as a charitable contribution under section 170 (c). Both the amount of the dividend income and the deduction under section 170 is $25 (LC100 x the free market rate, $.25).

Example 2. X, a corporation with the U.S. dollar as its functional currency, operates in foreign country L through branch Y. Y is a qualified business unit as defined in section 989 (a). X computes Y's income under the dollar approximate separate transactions method as described in § 1.985–3. The currency of L is the LC. X can purchase legally United States dollars ($) in L only from the L government. In order to take advantage of an arbitrage between the official and secondary dollar to LC exchange rates in L:

(i) X purchases LC100 for $80 in L on the secondary market when the official exchange rate is $1=LC1;

(ii) X transfers the LC100 to Y;

(iii) Y purchases $100 for LC100; and

(iv) Y transfers $95 ($100 less an L tax withheld of $35 on the transfer) to the home office of X.

Under paragraph (a)(7) of this section, the transfer of the LC100 by X to Y is a realization event. X has a basis of $80 in the LC100. Under these facts, the appropriate dollar to LC exchange rate for computing the amount realized by X is the official exchange rate. Therefore, X realizes $40 ($100–$60) of U.S. source gain from the transfer to Y. The same result would obtain if Y rather than X purchased the LC100 on the secondary market in L with $60 supplied by X, because the substance of this transaction is that X is performing the arbitrage.

(e) *Exchange gain or loss.* The term "exchange gain or loss" means the amount of gain or loss realized as determined in § 1.988–2 with respect to a section 988 transaction. Except as otherwise provided in these regulations (*e.g.*, § 1.988–5), the amount of exchange gain or loss from a section 988 transaction shall be separately computed for each section 988 transaction, and such amount shall not be integrated with gain or loss recognized on another transaction (whether or not such transaction is economically related to the section 988 transaction). See § 1.988–2 (b)(8) for a special rule with respect to debt instruments.

(f) *Hyperinflationary currency.* For the definition of hyperinflationary currency see § 1.985–2 (b)(2). Unless otherwise provided, the currency in any example used in §§ 1.988–1 through 1.988–5 is not a hyperinflationary currency.

(g) *Fair market value.* The fair market value of an item shall, where relevant, reflect an appropriate premium or discount for the time value of money (*e.g.*, the fair market value of a forward contract to buy or sell nonfunctional currency shall reflect the present value of the difference between the units of nonfunctional currency times the market forward rate at the time of valuation and the units of nonfunctional currency times the forward rate set forth in the contract). However, if consistent with the taxpayer's method of financial accounting (and consistently applied from year to year), the preceding sentence shall not apply to a financial instrument that matures within one year from the date of issuance or acquisition. Unless otherwise provided, the fair market value given in any example used in §§ 1.988–1 through 1.988–5 is deemed to reflect appropriately the time value of money. If the use of inconsistent sources of forward or other market rate quotations results in the distortion of income, the District Director or the Assistant Commissioner (International) may determine the appropriate rate.

(h) *Interaction with sections 1092 and 1256.* Unless otherwise provided, it is assumed for purposes of §§ 1.988–1 through 1.988–5 that any contract used in any example is not a section 1256 contract and is not part of a straddle as defined in section 1092. No inference is intended regarding the application of section 1092 or 1256 unless expressly stated.

(i) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

§ 1.988–2 Recognition and computation of exchange gain or loss.

(a) *Disposition of nonfunctional currency*—(1) *Recognition of exchange gain or loss*—(i) *In general.* Except as otherwise provided in this section, § 1.988–1(a)(7)(ii), and § 1.988–5, the recognition of exchange gain or loss upon the sale or other disposition of nonfunctional currency shall be governed by the recognition provisions of the Internal Revenue Code which apply to the sale or disposition of property (*e.g.*, section 1001 or, to the extent provided in regulations, section 1092). The disposition of nonfunctional currency in settlement of a forward contract, futures contract, option contract, or similar financial instrument is considered to be a sale or disposition of the nonfunctional currency for purposes of the preceding sentence.

(ii) *Clarification of section 1031.* An amount of one nonfunctional currency is not "property of like kind" with respect to an amount of a different nonfunctional currency.

(iii) *Coordination with section 988(c)(1)(C)(ii).* No exchange gain or loss is recognized with respect to the following transactions—

(A) An exchange of units of nonfunctional currency for different units of the same nonfunctional currency;

(B) The deposit of nonfunctional currency in a demand or time deposit or similar instrument (including a certificate of deposit) issued by a bank or other financial institution if such instrument is denominated in such currency;

(C) The withdrawal of nonfunctional currency from a demand or time deposit or similar instrument issued by a bank or other financial institution if such

instrument is denominated in such currency;

(D) The receipt of nonfunctional currency from a bank or other financial institution from which the taxpayer purchased a certificate of deposit or similar instrument denominated in such currency by reason of the maturing or other termination of such instrument; and

(E) The transfer of nonfunctional currency from a demand or time deposit or similar instrument issued by a bank or other financial institution to another demand or time deposit or similar instrument denominated in the same nonfunctional currency issued by a bank or other financial institution.

The taxpayer's basis in the units of nonfunctional currency or other property received in the transaction shall be the adjusted basis of the units of nonfunctional currency or other property transferred. See paragraph (b) of this section with respect to the timing of interest income or expense and the determination of exchange gain or loss thereon.

(iv) *Example.* The following example illustrates the provisions of paragraph (a)(1)(iii) of this section.

Example. X is a corporation on the accrual method of accounting with the U.S. dollar as its functional currency. On January 1, 1989, X acquires 1,500 British pounds (£) for $2,250 (£1=$1.50). On January 3, 1989, when the spot rate is £1=$1.49, X deposits the £1,500 with a British financial institution in a non-interest bearing demand account. On February 1, 1989, when the spot rate is £1=$1.45, X withdraws the £1,500. On February 5, 1989, when the spot rate is £1=$1.42, X purchases inventory in the amount of £1,500. Pursuant to paragraph (a)(1)(iii) of this section, no exchange loss is realized until February 5, 1989, when X disposes of the £1,500 for inventory. At that time, X realizes exchange loss in the amount of $120 computed under paragraph (a)(2) of this section. The loss is not an adjustment to the cost of the inventory.

(2) *Computation of gain or loss*—(i) *In general.* Exchange gain realized from the sale or other disposition of nonfunctional currency shall be the excess of the amount realized over the adjusted basis of such currency, and exchange loss realized shall be the excess of the adjusted basis of such currency over the amount realized.

(ii) *Amount realized*—(A) *In general.* The amount realized from the disposition of nonfunctional currency shall be determined under section 1001(b). A taxpayer that uses a spot rate convention under § 1.988–1(d)(3) to determine exchange gain or loss with respect to a payable shall determine the amount realized upon the disposition of nonfunctional currency paid in satisfaction of the payable in a manner consistent with such convention.

(B) *Exchange of nonfunctional currency for property.* For purpose of paragraph (a)(2) of this section, the exchange of nonfunctional currency for property (other than nonfunctional currency) shall be treated as—

(*1*) An exchange of the units of nonfunctional currency for units of functional currency at the spot rate on the date of the exchange, and

(*2*) The purchase or sale of the property for such units of functional currency.

(C) *Example.* The following example illustrates the provisions of paragraph (a)(2)(ii)(B) of this section.

Example. G is a U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1989, G enters into a contract to purchase a paper manufacturing machine for 10,000,000 British pounds (£) for delivery on January 1, 1991. On January 1, 1991, when G exchanges £10,000,000 (which G purchased for $12,000,000) for the machine, the fair market value of the machine is £17,000,000. On January 1, 1991, the spot exchange rate is £1=$1.50. Under paragraph (a)(2)(ii)(B) of this section, the transaction is treated as an exchange of £10,000,000 for $15,000,000 and the purchase of the machine for $15,000,000. Accordingly, in computing G's exchange gain of $3,000,000 on the disposition of the £10,000,000, the amount realized is $15,000,000. G's basis in the machine is $15,000,000. No gain is recognized on the bargain purchase of the machine.

(iii) *Adjusted basis*—(A) *In general.* Except as provided in paragraph (a)(2)(iii)(B) of this section, the adjusted basis of nonfunctional currency is determined under the applicable provisions of the Internal Revenue Code (*e.g.*, sections 1011 through 1023). A taxpayer that uses a spot rate convention under § 1.988–1 (d)(3) to determine exchange gain or loss with respect to a receivable shall determine the basis of nonfunctional currency received in satisfaction of such receivable in a manner consistent with such convention.

(B) *Determination of the basis of nonfunctional currency withdrawn from an account with a bank or other financial institution*—(*1*) *In general.* The basis of nonfunctional currency withdrawn from an account with a bank or other financial institution shall be determined under any reasonable method that is consistently applied from year to year by the taxpayer to all accounts denominated in a nonfunctional currency. For example, a taxpayer may use a first in first out method, a last in first out method, a pro rata method (as illustrated in the example below), or any other reasonable method that is consistently applied. However, a method that consistently results in units of nonfunctional currency with the highest basis being withdrawn first shall not be considered reasonable.

(*2*) *Example.* The following example illustrates the provisions of this paragraph (a)(2)(iii)(B).

Example. (i) X, a cash basis individual with the dollar as his functional currency, opens a demand account with a Swiss bank. Assume expenses associated with the demand account are deductible under section 212. The following chart indicates Swiss franc deposits to the account, Swiss franc interest credited to the account, the dollar basis of each deposit, and the determination of the aggregate dollar basis of all Swiss francs in the account. Assume that the taxpayer has properly translated all the amounts specified in the chart and that all transactions are subject to section 988.

Date	Swiss francs deposited	Interest received	U.S. dollar basis	Aggregate U.S. dollar basis
1/01/89	1000 SF		$500	$500
3/31/89		50 SF	25	525
6/30/89		50 SF	24	549
9/30/89		50 SF	25	574
12/31/89		50 SF	26	600

(ii) On January 1, 1990, X withdraws 500 Swiss francs from the account. X may determine his basis in the Swiss francs by multiplying the aggregate U.S. dollar basis of Swiss francs in the account by a fraction the numerator of which is the number of Swiss francs withdrawn from the account and the denominator is the total number of Swiss francs in the account. Under this method, X's basis in the 500 Swiss francs is $250 computed as follows:

$$\frac{500\ SF}{1200\ SF} \times \$600 = \$250$$

(iii) X's basis in the Swiss francs remaining in the account is $350 ($600−$250). X must use this method consistently from year to year with respect to withdrawals of nonfunctional currency from all of X's accounts.

(iv) *Purchase and sale of stock or securities traded on an established securities market by cash basis taxpayer*—

(A) *Amount realized.* If stock or securities traded on an established securities market are sold by a cash basis taxpayer for nonfunctional currency, the amount realized with respect to the stock or securities (as determined on the trade date) shall be computed by translating the units of nonfunctional currency received into functional currency at the spot rate on the settlement date of the sale. This rule applies notwithstanding that the stock or securities are treated as disposed of on a date other than the settlement date under another section of the Code. See section 453(k).

(B) *Basis.* If stock or securities traded on an established securities market are purchased by a cash basis taxpayer for nonfunctional currency, the basis of the stock or securities shall be determined by translating the units of nonfunctional currency paid into functional currency at the spot rate on the settlement date of the purchase.

(C) *Example.* The following example illustrates the provisions of this paragraph (a)(2)(iv).

Example. On November 1, 1989 (the trade date), X, a calendar year cash basis U.S. individual, purchases stock for £100 for settlement on November 5, 1989. On November 1, 1989, the spot value of the £100 is $140. On November 5, 1989, X purchases £100 for $141 which X uses to pay for the stock. X's basis in the stock is $141. On December 30, 1990 (the trade date), X sells the stock for £110 for settlement on January 5, 1991. On December 30, 1990, the spot value of £110 is $165. On January 5, 1991, X transfers the stock and receives £110 which, translated at the spot rate, equal $166. Under section 453(k), the stock is considered disposed of on December 30, 1990. The amount realized with respect to such disposition is the value of the £110 on January 5, 1991 ($166). Accordingly, X's gain realized on December 30, 1990, from the disposition of the stock is $25 ($166 amount realized less $141 basis). X's basis in the £110 received from the sale of the stock is $165.

(v) *Purchase and sale of stock or securities traded on an established securities market by accrual basis taxpayer.* For taxable years beginning after March 17, 1992, an accrual basis taxpayer may elect to apply the rules of paragraph (a)(2)(iv) of this section. The election shall be made by filing a statement with the taxpayer's first return in which the election is effective clearly indicating that the election has been made. A method so elected must be applied consistently from year to year and cannot be changed without the consent of the Commissioner.

(b) *Translation of interest income or expense and determination of exchange gain or loss with respect to debt instruments*—(1) *Translation of interest income received with respect to a nonfunctional currency demand account.* Interest income received with respect to a demand account with a bank or other financial institution which is denominated in (or the payments of which are determined by reference to) a nonfunctional currency shall be translated into functional currency at the spot rate on the date received or accrued or pursuant to any reasonable spot rate convention consistently applied by the taxpayer to all taxable years and to all accounts denominated in nonfunctional currency in the same financial institution. For example, a taxpayer may translate interest income received with respect to a demand account on the last day of each month of the taxable year, on the last day of each quarter of the taxable year, on the last day of each half of the taxable year, or on the last day of the taxable year. No exchange gain or loss is realized upon the receipt or accrual of interest income with respect to a demand account subject to this paragraph (b)(1).

(2) *Translation of nonfunctional currency interest income or expense received or paid with respect to a debt instrument described in § 1.988–1(a)(1)(ii) and (2)(i)*—(i) *Scope*—(A) *In general.* Paragraph (b) of this section only applies to debt instruments described in § 1.988–1(a) (1)(ii) and (2)(i) where all payments are denominated in, or determined with reference to, a single nonfunctional currency. Except as provided in paragraph (b)(2)(i)(B) of this section, this paragraph (b) shall not apply to contingent payment debt instruments.

(B) *Nonfunctional currency contingent payment debt instruments*—(*1*) *Operative rules.* [Reserved]

(*2*) *Certain instruments are not contingent payment debt instruments.* For purposes of section 1275(d), a debt instrument denominated in, or all payments of which are determined with reference to, a single nonfunctional currency (with no contingencies) is not a contingent payment debt instrument. See § 1.988–1(a) (4) and (5) for the treatment of dual currency and multi-currency debt instruments.

(ii) *Determination and translation of interest income or expense*—(A) *In general.* Interest income or expense on a debt instrument described in paragraph (b)(2)(i) of this section (including original issue discount determined in accordance with sections 1271 through 1275 and 163(e) as adjusted for acquisition premium under section 1272(a)(7), and acquisition discount determined in accordance with sections 1281 through 1283) shall be determined in units of nonfunctional currency and translated into functional currency as provided in paragraphs (b)(2)(ii) (B) and (C) of this section. For purposes of sections 483, 1273(b)(5) and 1274, the nonfunctional currency in which an instrument is denominated (or by reference to which payments are determined) shall be considered money.

(B) *Translation of interest income or expense that is not required to be accrued prior to receipt or payment.* With respect to an instrument described in paragraph (b)(2)(i) of this section, interest income or expense received or paid that is not required to be accrued by the taxpayer prior to receipt or payment shall be translated at the spot rate on the date of receipt or payment. No exchange gain or loss is realized with respect to the receipt or payment of such interest income or expense (other than the exchange gain or loss that might be realized under paragraph (a) of this section upon the disposition of the nonfunctional currency so received or paid).

(C) *Translation of interest income or expense that is required to be accrued prior to receipt or payment.* With respect to an instrument described in paragraph (b)(2)(i) of this section, interest income or expense that is required to be accrued prior to receipt or payment (*e.g.*, under section 1272, 1281 or 163(e) or because the taxpayer uses an accrual method of accounting) shall be translated at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the interest accrual period or, with respect to an interest accrual period that spans two taxable years, at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the partial period within the taxable year. See paragraphs (b) (3) and (4) of this section for the determination of exchange gain or loss on the receipt or payment of accrued interest income or expense.

(iii) *Determination of average rate or other accrual convention*—(A) *In general.* For purposes of this paragraph (b), the average rate for an accrual period (or partial period) shall be a

simple average of the spot exchange rates for each business day of such period or other average exchange rate for the period reasonably derived and consistently applied by the taxpayer.

(B) *Election to use spot accrual convention.* For taxable years beginning after March 17, 1992, a taxpayer may elect to translate interest income and expense at the spot rate on the last day of the interest accrual period (and in the case of a partial accrual period, the spot rate on the last day of the taxable year). If the last day of the interest accrual period is within five business days of the date of receipt or payment, the taxpayer may translate interest income or expense at the spot rate on the date of receipt or payment. The election shall be made by filing a statement with the taxpayer's first return in which the election is effective clearly indicating that the election has been made. A method so elected must be applied consistently to all debt instruments from year to year and cannot be changed without the consent of the Commissioner.

(3) *Exchange gain or loss recognized by the holder with respect to accrued interest income.* The holder of a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to accrued interest income on the date such accrued interest income is received or the instrument is disposed of (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to accrued interest income shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized with respect to accrued interest income is determined for each accrual period by—

(i) Translating the units of nonfunctional currency interest income received with respect to such accrual period (as determined under the ordering rules of paragraph (b)(7) of this section) into functional currency at the spot rate on the date the interest income is received or the instrument is disposed of (or deemed disposed of), and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency interest income accrued with respect to such income received at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for the accrual period.

(4) *Exchange gain or loss recognized by the obligor with respect to accrued interest expense.* The obligor under a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to accrued interest expense on the date such accrued interest expense is paid or the obligation to make payments is transferred or extinguished (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to accrued interest expense shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized with respect to accrued interest expense is determined for each accrual period by—

(i) Translating the units of nonfunctional currency interest expense accrued with respect to the amount of interest paid into functional currency at the average rate (or other rate specified in paragraph (b)(2)(iii)(B) of this section) for such accrual period; and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency interest paid (or, if the obligation to make payments is extinguished or transferred, the units accrued) with respect to such accrual period (as determined under the ordering rules in paragraph (b)(7) of this section) into functional currency at the spot rate on the date payment is made or the obligation is transferred or extinguished (or deemed extinguished).

(5) *Exchange gain or loss recognized by the holder of a debt instrument with respect to principal.* The holder of a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to the principal amount of such instrument on the date principal (determined under the ordering rules of paragraph (b)(7) of this section) is received from the obligor or the instrument is disposed of (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). For purposes of computing exchange gain or loss, the principal amount of a debt instrument is the holder's purchase price in units of nonfunctional currency. See paragraph (b)(10) of this section for rules regarding the amortization of that part of the principal amount that represents bond premium and the computation of exchange gain or loss thereon. If, however, the holder acquired the instrument in a transaction in which exchange gain or loss was realized but not recognized by the transferor, the nonfunctional currency principal amount of the instrument with respect to the holder shall be the same as that of the transferor. Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to such principal amount shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized by the holder with respect to principal is determined by—

(i) Translating the units of nonfunctional currency principal at the spot rate on the date payment is received or the instrument is disposed of (or deemed disposed of); and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency principal at the spot rate on the date the holder (or a transferor from whom the nonfunctional principal amount is carried over) acquired the instrument (is deemed to acquire the instrument).

(6) *Exchange gain or loss recognized by the obligor of a debt instrument with respect to principal.* The obligor under a debt instrument described in paragraph (b)(2)(i) of this section shall realize exchange gain or loss with respect to the principal amount of such instrument on the date principal (determined under the ordering rules of paragraph (b)(7) of this section) is paid or the obligation to make payments is transferred or extinguished (including a deemed disposition under section 1001 that results from a material change in terms of the instrument). For purposes of computing exchange gain or loss, the principal amount of a debt instrument is the amount received by the obligor for the debt instrument in units of nonfunctional currency. See paragraph (b)(10) of this section for rules regarding the amortization of that part of the principal amount that represents bond premium and the computation of exchange gain or loss thereon. If, however, the obligor became the obligor in a transaction in which exchange gain or loss was realized but not recognized by the transferor, the nonfunctional currency principal amount of the instrument with respect to such obligor shall be the same as that of the transferor. Except as otherwise provided in this paragraph (b) (*e.g.*, paragraph (b)(8) of this section), exchange gain or loss realized with respect to such principal shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. The amount of exchange gain or loss so realized by the obligor is determined by—

(i) Translating the units of nonfunctional currency principal at the spot rate on the date the obligor (or a transferor from whom the principal amount is carried over) became the obligor (or is deemed to have become the obligor); and

(ii) Subtracting from such amount the amount computed by translating the units of nonfunctional currency principal at the spot rate on the date payment is made or the obligation is transferred or extinguished (or deemed extinguished).

(7) *Payment ordering rules*—(i) *Debt instruments subject to the rules of sections 163(e), or 1271 through 1288.* In the case of a debt instrument described in paragraph (b)(2)(i) of this section that is subject to the rules of sections 163(e), or 1272 through 1288, units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) received or paid with respect to such debt instrument shall be treated first as a receipt or payment of periodic interest under the principles of section 1273 and the regulations thereunder, second as a receipt or payment of original issue discount to the extent accrued as of the date of the receipt or payment, and finally as a receipt or payment of principal. Units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) treated as a receipt or payment of original issue discount under the preceding sentence are attributed to the earliest accrual period in which original issue discount has accrued and to which prior receipts or payments have not been attributed. No portion thereof shall be treated as prepaid interest. These rules are illustrated by *Example 10* of paragraph (b)(9) of this section.

(ii) *Other debt instruments.* In the case of a debt instrument described in paragraph (b)(2)(i) of this section that is not subject to the rules of section 163(e) or 1272 through 1288, whether units of nonfunctional currency (or an amount determined with reference to nonfunctional currency) received or paid with respect to such debt instrument are treated as interest or principal shall be determined under section 163 or other applicable section of the Code.

(8) *Limitation of exchange gain or loss on payment or disposition of a debt instrument.* When a debt instrument described in paragraph (b)(2)(i) of this section is paid or disposed of, or when the obligation to make payments thereunder is satisfied by another person, or extinguished or assumed by another person, exchange gain or loss is computed with respect to both principal and any accrued interest (including original issue discount), as provided in paragraph (b)(3) through (7) of this section. However, pursuant to section 988(b) (1) and (2), the sum of any exchange gain or loss with respect to the principal and interest of any such debt instrument shall be realized only to the extent of the total gain or loss realized on the transaction. The gain or loss realized shall be recognized in accordance with the general principles of the Code. See *Examples 3, 4* and *6* of paragraph (b)(9) of this section.

(9) *Examples.* The preceding provisions are illustrated in the following examples. The examples assume that any transaction involving an individual is a section 988 transaction.

Example 1. (i) X is an individual on the cash method of accounting with the dollar as his functional currency. On January 1, 1992, X converts $13,000 to 10,000 British pounds (£) at the spot rate of £1=$1.30 and loans the £10,000 to Y for 3 years. The terms of the loan provide that Y will make interest payments of £1,000 on December 31 of 1992, 1993, and 1994, and will repay X's £10,000 principal on December 31, 1994. Assume the spot rates for the pertinent dates are as follows:

Date	Spot rate (pounds to dollars)
Jan. 1, 1992	£1=$1.30
Dec. 31, 1992	£1=$1.35
Dec. 31, 1993	£1=$1.40
Dec. 31, 1994	£1=$1.45

(ii) Under paragraph (b)(2)(ii)(B) of this section, X will translate the £1,000 interest payments at the spot rate on the date received. Accordingly, X will have interest income of $1,350 in 1992, $1,400 in 1993, and $1,450 in 1994. Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of interest income.

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 principal amount determined by translating the £10,000 at the spot rate on the date it is received (£10,000×$1.45=$14,500) and subtracting from such amount, the amount determined by translating the £10,000 at the spot rate on the date the loan was made (£10,000×$1.30=$13,000). Accordingly, X will realize an exchange gain of $1,500 on the repayment of the loan on December 31, 1994.

Example 2. (i) Assume the same facts as in *Example 1* except that X is an accrual method taxpayer and that average rates are as follows:

Accrual period	Average rate (pounds to dollars)
1992	£1=$1.32
1993	£1=$1.37
1994	£1=$1.42

(ii) Under paragraph (b)(2)(ii)(C) of this section, X will accrue the £1,000 interest payments at the average rate for the accrual period. Accordingly, X will have interest income of $1,320 in 1992, $1,370 in 1993, and $1,420 in 1994. Because X is an accrual basis taxpayer, X determines exchange gain or loss for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting the amounts of interest income accrued for such period. Thus, X will realize $90 of exchange gain with respect to interest received under the loan, computed as follows:

Year	Spot value interest received	Accrued interest @ average rate	Exch. gain
1992	$1,350	$1,320	$30
1993	1,400	1,370	30
1994	1,450	1,420	30
Total			$90

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 loan principal determined in the same manner as in *Example 1*. Accordingly, X will realize an exchange gain of $1,500 on the repayment of the loan principal on December 31, 1994.

Example 3. Assume the same facts as in *Example 1* except that X is a calendar year taxpayer on the accrual method of accounting that elects to use a spot rate convention to translate interest income as provided in § 1.988–2(b)(2)(iii)(B). Interest income is received by X on the last day of each accrual period. Under paragraph (b)(2)(ii)(C), X will translate the interest income at the spot rate on the last day of each interest accrual period. Accordingly, X will have interest income of $1,350 in 1992, and $1,400 in 1993, $1,450 in 1994. Because the rate at which the interest income is translated is the same as the rate on the day of receipt, X will not realize any exchange gain or loss with respect to the interest income. Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £10,000 loan principal determined in the same manner as in *Example 1*. Accordingly, X will realize an exchange gain of $1,500 on the repayment of the loan principal on December 31, 1994.

Example 4. Assume the same facts as in *Example 1* except that on December 31, 1993, X sells Y's note for 9,821.13 British pounds (£) after the interest payment. Under paragraph (b)(6) of this section, X will compute exchange gain on the £10,000 principal. The exchange gain is $1,000 [(£10,000×$1.40)−(£10,000×$1.30)]. This exchange gain, however, is only realized to the extent of the total gain on the disposition. X's total gain is

$749.58 [(£9,821.13×$1.40)−(£10,000×$1.30)]. Thus, X will realize $749.58 of exchange gain (and will realize no market loss).

Example 5. (i) The facts are the same as in *Example 1* except that Y becomes insolvent and fails to repay the full £10,000 principal when due. Instead, X and Y agree to compromise the debt for a payment of £8,000 on December 31, 1994. Under paragraph (b)(8) of this section, X will compute exchange gain on the £10,000 originally booked. The exchange gain is $1,500 [(£10,000×$1.45)−(£10,000×$1.30)=$1,500]. This exchange gain, however, is only realized to the extent of the total gain on the disposition. X realizes an overall loss on the disposition of $1,400 [(£8,000×$1.45)−(£10,000×$1.30)=($1,400)]. Thus, X will realize no exchange gain (and a $1400 market loss).

(ii) If the exchange rate on December 31, 1994, were £1=$1.25, rather than £1=$1.45, X would compute exchange loss under paragraph (b)(8) of this section, on the £10,000 originally booked. The exchange loss would be $500 [(£10,000×$1.25)−(£10,000×$1.30)=($500)]. X's total loss on the disposition would be $3,000 [(£8,000×$1.25)−(£10,000×$1.30)=($3,000)]. Thus, X would realize $500 of exchange loss and a $2,500 market loss on the disposition.

Example 6. (i) X is an individual with the dollar as his functional currency. X is on the cash method of accounting. On January 1, 1989, X borrows 10,000 British pounds (£) from Y, an unrelated person. The terms of the loan provide that X will make interest payments of £1,200 on December 31 of 1989 and 1990 and will repay Y's £10,000 principal on December 31, 1990. The spot rates for the pertinent dates are as follows:

Date	Spot rate [1]
Jan. 1, 1989	1=$1.50
Dec. 31, 1989	1=1.60
Dec. 31, 1990	1=1.70

[1] Pounds to dollars.

Assume that the basis of the £1,200 paid as interest by X on December 31, 1989 is $2,000, the basis of the £1,200 paid as interest by X on December 31, 1990, is $2,020 and the basis of the £10,000 principal paid by X on December 31, 1990 is $16,000.

(ii) Under paragraph (b)(2)(ii)(B) of this section, X translates the £1,200 interest payments at the spot rate on the day paid. Thus, X paid $1,920 (£1,200×$1.60) of interest on December 31, 1989 and $2,040 (£1,200×$1.70) of interest on December 31, 1990. In addition, X will realize exchange gain or loss on the disposition of the £1,200 on December 31, 1989 and 1990, under paragraph (a) of this section. Pursuant to paragraph (a)(2) of this section, X will realize an exchange loss of $80 [(£1,200×$1.60)−$2,000] on December 31, 1989 and exchange gain of $20 [(£1,200×$1.70)−$2,020] on December 31, 1990.

(iii) Under paragraph (b)(6) of this section, X will realize exchange loss on December 31, 1990 upon repayment of the £10,000 principal amount determined by translating the £10,000 received at the spot rate on January 1, 1989 (£10,000×$1.50=$15,000) and subtracting from such amount, the amount determined by translating the £10,000 paid at the spot rate on December 31, 1990 (£10,000×$1.70=$17,000). Thus, under paragraph (b)(6) of this section, X has an exchange loss with respect to the £10,000 principal of $2,000. Further, under paragraph (a)(2) of this section, X will realize an exchange gain upon disposition of the £10,000 on December 31, 1990. Under paragraph (a)(2) of this section, X will subtract his adjusted basis in the £10,000 ($16,000) from the amount realized upon the disposition of the £10,000 (£10,000×$1.70=$17,000) resulting in a gain of $1,000. Accordingly, X's combined exchange gain and loss realized on December 31, 1990 with respect to the repayment of the £10,000 is a $1,000 exchange loss.

Example 7. (i) X is a calendar year corporation on the accrual method of accounting and with the dollar as its functional currency. On January 1, 1989, X purchases at original issue for 82.64 Canadian dollars (C$) M corporation's 2 year note maturing on December 31, 1990, at a stated redemption price of C$100. The yield to maturity in Canadian dollars is 10 percent and the accrual period is the one year period beginning January 1 and ending December 31. The note has C$17.36 of original issue discount. Assume that the spot rates are as follows: C$1=U.S.$.72 on January 1, 1989; C$1=U.S.$.80 on January 1, 1990; C$1=U.S.$.82 on December 31, 1990. Assume further that the average rate for 1989 is C$1=U.S.$.76 and for 1990 is C$1=U.S.$.81.

(ii) Under paragraph (b)(2)(ii)(A) of this section, X will determine its interest income in Canadian dollars. Accordingly, under section 1272, X must take into account original issue discount in the amount of C$8.26 on December 31, 1989 and C$9.10 on December 31, 1990. Pursuant to paragraph (b)(2)(ii)(C) of this section, X will translate these amounts into U.S. dollars at the average exchange rate for the relevant accrual period. Thus, the amount of interest income taken into account in 1989 is U.S.$6.28 (C$8.26×U.S.$.76) and in 1990 is U.S.$7.37 (C$9.10×U.S.$.81). Pursuant to paragraph (b)(3)(ii) of this section, X will realize exchange gain or loss with respect to the accrued interest determined for each accrual period by translating the Canadian dollars received with respect to such accrual period into U.S. dollars at the spot rate on the date the interest is received and subtracting from that amount the amount accrued in U.S. dollars. Thus, the amount of exchange gain realized on December 31, 1990, is U.S.$.58 (U.S.$.49 from 1989+U.S.$.09 from 1990). Pursuant to paragraph (b)(5) of this section, X shall realize exchange gain or loss with respect to the principal (C$82.64) on December 31, 1990, computed by translating the C$82.64 at the spot rate on December 31, 1990 (U.S.$67.76) and subtracting the C$82.64 translated at the spot rate on January 1, 1989 (U.S.$59.50) for an exchange gain of U.S.$8.26. Thus, X's combined exchange gain is U.S.$8.84 (U.S.$.49+U.S.$.09+U.S.$8.26).

(iii) Assume instead that on January 1, 1990, X sells the note for C$86.95, which it immediately converts to U.S. dollars. X's exchange gain is computed under paragraph (b)(8) of this section with reference to the nonfunctional currency denominated principal amount (C$82.64) and the nonfunctional currency denominated accrued original issue discount (C$8.26). X will compute an exchange gain of U.S.$6.01 with respect to the issue price [(C$82.64×U.S.$.80)−(C$82.64×U.S.$.72)] and an exchange gain of U.S.$.33 with respect to the accrued original issue discount [(C$8.26×U.S.$.80)−(C$8.26×U.S.$.76)]. Accordingly, prior to the application of paragraph (b)(8) of this section, X's total exchange gain is U.S.$6.94 (U.S.$6.01+U.S.$.33), and X's market loss is U.S.$3.16 [(C$90.90−C$86.95)×U.S.$.80]. Pursuant to paragraph (b)(8) of this section, however, X's market loss on the note of U.S.$3.16 is netted against X's exchange gain of U.S.$6.94, resulting in a realized exchange gain of U.S.$3.78 and no market loss.

Example 8. (i) The facts are the same as in *Example 7* (i) except that on January 1, 1990, X contributes the M corporation note to Y, a wholly-owned U.S. subsidiary of X with the dollar as its functional currency, and Y collects C$100 from M corporation at maturity on December 31, 1990, when the spot rate is C$1=U.S.$.82. The transfer of the note from X to Y qualifies for nonrecognition of gain under section 351(a). On December 31, 1990, Y includes C$9.10 of accrued interest in income which translated at the average exchange rate of C$1=U.S.$.81 for the year results in U.S.$7.37 of interest income.

(ii) Y's exchange gain is computed under paragraph (b)(3) of this section with respect to accrued interest income and paragraph (b)(5) of this section with respect to the nonfunctional currency principal amount. Under paragraph (b)(3) of this section, Y will realize exchange gain or loss for each accrual period computed by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the day received and subtracting the amounts of interest income accrued for such period. Thus, Y will realize $.49 of exchange gain with respect to original issue discount accrued in 1989 [(C$8.26×U.S.$.82)−(C$8.26×U.S.$.76)=U.S.$.49] and $.09 of exchange gain with respect to original issue discount accrued in 1990 [(C$9.10×U.S.$.82)−(C$9.10×U.S.$.81)=$.09].

(iii) Pursuant to paragraph (b)(5) of this section, the nonfunctional currency principal amount of the M bond in the hands of Y is C$82.64, the amount carried over from X, the transferor. Y's exchange gain with respect to the nonfunctional currency principal amount is $8.26 [(C$82.64×U.S.$.82)−(C$82.64×U.S.$.72)=U.S.$8.26]. Accordingly, Y's combined exchange gain is U.S.$8.84 ($.49+$.09+$8.26). Because the amount realized in Canadian dollars equals the adjusted issue price (C$100) on retirement of the M note, there is no market loss, and the netting rule of paragraph (b)(8) of this section does not limit realization of the exchange gain.

Example 9. (i) X is a calendar year corporation on the accrual method of accounting and with the dollar as its functional currency. X elects to use the spot rate convention to translate interest income as provided in paragraph (b)(2)(iii)(B) of this section. On January 31, 1992, X loans £1000 to Y, an unrelated person. Under the terms of the loan, Y will pay X interest of £50 on July 31, 1992, and January 31, 1993, and will repay the £1000 principal on January 31, 1993. Assume the following spot exchange rates:

Date	Spot rate [1]
Jan. 31, 1992	£1=$1.50
July 31, 1992	£1=1.55
Dec. 31, 1992	£1=1.60
Jan. 31, 1993	£1=1.61

[1] Pounds to dollars.

(ii) Under paragraph (b)(2)(ii)(C) of this section, X will translate the interest income at the spot rate on the last day of each interest accrual period (and in the case of a partial accrual period, at the spot rate on the last day of the taxable year). Accordingly, X will have interest income of $77.50 (£50×$1.55) on July 31, 1992. Assuming under X's method of accounting that interest is accrued daily, X will accrue $86.50 (153/184×£50)×$1.60) of interest income on December 31, 1992. On January 31, 1993, X will have interest income of $13.60 ((31/184×£50)×$1.61). Because the rate at which the interest income is translated is the same as the rate on the day of receipt, X will not realize any exchange gain or loss with respect to the interest income received on July 31, 1992. However, X will realize exchange gain on the £41.50 (153/184×£50) of accrued interest income of $.41 [(£41.50×$1.61)−(£41.50×$1.60)=$.41].

(iii) Under paragraph (b)(5) of this section, X will realize exchange gain upon repayment of the £100 principal amount determined by translating the £100 at the spot rate on the date it is received (£100×$1.61=$161.00) and subtracting from such amount, the amount determined by translating the £100 at the spot rate on the date the loan was made (£100×$1.50=$150.00). Accordingly, X will realize an exchange gain of $11 on the repayment of the loan on January 31, 1993.

Example 10. (i) X, a cash basis taxpayer with the dollar as its functional currency, has the calendar year as its taxable year. On January 1, 1992, X purchases at original issue for 65.88 British pounds (£) M corporation's 5-year bond maturing on December 31, 1996, having a stated redemption price at maturity of £100. The bond provides for annual payments of interest in pounds of 1 pound per year on December 31 of each year. The bond has 34.12 British pounds of original issue discount. The yield to maturity is 10 percent in British pounds and the accrual period is the one year period beginning January 1 and ending December 31 of each calendar year. The amount of original issue discount is determined in pounds for each accrual period by multiplying the adjusted issue price expressed in pounds by the yield and subtracting from such amount the periodic interest payments expressed in pounds for such period. The periodic interest payments are translated at the spot rate on the payment date (December 31 of each year). The original issue discount is translated at the average rate for the accrual period (January 1 through December 31). The following chart describes the determination of interest income with respect to the facts presented and provides other pertinent information.

TABLE 1

Year (Dec. 31)	Periodic interest payments in pounds for the accrual period	Original issue discount in pounds for the accrual period	Issue price or adjusted issue price in pounds	Assumed spot rate on Dec. 31 (pounds to dollars)	Assumed average rate for accrual period (pounds to dollars)	Periodic interest payments in pounds multiplied by spot rate on the date of payment (column 2 times column 5)	Original issue discount in pounds multiplied by the average rate for the accrual period (column 3 times column 6)	Total interest income in dollars (column 7 plus column 8)	Adjusted issue price in dollars
1	2	3	4	5	6	7	8	9	10
Issue Date:			65.88	1=$1.20					$79.06
1992	1	5.59	71.47	1=1.30	1=$1.25	$1.30	$6.99	$8.29	86.05
1993	1	6.15	77.62	1=1.40	1=1.35	1.40	8.30	9.70	94.35
1994	1	6.76	84.38	1=1.50	1=1.45	1.50	9.80	11.30	104.15
1995	1	7.44	91.82	1=1.60	1=1.55	1.60	11.53	13.13	115.68
1996	1	8.18	100.00	1=1.70	1=1.65	1.70	13.50	15.20	129.18

(ii) Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of the £1 periodic interest payments. However, X will realize exchange gain on December 31, 1996 totaling $7.88 with respect to the original issue discount. Exchange gain is determined for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting from such amount, the amount computed by translating the units of nonfunctional currency interest income accrued for such period at the average rate for the period. The following chart illustrates this computation:

TABLE 2

Year	OID accrued in pounds for each accrual period	Assumed spot rate on date payment received (pounds to dollars)	Interest received times spot rate on the date received (col. 2 times col. 3)	Assumed average rate for accrual period (pounds to dollars)	100 in pounds times the average rate for the accrual period (col. 2 times col. 5)	Exchange gain or loss (col. 4 less col. 6)
1	2	3	4	5	6	7
1992	5.59	1=$1.70	$9.50	1=$1.25	$6.99	$2.51
1993	6.15	1=1.70	10.46	1=1.35	8.30	2.16
1994	6.76	1=1.70	11.49	1=1.45	9.80	1.69
1995	7.44	1=1.70	12.65	1=1.55	11.53	1.12
1996	8.18	1=1.70	13.90	1=1.65	13.50	.40

TABLE 2—Continued

Year	OID accrued in pounds for each accrual period	Assumed spot rate on date payment received (pounds to dollars)	Interest received times spot rate on the date received (col. 2 times col. 3)	Assumed average rate for accrual period (pounds to dollars)	IOD in pounds times the average rate for the accrual period (col. 2 times col. 5)	Exchange gain or loss (col. 4 less col. 6)
1	2	3	4	5	6	7
Total						$7.66

(iii) X will also realize exchange gain with respect to the principal of the loan (*i.e.*, the issue price of 65.88 British pounds) on December 31, 1996 computed by translating the units of nonfunctional currency principal received at the spot rate on the date principal is received (65.88 British pounds × $1.70=$112.00) and subtracting from such amount, the units of nonfunctional currency principal received translated at the spot rate on the date the instrument was acquired (65.88 British pounds × $1.20=$79.06). Accordingly, X's exchange gain on the principal is $32.94 and X's total exchange gain with respect to the accrued interest and principal is $40.82. It should be noted that, under this fact pattern, the total exchange gain may be determined in an alternative fashion. Exchange gain may be computed by subtracting the adjusted issue price in dollars at maturity ($129.16—see column 10 of Table 1) from the amount computed by multiplying the stated redemption price at maturity in pounds times the spot rate on the maturity date (£100×$1.70=$170), which equals $40.82.

Example 11. (i) The facts are the same as in *Example 10* except that X makes an election under paragraph (b)(2)(iii) of this section to translate accrued interest on the last day of the accrual period. Accordingly, columns 8, 9 and 10 in Table 1 would change as follows:

Year (Dec. 31)	Original issue discount in pounds multiplied by the spot rate on last day of accrual period (Dec. 31)	Total interest income in dollars (column 7 plus column 8)	Adjusted issue price in dollars
1	8	9	10	
			$79.06
1992	$7.27	$8.57	87.63
1993	8.61	10.01	97.64
1994	10.14	11.64	109.28
1995	11.90	13.50	122.78
1996	13.91	15.61	138.39

(ii) Because X is a cash basis taxpayer, X does not realize exchange gain or loss on the receipt of the £1 periodic interest payments. However, X will realize exchange gain on December 31, 1993 totaling $6.18 with respect to the original issue discount. Exchange gain is determined for each interest accrual period by translating the units of nonfunctional currency interest income received with respect to such accrual period at the spot rate on the date received and subtracting from such amount, the amount computed by translating the units of nonfunctional currency interest income accrued for such period at the spot rate on the last day of the accrual period. Accordingly, columns 5, 6 and 7 of Table 2 would change as follows:

Year	Spot rate on last day of accrual period	OID in pounds times the spot rate on the last day of the accrual period (col 2 times col. 3)	Exchange gain or loss (col. 4 less col. 6)
1	5	6	7
1992	$1.30	$7.27	$2.23
1993	1.40	8.61	1.85
1994	1.50	10.14	1.35
1995	1.60	11.90	0.75
1996	1.70	13.90	0.00
			6.18

(iii) X will realize exchange gain with respect to the principal amount of the loan as provided in the preceding example.

Example 12. (i) C is a corporation that is a calendar year accrual method taxpayer with the dollar as its functional currency. On January 1, 1989, C lends 100 British pounds (£) in exchange for a note under the terms of which C will receive two equal payments of £57.62 on December 31, 1989, and December 31, 1990. Each payment of £57.62 represents the annual payment necessary to amortize the £100 principal amount at a rate of 10% compounded annually over a two year period. The following tables reflect the amounts of principal and interest that compose each payment and assumptions as to the relevant exchange rates:

Date	Principal	Interest
Dec. 31, 1989	£47.62	£10.00
Dec. 12, 1990	£52.38	£5.24

Date	Spot rate £1=	Average rate for year ending
Jan. 1, 1989	$1.30	
Dec. 31, 1989	1.40	1.35
Dec. 31, 1990	1.50	1.45

(ii) Because each interest payment is equal to the product of the outstanding principal balance of the obligation and a single fixed rate of interest, each stated interest payment constitutes periodic interest under the principles of section 1273. Accordingly, there is no original issue discount.

(iii) Because C is an accrual basis taxpayer, C will translate the interest income at the average rate for the annual accrual period pursuant to paragraph (b)(2)(ii)(C) of this section. Thus, C's interest income is $13.50 (£10.00×$1.35) in 1989, and $7.60 (£5.24×$1.45) in 1990. C will realize exchange gain or loss upon receipt of accrued interest computed in accordance with paragraph (b)(3) of this section. Thus, C will realize exchange gain in the amount of $.50 [(£10.00×$1.40)−$13.50] in 1989, and $.26 [(£5.24×$1.50)−$7.60] in 1990.

(iv) In addition, C will realize exchange gain or loss upon the receipt of principal each year computed under paragraph (b)(5) of this section. Thus, C will realize exchange gain in the amount of $4.76 [(£47.62×$1.40)−(£47.62×$1.30)] in 1989, and $10.48 [(£52.38×$1.50)−(£52.38×$1.30)] in 1990.

(10) *Treatment of bond premium*—(i) *In general.* Amortizable bond premium on a bond described in paragraph (b)(2)(i) of this section shall be computed in the units of nonfunctional currency in which the bond is denominated (or in which the payments are determined). Amortizable bond premium properly taken into account under section 171 or § 1.61–12 (or the successor provision thereof) shall reduce interest income or expense in units of nonfunctional currency. Exchange gain or loss is realized with respect to bond premium described in the preceding sentence by treating the portion of premium amortized with respect to any period as a return of principal. With respect to a holder that does not elect to amortize bond premium under section 171, the amount of bond premium will constitute a market loss when the bond matures. See paragraph (b)(8) of this section. The principles set forth in this paragraph (b)(10) shall apply to determine the treatment of acquisition premium described in section 1272(a)(7).

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(10).

Example. (A) X is an individual on the cash method of accounting with the dollar as his functional currency. On January 1, 1989, X purchases Y corporation's note for 107.99 British pounds (£) from Z, an unrelated party. The note has an issue price of £100, a stated redemption price at maturity of £100, pays interest in pounds at the rate of 10% compounded annually, and matures on December 31, 1993. X elects to amortize the bond premium of £7.99 under the rules of section 171. Pursuant to paragraph (b)(10)(i) of this section, bond premium is determined and amortized in British pounds. Assume the amortization schedule is as follows:

Year ending 12/31	Bond premium amortized	Unamortized premium plus principal	Interest
		£107.99	
1989	£1.36	£106.63	£8.64
1990	£1.47	£105.16	£8.53
1991	£1.59	£103.57	£8.41
1992	£1.71	£101.86	£8.29
1993	£1.85	£100.00	£8.15

(B) The bond premium reduces X's pound interest income under the note. For example, the £10 stated interest payment made in 1989 is reduced by £1.36 of bond premium, and the resulting £8.64 interest income is translated into dollars at the spot rate on December 31, 1989. Exchange gain or loss is realized on the £1.36 bond premium based on the difference between the spot rates on January 1, 1989, the date the premium is paid to acquire the bond, and December 31, 1989, the date the bond premium is returned as part of the stated interest. The £1.36 bond premium reduces the unamortized premium plus principal to £106.63 (£107.99−£1.36). On December 31, 1993, when the bond matures and the £7.99 of bond premium has been fully amortized, X will realize exchange gain or loss with respect to the remaining purchase price of £100.

(11) *Market discount*—(i) *In general.* Market discount as defined in section 1278(a)(2) shall be determined in units of nonfunctional currency in which the market discount bond is denominated (or in which the payments are determined). Accrued market discount (other than market discount currently included in income pursuant to section 1278(b)) shall be translated into functional currency at the spot rate on the date the market discount bond is disposed of. No part of such accrued market discount is treated as exchange gain or loss. Accrued market discount currently includible in income pursuant to section 1278(b) shall be translated into functional currency at the average exchange rate for the accrual period. Exchange gain or loss with respect to accrued market discount currently includible in income under section 1278(b) shall be determined in accordance with paragraph (b)(3) of this section relating to accrued interest income.

(ii) *Example.* The following example illustrates the provisions of this paragraph (b)(11).

Example. (A) X is a calendar year corporation with the U.S. dollar as its functional currency. On January 1, 1990, X purchases a bond of M corporation for 96,530 British pounds (£). The bond, which was issued on January 1, 1989, has an issue price of £100,000, a stated redemption price at maturity of £100,000, and provides for annual pound payments of interest at 8 percent. The bond matures on December 31, 1991. X purchased the bond at a market discount of 3,470 pounds and did not elect to include the market discount currently in income under section 1278(b). X holds the bond to maturity and on December 31, 1991, receives payment of £100,000 (plus £8,000 interest) when the exchange rate is £1=$1.50.

(B) Pursuant to paragraph (b)(11) of this section, X computes market discount in units of nonfunctional currency. Thus, the market discount as defined under section 1278(a)(2) is £3,470. Accrued market discount (other than market discount currently included in income pursuant to section 1278(b)) is translated at the spot rate on the date the market discount bond is disposed of. Accordingly, X will translate the accrued market discount of £3,470 at the spot rate on December 31, 1991 (£3,470×$1.50=$5,205). No exchange gain or loss is realized with respect to the £3,470 of accrued market discount. See paragraphs (b) (3) and (5) of this section for the realization and recognition of exchange gain or loss with respect to accrued interest and principal.

(12) *Tax exempt bonds.* See § 1.988–3(c)(2), which characterizes exchange loss realized with respect to a nonfunctional currency tax exempt bond as a reduction of interest income.

(13) *Nonfunctional currency debt exchanged for stock of obligor*—(i) *In general.* Notwithstanding any other section of the Code other than section 267, 1091 or 1092, exchange gain or loss shall be realized and recognized by the holder and the obligor in accordance with the rules of paragraphs (b) (3) through (7) of this section with respect to the principal and accrued interest of a debt instrument described in paragraph (b)(2)(i) of this section that is acquired by the obligor in exchange for its stock, provided however, that such gain or loss shall be recognized only to the extent of the total gain or loss on the exchange (regardless of whether such gain or loss would otherwise be recognized). This rule shall apply whether the debt instrument is converted into stock according to its terms or exchanged pursuant to a separate agreement between the obligor and the holder. A debt instrument that is acquired by the obligor from a shareholder as a contribution to capital shall be treated for purposes of this section as exchanged for stock, whether or not additional stock is issued.

(ii) *Coordination with section 108.* Section 988 and this section shall apply before section 108. Exchange gain realized by the obligor on an exchange described in paragraph (b)(13)(i) of this section shall not be treated as discharge of indebtedness income, but shall be considered to reduce the amount of the liability for purposes of computing the obligor's income on the exchange under section 108(e)(4), section 108(e)(6) or section 108(e)(10).

(iii) *Effective date.* This paragraph (b)(13) shall be effective for exchanges of debt for stock effected after September 21, 1989.

(iv) *Examples.* The following examples illustrate the operation of this paragraph (b)(13). In each such example, assume that sections 267, 1091 and 1092 do not apply.

Example 1. (i) X is a calendar year U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1990 (the issue date), X acquired a convertible bond maturing on December 31, 1998, issued by Y corporation, a U.K. corporation with the British pound (£) as its functional currency. The issue price of the bond is £100,000, the stated redemption price at maturity is £100,000, and the bond provides for annual pound interest payments at the rate of 10%. The terms of the bond also provide that at any time prior to December 31, 1996, the holder may surrender all of his interest in the bond in exchange for 20 shares of Y common stock. On January 1, 1994, X surrenders his interest in the bond for 20 shares of Y common stock. Assume the following: (a) The spot rate on January 1, 1990, is £1=$1.30. (b) The spot rate on January 1, 1994, is £1=$1.50, and (c) The 20 shares of Y common stock have a market value of £200,000 on January 1, 1994.

(ii) Pursuant to paragraph (b)(13) of this section, X will realize and recognize exchange gain with respect to the issue price (£100,000) of the bond on January 1, 1994, when the bond is converted to stock. X will compute exchange gain pursuant to paragraph (b)(5) of this section by translating the issue price at the spot rate on the conversion date (£100,000×$1.50 = $150,000) and subtracting from such amount the issue price translated at the spot rate on the date X acquired the bond (£100,000×$1.30= $130,000). Thus, X will realize and recognize $20,000 of exchange gain. X's basis in the 20 shares of Y common stock is $150,000 ($130,000 substituted basis + $20,000 recognized gain).

Example 2. (i) X, a foreign corporation with the British pound (£) as its functional currency, lends £100 at a market rate of interest to Y, its wholly-owned U.S. subsidiary, on January 1, 1990, on which date

the spot exchange rate is £1=$1. Y's functional currency is the U.S. dollar. On January 1, 1992, when the spot exchange rate is £1=$.50, X cancels the debt as a contribution to capital. Pursuant to paragraph (b)(13) of this section, Y will realize and recognize exchange gain with respect to the £100 issue price of the debt instrument on January 1, 1992. Y will compute exchange gain pursuant to paragraph (b)(6) of this section by translating the issue price at the spot rate on the date Y became the obligor (£100×$1=$100) and subtracting from such amount the issue price translated at the spot rate on the date of extinguishment (£100×$.50=$50). Thus, Y will realize and recognize $50 of exchange gain.

(ii) Under section 108(e)(6), on the acquisition of its indebtedness from X as a contribution to capital Y is treated as having satisfied the debt with an amount of money equal to X's adjusted basis in the debt (£100). For purposes of section 108(e)(6), X's adjusted basis is translated into United States dollars at the spot rate on the date Y acquires the debt (£1=$.50). Therefore, Y is treated as having satisfied the debt for $50. Pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the exchange gain from $100 to $50. Accordingly, Y recognizes $50 of exchange gain and no discharge of indebtedness income on the extinguishment of its debt to X.

(iii) If X were a United States taxpayer with a dollar functional currency and a $100 basis in Y's obligation, X would realize and recognize an exchange loss of $50 under paragraph (b)(5) of this section on the contribution of the debt to Y. The recognized loss would reduce X's adjusted basis in the debt from $100 to $50, so that for purposes of applying section 108(e)(6) Y is treated as having satisfied the debt for $50. Accordingly, under these facts as well Y would recognize $50 of exchange gain and no discharge of indebtedness income.

Example 3. (i) X and Y are unrelated calendar year U.S. corporations with the U.S. dollar as their functional currency. On January 1, 1990 (the issue date), X acquires Y's bond maturing on December 31, 1999. The issue price of the bond is £100,000, the stated redemption price at maturity is £100,000, and the bond provides for annual pound interest payments at the rate of 10%. On January 1, 1994, X and Y agree that Y will redeem its bond from X in exchange for 20 shares of Y common stock. Assume the following:

(a) The spot rate on January 1, 1990, is £1=$1.00,

(b) The spot rate on January 1, 1994, is £1=$.50,

(c) Interest rates on equivalent bonds have increased so that as of January 1, 1994, the value of Y's bond has declined to £90,000, and

(d) The 20 shares of Y common stock have a market value of £90,000 as of January 1, 1994.

(ii) Pursuant to paragraph (b)(13) of this section, X will realize and recognize exchange loss with respect to the issue price (£100,000) of the bond on January 1, 1994, when the bond is exchanged for stock. X will compute exchange loss pursuant to paragraph (b)(5) of this section by translating the issue price at the spot rate on the exchange date (£100,000×$.50=$50,000) and subtracting from such amount the issue price translated at the spot rate on the date X acquired the bond (£100,000×$1.00=$100,000). Thus, X will compute $50,000 of exchange loss, all of which will be realized and recognized because it does not exceed the total $55,000 realized loss on the exchange ($45,000 worth of stock received less $100,000 basis in the exchanged bond).

(iii) Pursuant to paragraph (b)(13) of this section, Y will realize and recognize exchange gain with respect to the issue price, computed under paragraph (b)(6) of this section by translating the issue price at the spot rate on the date Y became the obligor (£100,000×$1.00=$100,000) and subtracting from such amount the issue price translated at the spot rate on the exchange date (£100,000×$.50=$50,000). Thus, Y will realize and recognize $50,000 of exchange gain. Under section 108(e)(10), on the transfer of stock to X in satisfaction of its indebtedness Y is treated as having satisfied the indebtedness with an amount of money equal to the fair market value of the stock (£90,000×$.50=$45,000). Pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the recognized exchange gain from $100,000 to $50,000. Accordingly, Y recognizes an additional $5,000 of discharge of indebtedness income on the exchange.

Example 4. (i) The facts are the same as in *Example 3* except that interest rates on equivalent bonds have declined, rather than increased, so that the value of Y's bond on January 1, 1994, has risen to £112,500; and X and Y agree that Y will redeem its bond from X on that date in exchange for 25 shares of Y common stock worth £112,500. Pursuant to paragraphs (b)(13) and (b)(5) of this section, X will compute $50,000 of exchange loss on the exchange with respect to the £100,000 issue price of the bond. See Example 3. However, because X's total loss on the exchange is only $43,750 ($56,250 worth of stock received less $100,000 basis in the exchanged bond), under the netting rule of paragraph (b)(13) of this section the realized exchange loss is limited to $43,750.

(ii) Pursuant to paragraphs (b)(13) and (b)(6) of this section, Y will compute $50,000 of exchange gain with respect to the issue price. See *Example 3.* Under section 108(e)(10), Y is treated as having satisfied the $100,000 indebtedness with an amount of money equal to the fair market value of the stock (£112,500×$.50=$56,250), resulting in a total gain on the exchange of $43,750. Accordingly, under paragraph (b)(13) of this section Y's realized (and recognized) exchange gain on the exchange is limited to $43,750. Also pursuant to paragraph (b)(13) of this section, for purposes of section 108 the amount of the indebtedness is considered to be reduced by the recognized exchange gain from $100,000 to $56,250. Accordingly, Y recognizes no discharge of indebtedness income on the exchange.

(14)–(15) [Reserved]

(16) *Coordination with section 267 regarding debt instruments*—(i) *Treatment of a creditor.* For rules applicable to a corporation included in a controlled group that is a creditor under a debt instrument see § 1.267(f)–1(h).

(ii) *Treatment of a debtor.* [Reserved]

(17) *Coordination with installment method under section 453.* [Reserved]

(c) *Item of expense or gross income or receipts which is to be paid or received after the date accrued*—(1) *In general.* Except as provided in § 1.988–5, exchange gain or loss with respect to an item described in § 1.988–1(a) (1)(ii) and (2)(ii) (other than accrued interest income or expense subject to paragraph (b) of this section) shall be realized on the date payment is made or received. Except as provided in the succeeding sentence, such exchange gain or loss shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. If the taxpayer's right to receive income, or obligation to pay an expense, is transferred or modified in a transaction in which gain or loss would otherwise be recognized, exchange gain or loss shall be realized and recognized only to the extent of the total gain or loss on the transaction.

(2) *Determination of exchange gain or loss with respect to an item of gross income or receipts.* Exchange gain or loss realized on an item of gross income or receipts described in paragraph (c)(1) of this section shall be determined by multiplying the units of nonfunctional currency received by the spot rate on the payment date, and subtracting from such amount the amount determined by multiplying the units of nonfunctional currency received by the spot rate on the booking date. The term "spot rate on the payment date" means the spot rate determined under § 1.988–1(d) on the date payment is received or otherwise taken into account. Pursuant to § 1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the payment date. The term "spot rate on the booking date" means the spot rate determined under § 1.988–1(d) on the date the item of gross income or receipts is accrued or otherwise taken into account. Pursuant to § 1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the booking date.

(3) *Determination of exchange gain or loss with respect to an item of expense.* Exchange gain or loss realized on an item of expense described in paragraph (c)(1) of this section shall be determined by multiplying the units of nonfunctional currency paid by the spot rate on the booking date and subtracting from such amount the amount determined by multiplying the units of nonfunctional currency paid by the spot rate on the payment date. The term "spot rate on the booking date" means the spot rate determined under § 1.988–1(d) on the date the item of expense is accrued or otherwise taken into account. Pursuant to § 1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the booking date. The term "spot rate on the payment date" means the spot rate determined under § 1.988–1(d) on the date payment is made or otherwise taken into account. Pursuant to § 1.988–1(d)(3), a taxpayer may use a spot rate convention for purposes of determining the spot rate on the payment date.

(4) *Examples.* The following examples illustrate the application of paragraph (c) of this section.

Example 1. X is a calendar year corporation with the dollar as its functional currency. X is on the accrual method of accounting. On January 15, 1989, X sells inventory for 10,000 Canadian dollars (C$). The spot rate on January 15, 1989, is C$1=U.S.$.55. On February 23, 1989, when X receives payment of the C$10,000, the spot rate is C$1=U.S.$.50. On February 23, 1989, X will realize exchange loss. X's loss is computed by multiplying the C$10,000 by the spot rate on the date the C$10,000 are received (C$10,000×.50=U.S. $5,000) and subtracting from such amount, the amount computed by multiplying the C$10,000 by the spot rate on the booking date (C$10,000×.55=U.S. $5,500). Thus, X's exchange loss on the transaction is U.S. $500 (U.S. $5,000−U.S. $5,500).

Example 2. The facts are the same as in *Example 1* except that X uses a spot rate convention to determine the spot rate as provided in § 1.988–1(d)(3). Pursuant to X's spot rate convention, the spot rate at which a payable or receivable is booked is determined monthly for each nonfunctional currency payable or receivable by adding the spot rate at the beginning of the month and the spot rate at the end of the month and dividing by two. All payables and receivables in a nonfunctional currency booked during the month are translated into functional currency at the rate described in the preceding sentence. Further, the translation of nonfunctional currency paid with respect to a payable, and nonfunctional currency received with respect to a receivable, is also performed pursuant to the spot rate convention. Assume the spot rate determined under the spot rate convention for the month of January is C$1=U.S. $.54 and for the month of February is C$1=U.S. $.51. On the last date in February, X will realize exchange loss. X's loss is computed by multiplying the C$10,000 by the spot rate convention for the month of February (C$10,000×U.S. $.51=U.S. $5,100) and subtracting from such amount, the amount computed by multiplying the C$10,000 by the spot rate convention for the month of January (C$10,000×U.S. $.54=$5,400). Thus, X's exchange loss on the transaction is U.S. $300 (U.S. $5,100−U.S. $5,400). X's basis in the C$10,000 is U.S. $5,400.

Example 3. The facts are the same as in *Example 2* except that X has a standing order with X's bank for the bank to convert any nonfunctional currency received in satisfaction of a receivable into U.S. dollars on the day received and to deposit those U.S. dollars in X's U.S. dollar bank account. X may use its convention to translate the amount booked into U.S. dollars, but must use the U.S. dollar amounts received from the bank with respect to such receivables to determine X's exchange gain or loss. Thus, if X receives payment of the C$10,000 on February 23, 1989, when the spot rate is C$1=U.S.$ .50, X determines exchange gain or loss by subtracting the amount booked under X's convention (U.S.$5,400) from the amount of U.S. dollars received from the bank under the standing conversion order (assume $5,000). X's exchange loss is U.S.$400.

(d) *Exchange gain or loss with respect to forward contracts, futures contracts and option contracts*—(1) *Scope*—(i) *In general.* This paragraph (d) applies to forward contracts, futures contracts and option contracts described in § 1.988–1(a) (1)(ii) and (2)(iii). For rules applicable to currency swaps and notional principal contracts described in § 1.988–1(a) (1)(ii) and (2)(iii), see paragraph (e) of this section.

(ii) *Treatment of spot contracts.* Solely for purposes of this paragraph (d), a spot contract as defined in § 1.988–1(b) to buy or sell nonfunctional currency is not considered a forward contract or similar transaction described in § 1.988–1(a)(2)(iii) unless such spot contract is disposed of (or otherwise terminated) prior to making or taking delivery of the currency. For example, if a taxpayer with the dollar as its functional currency enters into a spot contract to purchase British pounds, and takes delivery of such pounds under the contract, the delivery of the pounds is not a realization event under section 988(c)(5) and paragraph (e)(4)(ii) of this section because the contract is not considered a forward contract or similar transaction described in § 1.988–1(a)(2)(iii). However, if the taxpayer sells or otherwise terminates the contract before taking delivery of the pounds, exchange gain or loss shall be realized and recognized in accordance with paragraphs (d) (2) and (3) of this section.

(2) *Realization of exchange gain or loss*—(i) *In general.* Except as provided in § 1.988–5, exchange gain or loss on a contract described in § 1.988–2(d)(1) shall be realized in accordance with the applicable realization section of the Internal Revenue Code (*e.g.*, sections 1001, 1092, and 1256). See also section 988(c)(5). For purposes of determining the timing of the realization of exchange gain or loss, sections 1092 and 1256 shall take precedence over section 988(c)(5).

(ii) *Realization by offset*—(A) *In general.* Except as provided in paragraphs (d)(2)(ii) (B) and (C) of this section, exchange gain or loss with respect to a transaction described in § 1.988–1(a) (1)(ii) and (2)(iii) shall not be realized solely because such transaction is offset by another transaction (or transactions).

(B) *Exception where economic benefit is derived.* If a transaction described in § 1.988–1(a) (1)(ii) and (2)(iii) is offset by another transaction or transactions, exchange gain shall be realized to the extent the taxpayer derives, by pledge or otherwise, an economic benefit (*e.g.*, cash, property or the proceeds from a borrowing) from any gain inherent in such offsetting positions. Proper adjustment shall be made in the amount of any gain or loss subsequently realized for gain taken into account by reason of the preceding sentence. This paragraph (d)(2)(ii)(B) shall apply to transactions creating an offset after September 21, 1989.

(C) *Certain contracts traded on an exchange.* If a transaction described in § 1.988–1(a) (1)(ii) and (2)(iii) is traded on an exchange and it is the general practice of the exchange to terminate offsetting contracts, entering into an offsetting contract shall be considered a termination of the contract being offset.

(iii) *Clarification of section 988(c)(5).* If the delivery date of a contract subject to section 988(c)(5) and paragraph (d)(4)(ii) of this section is different than the date the contract expires, then for purposes of determining the date exchange gain or loss is realized, the term delivery date shall mean expiration date.

(iv) *Examples.* The following examples illustrate the rules of this paragraph (d) (1) and (2).

Example 1. On August 1, 1989, X, a calendar year corporation with the dollar as its functional currency, enters into a forward contract with Bank A to buy 100 New Zealand dollars for $80 for delivery on January 31, 1990. (The forward purchase contract is not a section 1256 contract.) On November 1, 1989, the market price for the purchase of 100 New Zealand dollars for delivery on January 31, 1990, is $76. On

November 1, 1989, X cancels its obligation under the forward purchase contract and pays Bank A $3.95 (the present value of $4 discounted at 12% for the period) in cancellation of such contract. Under section 1001 (a), X realizes an exchange loss of $3.95 on November 1, 1989, because cancellation of the forward purchase contract for cash results in the termination of X's contract.

Example 2. X is a corporation with the dollar as its functional currency. On January 1, 1989, X enters into a currency swap contract with Bank A under which X is obligated to make a series of Japanese yen payments in exchange for a series of dollar payments. On February 21, 1992, X has a gain of $100,000 inherent in such contract as a result of interest rate and exchange rate movements. Also on February 21, 1992, X enters into an offsetting swap with Bank A to lock in such gain. If on February 21, 1992, X pledges the gain inherent in such offsetting positions as collateral for a loan, X's initial swap contract is treated as being terminated on February 21, 1992, under paragraph (d)(2)(ii)(B) of this section. Proper adjustment is made in the amount of any gain or loss subsequently realized for the gain taken into account by reason of paragraph (d)(2)(ii)(B) of this section.

Example 3. X is a calendar year corporation with the dollar as its functional currency. On October 1, 1989, X enters into a forward contract to buy 100,000 Swiss francs (Sf) for delivery on March 1, 1990, for $51,220. Assume that the contract is a section 1256 contract under section 1256(g)(2) and that section 1256(e) does not apply. Pursuant to section 1256(a)(1), the forward contract is treated as sold for its fair market value on December 31, 1989. Assume that the fair market value of the contract is $1,000 determined under § 1.988–1(g). Thus X will realize an exchange gain of $1,000 on December 31, 1989. Such gain is subject to the character rules of § 1.988–3 and the source rules of § 1.988–4.

(v) *Extension of the maturity date of certain contracts.* An extension of time for making or taking delivery under a contract described in paragraph (d)(1) of this section (*e.g.*, a historical rate rollover as defined in § 1.988–5(b)(2)(iii)(C)) shall be considered a sale or exchange of the contract for its fair market value on the date of the extension and the establishment of a new contract on such date. If, under the terms of the extension, the time value of any gain or loss recognized pursuant to the preceding sentence adjusts the price of the currency to be bought or sold under the new contract, the amount attributable to such time value shall be treated as interest income or expense for all purposes of the Code. However, the preceding sentence shall not apply and the amount attributable to the time value of any gain or loss recognized shall be treated as exchange gain or loss if the period beginning on the first date the contract is rolled over and ending on the date payment is ultimately made or received with respect to such contract does not exceed 183 days.

(3) *Recognition of exchange gain or loss.* Except as provided in § 1.988–5 (relating to section 988 hedging transactions), exchange gain or loss realized with respect to a contract described in paragraph (d)(1) of this section shall be recognized in accordance with the applicable recognition provisions of the Internal Revenue Code. For example, a loss realized with respect to a contract described in paragraph (d)(1) of this section which is part of a straddle shall be recognized in accordance with the provisions of section 1092 to the extent such section is applicable.

(4) *Determination of exchange gain or loss*—(i) *In general.* Exchange gain or loss with respect to a contract described in § 1.988–2(d)(1) shall be determined by subtracting the amount paid (or deemed paid), if any, for or with respect to the contract (including any amount paid upon termination of the contract) from the amount received (or deemed received), if any, for or with respect to the contract (including any amount received upon termination of the contract). Any gain or loss determined according to the preceding sentence shall be treated as exchange gain or loss.

(ii) *Special rules where taxpayer makes or takes delivery.* If the taxpayer makes or takes delivery in connection with a contract described in paragraph (d)(1) of this section, any gain or loss shall be realized and recognized in the same manner as if the taxpayer sold the contract (or paid another person to assume the contract) on the date on which he took or made delivery for its fair market value on such date. See paragraph (d)(2)(iii) of this section regarding the definition of the term "delivery date." This paragraph (d)(4)(ii) shall not apply in any case in which the taxpayer makes or takes delivery before June 11, 1987.

(iii) *Examples.* The following examples illustrate the application of paragraph (d)(4) of this section.

Example 1. X is a calendar year corporation with the dollar as its functional currency. On October 1, 1989, when the six month forward rate is $.4907, X enters into a forward contract to buy 100,000 New Zealand dollars (NZD) for delivery on March 1, 1990. On March 1, 1990, when X takes delivery of the 100,000 NZD, the spot rate is 1NZD equals $.40. Pursuant to section 988(c)(5) and paragraph (d)(4)(ii) of this section, a taxpayer that takes delivery of nonfunctional currency under a forward contract that is subject to section 988 is treated as if the taxpayer sold the contract for its fair market value on the date delivery is taken. If X sold the contract on March 1, 1990, the transferee would require a payment of $1,070 [($.48×100,000NZD)−($.4907×100,000NZD)] to compensate him for the loss in value of the 100,000NZD. Therefore, X realizes an exchange loss of $1,070. X has a basis in the 100,000NZD of $48,000.

Example 2. Assume the same facts as in *Example 1* except that the contract is for Swiss francs and is a section 1256 contract. Assume further that on December 31, 1989, the value to X of the contract as marked to market is $1,000. Pursuant to section 1256(a), X realizes an exchange gain of $1,000. Such gain, however, is characterized as ordinary income under § 1.988–3 and will be sourced under § 1.988–4.

Example 3. X is a calendar year corporation with the dollar as its functional currency. On May 2, 1989, X enters into an option contract with Bank A to purchase 50,000 Canadian dollars (C$) for U.S. $42,500 (C$1=U.S. $.85) for delivery on or before September 18, 1989. X pays a $285 premium to Bank A to obtain the option contract. On September 18, 1989, when X exercises the option and takes delivery of the C$50,000, the spot rate is C$1 equals U.S. $.90. Pursuant to section 988(c)(5) and paragraph (d)(4)(ii) of this section, a taxpayer that takes delivery under an option contract that is subject to section 988 is treated as if the taxpayer sold the contract for its fair market value on the date delivery is taken. If X sold the contract for its fair market value on September 18, 1989, X would receive U.S. $2,500 [(C$50,000×U.S. $.90)−(C$50,000×U.S. $.85)]. Accordingly, X is deemed to have received U.S. $2,500 on the sale of the contract at its fair market value. X will realize U.S. $2,215 ($2,500 deemed received less $285 paid) of exchange gain with respect to the delivery of Canadian dollars under the option contract. X's basis in the 50,000 Canadian dollars is U.S. $45,000.

(5) [Reserved]

(e) *Currency swaps and other notional principal contracts*—(1) *In general.* Except as provided in paragraph (e)(2) of this section or in § 1.988–5, the timing of income, deduction and loss with respect to a notional principal contract that is a section 988 transaction shall be governed by section 446 and the regulations thereunder. Such income, deduction and loss is characterized as exchange gain or loss (except as provided in another section of the Internal Revenue Code (or regulations thereunder), § 1.988–5, or in paragraph (f) of this section).

(2) *Special rules for currency swaps*—(i) *In general.* Except as provided in paragraph (e)(2)(iii)(B) of this section, the provisions of this paragraph (e)(2) shall apply solely for purposes of determining the realization, recognition and amount of exchange gain or loss with respect to a currency swap contract, and not for purposes of determining the source of such gain or loss, or characterizing such gain or loss as interest. Except as provided in

§ 1.988–3(c), any income or loss realized with respect to a currency swap contract shall be characterized as exchange gain or loss (and not as interest income or expense). Any exchange gain or loss realized in accordance with this paragraph (e)(2) shall be recognized unless otherwise provided in an applicable section of the Code. For purposes of this paragraph (e)(2), a currency swap contract is a contract defined in paragraph (e)(2)(ii) of this section. With respect to a contract which requires the payment of swap principal prior to maturity of such contract, see paragraph (f) of this section. For purposes of this paragraph (e), the rules of paragraph (d)(2)(ii) of this section (regarding realization by offset) apply. See Example 2 of paragraph (d)(2)(iv) of this section.

(ii) *Definition of currency swap contract*—(A) *In general.* A currency swap contract is a contract involving different currencies between two or more parties to—

(*1*) Exchange periodic interim payments, as defined in paragraph (e)(2)(ii)(C) of this section, on or prior to maturity of the contract; and

(*2*) Exchange the swap principal amount upon maturity of the contract.

A currency swap contract may also require an exchange of the swap principal amount upon commencement of the agreement.

(B) *Swap principal amount.* The swap principal amount is an amount of two different currencies which, under the terms of the currency swap contract, is used to determine the periodic interim payments in each currency and which is exchanged upon maturity of the contract. If such amount is not clearly set forth in the contract, the Commissioner may determine the swap principal amount.

(C) *Exchange of periodic interim payments.* An exchange of periodic interim payments is an exchange of one or more payments in one currency specified by the contract for one or more payments in a different currency specified by the contract where the payments in each currency are computed by reference to an interest index applied to the swap principal amount. A currency swap contract must clearly indicate the periodic interim payments, or the interest index used to compute the periodic interim payments, in each currency.

(iii) *Timing and computation of periodic interim payments*—(A) *In general.* Except as provided in paragraph (e)(2)(iii)(B) of this section and § 1.988–5, the timing and computation of the periodic interim payments provided in a currency swap agreement shall be determined by treating—

(*1*) Payments made under the swap as payments made pursuant to a hypothetical borrowing that is denominated in the currency in which payments are required to be made (or are determined with reference to) under the swap, and

(*2*) Payments received under the swap as payments received pursuant to a hypothetical loan that is denominated in the currency in which payments are received (or are determined with reference to) under the swap.

Except as provided in paragraph (e)(2)(v) of this section, the hypothetical issue price of such hypothetical borrowing and loan shall be the swap principal amount. The hypothetical stated redemption price at maturity is the total of all payments (excluding any exchange of the swap principal amount at the inception of the contract) provided under the hypothetical borrowing or loan other than periodic interest payments under the principles of section 1273. For purposes of determining economic accrual under the currency swap, the number of hypothetical interest compounding periods of such hypothetical borrowing and loan shall be determined pursuant to a semiannual compounding convention unless the currency swap contract indicates otherwise. For purposes of determining the timing and amount of the periodic interim payments, the principles regarding the amortization of interest (see generally, sections 1272 through 1275 and 163(e)) shall apply to the hypothetical interest expense and income of such hypothetical borrowing and loan. However, such principles shall not apply to determine the time when principal is deemed to be paid on the hypothetical borrowing and loan. See paragraph (d)(2)(iii) of this section and *Example 2* of paragraph (d)(5) of this section with respect to the time when principal is deemed to be paid. With respect to the translation and computation of exchange gain or loss on any hypothetical interest income or expense, see § 1.988–2(b). The amount treated as exchange gain or loss by the taxpayer with respect to the periodic interim payments for the taxable year shall be the amount of hypothetical interest income and exchange gain or loss attributable to such interest income from the hypothetical borrowing and loan for such year less the amount of hypothetical interest expense and exchange gain or loss attributable to the interest expense from such hypothetical borrowing and loan for such year.

(B) *Effect of prepayment for purposes of section 956.* For purposes of section 956, the Commissioner may treat any prepayment of a currency swap as a loan.

(iv) *Timing and determination of exchange gain or loss with respect to the swap principal amount.* Exchange gain or loss with respect to the swap principal amount shall be realized on the day the units of swap principal in each currency are exchanged. (See paragraph (e)(2)(ii)(A)(*2*) of this section which requires that the entire swap principal amount be exchanged upon maturity of the contract.) Such gain or loss shall be determined on the date of the exchange by subtracting the value (on such date) of the units of swap principal paid from the value of the units of swap principal received. This paragraph (e)(2)(iv) does not apply to an equal exchange of the swap principal amount at the commencement of the agreement at a market exchange rate.

(v) *Anti-abuse rules*—(A) *Method of accounting does not clearly reflect income.* If the taxpayer's method of accounting for income, expense, gain or loss attributable to a currency swap does not clearly reflect income, or if the present value of the payments to be made is not equivalent to that of the payments to be received (including the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section) on the day the taxpayer enters into or acquires the contract, the Commissioner may apply principles analogous to those of section 1274 or such other rules as the Commissioner deems appropriate to clearly reflect income. For example, in order to clearly reflect income the Commissioner may determine the hypothetical issue price, the hypothetical stated redemption price at maturity, and the amounts required to be taken into account within a taxable year. Further, if the present value of the payments to be made is not equivalent to that of the payments to be received (including the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section) on the day the taxpayer enters into or acquires the contract, the Commissioner may integrate the swap with another transaction (or transactions) in order to clearly reflect income.

(B) *Terms must be clearly stated.* If the currency swap contract does not clearly set forth the swap principal amount in each currency, and the periodic interim payments in each currency (or the interest index used to compute the periodic interim payments

in each currency), the Commissioner may defer any income, deduction, gain or loss with respect to such contract until termination of the contract.

(3) *Amortization of swap premium or discount in the case of off-market currency swaps*—(i) *In general.* An "off-market currency swap" is a currency swap contract under which the present value of the payments to be made is not equal to that of the payments to be received on the day the taxpayer enters into or acquires the contract (absent the swap premium or discount, as defined in paragraph (e)(3)(ii) of this section). Generally, such present values may not be equal if the swap exchange rate (as defined in paragraph (e)(3)(iii) of this section) is not the spot rate, or the interest indices used to compute the periodic interim payments do not reflect current values, on the day the taxpayer enters into or acquires the currency swap.

(ii) *Treatment of taxpayer entering into or acquiring an off-market currency swap.* If a taxpayer that enters into or acquires a currency swap makes a payment (that is, the taxpayer pays a premium, "swap premium," to enter into or acquire the currency swap) or receives a payment (that is, the taxpayer enters into or acquires the currency swap at a discount, "swap discount") in order to make the present value of the amounts to be paid equal the amounts to be received, such payment shall be amortized in a manner which places the taxpayer in the same position it would have been in had the taxpayer entered into a currency swap contract under which the present value of the amounts to be paid equal the amounts to be received (absent any swap premium or discount). Thus, swap premium or discount shall be amortized as follows—

(A) The amount of swap premium or discount that is attributable to the difference between the swap exchange rate (as defined in paragraph (e)(3)(iii) of this section) and the spot rate on the date the contract is entered into or acquired shall be taken into account as income or expense on the date the swap principal amounts are taken into account; and

(B) The amount of swap premium or discount attributable to the difference in values of the periodic interim payments shall be amortized in a manner consistent with the principles of economic accrual. *Cf.*, section 171.

Any amount taken into account pursuant to this paragraph (e)(3)(ii) shall be treated as exchange gain or loss.

(iii) *Definition of swap exchange rate.* The swap exchange rate is the single exchange rate set forth in the contract at which the swap principal amounts are determined. If the swap exchange rate is not clearly set forth in the contract, the Commissioner may determine such rate.

(iv) [Reserved]

(4) *Treatment of taxpayer disposing of a currency swap.* Any gain or loss realized on the disposition or the termination of a currency swap is exchange gain or loss.

(5) *Examples.* The following examples illustrate the application of this paragraph (e).

Example 1. (i) C is an accrual method calendar year corporation with the dollar as its functional currency. On January 1, 1989, C enters into a currency swap with J with the following terms:

(1) the principal amount is $150 and 100 British pounds (£) (the equivalent of $150 on the effective date of the contract assuming a spot rate of £1=$1.50 on January 1, 1989);

(2) C will make payments equal to 10% of the dollar principal amount on December 31, 1989, and December 31, 1990;

(3) J will make payments equal to 12% of the pound principal amount on December 31, 1989, and December 31, 1990; and

(4) on December 31, 1990, C will pay to J the $150 principal amount and J will pay to C the £100 principal amount.

Assume that the spot rate is £1=$1.50 on January 1, 1989, £1=$1.40 on December 31, 1989, and £1=$1.30 on December 31, 1990. Assume further that the average rate for 1989 is £1=$1.45 and for 1990 is £1=$1.35.

(ii) Solely for determining the realization of gain or loss in accordance with paragraph (e)(2) of this section (and not for purposes of determining whether any payments are treated as interest), C will treat the dollar payments made by C as payments made pursuant to a dollar borrowing with an issue price of $150, a stated redemption price at maturity of $150, and yield to maturity of 10%. C will treat the pound payments received as payments received pursuant to a pound loan with an issue price of £100, a stated redemption price at maturity of £100, and a yield of 12% to maturity. Pursuant to § 1.988–2(b), C is required to compute hypothetical accrued pound interest income at the average rate for the accrual period and then determine exchange gain or loss on the day payment is received with respect to such accrued amount. Accordingly, C will accrue $17.40 (£12×$1.45) in 1989 and $16.20 (£12×$1.35) in 1990. C also will compute hypothetical exchange loss of $.60 on December 31, 1989 [(£12×$1.40)−(£12×$1.45)] and hypothetical exchange loss of $.60 on December 31, 1990 [(£12×$1.30)−(£12×$1.35)]. All such hypothetical interest income and exchange loss are characterized and sourced as exchange gain and loss. Further, C is treated as having paid $15 ($150×10%) of hypothetical interest on December 31, 1989, and again on December 31, 1990. Such hypothetical interest expense is characterized and sourced as exchange loss. Thus, C will have a net exchange gain of $1.80 ($17.40−$.60−$15.00) with respect to the periodic interim payments in 1989 and a net exchange gain of $.60 ($16.20−$.60−$15.00) with respect to the periodic interim payments in 1990. Finally, C will realize an exchange loss on December 31, 1990 with respect to the exchange of the swap principal amount. This loss is determined by subtracting the value of the units of swap principal paid ($150) from the value of the units of swap principal received (£100×$1.30=$130) resulting in a $20 exchange loss.

Example 2. (i) C is an accrual method calendar year corporation with the dollar as its functional currency. On January 1, 1989, when the spot rate is £1=$1.50, C enters into a currency swap contract with J under which C agrees to make and receive the following payments:

Date	C pays	J pays
December 31, 1989	$15.00	£12.00
December 31, 1990	41.04	12.00
December 31, 1991	0.00	12.00
December 31, 1992	150.00	112.00

(ii) Under paragraph (e)(2)(iii) of this section, C must treat the dollar periodic interim payments under the swap as made pursuant to a hypothetical dollar borrowing. The hypothetical issue price is $150 and the stated redemption price at maturity is $206.04. The amount of hypothetical interest expense must be amortized in accordance with economic accrual. Thus J must include and C must deduct periodic interim payment amounts as follows:

	Amount taken into account	Adjusted issue price
December 31, 1989	$15.00	150.00
December 31, 1990	$15.00	123.96
December 31, 1991	$12.40	135.36
December 31, 1992	13.64	

(iii) Gain or loss with respect to the periodic interim payments of the currency swap is determined under paragraph (e)(2)(iii)(A) of this section with respect to the dollar cash flow amortized as set forth above and the corresponding pound cash flow as stated in the currency swap contract. Gain or loss with respect to the principal payments (*i.e.*, $150 and £100) exchanged on December 31, 1992, is determined under paragraph (e)(2)(iv) of this section on December 31, 1992, notwithstanding that under the principles regarding amortization of interest $26.04 would have been regarded as a payment of principal on December 31, 1990.

Example 3. (i) X is a corporation on the accrual method of accounting with the dollar as its functional currency and the calendar year as its taxable year. On January 1, 1989, X enters into a three year currency swap contract with Y with the following terms. The swap principal amount is $100 and the Swiss franc (Sf) equivalent of such amount which equals Sf200 translated at the swap exchange rate of $1=Sf2. There is no initial exchange of the swap principal amount. The interest rates used to compute the periodic interim payments are 10% compounded annually for U.S. dollar payments and 5% compounded annually for Swiss franc payments. Thus, under the currency swap, X agrees to pay Y $10 (10%×$100) on December 31st of 1989, 1990 and 1991 and to pay Y the swap principal amount of $100 on December 31, 1991. Y agrees to pay X Sf10 (5%×Sf200) on December 31st of 1989, 1990 and 1991 and to pay X the swap principal amount of Sf200 on December 31, 1991. Assume that the average rate for 1989 and the spot rate on December 31, 1989, is $1=Sf2.5.

(ii) Under paragraph (e)(2)(iii) of this section, on December 31, 1989, X will realize an exchange loss of $6 (the sum of $10 of loss by reason of the $10 periodic interim payment paid to Y and $4.00 of gain, the value of Sf10 on December 31, 1989, from the receipt of Sf10 on such date).

(iii) On January 1, 1990, X transfers its rights and obligations under the swap contract to Z, an unrelated corporation. Z has the dollar as its functional currency, is on the accrual method of accounting, and has the calendar year as its taxable year. On January 1, 1990, the exchange rate is $1=Sf2.50. The relevant dollar interest rate is 8% compounded annually and the relevant Swiss franc interest rate is 5% compounded annually. Because of the movement in exchange and interest rates, the agreement between X and Z to transfer the currency swap requires X to pay Z $23.56 (the swap discount as determined under paragraph (e)(3) of this section).

(iv) Pursuant to paragraph (e)(4) of this section, X may deduct the loss of $23.56 in 1990. The loss is characterized under § 1.988–3 and sourced under § 1.988–4.

(v) Pursuant to paragraph (e)(3)(ii) of this section, Z is required to amortize the $23.56 received as follows. The amount of the $23.56 payment that is attributable to movements in exchange rates ($20) is taken into account on December 31, 1991, the date the swap principal amounts are exchanged, under paragraph (e)(3)(ii)(A) of this section. This amount is the present value (discounted at 10%, the rate under the currency swap contract used to compute the dollar periodic interim payments) of the financial asset required to compensate Z for the loss in value of the hypothetical Swiss franc loan resulting from movements in exchange rates between January 1, 1989 and January 1, 1990. This amount is determined by assuming that interest rates did not change from the date the swap originally was entered into (January 1, 1989), but that the exchange rate is $1=Sf2.50. Under this assumption, a taxpayer undertaking the obligation to pay dollars under the currency swap on January 1, 1990, would only agree to pay $8 for Sf10 on December 31, 1990 and $88 for Sf210 on December 31, 1991, because the exchange rates have moved from $1=Sf2 to $1=Sf2.50. Thus, Z requires $2 on December 31, 1990 and $22 on December 31, 1991 to compensate for the amount of dollar payments Z is required to make in exchange for the Swiss francs received on December 31, 1990 and 1991. The present value of $2 on December 31, 1990 and $22 on December 31, 1991 discounted at the rate for U.S. dollar payments of 10% is $20 ($1.82+$16.18). This amount is discounted at the rate for U.S. dollar payments (i.e., at the historic rate) because the amount of the $23.56 payment received by Z that is attributable to movements in interest rates is computed and amortized separately as provided in the following paragraph.

(vi) Pursuant to paragraph (e)(3)(ii)(B) of this section, Z is required to amortize the portion of the $23.56 payment attributable to movements in interest rates under principles of economic accrual over the term of the currency swap agreement. The amount of the $23.56 payment that is attributable to movements in interest rates (assuming that exchange rates have not changed) is the present value ($3.56) of the excess ($2.00 in 1990 and $2.00 in 1991) of the periodic interim payments Z is required to pay under the currency swap agreement ($10 in 1990 and $10 in 1991) over the amount Z would be required to pay if the currency swap agreement reflected current interest rates on the day Z acquired the swap contract ($8 in 1990 and $8 in 1991) discounted at the appropriate dollar interest rate on January 1, 1990. Thus, under principles of economic accrual (e.g., see section 171 of the Code), Z will include in income $1.72 on December 31, 1990, the amount that, when added to the interest ($.28) on the $3.56 computed at the 8% rate on the date Z acquired the currency swap contract, will equal the $2.00 needed to compensate Z for the movement in interest rates between January 1, 1989 and January 1, 1990. Z also will include in income $1.85 on December 31, 1991, the amount that, when added to the interest ($.15) on the $1.85 (the remaining balance of the $3.56 payment) computed at the 8% rate on the date Z acquired the currency swap contract, will equal the $2.00 needed to compensate Z for the movement in interest rates between January 1, 1990 and January 1, 1991. This amount is computed assuming exchange rates have not changed because the amount attributable to movements in exchange rates is computed and amortized separately under the preceding paragraph.

(6) *Special effective date for rules regarding currency swaps.* Paragraph (e)(3) of this section regarding amortization of swap premium or discount in the case of off-market currency swaps shall be effective for transactions entered into after September 21, 1989, unless such swap premium or discount was paid or received pursuant to a binding contract with an unrelated party that was entered into prior to such date. For transactions entered into prior to this date, see Notice 89–21, 1989–8 I.R.B. 23.

(7) [Reserved]

(f) *Substance over form*—(1) *In general.* If the substance of a transaction described in § 1.988–1(a)(1) differs from its form, the timing, source, and character of gains or losses with respect to such transaction may be recharacterized by the Commissioner in accordance with its substance. For example, if a taxpayer enters into a transaction that it designates a "currency swap contract" that requires the prepayment of all payments to be made or to be received (but not both), the Commissioner may recharacterize the contract as a loan. In applying the substance over form principle, separate transactions may be integrated where appropriate. See also § 1.861–9T(b)(1).

(2) *Example.* The following example illustrates the provisions of this paragraph (f).

Example. (i) On January 1, 1990, X, a U.S. corporation with the dollar as its functional currency, enters into a contract with Y under which X will pay Y $100 and Y will pay X LC100 on January 1, 1990, and X will pay Y LC109.3 and Y will pay X $133 on December 31, 1992. On January 1, 1990, the spot exchange rate is LC1=$1 and the 3 year forward rate is LC1=$.8218. X's cash flows are summarized below:

Date	Dollar	LC
1/1/90	(100)	100
12/31/90	0	0
12/31/91	0	0
12/31/92	133	(109.3)

(ii) X and Y designate this contract as a "currency swap." Notwithstanding this designation, for purposes of determining the timing, source, and character with respect to the transaction, the transaction is characterized by the Commissioner in accordance with its substance. Thus, the January 1, 1990, exchange by X of $100 for LC 100 is treated as a spot purchase of LCs by X and the December 31, 1992, exchange by X at 109.3LC for $133 is treated as a forward sale of LCs by X. Under such treatment there would be no tax consequences to X under paragraph (e)(2) of this section in 1990, 1991, and 1992 with respect to this transaction other than the realization of exchange gain or loss on the sale of the LC109.3 on December 31, 1992. Calculation of such gain or loss would be governed by the rules of paragraph (d) of this section.

(g) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

§ 1.988–3 Character of exchange gain or loss.

(a) *In general.* The character of exchange gain or loss recognized on a section 988 transaction is governed by section 988 and this section. Except as otherwise provided in section 988(c)(1)(E), section 1092, § 1.988–5 and this section, exchange gain or loss

realized with respect to a section 988 transaction (including a section 1256 contract that is also a section 988 transaction) shall be characterized as ordinary gain or loss. Accordingly, unless a valid election is made under paragraph (b) of this section, any section providing special rules for capital gain or loss treatment, such as sections 1233, 1234, 1234A, 1236 and 1256(f)(3), shall not apply.

(b) *Election to characterize exchange gain or loss on certain identified forward contracts, futures contracts and option contracts as capital gain or loss*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, a taxpayer may elect, subject to the requirements of paragraph (b)(3) of this section, to treat any gain or loss recognized on a contract described in § 1.988–2(d)(1) as capital gain or loss, but only if the contract—

(i) Is a capital asset in the hands of the taxpayer;

(ii) Is not part of a straddle within the meaning of section 1092(c) (without regard to subsections (c)(4) or (e)); and

(iii) Is not a regulated futures contract or nonequity option with respect to which an election under section 988(c)(1)(D)(ii) is in effect.

If a valid election under this paragraph (b) is made with respect to a section 1256 contract, section 1256 shall govern the character of any gain or loss recognized on such contract.

(2) *Special rule for contracts that become part of a straddle after an election is made.* If a contract which is the subject of an election under paragraph (b)(1) of this section becomes part of a straddle within the meaning of section 1092(c) (without regard to subsections (c)(4) or (e)) after the date of the election, the election shall be invalid with respect to gains from such contract and the Commissioner, in his sole discretion, may invalidate the election with respect to losses.

(3) *Requirements for making the election.* A taxpayer elects to treat gain or loss on a transaction described in paragraph (b)(1) of this section as capital gain or loss by clearly identifying such transaction on its books and records on the date the transaction is entered into. No specific language or account is necessary for identifying a transaction referred to in the preceding sentence. However, the method of identification must be consistently applied and must clearly identify the pertinent transaction as subject to the section 988(a)(1)(B) election. The Commissioner, in his sole discretion, may invalidate any purported election that does not comply with the preceding sentence.

(4) *Verification.* A taxpayer that has made an election under § 1.988–3(b)(3) must attach to his income tax return a statement which sets forth the following:

(i) A description and the date of each election made by the taxpayer during the taxpayer's taxable year;

(ii) A statement that each election made during the taxable year was made before the close of the date the transaction was entered into;

(iii) A description of any contract for which an election was in effect and the date such contract expired or was otherwise sold or exchanged during the taxable year;

(iv) A statement that the contract was never part of a straddle as defined in section 1092; and

(v) A statement that all transactions subject to the election are included on the statement attached to the taxpayer's income tax return.

In addition to any penalty that may otherwise apply, the Commissioner, in his sole discretion, may invalidate any or all elections made during the taxable year under § 1.988–3(b)(1) if the taxpayer fails to verify each election as provided in this § 1.988–3(b)(4). The preceding sentence shall not apply if the taxpayer's failure to verify each election was due to reasonable cause or bona fide mistake. The burden of proof to show reasonable cause or bona fide mistake made in good faith is on the taxpayer.

(5) *Independent verification*—(i) *Effect of independent verification.* If the taxpayer receives independent verification of the election in paragraph (b)(3) of this section, the taxpayer shall be presumed to have satisfied the requirements of paragraphs (b) (3) and (4) of this section. A contract that is a part of a straddle as defined in section 1092 may not be independently verified and shall be subject to the rules of paragraph (b)(2) of this section.

(ii) *Requirements for independent verification.* A taxpayer receives independent verification of the election in paragraph (b)(3) of this section if—

(A) The taxpayer establishes a separate account(s) with an unrelated broker(s) or dealer(s) through which all transactions to be independently verified pursuant to this paragraph (b)(5) are conducted and reported.

(B) Only transactions entered into on or after the date the taxpayer establishes such account may be recorded in the account.

(C) Transactions subject to the election of paragraph (b)(3) of this section are entered into such account on the date such transactions are entered into.

(D) The broker or dealer provides the taxpayer a statement detailing the transactions conducted through such account and includes on such statement the following: "Each transaction identified in this account is subject to the election set forth in section 988(a)(1)(B)."

(iii) *Special effective date for independent verification.* The rules of this paragraph (b)(5) shall be effective for transactions entered into after March 17, 1992.

(6) *Effective date.* Except as otherwise provided, this paragraph (b) is effective for taxable years beginning on or after September 21, 1989. For prior taxable years, any reasonable contemporaneous election meeting the requirements of section 988(a)(1)(B) shall satisfy this paragraph (b).

(c) *Exchange gain or loss treated as interest*—(1) *In general.* Except as provided in this paragraph (c)(1), exchange gain or loss realized on a section 988 transaction shall not be treated as interest income or expense. Exchange gain or loss realized on a section 988 transaction shall be treated as interest income or expense as provided in paragraph (c)(2) of this section with regard to tax exempt bonds, § 1.988–2(e)(2)(ii)(B), § 1.988–5, and in administrative pronouncements. See § 1.861–9T(b), providing rules for the allocation of certain items of exchange gain or loss in the same manner as interest expense.

(2) *Exchange loss realized by the holder on nonfunctional currency tax exempt bonds.* Exchange loss realized by the holder of a debt instrument the interest on which is excluded from gross income under section 103(a) or any similar provision of law shall be treated as an offset to and reduce total interest income received or accrued with respect to such instrument. Therefore, to the extent of total interest income, no exchange loss shall be recognized. This paragraph (c)(2) shall be effective with respect to debt instruments acquired on or after June 24, 1987.

(d) *Effective date.* Except as otherwise provided in this section, this section shall be effective for taxable years beginning after December 31, 1986. Thus, except as otherwise provided in this section, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section. Thus, for example, a payment made prior to January 1, 1987, under a forward contract that results in the deferral of a loss under section 1092 to a taxable year beginning after December 31, 1986, is not characterized as an ordinary loss by virtue of paragraph (a) of this section because payment was made prior to January 1, 1987.

§ 1.988–4 Source of gain or loss realized on a section 988 transaction.

(a) *In general.* Except as otherwise provided in § 1.988–5 and this section, the source of exchange gain or loss shall be determined by reference to the residence of the taxpayer. This rule applies even if the taxpayer has made an election under § 1.988–3(b) to characterize exchange gain or loss as capital gain or loss. This section takes precedence over section 865.

(b) *Qualified business unit*—(1) *In general.* The source of exchange gain or loss shall be determined by reference to the residence of the qualified business unit of the taxpayer on whose books the asset, liability, or item of income or expense giving rise to such gain or loss is properly reflected.

(2) *Proper reflection on the books of the taxpayer or qualified business unit*—(i) *In general.* Whether an asset, liability, or item of income or expense is properly reflected on the books of a qualified business unit is a question of fact.

(ii) *Presumption if booking practices are inconsistent.* It shall be presumed that an asset, liability, or item of income or expense is not properly reflected on the books of the qualified business unit if the taxpayer and its qualified business units employ inconsistent booking practices with respect to the same or similar assets, liabilities, or items of income or expense. If not properly reflected on the books, the Commissioner may allocate any asset, liability, or item of income or expense between or among the taxpayer and its qualified business units to properly reflect the source (or realization) of exchange gain or loss.

(c) *Effectively connected exchange gain or loss.* Notwithstanding paragraphs (a) and (b) of this section, exchange gain or loss that under principles similar to those set forth in § 1.864–4(c) arises from the conduct of a United States trade or business shall be sourced in the United States and such gain or loss shall be treated as effectively connected to the conduct of a United States trade or business for purposes of sections 871(b) and 882 (a)(1).

(d) *Residence*—(1) *In general.* Except as otherwise provided in this paragraph (d), for purposes of sections 985 through 989, the residence of any person shall be—

(i) In the case of an individual, the country in which such individual's tax home (as defined in section 911(d)(3)) is located;

(ii) In the case of a corporation, partnership, trust or estate which is a United States person (as defined in section 7701(a)(30)), the United States; and

(iii) In the case of a corporation, partnership, trust or estate which is not a United States person, a country other than the United States.

If an individual does not have a tax home (as defined in section 911(d)(3)), the residence of such individual shall be the United States if such individual is a United States citizen or a resident alien and shall be a country other than the United States if such individual is not a United States citizen or resident alien. If the taxpayer is a U.S. person and has no principal place of business outside the United States, the residence of the taxpayer is the United States. Notwithstanding paragraph (d)(1)(ii) of this section, if a partnership is formed or availed of to avoid tax by altering the source of exchange gain or loss, the source of such gain or loss shall be determined by reference to the residence of the partners rather than the partnership.

(2) *Exception.* In the case of a qualified business unit of any taxpayer (including an individual), the residence of such unit shall be the country in which the principal place of business of such qualified business unit is located.

(3) *Partner in a partnership not engaged in a U.S. trade or business under section 864(b)(2).* The determination of residence shall be made at the partner level (without regard to whether the partnership is a qualified business unit of the partners) in the case of partners in a partnership that are not engaged in a U.S. trade or business by reason of section 864(b)(2).

(e) *Special rule for certain related party loans*—(1) *In general.* In the case of a loan by a United States person or a related person to a 10 percent owned foreign corporation, or a corporation that meets the 80 percent foreign business requirements test of section 861(c)(1), other than a corporation subject to § 1.861–11T(e)(2)(i), which is denominated in, or determined by reference to, a currency other than the U.S. dollar and bears interest at a rate at least 10 percentage points higher than the Federal mid-term rate (as determined under section 1274(d)) at the time such loan is entered into, the following rules shall apply—

(i) For purposes of section 904 only, such loan shall be marked to market annually on the earlier of the last business day of the United States person's (or related person's) taxable year or the date the loan matures; and

(ii) Any interest income earned with respect to such loan for the taxable year shall be treated as income from sources within the United States to the extent of any notional loss attributable to such loan under paragraph (d)(1)(i) of this section.

(2) *United States person.* For purposes of this paragraph (e), the term "United States person" means a person described in section 7701(a)(30).

(3) *Loans by related foreign persons*—(i) *In general.* [Reserved]

(ii) *Definition of related person.* For purposes of this paragraph (e), the term "related person" has the meaning given such term by section 954(d)(3) except that such section shall be applied by substituting "United States person" for "controlled foreign corporation" each place such term appears.

(4) *10 percent owned foreign corporation.* For purposes of this paragraph (e), the term "10 percent owned foreign corporation" means any foreign corporation in which the United States person owns directly or indirectly (within the meaning of section 318(a)) at least 10 percent of the voting stock.

(f) *Exchange gain or loss treated as interest under § 1.988–3.* Notwithstanding the provisions of this section, any gain or loss realized on a section 988 transaction that is treated as interest income or expense under § 1.988–3(c)(1) shall be sourced or allocated and apportioned pursuant to section 861(a)(1), 862(a)(1), or 864(e) as the case may be.

(g) *Exchange gain or loss allocated in the same manner as interest under § 1.861–9T.* The allocation and apportionment of exchange gain or loss under § 1.861–9T shall not affect the source of exchange gain or loss for purposes of sections 871(a), 881, 1441, 1442 and 6049.

(h) *Effective date.* This section shall be effective for taxable years beginning after December 31, 1986. Thus, any payments made or received with respect to a section 988 transaction in taxable years beginning after December 31, 1986, are subject to this section.

§ 1.988–5 Section 988(d) hedging transactions.

(a) *Integration of a nonfunctional currency debt instrument and a § 1.988–5(a) hedge*—(1) *In general.* This paragraph (a) applies to a qualified hedging transaction as defined in this paragraph (a)(1). A qualified hedging transaction is an integrated economic

transaction, as provided in paragraph (a)(5) of this section, consisting of a qualifying debt instrument as defined in paragraph (a)(3) of this section and a § 1.988–5(a) hedge as defined in paragraph (a)(4) of this section. If a taxpayer enters into a transaction that is a qualified hedging transaction, no exchange gain or loss is recognized by the taxpayer on the qualifying debt instrument or on the § 1.988–5(a) hedge for the period that either is part of a qualified hedging transaction, and the transactions shall be integrated as provided in paragraph (a)(9) of this section. However, if the qualified hedging transaction results in a synthetic nonfunctional currency denominated debt instrument, such instrument shall be subject to the rules of § 1.988–2(b).

(2) *Exception.* This paragraph (a) does not apply with respect to a qualified hedging transaction that creates a synthetic asset or liability denominated in, or determined by reference to, a currency other than the U.S. dollar if the rate that approximates the Federal short-term rate in such currency is at least 20 percentage points higher than the Federal short term rate (determined under section 1274(d)) on the date the taxpayer identifies the transaction as a qualified hedging transaction.

(3) *Qualifying debt instrument*—(i) *In general.* A qualifying debt instrument is a debt instrument described in § 1.988–1(a)(2)(i), regardless of whether denominated in, or determined by reference to, nonfunctional currency (including dual currency debt instruments, multi-currency debt instruments and contingent payment debt instruments). A qualifying debt instrument does not include accounts payable, accounts receivable or similar items of expense or income.

(ii) *Special rule for debt instrument of which all payments are proportionately hedged.* If a debt instrument satisfies the requirements of paragraph (a)(3)(i) of this section, and all principal and interest payments under the instrument are hedged in the same proportion, then for purposes of this paragraph (a), that portion of the instrument that is hedged is eligible to be treated as a qualifying debt instrument, and the rules of this paragraph (a) shall apply separately to such qualifying debt instrument. See Example 8 in paragraph (a)(9)(iv) of this section.

(4) *Section 1.988–5(a) hedge*—(i) *In general.* A § 1.988–5(a) hedge (hereinafter referred to in this paragraph (a) as a "hedge") is a spot contract, futures contract, forward contract, option contract, notional principal contract, currency swap contract, similar financial instrument, or series or combination thereof, that when integrated with a qualifying debt instrument permits the calculation of a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated (as determined under paragraph (a)(9)(ii)(A) of this section).

(ii) *Retroactive application of definition of currency swap contract.* A taxpayer may apply the definition of currency swap contract set forth in § 1.988–2(e)(2)(ii) in lieu of the definition of swap agreement in section 2(e)(5) of Notice 87–11, 1987–1 C.B. 423 to transactions entered into after December 31, 1986 and before September 21, 1989.

(5) *Definition of integrated economic transaction.* A qualifying debt instrument and a hedge are an integrated economic transaction if all of the following requirements are satisfied—

(i) All payments to be made or received under the qualifying debt instrument (or amounts determined by reference to a nonfunctional currency) are fully hedged on the date the taxpayer identifies the transaction under paragraph (a) of this section as a qualified hedging transaction such that a yield to maturity (under principles of section 1272) in the currency in which the synthetic debt instrument is denominated (as determined under paragraph (a)(9)(ii)(A) of this section) can be calculated. Any contingent payment features of the qualifying debt instrument must be fully offset by the hedge such that the synthetic debt instrument is not classified as a contingent payment debt instrument. See Examples 6 and 7 of paragraph (a)(9)(iv) of this section.

(ii) The hedge is identified in accordance with paragraph (a)(8) of this section on or before the date the acquisition of the financial instrument (or instruments) constituting the hedge is settled or closed.

(iii) None of the parties to the hedge are related. The term "related" means the relationships defined in section 267(b) or section 707(b).

(iv) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the qualifying debt instrument and the hedge are properly reflected on the books of such qualified business unit throughout the term of the qualified hedging transaction.

(v) Subject to the limitations of paragraph (a)(5) of this section, both the qualifying debt instrument and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the qualifying debt instrument and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(vi) With respect to a foreign person engaged in a U.S. trade or business that enters into a qualifying debt instrument or hedge through such trade or business, all items of income and expense associated with the qualifying debt instrument and the hedge (other than interest expense that is subject to § 1.882–5), would have been effectively connected with such U.S. trade or business throughout the term of the qualified hedging transaction had this paragraph (a) not applied.

(6) *Special rules for legging in and legging out of integrated treatment*—(i) *Legging in.* "Legging in" to integrated treatment under this paragraph (a) means that a hedge is entered into after the date the qualifying debt instrument is entered into or acquired, and the requirements of this paragraph (a) are satisfied on the date the hedge is entered into ("leg in date"). If a taxpayer legs into integrated treatment, the following rules shall apply—

(A) Exchange gain or loss shall be realized with respect to the qualifying debt instrument determined solely by reference to changes in exchange rates between—

(*1*) The date the instrument was acquired by the holder, or the date the obligor assumed the obligation to make payments under the instrument; and

(*2*) The leg in date.

(B) The recognition of such gain or loss will be deferred until the date the qualifying debt instrument matures or is otherwise disposed of.

(C) The source and character of such gain or loss shall be determined on the leg in date as if the qualifying debt instrument was actually sold or otherwise terminated by the taxpayer.

(ii) *Legging out.* With respect to a qualifying debt instrument and hedge that are properly identified as a qualified hedging transaction, "legging out" of integrated treatment under this paragraph (a) means that the taxpayer disposes of or otherwise terminates all or a part of the qualifying debt instrument or hedge prior to maturity of the qualified hedging transaction, or the taxpayer changes a material term of the qualifying debt instrument (*e.g.*, exercises an option to change the interest rate or index, or the maturity date) or hedge (*e.g.*, changes the interest or exchange rates underlying the hedge, or the expiration date) prior to maturity of the qualified hedging transaction. A taxpayer that disposes of or terminates a qualified hedging transaction (*i.e.*, disposes of or terminates both the qualifying transaction and the hedge on the same day) shall be considered to have disposed of or otherwise terminated the synthetic debt instrument rather than as legging out. If a taxpayer legs out of integrated treatment, the following rules shall apply—

(A) The transaction will be treated as a qualified hedging transaction during the time the requirements of this paragraph (a) were satisfied.

(B) If the hedge is disposed of or otherwise terminated, the qualifying debt instrument shall be treated as sold for its fair market value on the date the hedge is disposed of or otherwise terminated (the "leg-out date"), and any gain or loss (including gain or loss resulting from factors other than movements in exchange rates) from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date shall be used to determine exchange gain or loss on the debt instrument for the period beginning on the leg-out date and ending on the date such instrument matures or is disposed of or otherwise terminated. Proper adjustment to the principal amount of the debt instrument must be made to reflect any gain or loss taken into account. The netting rule of § 1.988–2(b)(8) shall apply.

(C) If the qualifying debt instrument is disposed of or otherwise terminated, the hedge shall be treated as sold for its fair market value on the date the qualifying debt instrument is disposed of or otherwise terminated (the "leg-out date"), and any gain or loss from the identification date to the leg-out date is realized and recognized on the leg-out date. The spot rate on the leg-out date shall be used to determine exchange gain or loss on the hedge for the period beginning on the leg-out date and ending on the date such hedge is disposed of or otherwise terminated.

(D) Except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), that part of the qualified hedging transaction that has not been terminated (*i.e.*, the remaining debt instrument in its entirety even if partially hedged, or hedge) cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

(E) If a taxpayer legs out of a qualified hedging transaction and realizes a gain with respect to the terminated instrument, then paragraph (a)(6)(ii) (B) or (C) of this section, as appropriate, shall not apply if during the period beginning 30 days before the leg-out date and ending 30 days after that date the taxpayer enters into another transaction that hedges at least 50% of the remaining currency flow with respect to the qualifying debt instrument which was part of the qualified hedging transaction (or, if appropriate, an equivalent amount under the § 1.988–5 hedge which was part of the qualified hedging transaction).

(7) *Transactions part of a straddle.* At the discretion of the Commissioner, a transaction shall not satisfy the requirements of paragraph (a)(5) of this section if the debt instrument making up the qualified hedging transaction is part of a straddle as defined in section 1092(c) prior to the time the qualified hedging transaction is identified.

(8) *Identification requirements*—(i) *Identification by the taxpayer.* A taxpayer must establish a record and before the close of the date the hedge is entered into, the taxpayer must enter into the record for each qualified hedging transaction the following information—

(A) The date the qualifying debt instrument and hedge were entered into;

(B) The date the qualifying debt instrument and the hedge are identified as constituting a qualified hedging transaction;

(C) The amount that must be deferred, if any, under paragraph (a)(6) of this section and the source and character of such deferred amount;

(D) A description of the qualifying debt instrument and the hedge; and

(E) A summary of the cash flow resulting from treating the qualifying debt instrument and the hedge as a qualified hedging transaction.

(ii) *Identification by trustee on behalf of beneficiary.* A trustee of a trust that enters into a qualified hedging transaction may satisfy the identification requirements described in paragraph (a)(8)(i) of this section on behalf of a beneficiary of such trust.

(iii) *Identification by the Commissioner.* If—

(A) A taxpayer enters into a qualifying debt instrument and a hedge but fails to comply with one or more of the requirements of this paragraph (a), and

(B) On the basis of all the facts and circumstances, the Commissioner concludes that the qualifying debt instrument and the hedge are, in substance, a qualified hedging transaction,

then the Commissioner may treat the qualifying debt instrument and the hedge as a qualified hedging transaction. The Commissioner may identify a qualifying debt instrument and a hedge as a qualified hedging transaction regardless of whether the qualifying debt instrument and the hedge are held by the same taxpayer.

(9) *Taxation of qualified hedging transactions*—(i) *In general*—(A) *General rule.* If a transaction constitutes a qualified hedging transaction, the qualifying debt instrument and the hedge are integrated and treated as a single transaction with respect to the taxpayer that has entered into the qualified hedging transaction during the period that the transaction qualifies as a qualified hedging transaction. Neither the qualifying debt instrument nor the hedge that makes up the qualified hedging transaction shall be subject to section 263(g), 1092 or 1256 for the period such transactions are integrated. However, the qualified hedging transaction may be subject to section 263(g) or 1092 if such transaction is part of a straddle.

(B) *Special rule for income or expense of foreign persons effectively connected with a U.S. trade or business.* Interest income of a foreign person resulting from a qualified hedging transaction entered into by such foreign person that satisfies the requirements of paragraph (a)(5)(vii) of this section shall be treated as effectively connected with a U.S. trade or business. Interest expense of a foreign person resulting from a qualified hedging transaction entered into by such foreign person that satisfies the requirements of paragraph (a)(5)(vii) of this section shall be allocated and apportioned under § 1.882–5 of the regulations.

(C) *Special rule for foreign persons that enter into qualified hedging transactions giving rise to U.S. source income not effectively connected with a U.S. trade or business.* If a foreign person enters into a qualified hedging transaction that gives rise to U.S. source interest income (determined under the source rules for synthetic asset transactions as provided in this section) not effectively connected with a U.S. trade or business of such foreign person, for purposes of sections 871(a), 881, 1441, 1442 and 6049, the provisions of this paragraph (a) shall not apply and such sections of the Internal Revenue Code shall be applied separately to the qualifying debt instrument and the hedge. To the extent relevant to any foreign person, if the requirements of this paragraph (a) are otherwise met, the provisions of this paragraph (a) shall apply for all other purposes of the Internal Revenue Code (*e.g.*, for purposes of calculating the earnings and profits of a controlled foreign corporation that enters into a qualified

hedging transaction through a qualified business unit resident outside the United States, income or expense with respect to such qualified hedging transaction shall be calculated under the provisions of this paragraph (a)).

(ii) *Income tax effects of integration.* The effect of integrating and treating a transaction as a single transaction is to create a synthetic debt instrument for income tax purposes, which is subject to the original issue discount provisions of sections 1272 through 1288 and 163(e), the terms of which are determined as follows:

(A) *Denomination of synthetic debt instrument.* In the case where the qualifying debt instrument is a borrowing, the denomination of the synthetic debt instrument is the same as the currency paid under the terms of the hedge to acquire the currency used to make payments under the qualifying debt instrument. In the case where the qualifying debt instrument is a lending, the denomination of the synthetic debt instrument is the same as the currency received under the terms of the hedge in exchange for amounts received under the qualifying debt instrument. For example, if the hedge is a forward contract to acquire British pounds for dollars, and the qualifying debt instrument is a borrowing denominated in British pounds, the synthetic debt instrument is considered a borrowing in dollars.

(B) *Term and accrual periods.* The term of the synthetic debt instrument shall be the period beginning on the identification date and ending on the date the qualifying debt instrument matures or such earlier date that the qualifying debt instrument or hedge is disposed of or otherwise terminated. Unless otherwise clearly indicated by the payment interval under the hedge, the accrual period shall be a six month period which ends on the dates determined under section 1272(a)(5).

(C) *Issue price.* The issue price of the synthetic debt instrument is the adjusted issue price of the qualifying debt instrument translated into the currency in which the synthetic debt instrument is denominated at the spot rate on the identification date.

(D) *Stated redemption price at maturity.* In the case where the qualifying debt instrument is a borrowing, the stated redemption price at maturity shall be determined under section 1273(a)(2) on the identification date by reference to the amounts to be paid under the hedge to acquire the currency necessary to make interest and principal payments on the qualifying debt instrument. In the case where the qualifying debt instrument is a lending, the stated redemption price at maturity shall be determined under section 1273(a)(2) on the identification date by reference to the amounts to be received under the hedge in exchange for the interest and principal payments received pursuant to the terms of the qualifying debt instrument.

(iii) *Source of interest income and allocation of expense.* Interest income from a synthetic debt instrument described in paragraph (a)(9)(ii) of this section shall be sourced by reference to the source of income under sections 861 (a)(1) and 862(a)(1) of the qualifying debt instrument. The character for purposes of section 904 of interest income from a synthetic debt instrument shall be determined by reference to the character of the interest income from qualifying debt instrument. Interest expense from a synthetic debt instrument described in paragraph (a)(9)(ii) of this section shall be allocated and apportioned under §§ 1.861–8T through 1.861–12T or the successor sections thereof or under § 1.882–5.

(iv) *Examples.* The following examples illustrate the application of this paragraph (a)(9).

Example 1. (i) K is a U.S. corporation with the U.S. dollar as its functional currency. On December 24, 1989, K agrees to close the following transaction on December 31, 1989. K will borrow from an unrelated party on December 31, 1989, 100 British pounds (£) for 3 years at a 10 percent rate of interest, payable annually, with no principal payment due until the final installment. K will also enter into a currency swap contract with an unrelated counterparty under the terms of which—

(a) K will swap, on December 31, 1989, the £100 obtained from the borrowing for $100; and

(b) K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make payments on the pound borrowing:

Date	U.S. dollars	Pounds
December 31, 1990	5	10
December 31, 1991	5	10
December 31, 1992	105	110

(ii) The interest rate on the borrowing is set and the exchange rates on the swap are fixed on December 24, 1989. On December 31, 1989, K borrows the £100 and swaps such pounds for $100. Assume x has satisfied the identification requirements of paragraph (a)(8) of this section.

(iii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $100 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., $8 in 1990, $8 in 1991, and $108 in 1992).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $100. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of $8 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $100 as a return of principal in 1992.

(E) K must allocate and apportion its interest expense with respect to the synthetic dollar borrowing under the rules of §§ 1.861–8T through 1.861–12T.

Example 2. (i) K, a U.S. corporation, has the U.S. dollar as its functional currency. On December 24, 1989, when the spot rate for Swiss francs (Sf) is Sf1=$1, K enters into a forward contract to purchase Sf100 in exchange for $100.04 for delivery on December 31, 1989. The Sf100 are to be used for the purchase of a franc denominated debt instrument on December 31, 1989. The instrument will have a term of 3 years, an issue price of Sf100, and will bear interest at 6 percent, payable annually, with no repayment of principal until the final installment. On December 24, 1989, K also enters into a series of forward contracts to sell the franc interest and principal payments that will be received under the terms of the franc denominated debt instrument for dollars according to the following schedule:

Date	U.S. dollars	Francs
December 31, 1990	5.12	6
December 31, 1991	5.23	6
December 31, 1992	112.16	106

(ii) On December 31, 1989, K takes delivery of the Sf100 and purchases the franc denominated debt instrument. Assume K satisfies the identification requirements of paragraph (a)(8) of this section. The purchase of the franc debt instrument (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the series of forward contracts (which constitute a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, the franc debt instrument and all the forward contracts are integrated and treated as one transaction with the following consequences:

(A) The integration of the franc debt instrument and the forward contracts results in a synthetic dollar debt instrument in an amount equal to the dollars exchanged under the forward contract to purchase the francs necessary to acquire the franc debt instrument. Accordingly, the issue price is $100.04 (section 1273(b)(2) of the Code).

(B) The total amount of interest and principal received by K with respect to the synthetic dollar debt instrument is equal to the dollars received under the forward sales contracts (i.e., $6.12 in 1990, $6.23 in 1991, and $112.16 in 1992).

(C) The synthetic dollar debt instrument is an installment obligation and its stated redemption price at maturity is $106.15 (i.e., $6.12 of the payments in 1990, 1991, and 1992 are treated as periodic interest payments under the principles of section 1273). Because the stated redemption price at maturity exceeds the issue price, under section 1273(a)(1) the synthetic dollar debt instrument has OID of $6.11.

(D) The yield to maturity of the synthetic dollar debt instrument is 6.00 percent, compounded annually. Assuming K is a calendar year taxpayer, it must include interest income of $6.00 in 1990 (of which $1.88 constitutes OID), $6.15 in 1991 (of which $2.03 constitutes OID), and $6.32 in 1992 (of which $2.20 constitutes OID). The amount of the final payment received by K in excess of the interest income includible is a return of principal and a payment of previously accrued OID.

(E) The source of the interest income shall be determined by applying sections 861(a)(1) and 862(a)(1) with reference to the franc interest income that would have been received had the transaction not been integrated.

Example 3. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1992, is £1=$1.50. On January 1, 1993, when the spot rate is £1=$1.60, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make the remaining payments on the pound borrowing:

Date	U.S. dollars	Pounds
December 31, 1993	12.80	10
December 31, 1994	12.80	10
December 31, 1994	160.00	100

(ii) Assume that British pound interest rates are still 10% and that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(8) of this section. Under paragraph (a)(6)(i) of this section, K must realize exchange gain or loss with respect to the pound borrowing determined solely by reference to changes in exchange rates between January 1, 1992 and January 1, 1993. (Thus, gain or loss from other factors such as movements in interest rates or changes in credit quality of K are not taken into account). Recognition of such gain or loss is deferred until K terminates its pound borrowing. Accordingly, K must defer exchange loss in the amount of $10 [(£100×1.50)−(£100×1.60)].

(iii) Additionally, the qualified hedging transaction is treated as a synthetic U.S. dollar debt instrument with an issue date of January 1, 1993, and a maturity date of December 31, 1994. The issue price of the synthetic debt instrument is $160 (£100×1.60, the spot rate on January 1, 1993) and the total amount of interest and principal is $185.60. The accrual period is the one year period beginning on January 1 and ending December 31 of each year. The stated redemption price at maturity is $160. Thus, K is treated as paying $12.80 of interest in 1993, $12.80 of interest in 1994, and $160 of principal in 1994. The interest expense from the synthetic instrument is allocated and apportioned in accordance with the rules of §§ 1.861–8T through 1.861–12T. Sections 263(g), 1092, and 1256 do not apply to the positions comprising the synthetic dollar borrowing.

Example 4. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1990, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1990, is £1=$1.50. Also on January 1, 1990, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange dollars for pounds pursuant to the following table in order to obtain the pounds necessary to make the remaining payments on the pound borrowing:

Date	U.S. dollars	Pounds
December 31, 1990	12.00	10
December 31, 1991	12.00	10
December 31, 1992	162.00	110

(ii) Assume that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(1) of this section.

(iii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., $12 in 1990, $12 in 1991, and $162 in 1992).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of $12 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $150 as a return of principal in 1992.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§ 1.861–8T through 1.861–12T.

(iv) Assume that on January 1, 1991, the spot exchange rate is £1=$1.60, interest rates have not changed since January 1, 1990, (accordingly, assume that the market value of K's bond in pounds has not changed) and that K transfers its rights and obligations under the currency swap contract in exchange for $10. Under § 1.988–2(e)(3)(iii), K will include in income as exchange gain $10 on January 1, 1991. Pursuant to paragraph (a)(6)(ii) of this section, the pound borrowing and the currency swap contract are treated as a qualified hedging transaction for 1990. The loss inherent in the pound borrowing from January 1, 1990, to January 1, 1991, is realized and recognized on January 1, 1991. Such loss is exchange loss in the amount of $10.00 [(£100×$1.50, the spot rate on January 1, 1990)—(£100×$1.60, the spot rate on January 1, 1991)]. For purposes of determining exchange gain or loss on the £100 principal amount of the debt instrument for the period January 1, 1991, to December 31, 1992, the spot rate on January 1, 1991 is used rather than the spot rate on the issue date. Thus, assuming that the spot rate on December 31, 1992, the maturity date, is £1=$1.80, K realizes exchange loss in the amount of $20 [(£100×$1.60)−(£100×$1.80)]. Except as provided in paragraph (a)(6)(iii) (regarding identification by the Commissioner), the pound borrowing cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

Example 5. (i) K, a U.S. corporation, has the U.S. dollar as its functional currency. On January 1, 1990, when the spot rate for Swiss francs (Sf) is Sf1=$.50, K converts $100 to Sf200 and purchases a franc denominated debt instrument. The instrument has a term of 3 years, an adjusted issue price of Sf200, and will bear interest at 5 percent, payable annually, with no repayment of principal until the final installment. The U.S. dollar interest rate on an equivalent instrument is 8% on January 1, 1990, compounded annually. On January 1, 1990, K also enters into a series of forward contracts to sell the franc interest and principal payments that will be received under the terms of the franc denominated debt instrument for dollars according to the following schedule:

Date	U.S. dollars	Francs
December 31, 1990	5.14	10
December 31, 1991	5.29	10
December 31, 1992	114.26	210

(ii) Assume K satisfies the identification requirements of paragraph (a)(8) of this section. Assume further that on January 1, 1991, the spot exchange rate is Sf1=U.S.$.5143, the U.S. dollar interest rate is 10%, compounded annually, and the Swiss franc interest rate is the same as on January

1, 1990 (5%, compounded annually). On January 1, 1991, K disposes of the forward contracts that were to mature on December 31, 1991, and December 31, 1992 and incurs a loss of $3.62 (the present value of $.10 with respect to the 1991 contract and $4.27 with respect to the 1992 contract).

(iii) The purchase of the franc debt instrument (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the series of forward contracts (which constitute a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, the franc debt instrument and all the forward contracts are integrated for the period beginning January 1, 1990, and ending January 1, 1991.

(A) The integration of the franc debt instrument and the forward contracts results in a synthetic dollar debt instrument with an issue price of $100.

(B) The total amount of interest and principal to be received by K with respect to the synthetic dollar debt instrument is equal to the dollars to be received under the forward sales contracts (i.e., $5.14 in 1990, $5.29 in 1991, and $114.26 in 1992).

(C) The synthetic dollar debt instrument is an installment obligation and its stated redemption price at maturity is $109.27 (i.e., $5.14 of the payments in 1990, 1991, and 1992 is treated as periodic interest payments under the principles of section 1273). Because the stated redemption price at maturity exceeds the issue price, under section 1273(a)(1) the synthetic dollar debt instrument has OID of $9.27.

(D) The yield to maturity of the synthetic dollar debt instrument is 8.00 percent, compounded annually. Assuming K is a calendar year taxpayer, it must include interest income of $8.00 in 1990 (of which $2.86 constitutes OID).

(E) The source of the interest income is determined by applying sections 861(a)(1) and 862(a)(1) with reference to the franc interest income that would have been received had the transaction not been integrated.

(iv) Because K disposed of the forward contracts on January 1, 1991, the rules of paragraph (a)(6)(ii) of this section shall apply. Accordingly, the $3.62 loss from the disposition of the forward contracts is realized and recognized on January 1, 1991. Additionally, K is deemed to have sold the franc debt instrument for $102.86, its fair market value in dollars on January 1, 1991. K will compute gain or loss with respect to the deemed sale of the franc debt instrument by subtracting its adjusted basis in the instrument ($102.86—the value of the Sf200 issue price at the spot rate on the identification date plus $2.86 of original issue discount accrued on the synthetic dollar debt instrument for 1990) from the amount realized on the deemed sale of $102.86. Thus K realizes and recognizes no gain or loss from the deemed sale of the debt instrument. The dollar amount used to determine exchange gain or loss with respect to the franc debt instrument is the Sf200 issue price on January 1, 1991, translated into dollars at the spot rate on January 1, 1991, of Sf1 = U.S.$.5143. Except as provided in paragraph (a)(8)(iii) of this section (regarding identification by the Commissioner), the franc borrowing cannot be part of a qualified hedging transaction for any period subsequent to the leg out date.

Example 6. (i) K is a U.S. corporation with the dollar as its functional currency. On January 1, 1992, K issues a debt instrument with the following terms: the issue price is $1,000, the instrument pays interest annually at a rate of 8% on the $1,000 principal amount, the instrument matures on December 31, 1996, and the amount paid at maturity is the greater of zero or $2,000 less the U.S. dollar value (determined on December 31, 1996) of 150,000 Japanese yen.

(ii) Also on January 1, 1992, K enters into the following hedges with respect to the instrument described in the preceding paragraph: a forward contract under which K will sell 150,000 yen for $1,000 on December 31, 1996 (note that this forward rate assumes that interest rates in yen and dollars are equal); and an option contract that expires on December 31, 1996, under which K has the right (but not the obligation) to acquire 150,000 yen for $2,000. K will pay for the option by making payments to the writer of the option equal to $5 each December 31 from 1992 through 1996.

(iii) The net economic effect of these transactions is that K has created a liability with a principal amount and amount paid at maturity of $1,000, with an interest cost of 8.5% (8% on debt instrument, 0.5% option price) compounded annually. For example, if on December 31, 1996, the spot exchange rate is $1=100 yen, K pays $500 on the bond [$2,000−(150,000 yen/$100)], and $500 in satisfaction of the forward contract [$1,000−(150,000 yen/$100)]. If instead the spot exchange rate on December 31, 1996 is $1=200 yen, K pays $1,250 on the bond [$2,000−(150,000 yen/$200)] and K receives $250 in satisfaction of the forward contract [$1,000−(150,000 yen/$200)]. Finally, if the spot exchange rate on December 31, 1996 is $1=50 yen, K pays $0 on the bond [$2,000−(150,000 yen/$50), but the bond holder is not required under the terms of the instrument to pay additional principal]; K exercises the option to buy 150,000 yen for $2,000; and K then delivers the 150,000 yen as required by the forward contract in exchange for $1,000.

(iv) Assume K satisfies the identification requirements of paragraph (a)(8) of this section. The debt instrument described in paragraph (i) of this *Example 6* (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the forward contract and option contract described in paragraph (ii) of this example (which constitute a hedge under paragraph (a)(4) of this section and are collectively referred to hereafter as "the contracts") together are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, with respect to K, the debt instrument and the contracts are integrated, resulting in a synthetic dollar debt instrument with an issue price of $1000, a stated redemption price at maturity of $1000 and a yield to maturity of 8.5% compounded annually (with no original issue discount). K must allocate and apportion its annual interest expense of $85 under the rules of §§ 1.861–8T through 1.861–12T.

Example 7. (i) R is a U.S. corporation with the dollar as its functional currency. On January 1, 1995, R issues a debt instrument with the following terms: the issue price is 504 British pounds (£), the instrument pays interest at a rate of 3.7% (compounded semi-annually) on the £504 principal amount, the instrument matures on December 31, 1999, with a repayment at maturity of the £504 principal plus the proportional gain, if any, in the "Financial Times" 100 Stock Exchange (FTSE) index (determined by the excess of the value of the FTSE index on the maturity date over the value of the FTSE on the issue date, divided by the value of the FTSE index on the issue date, multiplied by the number of FTSE index contracts that could be purchased on the issue date for £504).

(ii) Also on January 1, 1995, R enters into a contract with a bank under which on January 1, 1995, R will swap the £504 for $1,000 (at the current spot rate). R will make U.S. dollar payments to the bank equal to 8.15% on the notional principal amount of $1,000 (compounded semi-annually) for the period beginning January 1, 1995 and ending December 31, 1999. R will receive pound payments from the bank equal to 3.7% on the notional principal amount of £504 (compounded semi-annually) for the period beginning January 1, 1995 and ending December 31, 1999. On December 31, 1999, R will swap with the bank $1,000 for £504 plus the proportional gain, if any, in the FTSE index (computed as provided above).

(iii) Economically, both the indexed debt instrument and the hedging contract are hybrid instruments with the following components. The indexed debt instrument is composed of a par pound debt instrument that is assumed to have a 10.85% coupon (compounded semi-annually) plus an embedded FTSE equity index option for which the investor pays a premium of 7.15% (amortized semi-annually) on the pound principal amount. The combined effect is that the premium paid by the investor partially offsets the coupon payments resulting in a return of 3.7% (10.85%−7.15%). Similarly, the dollar payments under the hedging contract to be made by R are computed by multiplying the dollar notional principal amount by an 8.00% rate (compounded semi-annually) which the facts assume would be the rate paid on a conventional currency swap plus a premium of 0.15% (amortized semi-annually) on the dollar notional principal amount for an embedded FTSE equity index option.

(iv) Assume R satisfies the identification requirements of paragraph (a)(8) of this section. The indexed debt instrument described in paragraph (i) of this *Example 7* constitutes a qualifying debt instrument under paragraph (a)(3) of this section. The hedging contract described in paragraph (ii) of this *Example 7* constitutes a hedge under paragraph (a)(4) of this section. Since both the pound exposure of the indexed debt instrument and the exposure to movements of the FTSE embedded in the indexed debt instrument are hedged such that a yield to maturity can be determined in dollars, the transaction satisfies the requirement of paragraph (a)(5)(i) of this section. Assuming the transactions satisfy the other requirements of paragraph (a)(5) of this section, the indexed debt instrument and hedge are a qualified hedging transaction under paragraph (a)(1) of this section. Accordingly, with respect to R, the debt instrument and the contracts are integrated, resulting in a synthetic dollar debt instrument with an issue price of $1000, a stated redemption price at maturity of $1000 and a yield to maturity of 8.15% compounded semi-annually (with no original issue discount). K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§ 1.861–8T through 1.861–12T.

Example 8. (i) K is a U.S. corporation with the U.S. dollar as its functional currency. On December 24, 1992, K agrees to close the following transaction on December 31, 1992. K will borrow from an unrelated party on December 31, 1992, 200 British pounds (£) for 3 years at a 10 percent rate of interest, payable annually, with no principal payment due until the final installment. K will also enter into a currency swap contract with an unrelated counterparty under the terms of which—

(A) K will swap, on December 31, 1992, £100 obtained from the borrowing for $100; and

(B) K will exchange dollars for pounds pursuant to the following table:

Date	U.S. dollars	Pounds
December 31, 1993	8	10
December 31, 1994	8	10
December 31, 1995	108	110

(ii) The interest rate on the borrowing is set and the exchange rates on the swap are fixed on December 24, 1992. On December 31, 1992, K borrows the £200 and swaps £100 for $100. Assume K has satisfied the identification requirements of paragraph (a)(8) of this section.

(iii) The £200 debt instrument satisfies the requirements of paragraph (a)(3)(i) of this section. Because all principal and interest payments under the instrument are hedged in the same proportion (50% of all interest and principal payments are hedged), 50% of the payments under the £200 instrument (principal amount of £100 and annual interest of £10) are treated as a qualifying debt instrument for purposes of paragraph (a) of this section. Thus, the distinct £100 borrowing and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, £100 of the pound borrowing and the swap are integrated and treated as one synthetic dollar transaction with the following consequences:

(A) The integration of £100 of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $100 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract (i.e., $8 in 1993, $8 in 1994, and $108 in 1995).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $100. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the annual interest payments of $8 under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $100 as a return of principal in 1995.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§ 1.861–8T through 1.861–12T.

That portion of the £200 pound debt instrument that is not hedged (*i.e.*, £100) is treated as a separate debt instrument subject to the rules of § 1.988–2 (b) and §§ 1.861–8T through 1.861–12T.

Example 9. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K borrows 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. On the same day, K enters into a currency swap agreement with an unrelated bank under which K agrees to the following:

(A) On January 1, 1992, K will exchange the £100 borrowed for $150.

(B) For the period beginning January 1, 1992 and ending December 31, 1994, K will pay at the end of each month an amount determined by multiplying $150 by one month LIBOR less 65 basis points and receive from the bank on December 31st of 1992, 1993, and 1994, £10.

(C) On December 31, 1994, K will exchange $150 for £100.

Assume K satisfies the identification requirements of paragraph (a)(8) of this section.

(ii) The pound borrowing (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound borrowing and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound borrowing and the swap results in a synthetic dollar borrowing with an issue price of $150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar borrowing is equal to the dollar payments made by K under the currency swap contract.

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar borrowing.

(D) K may deduct the monthly variable interest payments under section 163(a) (subject to any limitations on deductibility imposed by other provisions of the Code) according to its regular method of accounting. K has also paid $150 as a return of principal in 1994.

(E) K must allocate and apportion its interest expense from the synthetic instrument under the rules of §§ 1.861–8T through 1.861–12T.

Example 10. (i) K is an accrual method U.S. corporation with the U.S. dollar as its functional currency. On January 1, 1992, K loans 100 British pounds (£) for 3 years at a 10% rate of interest payable on December 31 of each year with no principal payment due until the final installment. The spot rate on January 1, 1992, is £1=$1.50. Also on January 1, 1992, K enters into a currency swap contract with an unrelated counterparty under the terms of which K will exchange pounds for dollars pursuant to the following table:

Date	Pounds	Dollars
December 31, 1992	10	12
December 31, 1993	10	12
December 31, 1994	110	162

(ii) Assume that K properly identifies the pound borrowing and the currency swap contract as a qualified hedging transaction as provided in paragraph (a)(1) of this section.

(iii) The pound loan (which constitutes a qualifying debt instrument under paragraph (a)(3) of this section) and the currency swap contract (which constitutes a hedge under paragraph (a)(4) of this section) are a qualified hedging transaction as defined in paragraph (a)(1) of this section. Accordingly, the pound loan and the swap are integrated and treated as one transaction with the following consequences:

(A) The integration of the pound loan and the swap results in a synthetic dollar loan with an issue price of $150 under section 1273(b)(2).

(B) The total amount of interest and principal of the synthetic dollar loan is equal to the dollar payments received by K under the currency swap contract (i.e., $12 in 1992, $12 in 1993, and $162 in 1994).

(C) The stated redemption price at maturity (defined in section 1273(a)(2)) is $150. Because the stated redemption price equals the issue price, there is no OID on the synthetic dollar loan.

(D) K must include in income as interest $12 in 1992, 1993, and 1994.

(E) The source of the interest income shall be determined by applying sections 861(a)(1) and 862(a)(1) with reference to the pound interest income that would have been received had the transaction not been integrated.

(iv) On January 1, 1993, K transfers both the pound loan and the currency swap to B, its wholly owned U.S. subsidiary, in exchange for B stock in a transfer that satisfies the requirements of section 351. Under paragraph (a)(6) of this section, the transfer of both instruments is not "legging out." Rather, K is considered to have transferred the synthetic dollar loan to B in a transaction in which gain or loss is not recognized. B's basis in the loan under section 362 is $100.

(10) *Transition rules and effective dates for certain provisions—*(i) *Coordination with Notice 87–11.* Any transaction entered into prior to September 21, 1989 which satisfied the requirements of Notice 87–11, 1987–1

C.B 423, shall be deemed to satisfy the requirements of paragraph (a) of this section.

(ii) *Prospective application to contingent payment debt instruments.* In the case of a contingent payment debt instrument, the definition of qualifying debt instrument set forth in paragraph (a)(3)(i) of this section applies to transactions entered into after March 17, 1992.

(iii) *Prospective application of partial hedging rule.* Paragraph (a)(3)(ii) of this section is effective for transactions entered into after March 17, 1992.

(iv) *Effective date for paragraph (a)(6)(i) of this section.* The rules of paragraph (a)(6)(i) of this section are effective for qualified hedging transactions that are legged into after March 17, 1992.

(b) *Hedged executory contracts*—(1) *In general.* If the taxpayer enters into a hedged executory contract as defined in paragraph (b)(2) of this section, the executory contract and the hedge shall be integrated as provided in paragraph (b)(4) of this section.

(2) *Definitions*—(i) *Hedged executory contract.* A hedged executory contract is an executory contract as defined in paragraph (b)(2)(ii) of this section that is the subject of a hedge as defined in paragraph (b)(2)(iii) of this section, provided that the following requirements are satisfied—

(A) The executory contract and the hedge are identified as a hedged executory contract as provided in paragraph (b)(3) of this section.

(B) The hedge is entered into (*i.e.*, settled or closed, or in the case of nonfunctional currency deposited in an account with a bank or other financial institution, such currency is acquired and deposited) on or after the date the executory contract is entered into and before the accrual date as defined in paragraph (b)(2)(iv) of this section.

(C) The executory contract is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3) of this section and ending on or after the accrual date.

(D) None of the parties to the hedge are related. The term related means the relationships defined in section 267(b) and section 707(c)(1).

(E) In the case of a qualified business unit with a residence, as defined in section 988(a)(3)(B), outside of the United States, both the executory contract and the hedge are properly reflected on the books of the same qualified business unit.

(F) Subject to the limitations of paragraph (b)(2)(i)(E) of this section, both the executory contract and the hedge are entered into by the same individual, partnership, trust, estate, or corporation. With respect to a corporation, the same corporation must enter into both the executory contract and the hedge whether or not such corporation is a member of an affiliated group of corporations that files a consolidated return.

(G) With respect to a foreign person engaged in a U.S. trade or business that enters into an executory contract or hedge through such trade or business, all items of income and expense associated with the executory contract and the hedge would have been effectively connected with such U.S. trade or business throughout the term of the hedged executory contract had this paragraph (b) not applied.

(ii) *Executory contract*—(A) *In general.* Except as provided in paragraph (b)(2)(ii)(B) of this section, an executory contract is an agreement entered into before the accrual date to pay nonfunctional currency (or an amount determined with reference thereto) in the future with respect to the purchase of property used in the ordinary course of the taxpayer's business, or the acquisition of a service (or services), in the future, or to receive nonfunctional currency (or an amount determined with reference thereto) in the future with respect to the sale of property used or held for sale in the ordinary course of the taxpayer's business, or the performance of a service (or services), in the future. Notwithstanding the preceding sentence, a contract to buy or sell stock shall be considered an executory contract. (Thus, for example, a contract to sell stock of an affiliate is an executory contract for this purpose.) On the accrual date, such agreement ceases to be considered an executory contract and is treated as an account payable or receivable.

(B) *Exceptions.* An executory contract does not include a section 988 transaction. For example, a forward contract to purchase nonfunctional currency is not an executory contract. An executory contract also does not include a transaction described in paragraph (c) of this section.

(C) *Effective date for contracts to buy or sell stock.* That part of paragraph (b)(2)(ii)(A) of this section which provides that a contract to buy or sell stock shall be considered an executory contract applies to contracts to buy or sell stock entered into on or after March 17, 1992.

(iii) *Hedge*—(A) *In general.* For purposes of this paragraph (b), the term hedge means a deposit of nonfunctional currency in a hedging account (as defined paragraph (b)(3)(iii)(D) of this section), a forward or futures contract described in § 1.988-1(a) (1)(ii) and (2)(iii), or combination thereof, which reduces the risk of exchange rate fluctuations by reference to the taxpayer's functional currency with respect to nonfunctional currency payments made or received under an executory contract. The term hedge also includes an option contract described in § 1.988-1(a) (1)(ii) and (2)(iii), but only if the option's expiration date is on or before the accrual date. The premium paid for an option that lapses shall be integrated with the executory contract.

(B) *Special rule for series of hedges.* A series of hedges as defined in paragraph (b)(3)(iii)(A) of this section shall be considered a hedge if the executory contract is hedged in whole or in part throughout the period beginning with the date the hedge is identified in accordance with paragraph (b)(3)(i) of this section and ending on or after the accrual date. A taxpayer that enters into a series of hedges will be deemed to have satisfied the preceding sentence if the hedge that succeeds a hedge that has been terminated is entered into no later than the business day following such termination.

(C) *Special rules for historical rate rollovers*—(*1*) *Definition.* A historical rate rollover is an extension of the maturity date of a forward contract where the new forward rate is adjusted on the rollover date to reflect the taxpayer's gain or loss on the contract as of the rollover date plus the time value of such gain or loss through the new maturity date.

(*2*) *Certain historical rate rollovers considered a hedge.* A historical rate rollover is considered a hedge if the rollover date is before the accrual date.

(*3*) *Treatment of time value component of certain historical rate rollovers that are hedges.* Interest income or expense determined under § 1.988-2(d)(2)(v) with respect to a historical rate rollover shall be considered part of a hedge if the period beginning on the first date a hedging contract is rolled over and ending on the date payment is made or received under the executory contract does not exceed 183 days. Such interest income or expense shall not be recognized and shall be an adjustment to the income from, or expense of, the services performed or received under the executory contract, or to the amount realized or basis of the property sold or purchased under the executory contract. For the treatment of such interest income or expense that is not considered part of a hedge, see § 1.988-2(d)(2)(v).

(D) *Special rules regarding deposits of nonfunctional currency in a hedging account.* A hedging account is an account with a bank or other financial institution used exclusively for deposits of nonfunctional currency used to hedge executory contracts. For purposes of determining the basis of units in such account that comprise the hedge, only those units in the account as of the accrual date shall be taken into consideration. A taxpayer may adopt any reasonable convention (consistently applied to all hedging accounts) to determine which units comprise the hedge as of the accrual date and the basis of the units as of such date.
